

This Supplement is not intended to replace your vehicle Owner's Manual which contains more detailed information concerning the features of your vehicle, as well as important safety warnings designed to help reduce the risk of injury to you and your passengers. Please read your entire Owner's Manual carefully as you begin learning about your new vehicle and refer to the appropriate chapters when questions arise.

All information contained in this supplement was accurate at the time of publication. We reserve the right to change features, operation and/or functionality of any vehicle specification at any time. Your Ford dealer is the best source for the most current information. For detailed operating and safety information, please consult your Owner's Manual.

OFF-ROAD OVERVIEW

2017 F-150 RAPTOR OFF-ROAD FEATURES OVERVIEW

Hill Descent – Overlay Mode Selection

Available In All Modes

Note: The Hill Descent Control function is not affected by the Terrain Management System, AdvanceTrac® or electronic locking differential settings:

- 1. The button illuminates.
- 2. “Hill Descent Control Ready” illuminates in the information display.
- 3. An audible tone sounds.
- 4. The HDC light in the LCD display illuminates and the HDC icon on the Off Road screen shows ‘Active’ when the system is controlling the vehicle:
 - HDC controls descent speed between 2 and 20 mph (3 and 32 km/h).
 - The System remains ‘armed’ between 20 and 40 mph (32 and 65 km/h) but will not control hill descent speed.
 - The system disengages above 40 mph (65 km/h), you must press the button again to re-engage.

Use extreme caution when using any device or feature that may take your attention off the road. Your primary responsibility is the safe operation of the vehicle. Only use non-essential features and devices when it is safe to do so. Please refer to your Owner’s Manual and Raptor Supplement for further information, including important safety information.

† Never go through water of any depth faster than 40 mph (65 km/h). You must reduce your speed significantly when driving through water over 6 in (150 mm) in depth. Do not exceed a maximum depth of 32 in. (810 mm) and no greater than 4 mph (7km/h) to avoid potential vehicle damage.
