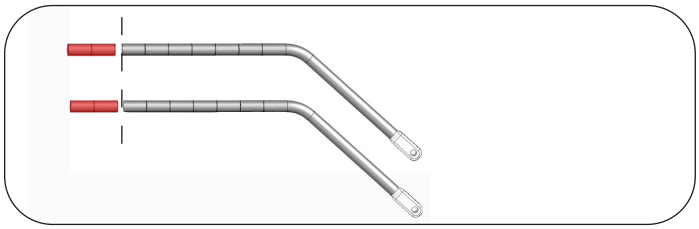
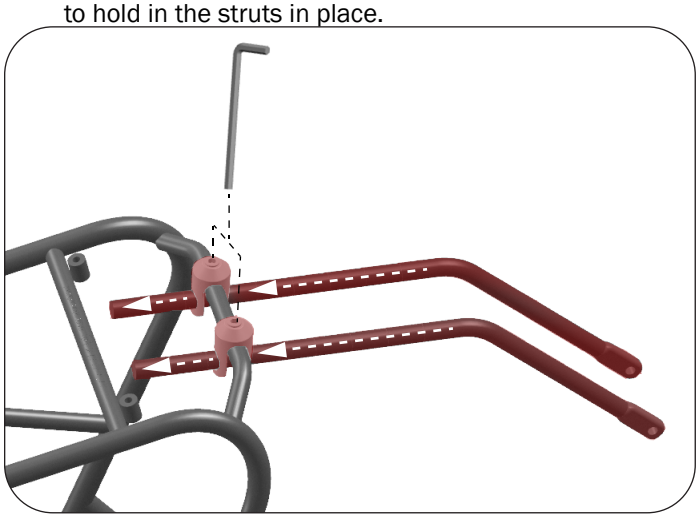
5. Socket head screws, steel, M5 x 25mm — W5252787
6. Bolts, stainless steel, M5 x 10mm — W5288087
7. Rear light bracket (black only) — 5314712

Rear rack — installation

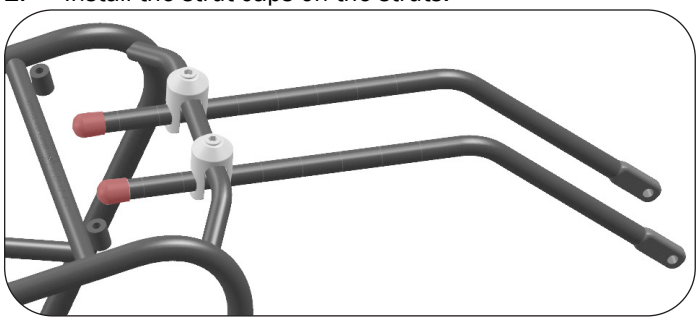
Large or extra-large frames only: If adding or replacing a rack, use a hacksaw to cut two lengths from each strut to create clearance for the tire.



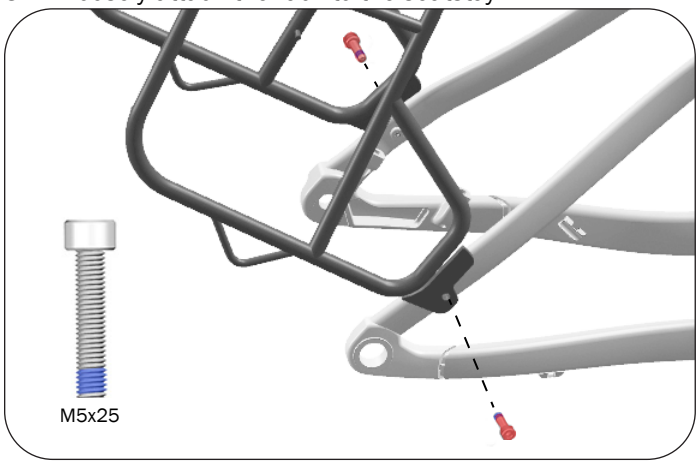
1. Place the strut mounts over the rack. Slide the struts thru the strut nuts. Then, slightly tighten the strut nuts to hold in the struts in place.



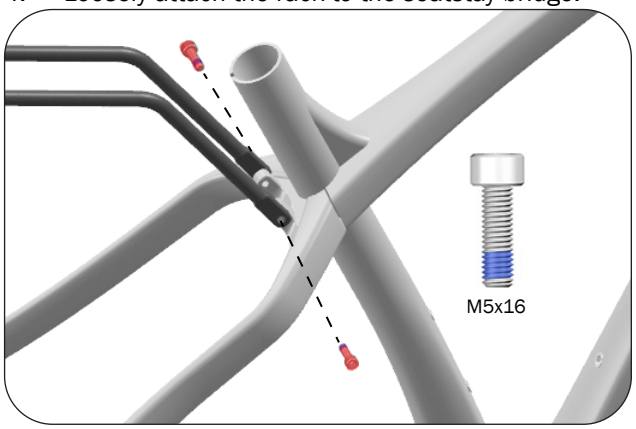
2. Install the strut caps on the struts.



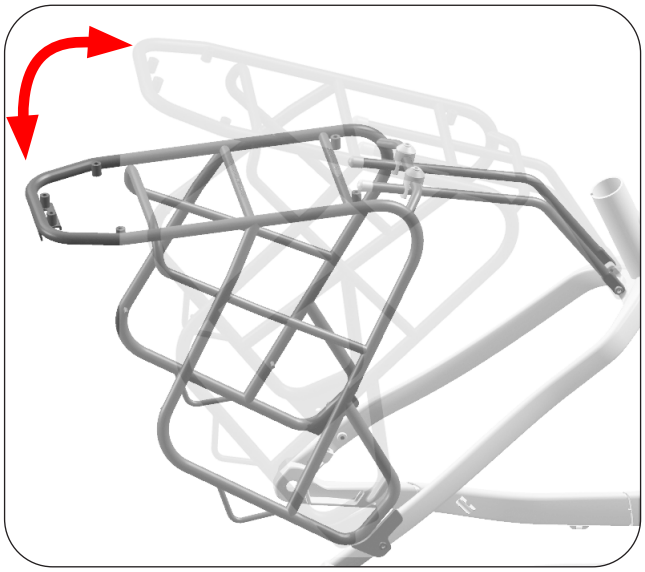
3. Loosely attach the rack to the seatstay.



4. Loosely attach the rack to the seatstay bridge.



5. Adjust the rack to the desired angle. You may need to further loosen the strut nuts.



6. Torque all bolts.
