

On the filler panel behind the rear seat

With filler panel trim—

- Using the illustration as a guide, run your fingers across trim of the filler panel itself to locate the position of the holes underneath.
- Make a hole in the covering directly above the hole in the filler panel.
- Insert a 10 mm (0.4 in.) spacer and tighten down the anchor bracket for your child restraint system with a bolt. Torque the bolt to 16.5–24.7 N·m (1.68–2.52 kgf·m, 12.2–18.2 ft·lf).

Without filler panel trim—

- Remove the cap on the filler panel you wish to use.
- Insert a 10 mm (0.4 in.) spacer and tighten down the anchor bracket for your child restraint system with a bolt. Torque the bolt to 16.5–24.7 N·m (1.68–2.52 kgf·m, 12.2–18.2 ft·lb).

To comply with Canada Motor Vehicle Safety Standards, vehicles sold in Canada are provided with a bracket set in the glovebox, designed for use with any of the 3 anchor locations shown in the illustration.

If your child restraint system does not provide any of the necessary parts, ask your Toyota dealer. (See “Child restraint system”).

Tilt steering wheel

To change the steering wheel angle, pull up the lock release lever, tilt the steering wheel to the desired angle and release the lever.

- Do not adjust the steering wheel while the vehicle is moving.**
- After adjusting the steering wheel, try moving it up and down to make sure it is locked in position.**

Outside rear view mirrors—

Adjust the mirror so you can just see the side of your vehicle in the mirror.

Be careful when judging the size or distance of any object seen in the outside rear view mirror on the passenger's side. It is a convex mirror with a curved surface. Any object seen in a convex mirror will look smaller and farther away than when seen in a flat mirror.

CAUTION

Do not adjust the mirror while the vehicle is moving. It may cause the driver to mishandle the vehicle and an accident may occur resulting in personal injuries.

—Rear view mirror remote control

To adjust the rear view mirror, simply operate the control lever.

NOTICE

If ice should jam the mirror, do not operate the control or scrape the mirror face. Use a spray de-icer to free the mirror.

—Power rear view mirror control

To adjust a power rear view mirror, first push the master switch in “L” (left) or “R” (right) depending on which mirror needs adjusting, then push the control switch in desired direction.

If the engine is not running, the key must be in the “ACC” position.

NOTICE

If ice should jam the mirror, do not operate the control or scrape the mirror face. Use a spray de-icer to free the mirror.

—Folding rear view mirrors

To fold the rear view mirror, push backward.

The rear view mirrors can be folded backward for parking in restricted areas.

Do not drive with the mirrors folded down, or it may cause an accident due to a poor or inaccurate view of objects to the rear.

Anti-glare inside rear view mirror

Pull the lever toward you to reduce glare from the headlights of the vehicle behind you during night driving.

Before adjusting the mirror to the position with most clarity, push the day-night change lever away from you (daylight driving position).

Remember that by reducing glare you also lose some rear view clarity.
