

Park Assist and Reverse Automatic Braking Information

Due to an industry-wide semiconductor shortage, your vehicle may not be equipped with Front Park Assist (FPA), Rear Park Assist (RPA), or Reverse Automatic Braking (RAB) despite the presence of the **P**  Button.

DO NOT ASSUME THAT YOUR VEHICLE IS EQUIPPED WITH FPA, RPA, OR RAB EVEN IF IT HAS A **P**  BUTTON.

VEHICLES WITHOUT RAB WILL NOT BRAKE AUTOMATICALLY WHEN REVERSING.

See your dealer for details on specific features available on your vehicle, as other features may be affected by the semiconductor shortage.
