

Rear Dual USB Charging Port

Owner's Reference Guide

The Rear Dual USB Charging Port located in your vehicle provides a high output USB charging port for your USB devices. Each of the ports offers up to 12 Watts of charging. The LED light indicates the ports are ready to charge. To use, simply plug your USB device into a port to charge.

Please note that the Rear Dual USB Charging Port is a “Charge Only” device. It does not transmit or stream any data, music, or other information.
