Garage Door Opener

1 While the car is ON, hold the handheld garage door transmitter 1-3 inches from the HomeLink® button you want to program in the vehicle.

2 Push and hold both the HomeLink® button being programmed and the button on the garage door transmitter.

TO ERASE ALL SET CHANNELS:
Push and hold the two outside HomeLink® buttons for 20 seconds until the orange indicator flashes. An individual channel cannot be erased.

ROLLING OR NON-ROLLING?
Check your garage door opener motor in your garage for a "LEARN" or "TRAIN" button by the hanging antenna. If you have one of these, you have a Rolling Code garage door opener.

3 **For Non-Rolling Code** garage door openers, watch for the indicator light to go constant.

For Rolling Code garage door openers, watch for the indicator light to go from a slow blink to blinking rapidly.

4 **For Rolling Code** garage door openers only, firmly push and release the "LEARN" or "TRAIN" button on your garage door opener motor in your garage, then push the HomeLink® button in your vehicle three times (holding the button for two seconds each time).

5 If the programming was successful, your garage door should open and close with your chosen HomeLink® button.

LINK YOUR GARAGE DOOR

Pair a Phone

1. Make sure Bluetooth® is enabled on your mobile device
2. With the vehicle in the ON/RUN position, press the Phone button on the vehicle's touchscreen menu bar
3. Press "Device Manager"
4. Press "Add Device"
5. Follow the prompts on your phone and on the touchscreen

Troubleshooting

1. Perform a reset by holding the power button on the radio for 15 seconds
2. Reboot your phone
3. Remove the paired phone
4. Follow the Pair a Phone steps above to set up phone

CONNECT YOUR APPS

Connect your smartphone to the media USB port or pair your smartphone within Device Manager.

The Android Auto™ or Apple CarPlay® icon will replace the phone icon on the touchscreen.

KEEP IN MIND:

For Android™ Users, if the Android Auto™ app was not previously downloaded, it will download the first time you plug in your device.

For Apple® Users, Apple CarPlay® is only compatible with iPhone® 5 or later and requires Siri being enabled in Settings.

Ready to remove a phone or audio device?

1. Press "Device Manager" on the touchscreen.
2. Press the Settings gear icon next to the phone or device you would like to remove.
3. Press "Delete Device". The device should be removed.
4. On your phone's Bluetooth® or Setup menu, remove the saved Uconnect radio.

Connected Services

WITH CONNECTED SERVICES YOU CAN...

- **Lock Your Vehicle**
- **Unlock Your Vehicle**
- **Remote Start Your Vehicle**
- **Cancel Remote Start**
- **Activate Your Horn**

ACTIVATE YOUR REMOTE SERVICES

1. Press “Apps” on the touchscreen.
2. Press “Activate Services”.
3. Press “Activate Now”.
4. There are two ways to activate: via email or via an agent. On the next screen, you can either enter your name and email, or press “Call An Agent” to directly speak with a certified agent.
   If you previously registered for Connected Services at the dealer, you only need to enter your email and PIN to activate Connected Services on your vehicle.
5. Download the Dodge Mobile App from the Google Play Store or Apple® App Store® for access to remote commands. Log in with your account information.

Wireless Charging Pad

YOUR VEHICLE MAY BE EQUIPPED WITH A 15W 3A QI WIRELESS CHARGING PAD FOR YOUR SMARTPHONE!

KEEP IN MIND:

- The charging pad will not work if any door is open, regardless if the engine is running.
- Having multiple applications open on the phone will reduce charging efficiency.
- In the event the phone starts to overheat, the phone may shut down during the charging process.

For the wireless pad to work properly:

Remove the phones protective case and place within the outline shown on the pad.

Forward Collision Warning (FCW) With Mitigation & Electronic Stability Control (ESC)

FCW with Mitigation can provide both audible and visual warnings, and may also apply a brake jerk to warn you of a potential frontal collision. The warnings and limited braking are intended to provide you with enough time to react, and avoid or mitigate a potential collision.

You can also use your touchscreen to turn FCW on or off or to adjust the system's sensitivity and active braking status.

Select between the following **sensitivity** settings:

- Near
- Medium
- Far

Select between the following **brake** settings:

- Warning & Braking
- Warning Only
- Off

KEEP IN MIND:

The default settings are “Medium” and “Warning & Braking”.

Scan For FCW Video

ESC enhances directional control and stability of the vehicle under various driving conditions by correcting oversteering or understeering of the vehicle by applying the brake of the appropriate wheels as well as temporarily reducing engine power.

ESC has two operating modes:

ESC On

This is the normal operating mode. Whenever the vehicle is started, the ESC system will be on.

Full Off

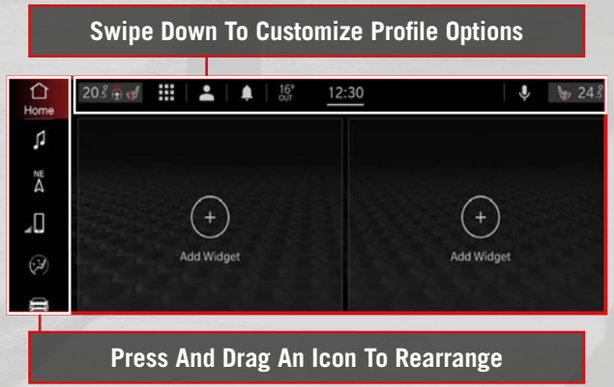
This mode may be useful if the vehicle becomes stuck and more wheel spin is needed. To turn off, put the vehicle in Sport Mode then push the ESC OFF button, located below the radio, for two seconds.

Scan For ESC Video

Uconnect 5/5 NAV

Available Modes

- Home: Customize the Home screen with widgets.
- Media: Listen to the radio and play media.
- Phone: Pair your smartphone and make hands-free calls.
- Comfort: Adjust the vehicle's multiple climate systems.
- Vehicle: Change vehicle settings.
- Navigation: Search for and navigate to any destination.



KEEP IN MIND:
Push and hold the Power button on the radio's faceplate for a minimum of 15 seconds to reset the radio.

Using Android Auto™ Or Apple CarPlay®?

You can use Voice Recognition with Android Auto™ and Apple CarPlay®!

1. Activate Android Auto™ or Apple CarPlay® from "Device Manager" in Phone Mode. The respective icon will replace the Phone icon in the menu bar.
2. Push and hold the Voice Recognition button to start a Voice session using Android Auto™ or Apple CarPlay®.

There may be an inconsistent volume between different audio sources.

Navigation

Accessing your Navigation unit is quick and simple. Press the Navigation icon on the Menu Bar of the radio screen. From here you can access certain icons and options for Navigation.

Navigation Options

- Planning A Route: You can search for a route using an address or a zip code.
- Changing Your Route: Selecting the Options button in "Map View" will give different ways to change a route.
- Points Of Interest: Using POI is as simple as selecting the POI category under the search bar. Some POI examples are Restaurants, Hotels, and Museums.
- Favorites: Some examples of Favorites are "Recent Destinations" and a "Home" location that can be set up from the Navigation Main Menu.

Keyless Enter 'n Go™ — Passive Entry & Hands-Free Liftgate

LOCK & UNLOCK YOUR VEHICLE WITH EASE

TO OPEN YOUR LIFTGATE:

Make sure your kicking motion is straight in-and-out, and within the activation zone.

Please note, this feature is available only on vehicles equipped with Passive Entry.

Activation Zone

Use a Straight In-and-Out Kicking Motion

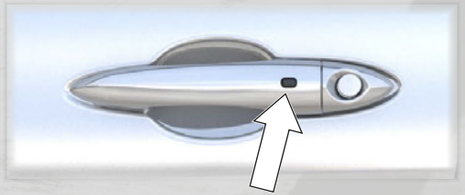
Scan For Passive Entry and Hands-Free Liftgate Video

X Do not move your foot sideways or in a sweeping motion; the sensors may not detect the motion.

WITH YOUR KEY FOB ON YOUR PERSON:

Press the **Passive Entry Button** on the door handle, making sure not to grab the door handle, to lock the vehicle.

Grab the door handle to unlock the vehicle.

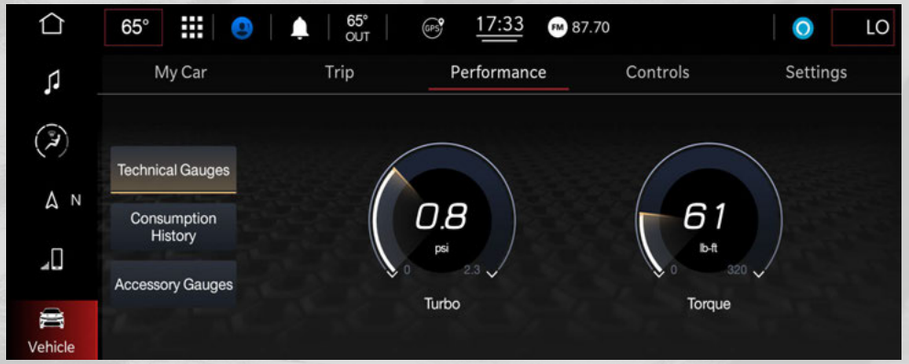


LIFTGATE BUTTONS

1. **Passive Entry Button**
   Press the Passive Entry button to the left of the liftgate release handle to lock all doors and the liftgate.
2. **Liftgate Release**
   Grab the liftgate release handle to open the liftgate.

Performance Pages

Performance Pages provide performance indicators that will help you gain familiarity with the capabilities of your vehicle in real time.



Performance Pages Access

Performance Pages are quick and easy to access. Select the Vehicle icon from the left side menu bar on the touchscreen. Then select “Performance” from the top menu bar.

Performance Pages Features

- Technical Gauges
- Consumption History
- Accessory Gauges

Active Driving Assist (ADA) System

COMBINES LANESENSE AND ADAPTIVE CRUISE CONTROL

INDICATOR LIGHT & INSTRUMENT CLUSTER DISPLAY GLOW:

OFF		System not turned on/enabled
WHITE	●	System is turned on/enabled, but is not actively steering the vehicle
GREEN	●	System detects driver attentiveness and is actively steering the vehicle
YELLOW	●	System detects driver inattentiveness and warns the driver to place hands on the steering wheel
RED	●	System still detects driver inattentiveness and still warns the driver to place hands on the steering wheel or the system will cancel

KEEP IN MIND:
The ADA system requires the driver keep both hands on the steering wheel at all times.

ACC Indicator Light

Active Speed Limiter Indicator Light

Mode Button
Choose between **Active Speed Limiter** to set the maximum speed of the vehicle or **Adaptive Cruise Control** to set your vehicle speed and following distance.

For PHEV Models: eDrive Mode
Battery Save: Maintains a high level of State of Charge (SOC) of the battery. **Battery Charge:** Uses additional power from the gas engine to increase the high voltage SOC up to 80% capacity.

ISA Indicator Light

Intelligent Speed Assist (ISA)
ISA combines **Active Speed Limiter** with the **Traffic Sign Recognition** system! When both are enabled, the ISA will automatically adjust the maximum speed of the vehicle based on detected speed limit signs.

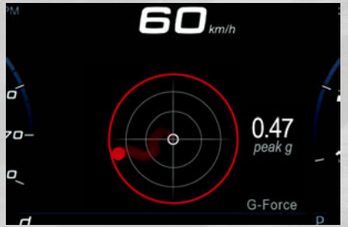
Digital Cluster

Use the Thumbwheel to scroll up and down through the Menu options. Press the Thumbwheel to enter/exit the highlighted menu.

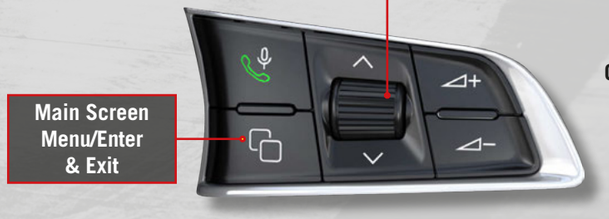
Main Menu Options

- Speedometer
- Navigation
- Phone
- Performance
- Driver Assist
- Stored Messages

G-METER



G-Meter displays parameters related to car stability and illustrates the trend of the longitudinal/lateral accelerations considering gravity acceleration.



Scan For Instrument Cluster Display Video

PowerShot (PHEV Models)

ADD HORSEPOWER AND INSTANT TORQUE!

PowerShot is a feature that allows max battery power for a short period of time, adding an additional 25 horsepower and instant torque.

The instrument cluster will display system status and availability of extra power when the feature is active.

To Activate PowerShot

Pull both paddle shifters simultaneously, the added power will be applied on the next throttle pedal application for a 10 - 15 second interval. The feature can be used multiple times after a 10- 15 second cool down period.
