

This SRS airbag system has a service reminder indicator to inform the driver of operating problems. If either of the following conditions occurs, this indicates a malfunction of the airbags. Contact your Toyota dealer as soon as possible to service the vehicle.

- The light does not come on when the ignition key is turned to the “ACC” or “ON” position, or remains on.
- The light comes on while driving.

In the following cases, contact your Toyota dealer as soon as possible:

- The SRS airbag has been inflated.
- The front part of the vehicle (shaded in the illustration) was involved in an accident not of the extent to cause the SRS airbags to inflate
- The pad section of the steering wheel (shaded in the illustration) is scratched, cracked, or otherwise damaged.

Child restraint—

—Child restraint precautions

Toyota strongly urges the use of child restraint systems for children small enough to use them.

The laws of all fifty states in the U.S.A. and Canada now require the use of a child restraint system.

Your vehicle conforms to SAEJ1819.

If a child is too large for a child restraint system, the child should sit in the rear seat and must be restrained using the vehicle's seat belt. See “Seat belts” for details.

- **For effective protection in automobile accidents and sudden stops, children must be properly restrained using a seat belt or child restraint system depending on the age and size of the child. Holding a child in your arms is not a substitute for a child restraint system. In an accident, the child can be crushed against the windshield, or between you and the vehicle's interior.**

- **NORMAL-CAB MODELS—**
Toyota strongly urges use of a proper child restraint system which conforms to the size of the child and is put on the seat.
- **XTRA-CAB MODELS—**
Toyota strongly urges use of a proper child restraint system which conforms to the size of the child and is put on the rear seat. According to accident statistics, the child is safer when properly restrained in the rear seat than in the front seat.
- **Make sure that you have complied with all installation instructions provided by the child restraint manufacturer and that the system is properly secured.**

—Child restraint system

A child restraint system for a small child or baby must itself be properly restrained on the seat with either the lap belt or the lap portion of the lap/shoulder belt. You must carefully consult the manufacturer's instructions which accompany your child restraint system.

To provide proper restraint, use a child restraint system following the manufacturer's instructions about the appropriate age and size of the child for the child restraint system.

Install the child restraint system correctly following the instructions provided by its manufacturer of the system. General directions are also provided under the following illustrations.

The child restraint system should be installed on the rear seat. According to accident statistics, the child is safer when properly restrained in the rear seat than in the front seat.

CAUTION

After installing the child restraint system, make sure it is secured in place following the manufacturer's instructions. If it is not restrained securely, it may cause injury to the child in the event of a sudden stop or accident.

When not using the child restraint system, keep it secured with the seat belt. This will prevent it from injuring passengers in the event of a sudden stop or accident.

—Types of child restraint system

Child restraint systems are classified into the following 3 types depending on the child's age and size.

(A) Infant seat

(B) Convertible seat

(C) Booster seat

Install the child restraint system following the instructions provided by its manufacturer.

—Installation with 2-point type seat belt

(A) INFANT SEAT INSTALLATION

An Infant seat is used in rear-facing only

With the child restraint system installed, check that your driving position is satisfactory and that the child restraint system does not interfere with your driving.

If your driving position is not satisfactory, or the child restraint system interferes with your driving, install it at another position.

Split bench seat—

Adjust the passenger seat forward and rearward travel as well as seatback position so that the child restraint system is securely restrained.

**Ignoring the above instructions
may result in a serious injury in case
of an accident.**

1. Run the center lap and shoulder belt through or around the infant seat following the instructions provided by its manufacturer and insert the tab into the buckle taking care not to twist the lap belt.

! CAUTION

- After inserting the tab, make sure the tab and buckle are locked and that the lap and belt is not twisted.
- Do not insert coins, clips, etc. in the buckle as this may prevent you from properly latching the tab and buckle.
- If the seat belt does not function normally, it cannot protect your child from injury. Contact your Toyota dealer immediately. Do not use the seat until the seat belt is fixed.

2. While pressing the infant seat firmly against the seat cushion and seat-back, let the shoulder belt retract as far as it will go to hold the infant seat securely.

! CAUTION

Push and pull the child restraint system in different directions to be sure it is secure. Follow all the installation instructions provided by its manufacturer.

3. To remove the infant seat, press the buckle-release button.

(B) CONVERTIBLE SEAT INSTALLATION

A convertible seat is used in forward-facing and rear-facing depending on the child's age and size. When installing, follow the manufacturer's instruction about the applicable child's age and size as well as direction for installing of a child restraint system.

With the child restraint system installed, check that your driving position is satisfactory and that the child restraint system does not interfere with your driving.

If your driving position is not satisfactory, or the child restraint system interferes with your driving, install it at another position.

Split bench seat—

Adjust the passenger seat forward and rearward travel as well as seatback position so that the child restraint system is securely restrained.

Ignoring the above instructions may result in a serious injury in case of an accident.

1. Run the center belt through or around the convertible seat following the instructions provided by its manufacturer and insert the tab into the buckle taking care not to twist the lap belt.

CAUTION

- After inserting the tab, make sure the tab and buckle are locked and that the lap belt is not twisted.
- Do not insert coins, clips, etc. in the buckle as this may prevent you from properly latching the tab and buckle.
- If the seat belt does not function normally, it cannot protect your child from injury. Contact your Toyota dealer immediately. Do not use the seat until the seat belt is fixed.

2. While pressing the convertible seat firmly against the seat cushion and seatback, tighten the lap belt by pulling its free end to hold the convertible seat securely.

Push and pull the child restraint system in different directions to be sure it is secure. Follow all the installation instructions provided by its manufacturer.

3. To remove the convertible seat, press the buckle-release button.

—Installation with 3-point type seat belt

WHEN INSTALLING ON THE REAR SEAT (Xtra-cab models):

Raise the bottom cushion before installing the child restraint system.

If your child restraint system is too large, you can use the folding table as an auxiliary support. For instructions about how to stand the table, see "Cup holder (Xtra-cab models)" in Chapter 1-8.

(A) INFANT SEAT INSTALLATION

An infant seat is used in rear-facing position only.

CAUTION

- Do not put a rear-facing child restraint system in the rear seat if the child restraint system interferes with the front seat lock mechanism or with your proper driving position. This can cause severe injury to the child and front passenger in case of sudden braking or a collision.
- If your driving position is not satisfactory, install the child restraint system at another position.

1. Run the lap and shoulder belt through or around the infant seat following the instructions provided by its manufacturer and insert the tab into the buckle taking care not to twist the belt. Keep the lap portion of the belt tight.

CAUTION

- After inserting the tab, make sure the tab and buckle are locked and that the lap belt is not twisted.
- Do not insert coins, clips, etc. in the buckle as this may prevent you from properly latching the tab and buckle.
- If the seat belt does not function normally, it cannot protect your child from injury. Contact your Toyota dealer immediately. Do not use the seat until the seat belt is fixed.

2. Fully extend the shoulder belt to put it in the lock mode. When the belt is then retracted even slightly, it cannot be extended.

To hold the infant seat securely, make sure the belt is in the lock mode before letting the belt to retract.

3. While pressing the infant seat firmly against the seat cushion and seatback, let the shoulder belt retract as far as it will go to hold the infant seat securely.

! CAUTION

Make sure the seat belt is securely locked. Also make sure the child restraint system is secure by pushing and pulling it in different directions. Follow all the installation instructions provided by its manufacturer.

4. To remove the infant seat, press the buckle-release button and allow the belt to retract completely. The belt will move freely again and be ready to work for an adult or older child passenger.

(B) CONVERTIBLE SEAT INSTALLATION

A convertible seat is used in forward-facing and rear-facing position depending on the child's age and size. When installing, follow the manufacturer's instructions about the applicable child's age and size as well as direction for installing of a child restraint system.

CAUTION

- Do not put a rear-facing child restraint system in the rear seat if the child restraint system interferes with the front seat lock mechanism or with your proper driving position. This can cause severe injury to the child and front passenger in case of sudden braking or a collision.
- If your driving position is not satisfactory, install the child restraint system at another position.

1. Run the lap and shoulder belt through or around the convertible seat following the instructions provided by its manufacturer and insert the tab into the buckle taking care not to twist the belt. Keep the lap portion of the belt tight.

CAUTION

- After inserting the tab, make sure the tab and buckle are locked and that the lap and shoulder portions of the belt are not twisted.
- Do not insert coins, clips, etc. in the buckle as this may prevent you from properly latching the tab and buckle.
- If the seat belt does not function normally, it cannot protect your child from injury. Contact your Toyota dealer immediately. Do not use the seat until the seat belt is fixed.

2. Fully extend the shoulder belt to put it in the lock mode. When the belt is then retracted slightly, it cannot be extended.

To hold the convertible seat securely, make sure the belt is in the lock mode before letting the belt to retract.

3. While pressing the convertible seat firmly against the seat cushion and seatback, let the shoulder belt retract as far as it will go to hold the convertible seat securely.

Push and pull the child restraint system in different directions to be sure it is secure. Follow all the installation instructions provided by its manufacturer.

4. To remove the convertible seat, press the buckle-release button and allow the belt to retract completely. The belt will move freely again and be ready to work for an adult or older child passenger.

(C) BOOSTER SEAT INSTALLATION

A booster seat is used in forward-facing position only.

1. Sit the child on a booster seat. Run the lap and shoulder belt through or around the booster seat and child following the instructions provided by its manufacturer and insert the tab into the buckle taking care not to twist the belt.

Make sure the shoulder belt is correctly across the child's shoulder and that the lap belt is positioned as low as possible on child's hips. See "Seat belts" for details.

CAUTION

- Always make sure the shoulder belt is positioned across the center of the child's shoulder. The belt should be kept away from child's neck, but not falling off child's shoulder. Failure to do so could reduce the amount of protection in an accident and cause serious injuries in a collision.
- High-positioned lap belts and loose-fitting belts both could cause serious injuries due to sliding under the lap belt during a collision. Keep the lap belt positioned as low on hips as possible.
- For child's safety, do not place the shoulder belt under child's arm.
- After inserting the tab, make sure the tab and buckle are locked and that the lap and shoulder portions of the belt are not twisted.
- Do not insert coins, clips, etc. in the buckle as this may prevent you from properly latching the tab and buckle.

- If the seat belt does not function normally, it cannot protect your child from injury. Contact your Toyota dealer immediately. Do not use the seat until the seat belt is fixed.

2. To remove the child restraint system, press the buckle-release button and allow the belt to retract.
