PRIUS

2018

QUICK REFERENCE GUIDE

TOYOTA

2018

PRIUS

This Quick Reference Guide is a summary of basic vehicle operations. It contains brief descriptions of fundamental operations so you can locate and use the vehicle's main equipment quickly and easily.

The Quick Reference Guide is not intended as a substitute for the Owner's Manual located in your vehicle's glove box. We strongly encourage you to review the Owner's Manual and supplementary manuals so you will have a better understanding of your vehicle's capabilities and limitations.

Your dealership and the entire staff of Toyota Motor North America, Inc. wish you many years of satisfied driving in your new Prius.

A word about safe vehicle operations

This Quick Reference Guide is not a full description of Prius operations. Every Prius owner should review the Owner's Manual that accompanies this vehicle.

Pay special attention to the boxed information highlighted in color throughout the Owner's Manual. Each box contains safe operating instructions to help you avoid injury or equipment malfunction.

All information in this Quick Reference Guide is current at the time of printing. Toyota reserves the right to make changes at any time without notice.

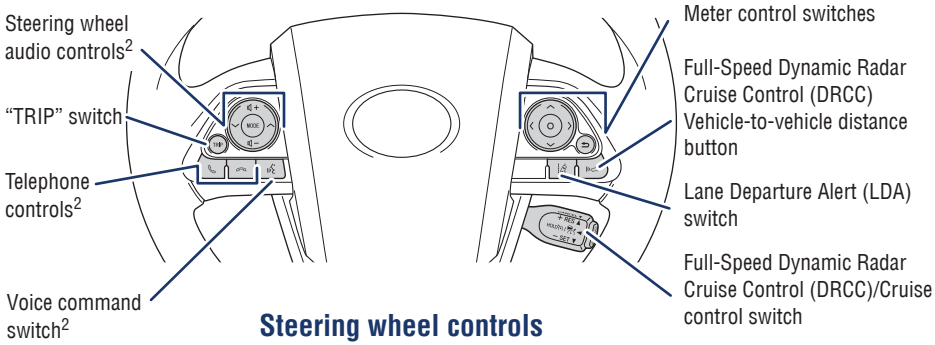
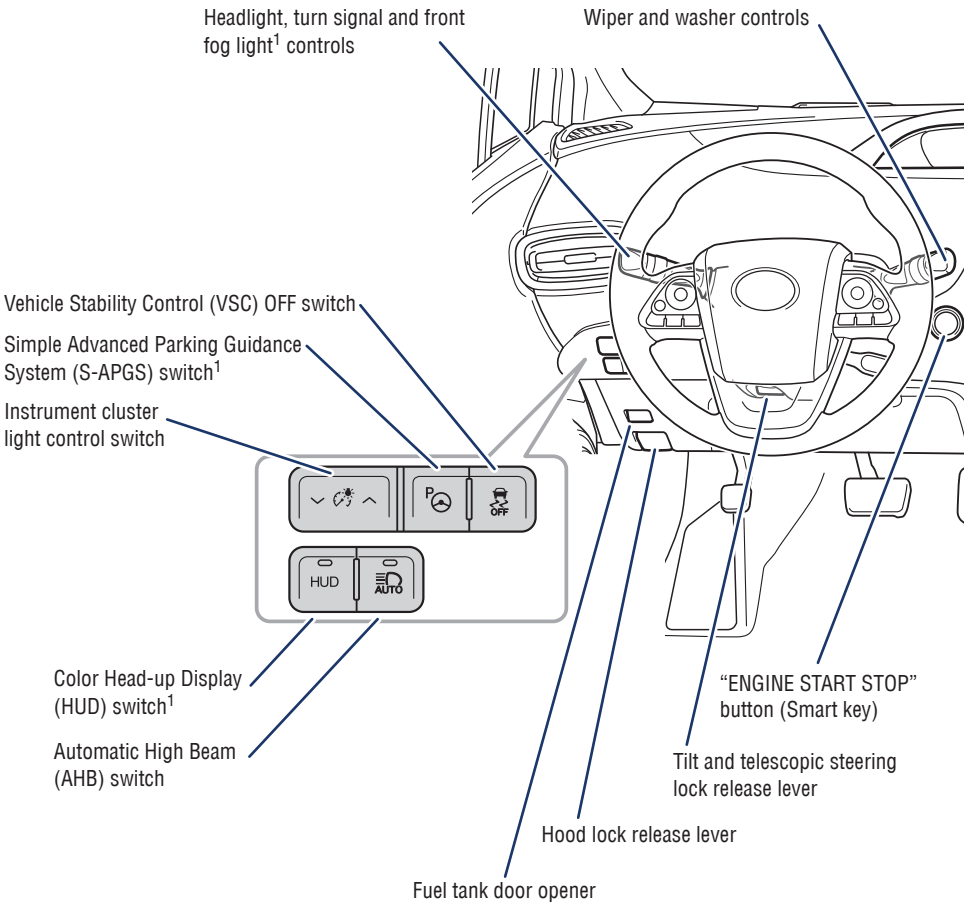
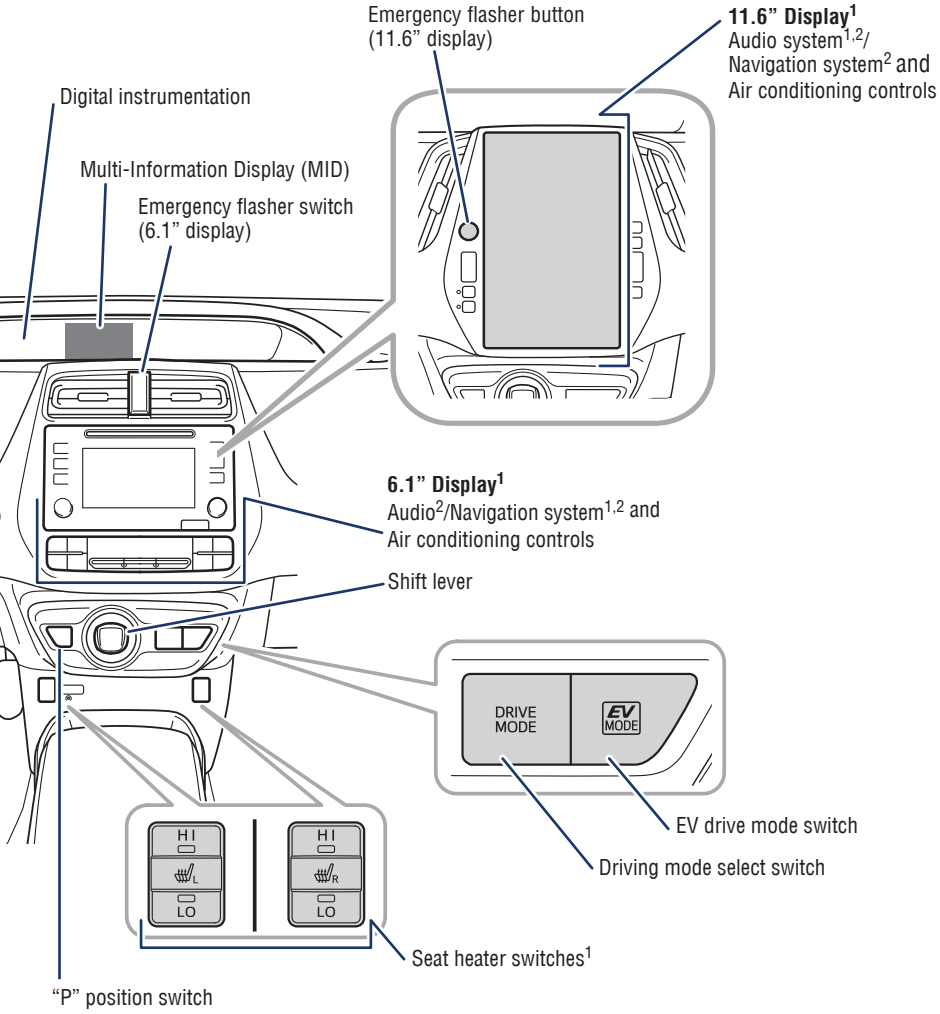
Instrument panel



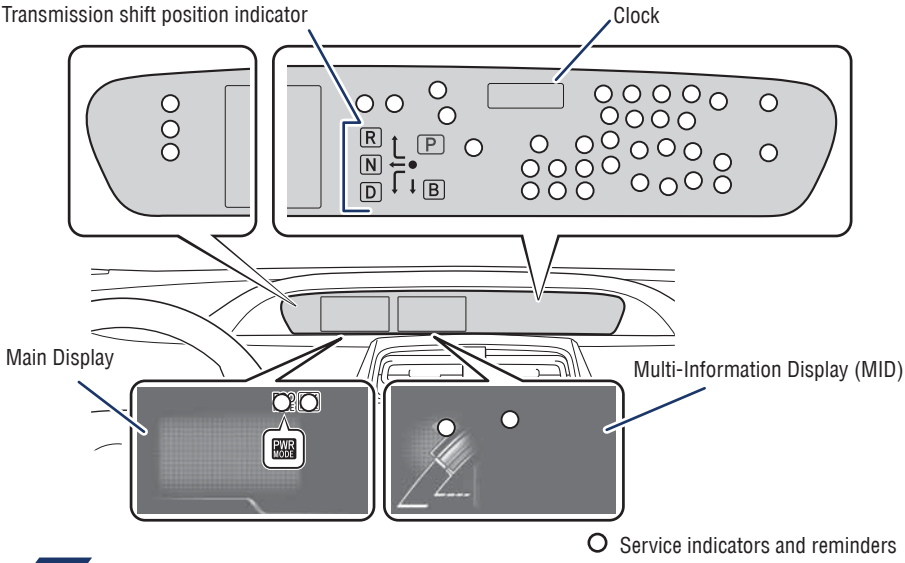
Steering wheel controls



[1] If equipped
[2] For details, refer to the Navigation System Owner's Manual.



Instrument cluster



Indicator symbols

For details, refer to "Indicators and warning lights," Section 2, 2018 Owner's Manual.

PASSENGER AIRBAG OFF AIRBAG ON — Air bag ON/OFF indicator

Airbag SRS warning[1]

ABS — Anti-lock Brake System (ABS) warning[1]

Arrow direction indicates fuel tank door position

AUTO — Automatic High Beams (AHB) indicator[1]

BSM — Blind Spot Monitor (BSM) indicator[3]

Brake Overrride System/Drive-Start control/Intelligent Clearance Sonar[3]

BRAKE — Brake system warning[1]

Brake system warning (yellow indicator)[1]

Charging system warning[1]

SET — Constant speed cruise control indicator[2]/Constant speed cruise control SET indicator[2]

Driver seat belt reminder and/or front passenger seat belt reminder (alarm will sound if speed is over 12 mph)

SET — Full-Speed Dynamic Radar Cruise Control (DRCC) indicator[2]/DRCC SET indicator[2]

ECO MODE — ECO MODE indicator

EV indicator

EV MODE — EV drive mode indicator

Electric power steering system warning[1]

Fog light indicator[3]

Headlight low/high beam indicators

High coolant temperature warning[1]

Immobilizer system indicator

Intelligent Clearance Sonar (ICS) OFF indicator[3]

Intelligent Parking Assist indicator[3]

Lane Departure Alert (LDA) indicator

Lane Departure Alert (LDA) with Steering Assist

Lane Departure Alert (LDA) Sway Control

Low engine oil pressure warning[1]

Low fuel level warning

Low Tire Pressure Warning[1]

Malfunction/ Check Engine indicator[1]

Master warning[1]

Open door warning

Parking brake indicator

Power Mode indicator

Pre-Collision System (PCS) warning light[1]

READY indicator

Rear passengers' seat belt reminder indicator

S-APGS indicator[3]

Shift position indicators

Smart Key system warning

Slip indicator/Hill-start Assist Control indicator[1]

Steering Assist indicator[3]

Turn signal indicator

VSC OFF indicator[1]

[1] *If indicator does not come on or turn off within a few seconds of starting engine, there may be a malfunction. Have vehicle inspected by your Toyota dealer.*

[2] *If this light flashes, refer to "Cruise control," or "Dynamic Radar Cruise Control," Section 4-5, 2018 Owner's Manual.*

[3] *If equipped.*

Keyless entry

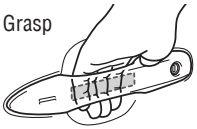
UNLOCKING OPERATION

Push
ONCE: Driver door
TWICE: All doors

Carry remote
Smart key feature

Driver door unlock*

Grasp



NOTE: If a door is not opened within 60 seconds of unlocking, all doors will relock for safety.

LOCKING OPERATION

Push

Carry remote
Smart key feature

All-door lock

Touch

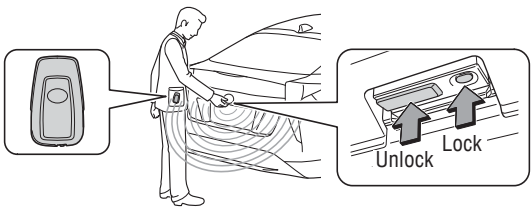
PANIC BUTTON

HOLD

Push and hold

BACK DOOR LOCKING/UNLOCKING

Carry remote to lock/unlock

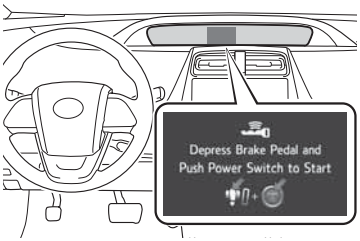


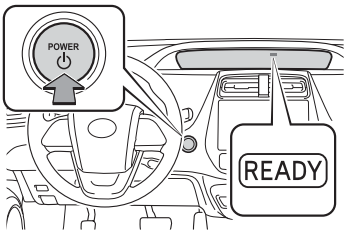
* Driver door unlocking function can be programmed to unlock driver door only, or all doors. Grasping passenger door handle or pushing unlock button on rear hatch will unlock all doors.

NOTE: Fuel consumption and energy information of the hybrid system are shown on the Dual Multi-Information Displays.

Smart Key system (and remote entry)

START FUNCTION

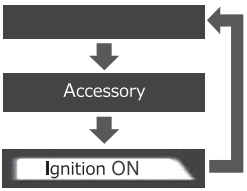




When starting the hybrid system, make sure you are carrying the Smart key, the parking brake is set and shift position is in P.

POWER (WITHOUT STARTING HYBRID SYSTEM)

Without depressing the brake pedal, pressing the “POWER” switch will change the operation mode in succession from:

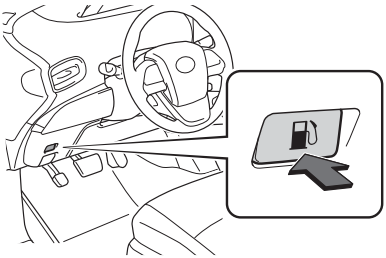


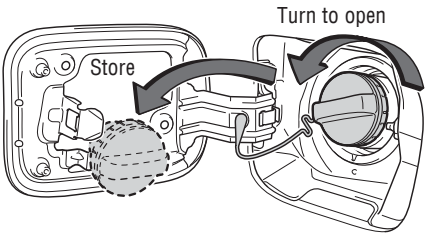
Off - All systems OFF. Emergency flashers can be used.

Accessory – Some electrical components can be used.

On - All electrical components can be used.

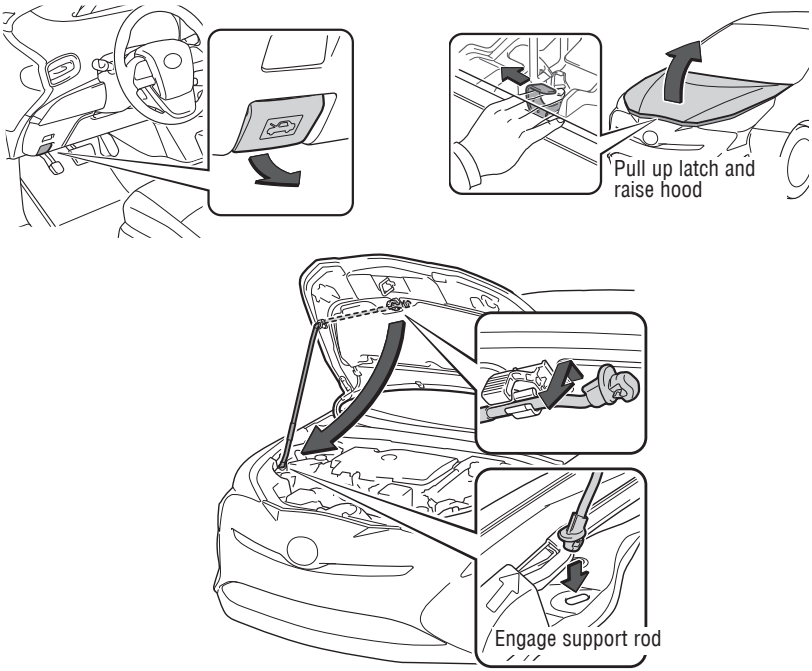
Fuel tank door release & cap



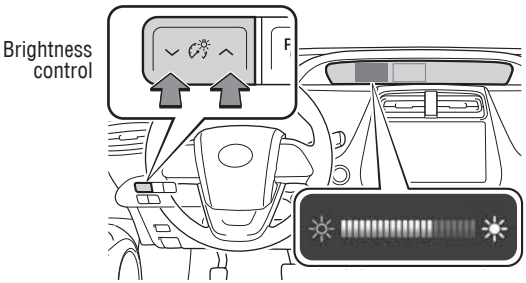


NOTE: Tighten until one click is heard. If the cap is not locked or tightened, Check Engine “ CHECK ” indicator may illuminate.

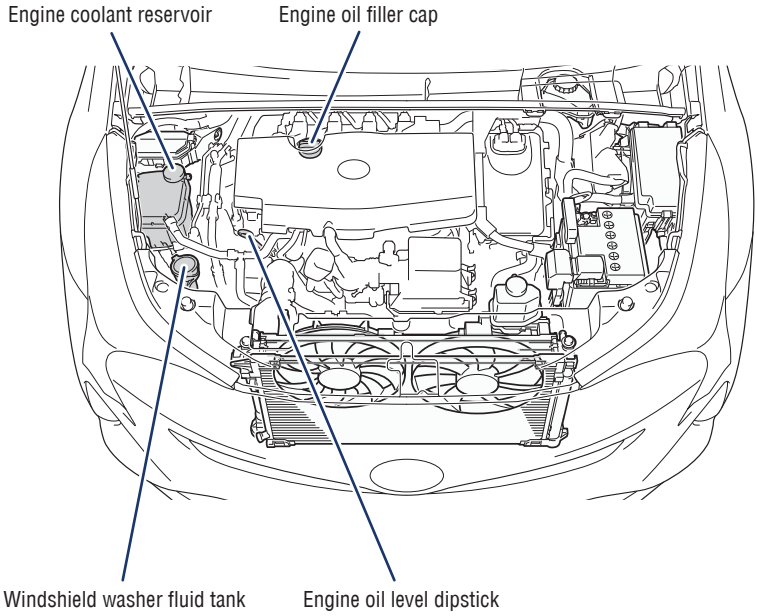
Hood release



Instrument panel light control



Engine maintenance



NOTE: Regularly scheduled maintenance, including oil changes, will help extend the life of your vehicle and maintain performance. Please refer to the "Warranty & Maintenance Guide." Maintenance reset light instructions can be found in "Maintenance Requirements Chapter" in Owner's Manual.

Auto lock/unlock

Automatic door locks can be programmed to operate in different modes, or turned OFF.

Shift position linked door locking/unlocking function
-Doors lock when shifting from Park.
-Doors unlock when shifting into Park.

Speed linked door locking function
-Doors lock when the vehicle speed goes above approximately 12 mph.

Driver's door linked door unlocking function
-Doors unlock when the driver's door is opened within 45 seconds after turning "ENGINE START STOP" switch to OFF.

Refer to the *Owner's Manual* for more details.

Hybrid Synergy Drive System

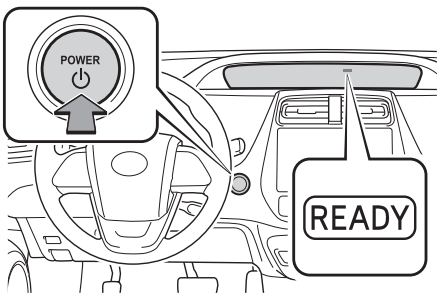
The Hybrid Synergy Drive System utilizes a computer-controlled gasoline engine and electric motor to provide the most efficient combination of power for the vehicle. To conserve energy, when the brakes are applied the braking force generates electricity which is then sent to the traction battery. In addition, the engine shuts off when the vehicle is stopped. The benefits are better fuel economy, reduced vehicle emissions and improved performance.

NOTE: Fuel consumption and energy information of the Hybrid System are shown on the Entune™ Audio system screen or the navigation system.

TIPS FOR IMPROVED FUEL ECONOMY

1. Ensure tire pressures are maintained at levels specified in the Owner's Manual.
2. When possible, link trips to reduce engine cold starts.
3. Avoid driving at speeds that are higher than necessary, especially on the highway.
4. When possible, avoid sudden stops to maximize regenerative braking energy.
5. Minimize use of the air conditioning.

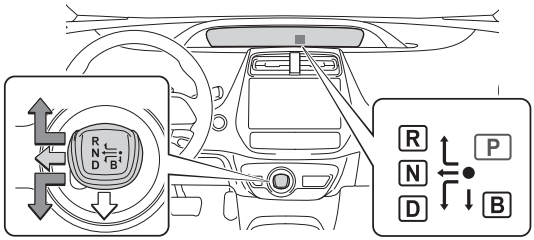
STARTING YOUR VEHICLE



(1) Depress the brake pedal and press the "POWER" switch briefly and firmly.

(2) The "READY" light will blink. After a few seconds, when the light remains steady and a beep sounds, you may begin driving.

Hybrid transmission



P	Park button
R	Reverse
N	Neutral
D	Drive
B	Engine brake*

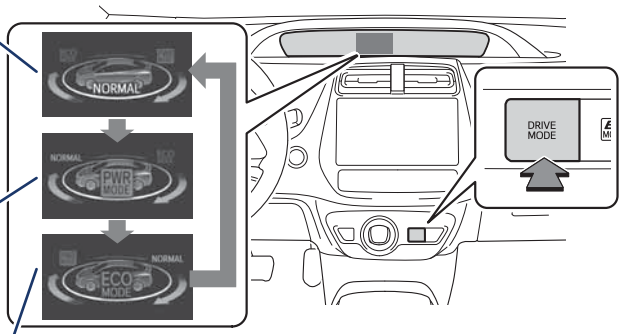
* The engine brake is the equivalent of downshifting. Shift to “B” when engine braking is desired (i.e. downhill driving, coasting to a stop, etc.). While vehicle is stopped, push “P” button to park.

Driving mode select switch

Normal - Suitable for normal driving.

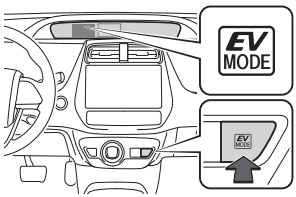
Power mode - Use when a higher level of response is desired, such as when driving in mountainous regions.

ECO drive mode - Helps achieve lower fuel consumption during trips that involve frequent accelerating and braking.



Refer to the Owner’s Manual for more details.

EV drive mode switch

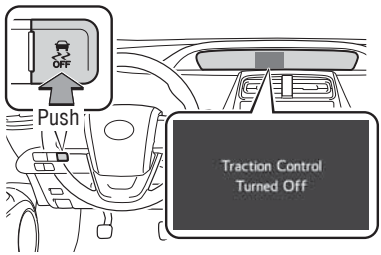


EV MODE

EV Drive Mode ON/OFF switch EV-Drive Mode allows the electric motor (traction motor), powered by the hybrid battery (traction battery), to be used to drive the vehicle under certain driving conditions.

Refer to the Owner’s Manual for more details.

Vehicle Stability Control (VSC)/TRAC OFF Switch

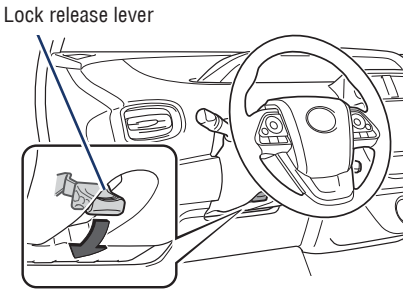


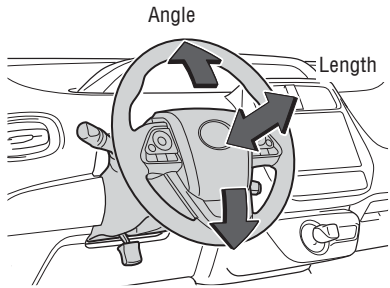
The VSC OFF switch can be used to help free a stuck vehicle in surroundings like mud, dirt or snow. While car is stopped, press switch to disable the TRAC system.

To disable both VSC and TRAC systems, press the switch for at least 3 seconds.

Refer to the Owner's Manual for more details.

Tilt & telescopic steering wheel



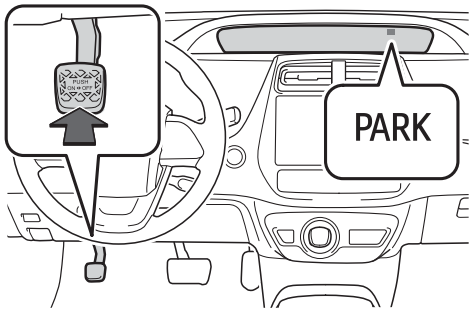


Hold wheel, push lever down, set angle and length, and return lever.

NOTE: Do not attempt to adjust while the vehicle is in motion.

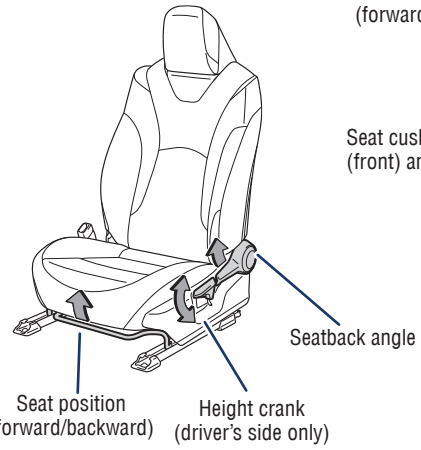
Parking brake

Set: Depress
Release: Depress again

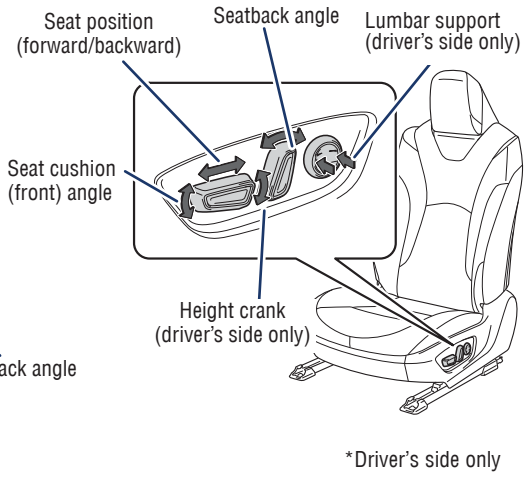


Seat adjustments - Front

MANUAL SEAT



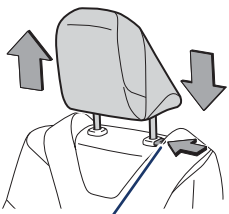
POWER SEAT (IF EQUIPPED)*



*Driver's side only

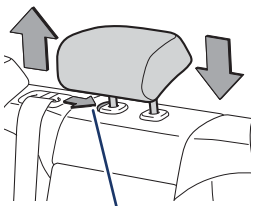
Seats - Head restraints

Front



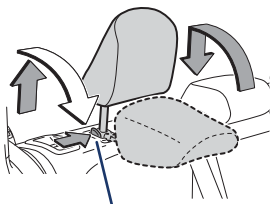
Lock release button

Rear center



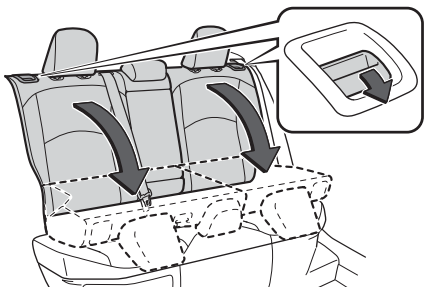
Lock release button

Rear outboard

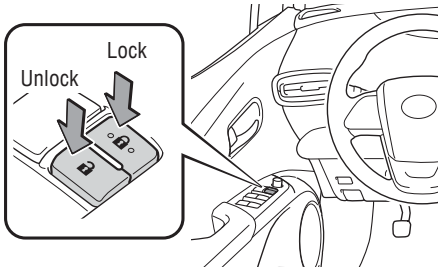


Lock release button

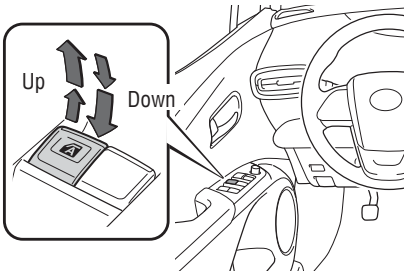
Seats - Folding down rear seat

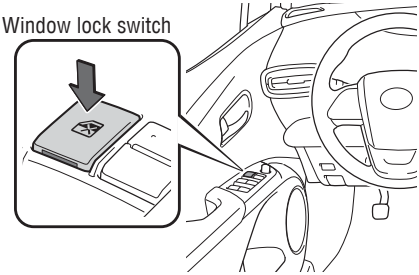


Door locks



Windows-Power



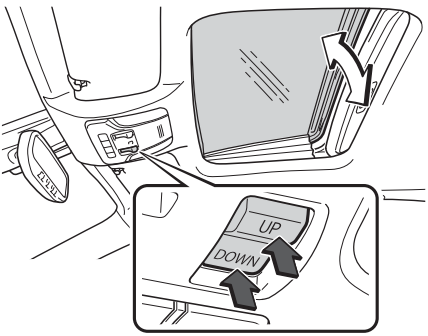


Automatic operation Push the switch completely down or pull it completely up and release to fully open or close. To stop the window partway, operate the switch in the opposite direction.

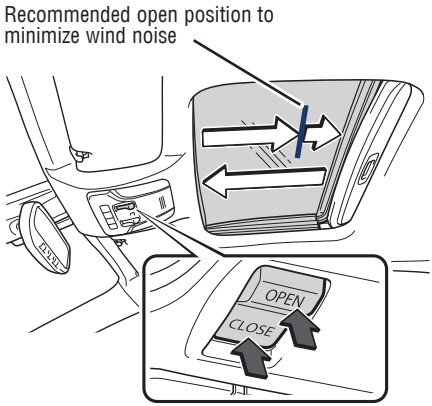
Window lock switch Deactivates all passenger windows. Driver's window remains operable.

Moonroof *(if equipped)*

TILTING OPERATION



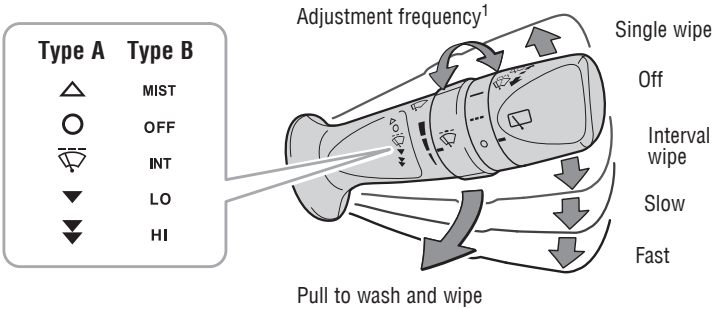
SLIDING OPERATION



Push once to open partway; again to open completely.

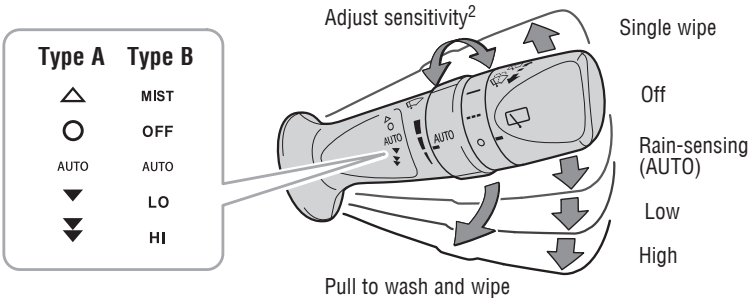
Windshield wipers & washers

FRONT-INTERMITTENT (IF EQUIPPED)



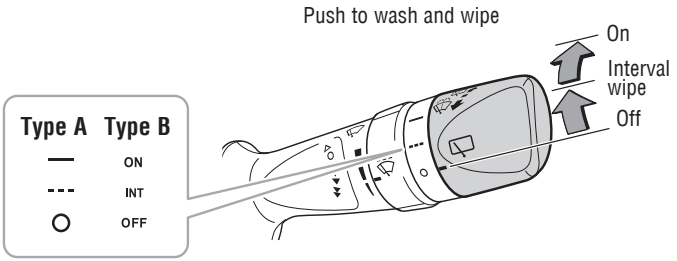
1 **Intermittent windshield wiper frequency adjustment** Rotate to increase/decrease wipe frequency.

FRONT-AUTO (RAIN-SENSING)(IF EQUIPPED)



2 **Rain-sensing windshield wipers** Rotate to increase/decrease sensor sensitivity.

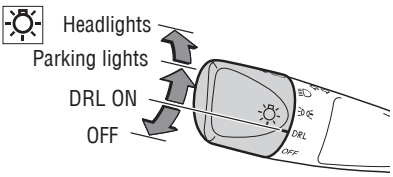
REAR (IF EQUIPPED)



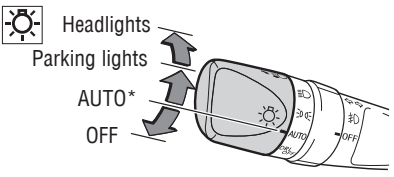
Lights & turn signals

HEADLIGHTS

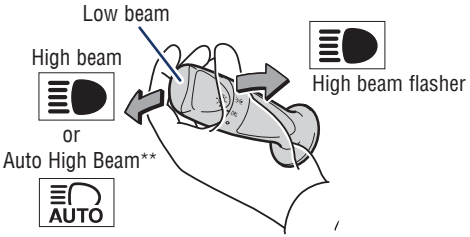
Type A



Type B



*if equipped



Daytime Running Light system (DRL) Automatically turns on the headlights at a reduced intensity

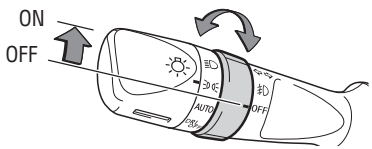
Automatic light cutoff system Automatically turns lights off after a delay of 30 seconds, or when lock switch on remote is pushed after all doors are locked.

Automatic High Beam (AHB) system Automatically switches between high and low beams as appropriate to provide the most light possible and enhance forward visibility. *Refer to Toyota Safety Sense™ P (TSS-P) in this guide or the Owner's Manual for more details on the Automatic High Beam feature.*

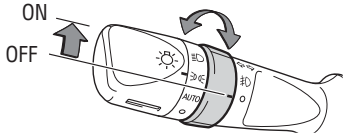
** Operating conditions must be met. Refer to Owner's Manual for details.

FRONT FOG LIGHTS (IF EQUIPPED)

Type A

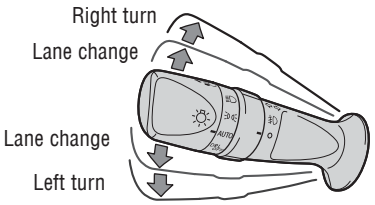


Type B

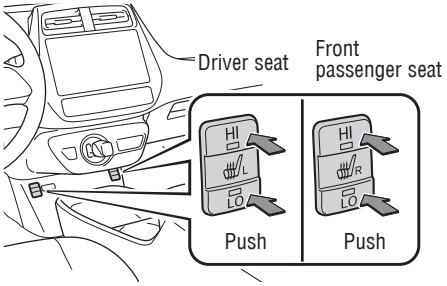


Front fog lights come on only when the headlights are on low beam.

TURN SIGNALS



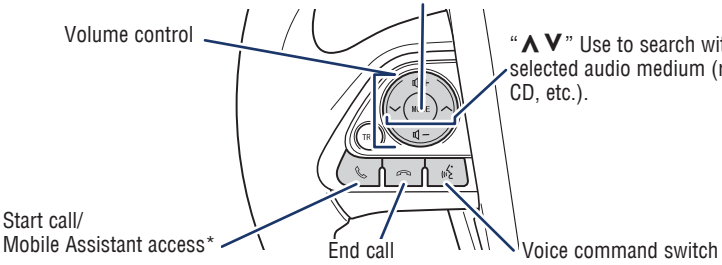
Seat heaters *(if equipped)*



Steering wheel switches & telephone controls (Bluetooth®)*

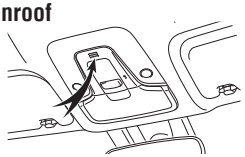
STEERING WHEEL AUDIO AND TELEPHONE CONTROLS

"MODE"
Push to turn audio ON and select an audio mode. Push and hold to mute/unmute or pause/resume the current operation.



MICROPHONE

Without moonroof



With moonroof

Bluetooth® technology allows dialing or receipt of calls without taking hands from the steering wheel or using a cable to connect the compatible telephone and the system.

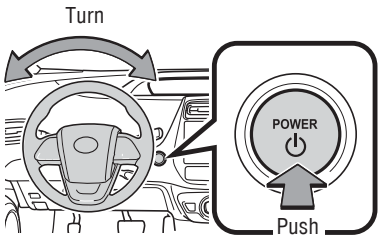
* Push and hold to access Mobile Assistant. Once you connect a compatible, registered mobile phone, you can access Siri® Eyes Free using Mobile Assistant access switch.

Refer to "Bluetooth® Device Pairing Section," in this guide, for more information about phone connections and compatibility.

Refer to the "Owner's Manual" or the "Navigation System Owner's manual for more datails.

NOTE: Concentrating on the road should always be your first priority while driving. Do not use the hands-free phone system if it will distract you.

Steering lock release



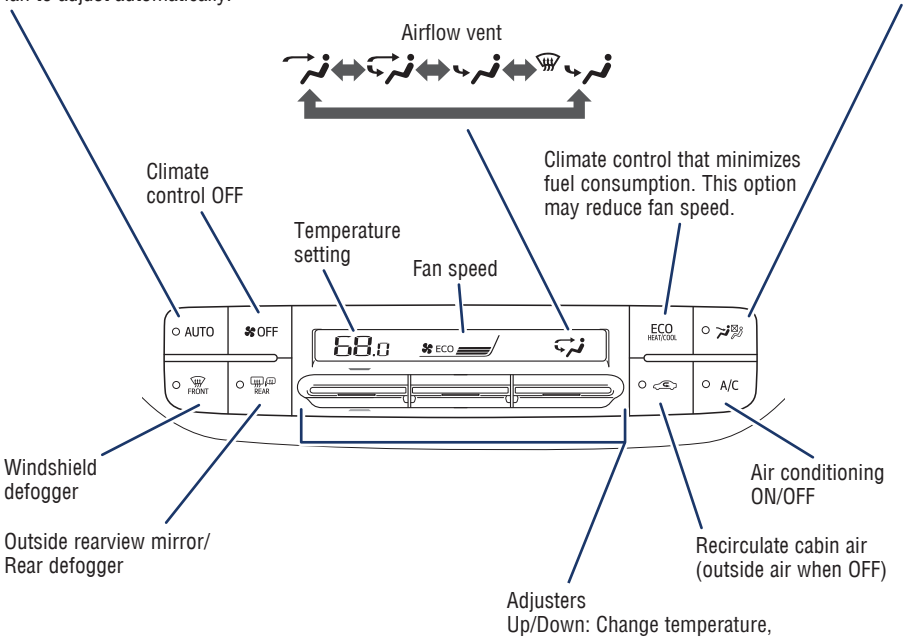
The green indicator light on the engine switch will flash and a message will be shown on the multi-information display. Press the engine switch while turning the steering wheel left and right.

Air conditioning/heating

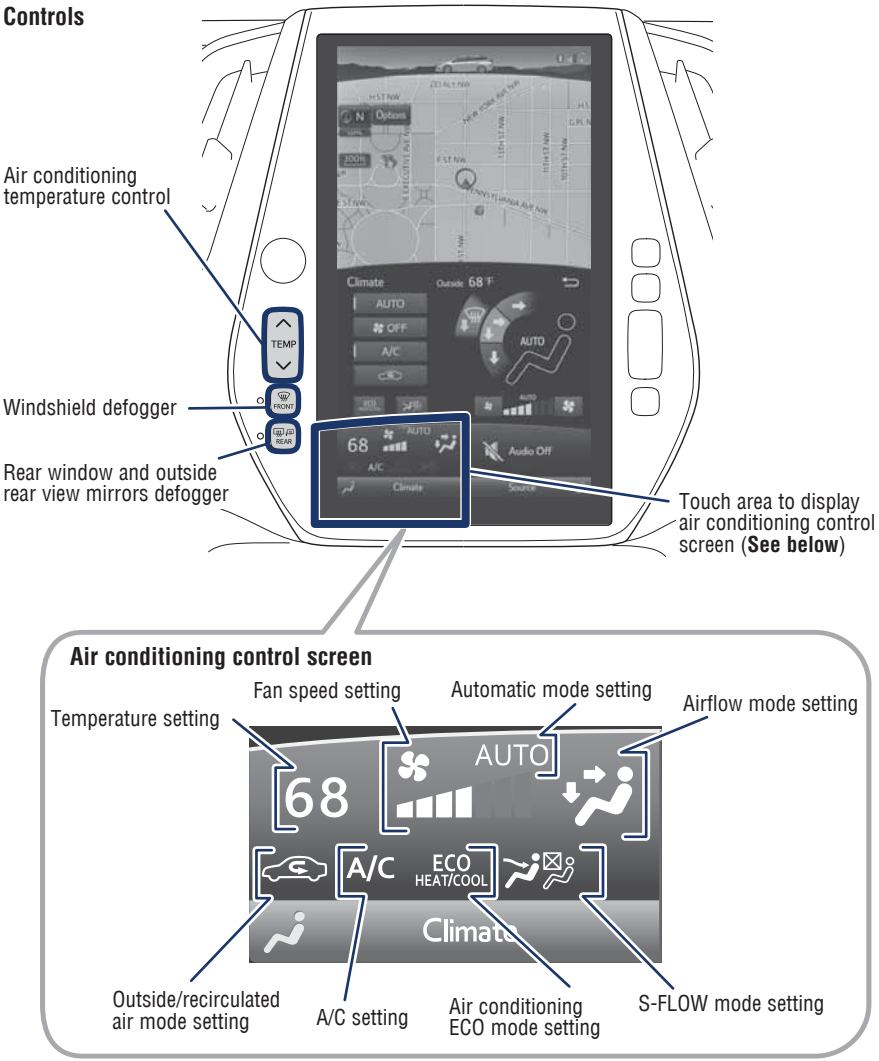
AUTOMATIC AIR CONDITIONING - 6.1" DISPLAY (IF EQUIPPED)

Automatic climate control ON
Adjusting the temperature setting will cause the airflow vents, air intake and fan to adjust automatically.

Smart-flow (S-Flow) mode gives airflow priority to the front seats, reducing the airflow and air conditioning effect on rear seats when there are no passengers.

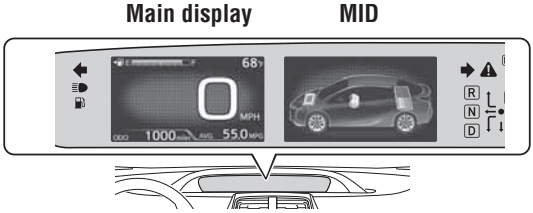


Controls



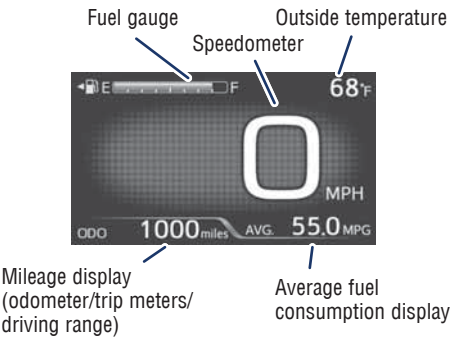
Air conditioning control screen

Color Dual Multi-Information Display (MID)

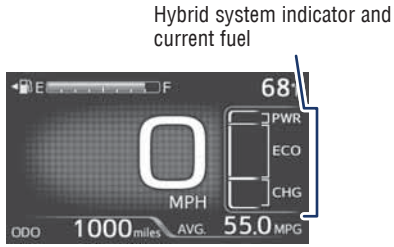


MAIN DISPLAY

Simple screen



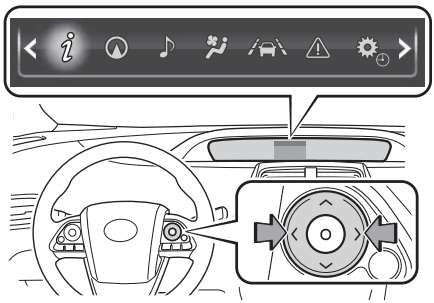
Split screen



The default split screen mode can also be viewed in simple screen mode shown above. The main display shows basic drive information. Push "TRIP" to view more info for mileage and average fuel consumption display.

For more details, see Owner's Manual.

MULTI-INFORMATION DISPLAY (MID)

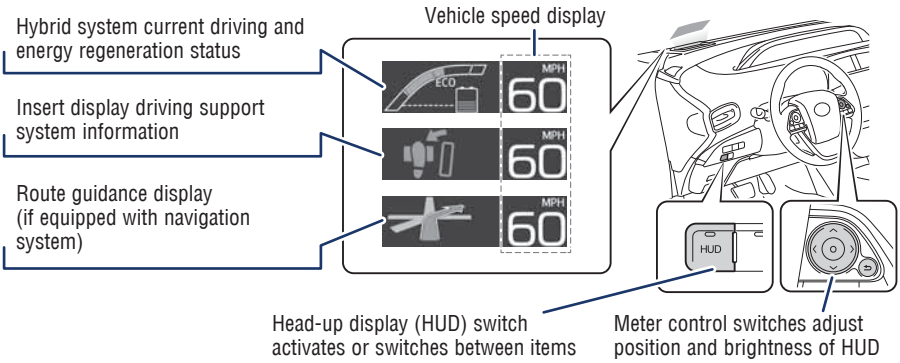


- Drive information
- Navigation system-linked display (if equipped)
- Audio system-linked display (if equipped)
- Air conditioning system settings screen
- Driving assist system information (if equipped)
- Warning message display
- Settings display

Push "**< >**" to change between the following information screens, "○" to select, "**∧∨**" to switch contents and "↩" to go back:

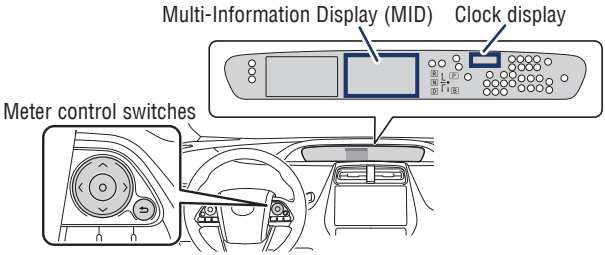
For more details, see Owner's Manual.

Color Head-up Display (HUD) *(if equipped)*



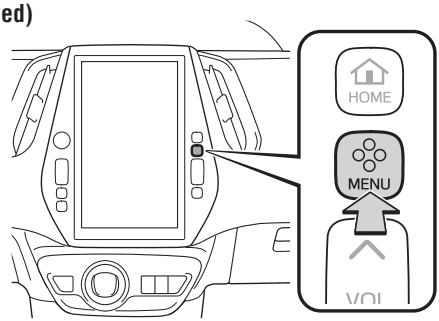
The color head-up display can display the current vehicle speed and hybrid system indicator in front of the driver. Also, it can display various types of information to assist the driver.

Clock



To adjust the time, use meter control switches to go to the screen on the MID. Then, select the option to access the clock setting.

11.6” display (if equipped)

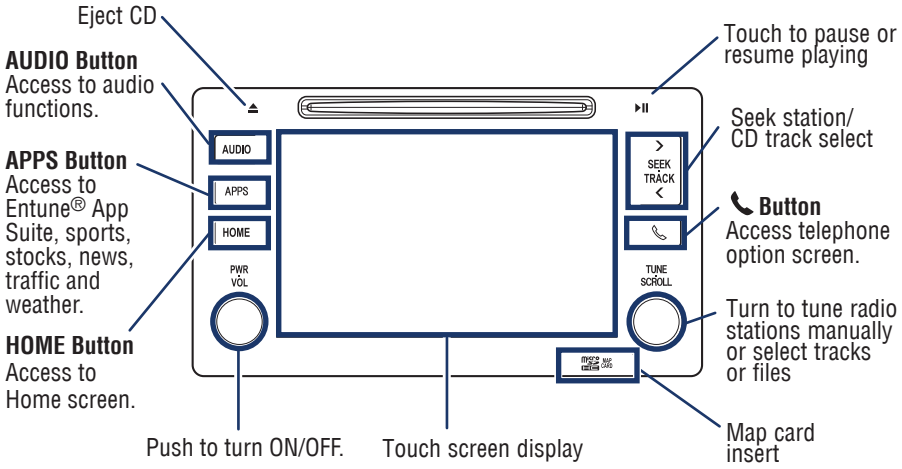


To adjust the time, press to select . Then select to access General Settings screen. From here, select “System Time” to access clock setting.

Audio

ENTUNE™ PREMIUM AUDIO WITH INTEGRATED NAVIGATION & APP SUITE

6.1" Display

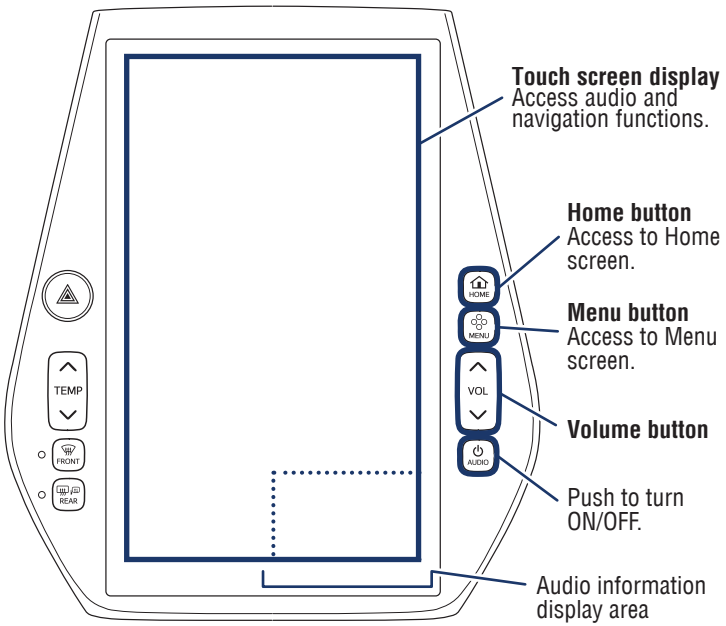


HOME SCREEN - the home screen offers a two panel and a three panel layout. Information and layout will vary depending on selected set up.

Refer to the Navigation System Owner's Manual for more details.

NOTE: Concentrating on the road should always be your first priority while driving. Do not use the Entune system if it will distract you.

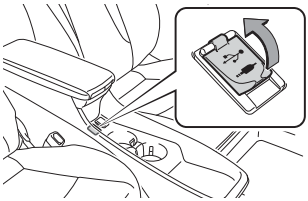
11.6" Display (if equipped)



Refer to the Navigation System Owner's Manual for more details.

NOTE: Concentrating on the road should always be your first priority while driving. Do not use the Entune system if it will distract you.

USB/AUX port

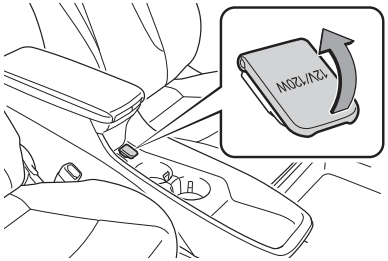


By inserting a USB or an auxilary cable plug into the USB/AUX port, you can listen to music from a portable audio device through the vehicle's speaker system while in USB/AUX mode.

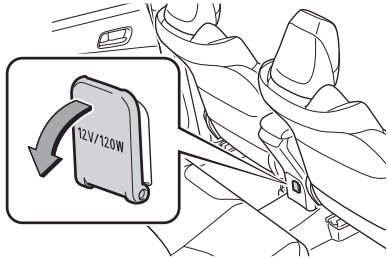
Refer to the "Owner's Manual" or the "Navigation System Owner's Manual" for instructions and more information.

Power outlets

Front



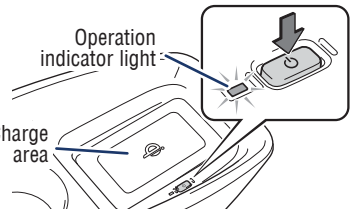
Rear



Power switch must be set at “ACCESSORY” or “ON” mode to be used.

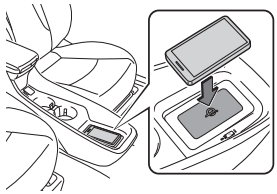
Qi-compatible wireless charging *(if equipped)*

(1)



Push power supply charging button.

(2)



Place charging side of device on the charge area.

Orange light - device is charging.
Green light - device is finished charging.

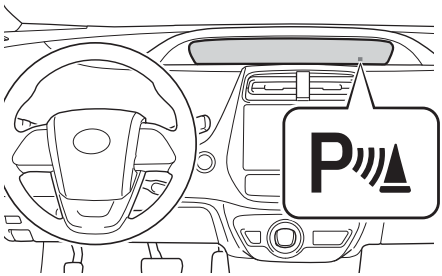
The power switch must be in ACCESSORY or ON mode.

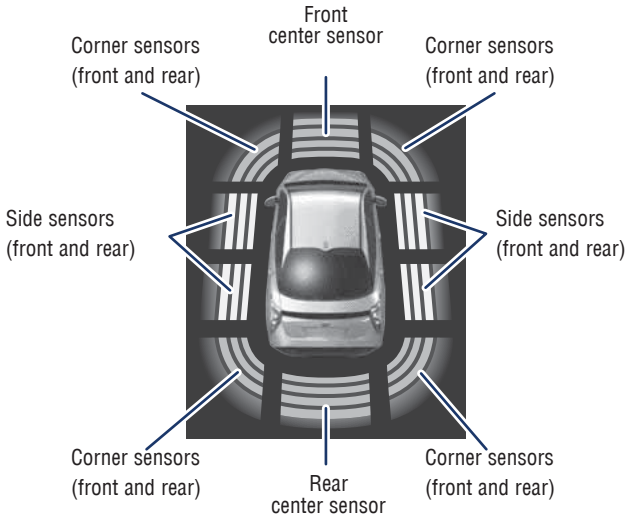
A portable device can be charged by just placing Qi standard wireless charge compatible portable devices according to the Wireless Power Consortium, such as smart phones and mobile batteries, etc., on the charge area.

This function cannot be used with portable devices that are larger than the charging area. Also, depending on the portable device, it may not operate normally.

See Owner’s Manual for compatible portable devices.

Intelligent Parking Assist (IPA) *(if equipped)*





If the sensors detect an obstacle, the buzzer and MID display informs the driver of the approximate position and distance of the obstacle by illuminating continuously (far) or blinking (near).

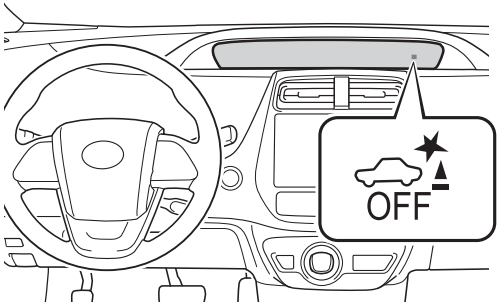
Note: Use **in the Multi-Information Display (MID) to change settings. The system will continue in the last state it was in (ON or OFF) when the engine is started again.**

Refer to section S-APGS (Simple Advanced Parking Guidance System) in the Owner's Manual for more details.

Intelligent Clearance Sonar (ICS) *(if equipped)*

When parking, this available system scans for stationary objects, like walls or lampposts. Should the system anticipate a collision, it will emit an audible and visible alert, reduce engine or motor output, and automatically apply the brakes if needed. And with advanced side-colllision detection, Prius can help you get in and out of parking spots more easily.

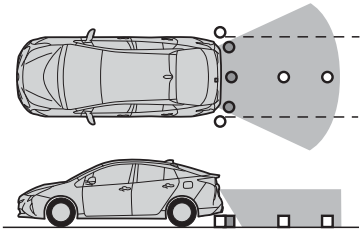
CHANGE SETTINGS

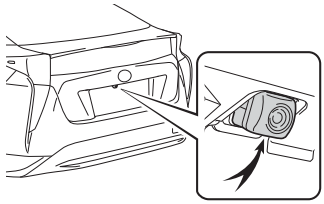


System ON/OFF on the Multi-Information Display.

Refer to the Owner's Manual for more details on this system.

Rear view monitor system



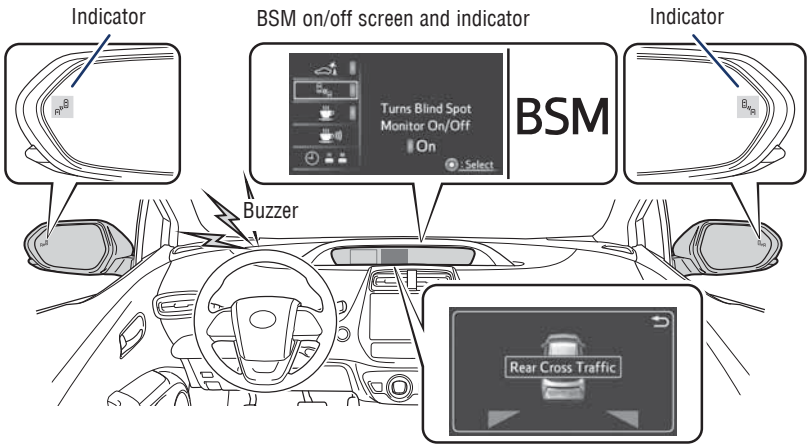


The rear view monitor system displays an image of the view from the bumper of the rear area of the vehicle. The camera for the rear view monitor system is located above the license plate.

To adjust the image on the rear view monitor screen, press the "SETUP" button and select "Display" on the "Setup" screen. Select "Camera" to adjust the screen contrast and brightness.

Refer to the Owner's Manual for limitations and more details on this system.

Blind Spot Monitor with Rear Cross Traffic Alert (BSM w/RCTA) *(if equipped)*



RCTA detection display

The Blind Spot Monitor is a system that has two functions:

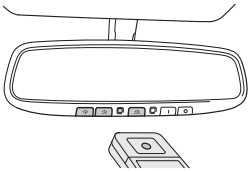
- The Blind Spot Monitor function (assists the driver in making the decision when changing lanes)
- The Rear Cross Traffic Alert function (assists the driver when backing up)

The system is designed to use radar sensors to detect vehicles traveling in the Prius' blind spot and advises the driver of the vehicles' presence via the outside rear view mirror indicators.

Note: Use in the Multi-Information Display (MID) to change settings. The system will continue in the last state it was in (ON or OFF) when the engine is started again.

Refer to the Owner's Manual for limitations and more details on this system before attempting to use it.

Garage door opener (HomeLink®) *(if equipped)*



Garage door openers manufactured under license from HomeLink®* can be programmed to operate garage doors, estate gates, security lighting, etc.

Refer to "Garage door opener," Section 6-4 in the Owner's Manual for more details.

For programming assistance, contact HomeLink® at 1-800-355-3515, or visit http://www.homelink.com.

* HomeLink® is a registered trademark of Johnson Controls, Inc.

Quick overview-Toyota Safety Sense™ P (TSS-P)

Toyota Safety Sense™ P (TSS-P) is a set of active safety technologies designed to help mitigate or prevent collisions across a wide range of traffic situations, in certain conditions. TSS-P is designed to help support the driver's awareness, decision making and vehicle operation contributing to a safe driving experience.

Refer to the Owner's Manual for operation, setting adjustments, limitations and more details to understand these functions and complete safety precautions. For more information, please go to http://www.toyota.com/safety-sense

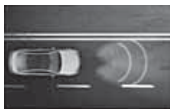
Pre-Collision System with Pedestrian Detection function (PCS w/PD)
PCS w/PD is designed to provide alert, mitigation, and/or avoidance support in certain conditions, when the system detects a potential collision with a preceding vehicle is likely to occur.

Advanced millimeter-wave radar sensor system is designed to work with the camera sensor to help recognize a preceding pedestrian, and provide an alert, mitigation and/or avoidance support in certain conditions.

Lane Departure Alert with Steering Assist function (LDA w/SA)
LDA w/SA is designed to provide notification when the system detects an unintended lane departure.

The Steering Assist function is designed to provide small corrective steering inputs to the steering wheel for a short period of time to help keep the vehicle in its lane.

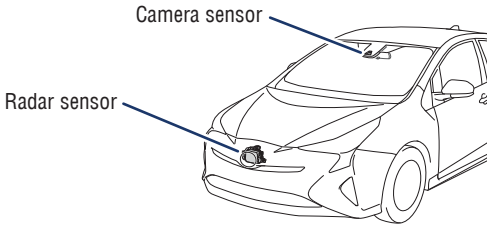
Full-Speed Range Dynamic Radar Cruise Control (DRCC)
DRCC is designed to help maintain a pre-set distance to a preceding vehicle when the preceding vehicle is traveling at a lower speed.



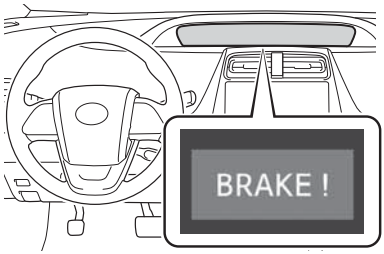
Automatic High Beams (AHB)
AHB is designed to detect the headlights of oncoming vehicles and the tail lights of preceding vehicles and switch between high beams and low beams as appropriate.

Sensors

TSS-P combines an in-vehicle camera mounted in front of the inside rear view mirror and a millimeter-wave radar mounted in the front grill. These sensors support the driver assist systems.



Pre-Collision System with Pedestrian Detection function (PCS w/PD)



The Pre-Collision System uses a radar sensor and camera sensor to help detect a vehicle or pedestrian in front of your vehicle.

As there is a limit to the degree of recognition accuracy and control performance that this system can provide, do not overly rely on this system. This system will not prevent collisions or lessen collision damage or injury in every situation. Do not use PCS instead of normal braking operations under any circumstances. Do not attempt to test the operation of the pre-collision system yourself, as the system may not operate or engage, possibly leading to an accident. In some situations, such as when driving in inclement weather such as heavy rain, fog, snow or a sandstorm or while driving on a curve and for a few seconds after driving on a curve, a vehicle may not be detected by the radar and camera sensors, preventing the system from operating or engaging properly.

Refer to a Toyota Owner's Manual for a list of additional situations in which the system may not operate properly.

Pre-Collision Warning
When the system determines that the possibility of a frontal collision is high, a buzzer will sound and a warning message will be displayed on the Multi-Information Display (MID) to urge the driver to take evasive action.

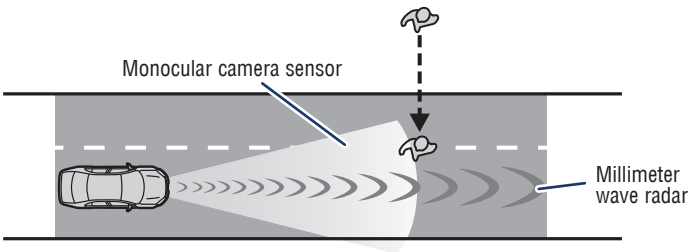
Pre-Collision Brake Assist
If the driver notices the hazard and brakes, the system may provide additional braking force using Brake Assist. This system may prime the brakes and may apply greater braking force in relation to how strongly the brake pedal is depressed.

Pre-Collision Braking
If the driver does not brake in a set time and the system determines that the possibility of a frontal collision with a preceding vehicle is extremely high, the system may automatically apply the brakes, reducing speed in order to help the driver reduce the impact and in certain cases avoid the collision.

Refer to a Toyota Owner's Manual for additional information on PCS w/PD operation, settings adjustments, limitations, and precautions before attempting to use it.

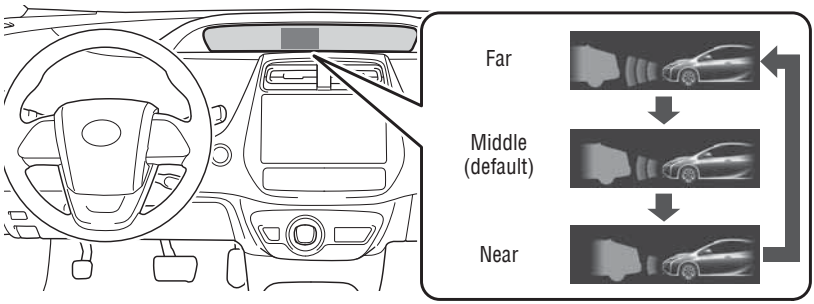
PEDESTRIAN DETECTION FUNCTION

In certain conditions, the PCS system included with the TSS-P package may also help to detect a pedestrian in front of your vehicle. With Toyota Safety Sense™ P, PCS uses an in-vehicle camera and front-grill mounted millimeter-wave radar to help detect a pedestrian in front of your vehicle in certain conditions. The in-vehicle camera of PCS detects a potential pedestrian based on size, profile, and motion of the detected pedestrian. However, a pedestrian may not be detected depending on the conditions, including the surrounding brightness and the motion, posture, size, and angle of the potential detected pedestrian, preventing the system from operating or engaging. *Refer to a Toyota Owner's Manual for additional information.*



As part of the Pre-Collision System, this function is also designed to first provide an alert and then automatic braking if needed.

CHANGING THE PCS ALERT TIMING



(1) Press "〈〉" switches and select from the Multi-Information Display (MID).

(2) Press "⌃⌄" switches and select from the MID and then press "○". The setting screen is displayed.

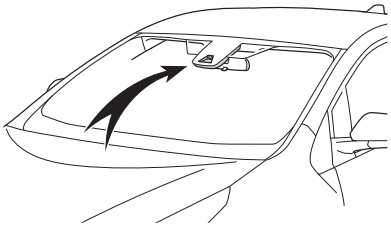
(3) Press "○" each time to change the setting. Each time it is pressed, the response to the PCS alert timing changes as shown above. You can press "↩" to go back to the menu.

Note: PCS is enabled each time the engine switch is turned to Ignition On. The system can be disabled/enabled and the alert timing of the system can be changed. (Alert timing only, brake operation remains the same).

DISABLING THE PRE-COLLISION SYSTEM (PCS)

(1) Press "〈〉" switches and select from the Multi-Information Display (MID).
(2) Press "⌃⌄" switches and select the setting function from the MID and then press "○". The setting screen is displayed.
(3) Press "○" each time to change the setting. You can press "↩" to go back to the menu.

Lane Departure Alert with Steering Assist function (LDA w/SA)

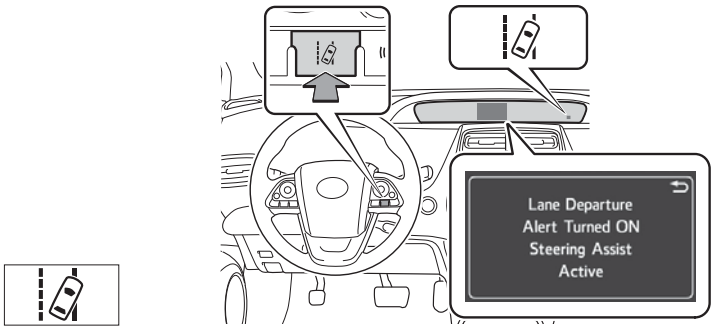


LDA in TSS-P uses an in-vehicle camera designed to detect visible white and yellow lane markers in front of the vehicle and the vehicle's position on the road. If the system determines that the vehicle is starting to unintentionally deviate from its lane, the system alerts the driver with an audio and visual alert. When the alerts occur, the driver must check the surrounding road situation and carefully operate the steering wheel to move the vehicle back to the center part of their lane.

LDA is designed to function at speeds of approximately 32 MPH or higher on relatively straight roadways.

In addition to the alert function, LDA w/SA also features a steering assist function. When enabled, if the system determines that the vehicle is on a path to unintentionally depart from its lane, the system may provide small corrective steering inputs to the steering wheel for a short period of time to help keep the vehicle in its lane.

TURNING THE LDA SYSTEM ON/OFF



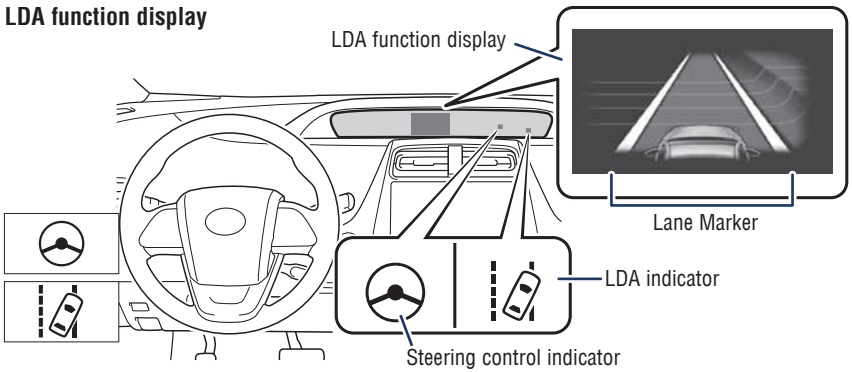
Press the LDA switch to turn the LDA system on. Depress again to turn it off.

Note: Operation of the LDA system and setting adjustments continues in the same condition regardless of Ignition cycle until changed by the driver or the system is reset.

Refer to a Toyota Owner's Manual for additional information on LDA operation, settings adjustments, limitations, and precautions before attempting to use it.

FUNCTIONS

LDA function display



Lane Departure Alert (LDA) indicator flashes orange when operating.

(1)

(2)

The LDA function displays when the Multi-Information Display (MID) is switched to the driving assist system information screen.

(1) The system displays solid white lines on the LDA indicator when visible lane markers on the road are detected. A side flashes orange to alert the driver when the vehicle deviates from its lane.

(2) The system displays outlines on the LDA indicator when lane markers on the road are not detected or the function is temporarily cancelled.

Note: When operation conditions are no longer met, a function may be temporarily canceled. However, when the operation conditions are met again, operation of the function is automatically restored. For example, LDA may not function on the side(s) where white/yellow lines are not detectable.

Refer to a Toyota Owner's Manual for additional information on LDA operation, settings adjustments, limitations, and precautions before attempting to use it.

DISABLING THE STEERING ASSIST FUNCTION

(1) Press "‹ ›" switches and select from the Multi-Information Display (MID).

(2) Press "⌃ ⌄" switches and select the setting function and then press "○".

(3) Press "○" each time to change the setting.

(4) Press "↩" to go back to the menu.

Note: Operation of the LDA system and setting adjustments continues in the same condition regardless of Ignition cycle until changed by the driver or the system is reset.

CHANGING THE LDA ALERT SENSITIVITY

The driver can adjust the sensitivity of the LDA (warning) function from the Multi-Information Display (MID) customization screen.

High - Is designed to warn approximately before the front tire crosses the lane marker.
Normal - Is designed to warn approximately when the front tire crosses the lane marker.

(1) Press "‹ ›" switches and select from the Multi-Information Display (MID).

(2) Press "⌃ ⌄" switches and select the setting function and then press "○".

(3) Press "○" each time to change the setting.

(4) Press "↩" to go back to the menu.

VEHICLE SWAY WARNING SYSTEM (SWS) FUNCTION

Continuous lane deviations from swaying.

Gentle swaying from driver's inattentiveness.

Acute steering wheel operation after the number of operations decrease due to driver's inattentiveness.

SWS is a function of LDA and is designed to detect swaying based on the vehicle location in the lane and the driver's steering wheel operation. To help prevent swaying, the system alerts the driver using a buzzer sound and a warning displays in the MID.

ADJUSTING SWAY ALERT SENSITIVITY

(1) Press "〈〉" switches and select from the Multi-Information Display (MID).
(2) Press "⌃⌄" switches and select the setting function and then press "".
(3) Press " " each time to change the setting.
(4) Press " " to go back to the menu.

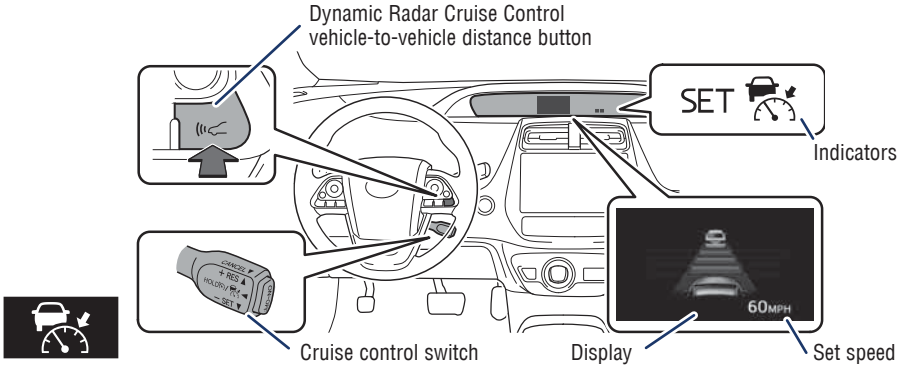
DISABLING SWS

(1) Press "〈〉" switches and select from the Multi-Information Display (MID).
(2) Press "⌃⌄" switches and select the setting function and then press "".
(3) Press " " each time to change the setting.
(4) Press " " to go back to the menu.

Note: Operation of the LDA system and setting adjustments continues in the same condition regardless of Ignition cycle until changed by the driver or the system is reset.

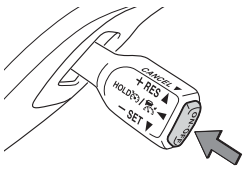
Full-Speed Range Dynamic Radar Cruise Control (DRCC)

DRCC helps maintain a pre-set distance to a preceding vehicle when the preceding vehicle is traveling at a lower speed. This mode is always selected first when the cruise control button is depressed. Constant speed cruise control mode is also available. Full-Speed Range DRCC is designed to function at speeds between 0 to approximately 110 MPH and is intended for highway use.



TURNING SYSTEM ON/OFF

(1)

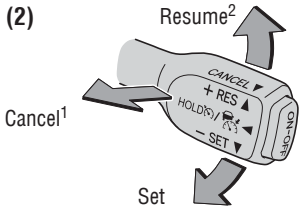


Push once: On
Push again: Off

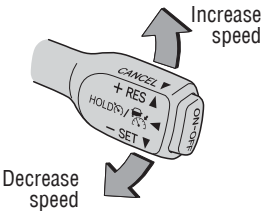
Refer to page 37 for switching to Constant Speed (Cruise) Control Mode.

ADJUSTING SET SPEED

(2)



(3)



Vehicle will cruise at a set speed, decelerate to maintain selected distance from a slower vehicle traveling in front and accelerate back up to the selected speed if the vehicle in front changes lanes or speeds up.

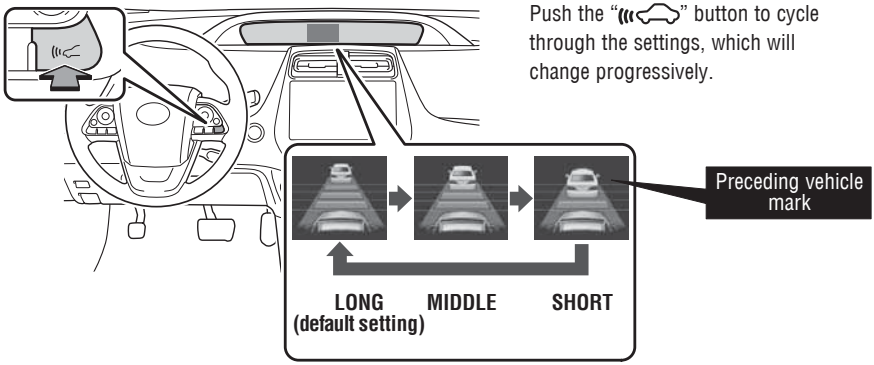
(1) Push the ON-OFF button. The “RADAR READY” or “ ” indicator will come on.
(2) Push the lever down to SET speed, push it up to Resume and pull it or depress brake to Cancel.
(3) Push up to increase the set speed, push down to decrease (1 MPH increments).

[1] The set speed may also be cancelled by depressing the brake pedal.
[2] The set speed may be resumed once vehicle speed exceeds 25 mph.

ADJUSTING DISTANCE

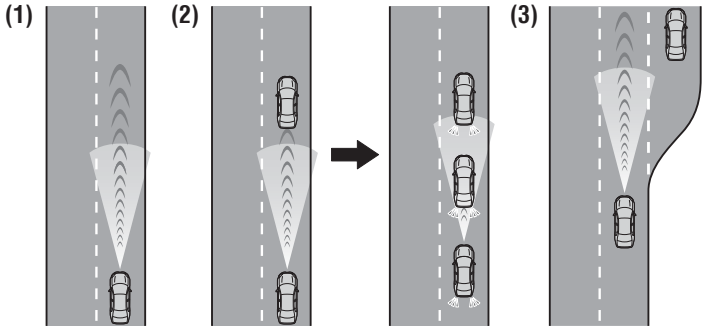
To change the vehicle-to-vehicle distance

Push the "" button to cycle through the settings, which will change progressively.



This mode employs a radar sensor to detect the presence of a preceding vehicle up to approximately 328 ft (100m) ahead, determines the current vehicle-to-vehicle following distance and operates to maintain a suitable following distance from the vehicle ahead. These distances vary based on vehicle speed.

Note: Vehicle-to-vehicle distance will close in when traveling on long downhill slopes.



(1) **Constant speed cruising when there are no vehicles ahead**
The vehicle travels at the speed set by the driver. The desired vehicle-to-vehicle distance can also be set by operating the vehicle-to-vehicle distance control.

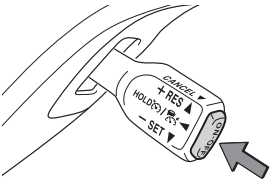
(2) **Deceleration cruising and follow-up cruising when a preceding vehicle driving slower than the set speed appears**
When a vehicle is detected running ahead of you, the system automatically decelerates your vehicle. When a greater reduction in vehicle speed is necessary, the system applies the brakes (the brake lights will come on at this time). The system will respond to changes in the speed of the vehicle ahead in order to maintain the vehicle-to-vehicle distance set by the driver. A warning tone warns you when the system cannot decelerate sufficiently to prevent your vehicle from closing in on the vehicle ahead.

DRCC ADJUSTING DISTANCE (CONTINUED)

(3) **Acceleration when there are no longer any preceding vehicles driving slower than the set speed**
The system accelerates until the set speed is reached. The system then returns to constant speed cruising.

Note: When your vehicle is too close to a vehicle ahead, and sufficient automatic deceleration via the cruise control is not possible, the display will flash and the buzzer will sound to alert the driver. An example of this would be if another driver cuts in front of you while you are following a vehicle. Depress the brake pedal to ensure an appropriate vehicle-to-vehicle distance.

SWITCHING TO CONSTANT SPEED (CRUISE) CONTROL MODE



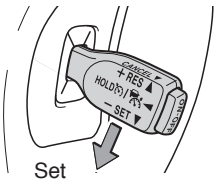
If you are already using DRCC " ", push ON-OFF button to turn the system off first, then push and hold ON-OFF button for at least 1.5 seconds to switch.

Note: When the engine is turned off, it will automatically default to DRCC.

Refer to a Toyota Owner's Manual for additional information on DRCC operation, settings adjustments, limitations, and precautions before attempting to use it.

SETTING CONSTANT SPEED (CRUISE) CONTROL

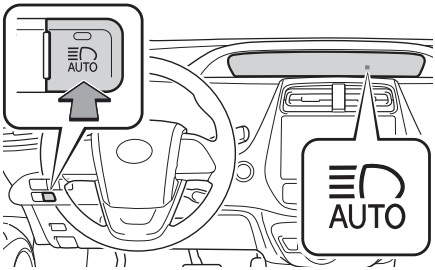
SET



To adjust speed or cancel, see steps (2) and (3) of ADJUSTING SET SPEED on page 35.

Refer to a Toyota Owner's Manual for additional information on DRCC operation, settings adjustments, limitations, and precautions before attempting to use it.

Automatic High Beams (AHB)



AHB is a safety system designed to help drivers see more of what's ahead at nighttime without dazzling other drivers. When enabled, AHB uses an in-vehicle camera to help detect the headlights of oncoming vehicles and tail lights of preceding vehicles, then automatically switches between high and low beams as appropriate to provide the most light possible and enhance forward visibility. By using high beams more frequently, the system may allow earlier detection of pedestrians and obstacles.

Refer to a Toyota Owner's Manual for additional information on AHB operation, settings adjustments, limitations, and precautions before attempting to use it.

ACTIVATING THE AHB SYSTEM

(1) With the engine switch in IGNITION ON mode and headlight switch turned to "AUTO" or " " position, push lever away from you.

(2) Depress the Automatic High Beam " AUTO " switch.

The AHB indicator will come on when the headlights are turned on automatically to indicate that the system is active.

Note: Pull the lever back toward you to turn the AHB system off.

The AHB indicator will turn off and the high beam indicator " " turns on.

CONDITIONS WHERE AHB WILL TURN ON/OFF AUTOMATICALLY

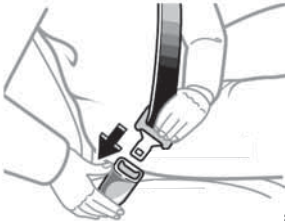
When all of these conditions are met, high beams will be automatically turned on (after approximately 1 second):

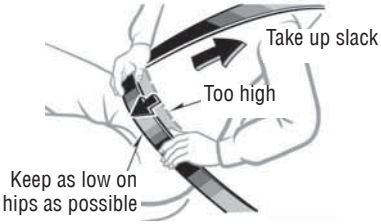
- Vehicle speed is above approximately 21 mph (34 km/h.)
- The area ahead of the vehicle is dark.
- There are no oncoming or preceding vehicles with headlights or tail lights turned on.
- There are few street lights on the road ahead.

If any of these conditions occur, the system is designed to automatically turn off high beams:

- Vehicle speed drops below approximately 17 mph (27 km/h.)
- The area ahead of the vehicle is not dark.
- Oncoming or preceding vehicles have headlights or tail lights turned on.
- There are many streetlights on the road ahead.

Seat belts

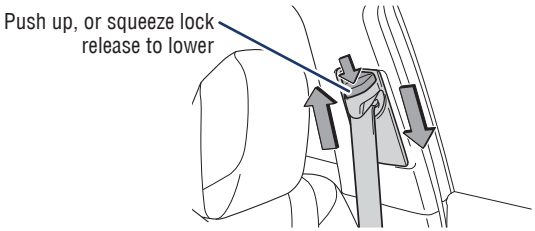




NOTE: If a passenger's seat belt is fully extended, then retracted even slightly, the Automatic Locking Retractor (ALR) will prevent it from being re-extended beyond that point, unless fully retracted again. This feature is used to help hold child restraint systems securely.

To find more information about seat belts, and how to install a child restraint system, refer to the Owner's Manual.

Seat belts - Shoulder belt anchor



Tire Pressure Monitoring (warning) System (TPMS)

If the Tire Pressure Warning indicator "(!)" illuminates without blinking, adjust tire pressures to factory-specified levels.* The light will turn off after a few minutes. The warning light may come on due to temperature changes or changes in tire pressure from natural air leakage.

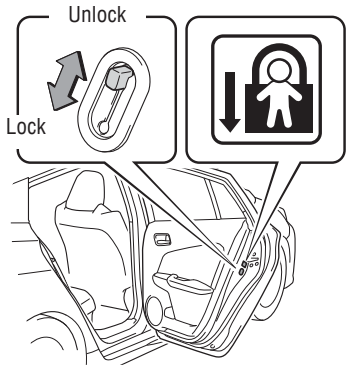
If the tire pressure indicator flashes for more than 60 seconds and then remains on, take the vehicle to your local Toyota dealer.

Refer to the Owner's Manual for more details.

** Refer to load label on door jamb or the Owner's Manual for tire inflation specifications.*

Rear door child safety locks

Rear door

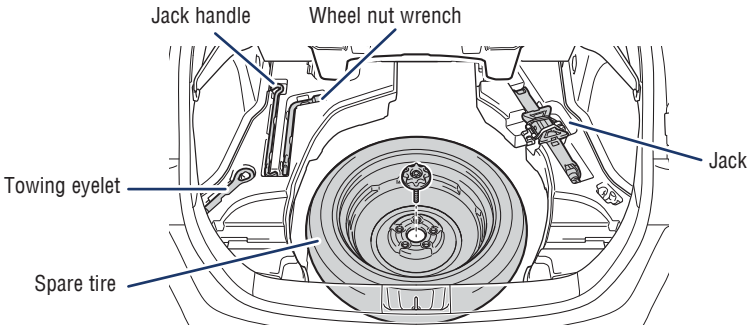


Moving the lever downward will allow the door to be opened only from the outside.

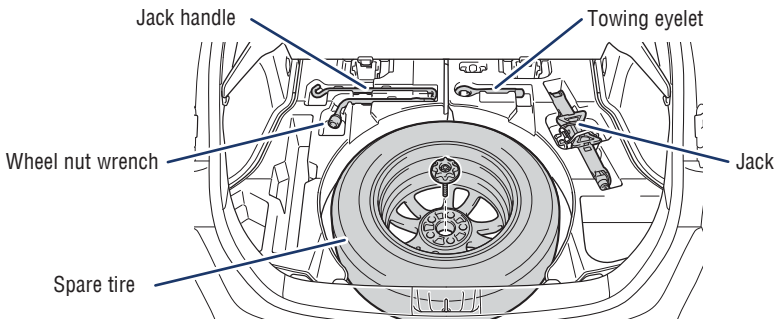
Spare tire/Tire repair kit & tools

TOOL LOCATION

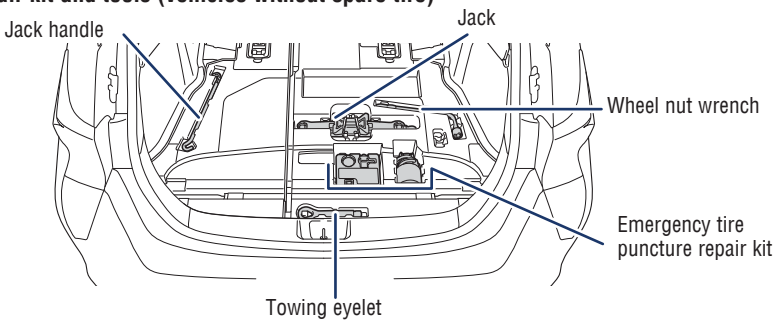
With compact spare tire (if equipped)



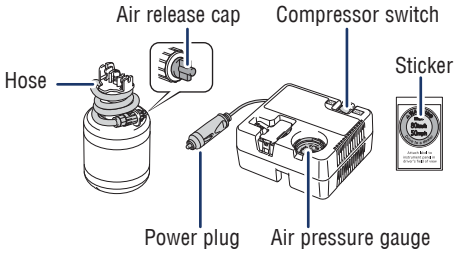
With full-size spare tire (if equipped)



With tire repair kit and tools (vehicles without spare tire)

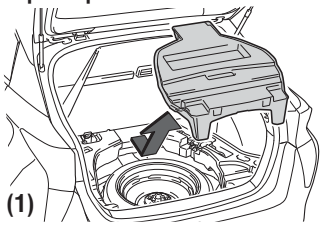


Tire repair kit components

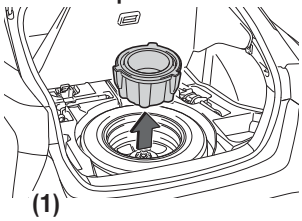


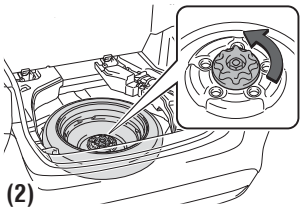
REMOVING THE SPARE TIRE (IF EQUIPPED)

With compact spare tire



With full-size spare tire





Refer to the Owner's Manual for tire changing and jack positioning procedures.

Star Safety System™

Your vehicle comes standard with the Star Safety System™, which combines Anti-lock Braking System (ABS), Brake Assist (BA), Electronic Brake-force Distribution (EBD), Smart Stop Technology (SST), Traction Control (TRAC) and Vehicle Stability Control (VSC).

Refer to the Owner's Manual for more details and important information on limitations to these systems.

ANTI-LOCK BRAKE SYSTEM (ABS)

Toyota's ABS sensors detect which wheels are locking up and limits wheel lockup by "pulsing" each wheel's brakes independently. Pulsing releases brake pressure repeatedly for fractions of a second. This helps the tires attain the traction that current road conditions will allow, helping you to stay in directional control.

BRAKE ASSIST (BA)

Brake Assist is designed to detect sudden or "panic" braking, and then add braking pressure to help decrease the vehicle's stopping distance. When there's only a split second to react, Brake Assist can add additional brake pressure more quickly than just the driver alone can.

ELECTRONIC BRAKE FORCE DISTRIBUTION (EBD)

Toyota's ABS technology has Electronic Brake-force Distribution (EBD) to help maintain control and balance when braking. Abrupt stops can cause a vehicle to tilt forward, reducing the braking power of the rear wheels. EBD responds to sudden stops by redistributing brake force to enhance the braking effectiveness of all four wheels.

SMART STOP TECHNOLOGY (SST)

Smart Stop Technology automatically reduces engine power when the accelerator and brake pedals are pressed simultaneously under certain conditions.

SST engages when the accelerator is depressed first and the brakes are applied firmly for longer than one-half second at speeds greater than five miles per hour.

SST doesn't engage if the brake pedal is depressed before the accelerator pedal, allowing vehicles to start on a steep hill and safely accelerate without rolling backward.

Refer to the Brake Override System section in the Owner's Manual for more information on Smart Stop Technology.

ENHANCED VEHICLE STABILITY CONTROL (VSC)

Enhanced Vehicle Stability Control provides cooperative control of the ABS, TRAC, VSC and EPS.

Enhanced VSC helps to maintain directional stability when loss of traction occurs during a turn.

TRACTION CONTROL (TRAC)

VSC helps prevent loss of traction during cornering by reducing Hybrid System output, and Traction Control helps maintain traction on loose gravel and wet, icy, or uneven surfaces by applying brake force to the spinning wheel(s).

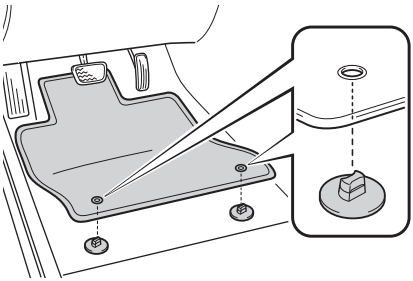
Toyota's TRAC sensors are activated when one of the drive wheels starts to slip. TRAC limits Hybrid System output and applies the brakes to the spinning wheel. This transfers power to the wheels that still have traction to help keep you on track.

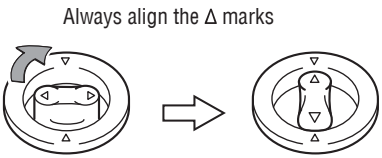
Floor mat installation

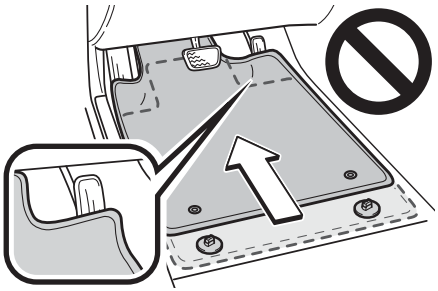
There are two types of Toyota floor mats: carpeted and all-weather. Each vehicle has model-specific floor mats. Installation is easy.

To keep your floor mat properly positioned, follow these steps:

- Only use Toyota floor mats designed for your specific model.
- Use only one floor mat at a time, using the retaining hooks to keep the mat in place.
- Install floor mats right side up.







BLUETOOTH® DEVICE PAIRING SECTION

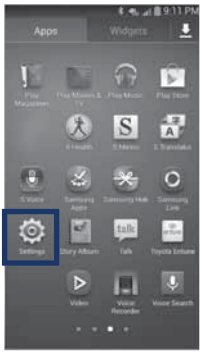
Do not attempt the Bluetooth® Pairing process while driving.

To begin the Bluetooth® Pairing process, press the HOME button on the faceplate of your Toyota Vehicle Entune™ Multimedia Head Unit.[1]

Bluetooth® Pairing for Android phone and Entune™ touch screen system

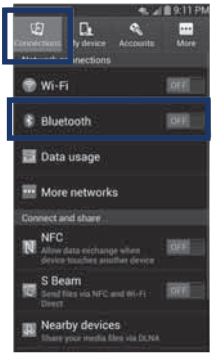
Pairing your phone is the first step in connecting with your Toyota for hands-free calling and for audio streaming via Bluetooth. This pairing process is quick and easy: all Android mobile digital devices have Bluetooth integrated; all you have to do is setup the phone and multimedia system to "talk" to each other and form a connection.[2]

Initiate Bluetooth® on your Android®



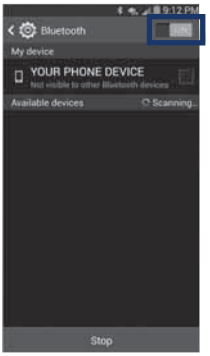
STEP 1

From your **APPS SCREEN**, select **SETTINGS**.



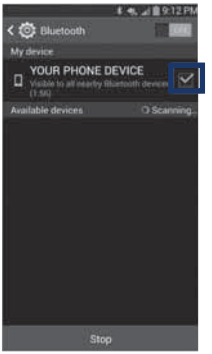
STEP 2

Select **CONNECTIONS** and select **BLUETOOTH**.



STEP 3

Ensure **BLUETOOTH** is **ON**.



STEP 4

Select **YOUR PHONE DEVICE** to make it discoverable.

Phone will seek out Bluetooth devices while remaining discoverable.

STEP 5

While your Android device is seeking out Bluetooth devices, proceed to your Entune Multimedia Head Unit on your Toyota vehicle.

[1] To determine which head unit is installed in your vehicle, refer to the Audio section in this guide. Entune™ Premium Audio screens are shown in this section. Screens and features may vary by Entune™ system.

[2] Some Android devices may have slightly different SETTINGS screen layout depending on manufacturer of device and Android OS version.

BLUETOOTH® DEVICE PAIRING

Initiate Bluetooth® on your Entune™ Multimedia Head Unit

Once you have Bluetooth enabled on your phone and ready to pair, you will need to initiate Bluetooth on your Entune head unit. Please follow the instructions below to pair your Bluetooth enabled phone to your Entune system.

STEP 6

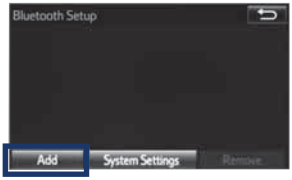
On your Toyota Vehicle Entune Multimedia Head Unit, Select **SETUP BUTTON** on the Home Screen.

For Entune™ Audio System, press the **SETUP BUTTON** on the faceplate to access the Setup Screen.

STEP 7

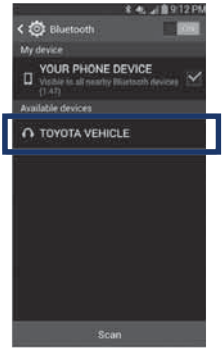
Select **BLUETOOTH**.

Image shown is a sample image, features may vary.



STEP 8

Select **ADD**, to add your phone device.



STEP 9

Back on your smartphone, you can now select your **TOYOTA VEHICLE** in Bluetooth Settings.

You may need to enter the provided Bluetooth PIN on your phone.

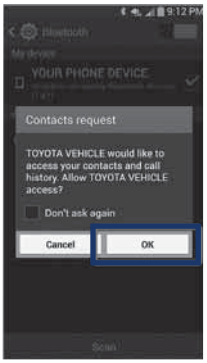
STEP 10

Your smartphone is now paired with Entune.

STEP 11

Once paired, Entune will attempt to connect audio and contacts on your phone.

Initiate Bluetooth® on your Entune™ Multimedia Head Unit



STEP 12

Using your smartphone, you will need to allow Entune access to your messaging and contacts.

It is recommended to check the "Don't ask again" box, so as not to have to press OK every time the phone makes a Bluetooth connection with your Toyota.

STEP 13

A confirmation will appear once your phone has been paired and connected.
