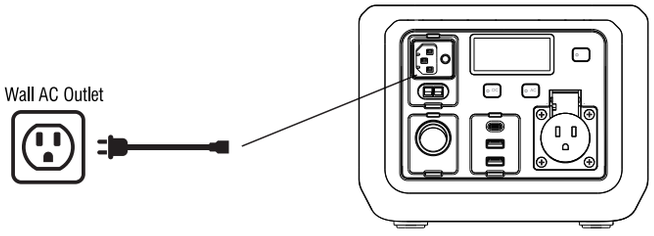
Charging the Power Station

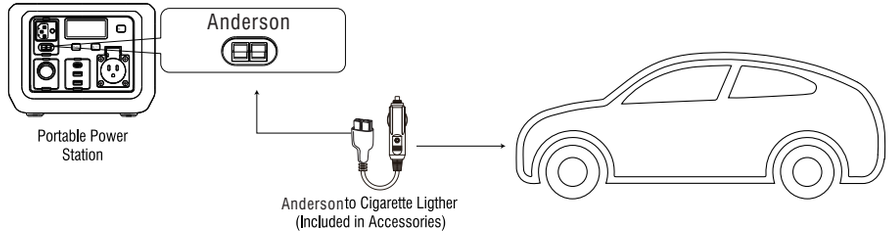
A



With an AC Power Source

Using the included AC wall charging cable, plug the unit into any wall outlet to charge the unit.

B



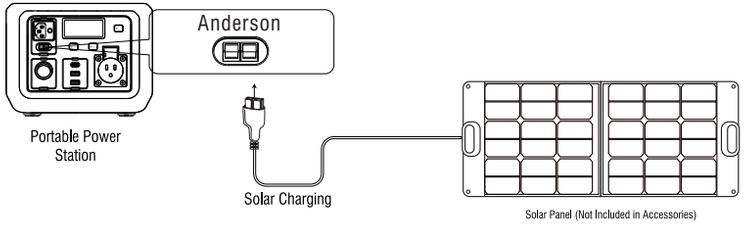
With Car Charging Cable

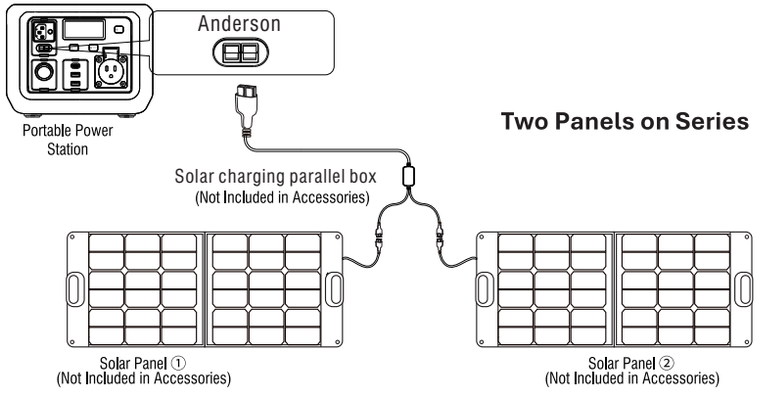
Connect the included car charging cable to the cigarette lighter in the car and the Anderson interface on the side of the unit. Start your car's engine to charge the unit.

C

With Solar Panel

Place the solar panels in a place that gets as much direct sunlight as possible. After connecting the solar panel interface to the product Anderson input port, start charging the solar panel.





⚠WARNING This Quick Reference Guide is not substitute for reading the operator's manual. To reduce the risk of injury or death, user must read and understand the operator's manual before using this product. All pages references to the operator's manual.

ATTENTION: Your power station comes partially charged. Before use, plug your power station into the wall until fully charged.
