PURPOSE OF THIS GUIDE

WELCOME

Congratulations on choosing a Subaru Forester and welcome to the Subaru family!

Subaru is More Than a Car Company®. We are committed to making the world a better place, and the Subaru Love Promise® is our vision to show love and respect to all people at every interaction with Subaru. We believe in building lifelong relationships with our customers, earning your trust and exceeding your expectations by providing customer service with integrity and compassion.

This Getting Started Guide will introduce you to your new Subaru Forester by providing information on the basic operation and key features of your Subaru as well as the STARLINK ® and EyeSight ® systems in your vehicle.

IMPORTANT SAFETY INFORMATION

The Getting Started Guide is not intended as a substitute for your Owner's Manuals. We strongly encourage you to review your Vehicle, STARLINK®, and EyeSight® Owner's Manuals to ensure complete understanding.

OWNER'S RESOURCES

If you're having difficulty using any of the functions outlined in this guide, or want to learn more, you can get additional information from the following sources:

Your Subaru Owner's Manuals:
Located in the glovebox

Online Subaru Owner's Resources:
www.subaru.com/owners

Subaru Customer Support:
www.subaru.com/customer-support

1-800-782-2783 (1-800-SUBARU3)

Scan to learn more about **Owner's Resources**.

Scan to learn more about **Customer Support**.

MYSUBARU

Scan to get the **MySubaru** App.

IN CASE OF EMERGENCY

SUBARU STARLINK® Safety and Security (if equipped, subscription required)

SOS Emergency: Press the red "SOS" button on the overhead console in the event of an emergency to speak with a SUBARU STARLINK® Customer Care Advisor.

Enhanced Roadside Assistance: Press the blue "i" button on the overhead console or select the "MySubaru" button and then choose "Roadside Assistance" on the multimedia system. The "i" button also connects to the Concierge service, if subscribed.

SOS and Roadside Assistance Buttons

For more information, please refer to "Safety and Security Overview" on page 78 in this Getting Started Guide or "Introduction" in your SUBARU STARLINK® Safety and Security Owner's Manual. Not available in all states. See Retailer for details.

Subaru Roadside Assistance

Subaru Roadside Assistance:
1-800-261-2155

Subaru Roadside Assistance is free and standard on your Subaru; there are no forms to complete. This service is available anytime during the 3-year/36,000-mile Subaru Limited Warranty, whichever comes first. See your Subaru Retailer for details and refer to the Roadside Assistance guide in the owner's information kit for the details on this coverage. A Subaru Roadside Assistance decal has been affixed to the driver's door window.

Roadside assistance helps with:

- Towing to the nearest authorized Subaru Retailer if you cannot safely drive your Subaru
- Jump-start if your battery is dead
- Gasoline delivery if you run out of gas
- Flat tire change to install your spare
- Emergency lockout service
- National Subaru Retailer locator service, with phone numbers and location of the nearest Subaru Retailer anywhere in the U.S. or Canada

NOTE: Specifically excluded from Subaru Roadside Assistance coverage are service requests or claims resulting from: accidents, vandalism, acts of God, violation of any laws, or vehicle modifications not recommended by the manufacturer.

TOWING YOUR ALL-WHEEL DRIVE SUBARU

Since Subaru Symmetrical All-Wheel Drive distributes power to all four wheels, improper towing may damage your AWD system. The best way to tow your Forester is with a flatbed truck by your Subaru Retailer or a commercial towing service.

For more information, please refer to “In Case of Emergency” in your Owner’s Manual.

KEYLESS ENTRY

Transmitter

Access Key Fob

1 Lock/Arm

- Press the lock/arm button to lock the doors, the rear gate, and the fuel filler lid and to activate the security alarm. A chirp sounds and the hazard warning lights flash once.
- If any of the doors or the rear gate are not fully closed, five rapid chirps sound and the hazard warning lights flash to alert you.
- Press the lock/arm button three times to activate the vehicle finder function. If you are within 30 feet of your Subaru, the horn sounds once, and the hazard warning lights flash three times.

2 Unlock/Disarm

- Press the unlock/disarm button once to unlock the driver's door and fuel filler lid. Two chirps sound and the hazard warning lights flash twice. To unlock all the doors and the rear gate, briefly press the button twice.
- The interior lights will illuminate when you press the unlock/disarm button if the interior light switch is set to the "DOOR" position on the overhead console.

3 Rear Gate

- Press the rear gate button to unlock the rear gate.
- If your Subaru has a Power Rear Gate, press and hold this button to open or close the rear gate.

4 Panic Alarm

- Press the panic alarm button to sound the horn and flash the hazard warning lights.
- Press any button on the access key fob or transmitter to deactivate the panic alarm.

Automatic Door Locking/Unlocking

This feature allows you to set when your Subaru automatically locks or unlocks the doors through the Combination Meter Display (use the i/Set Switch to navigate to “Vehicle Setting”) or through the STARLINK® Touchscreen (select “Settings” then “Vehicle”). The available settings are listed in the following table.

		AVAILABLE SETTINGS			
AUTO DOOR LOCK/UNLOCK	**AUTO DOOR LOCK**	Vehicle Speed (12 mph)	Shift into or out of PARK	OFF	
	AUTO DOOR UNLOCK	Ignition OFF	Driver Door Open	Shift into or out of PARK	OFF

KEYLESS ACCESS WITH PUSH BUTTON START (if equipped)

The Keyless Access with Push-Button Start system features the following touch-activated door locking or unlocking functions without the key ever leaving your pocket or purse; simply carry the access key fob with you. You can customize the touch-activated door locking or unlocking settings using the Combination Meter Display or through the STARLINK® Touchscreen by selecting “Settings” then “Vehicle”.

Unlocking Using Door Handles

Grip the driver’s door handle to unlock the driver’s door and fuel filler lid. Grip the front passenger’s door handle to unlock all doors, the fuel filler lid, and the rear gate. Two chirps sound and the hazard warning lights flash twice.

Door Unlock Sensor

Locking Using Door Handles

Close all the doors and the rear gate and touch the door lock sensor (two lines) on either front door handle. All doors and the rear gate lock. One chirp sounds and the hazard warning lights flash once.

Door Lock Sensor

Unlocking Using the Rear Gate

Press the rear gate opener button to unlock and open the rear gate. Two chirps sound and the hazard warning lights flash twice.

Rear Gate Opener Button

Locking Using the Rear Gate

Close all the doors and the rear gate and press the rear lock button. All doors and the rear gate lock. One chirp sounds and the hazard warning lights flash once.

Rear Lock Button

POWER REAR GATE (PRG) (if equipped)

The Power Rear Gate allows automatic opening, and a single touch of a button can close the gate and lock the entire vehicle. The opening height can also be adjusted for spaces where clearance is limited.

You can learn more about the Power Rear Gate from the video linked in the QR code and “Keys and Doors” in your Owner’s Manual.

Scan to learn how to use the **Power Rear Gate.**

Power Rear Gate Button

Opening the Power Rear Gate

Press and hold the Power Rear Gate Button on the instrument panel to automatically open the rear gate. Two chirps sound and the hazard warning lights flash twice.

Stopping the Power Rear Gate

If you briefly press the Power Rear Gate Button while the rear gate is opening, it will stop. Press and briefly hold the button again to close the rear gate.

Power Rear Gate Button

Closing the Power Rear Gate

Press and hold the Power Rear Gate Button on the instrument panel to close the rear gate. If you briefly press the button while the rear gate is closing, it will open.

The operation of the Power Rear Gate is the same using the Power Rear Gate Button on the access key fob or transmitter.

NOTE: If the doors are locked when you operate the Power Rear Gate, you may hear three rapid beeps from the vehicle. In this case, unlock the doors and then operate the Power Rear Gate.

From the Rear of the Vehicle

Opening the Power Rear Gate

To open the rear gate, briefly press the Rear Gate Opener Button on the underside trim near the license plate, and the rear gate automatically opens.

Rear Gate Opener Button

Stopping the Power Rear Gate

If you briefly press the Power Rear Gate Close Button on the inside edge of the rear gate while the gate is opening, it will stop. Press the button again to close the rear gate.

Closing the Power Rear Gate

To close the rear gate, briefly press the Power Rear Gate Close Button on the inside edge of the rear gate. If you press the button while the gate is closing, it will open.

Power Rear Gate Close Button

Power Rear Gate Lock

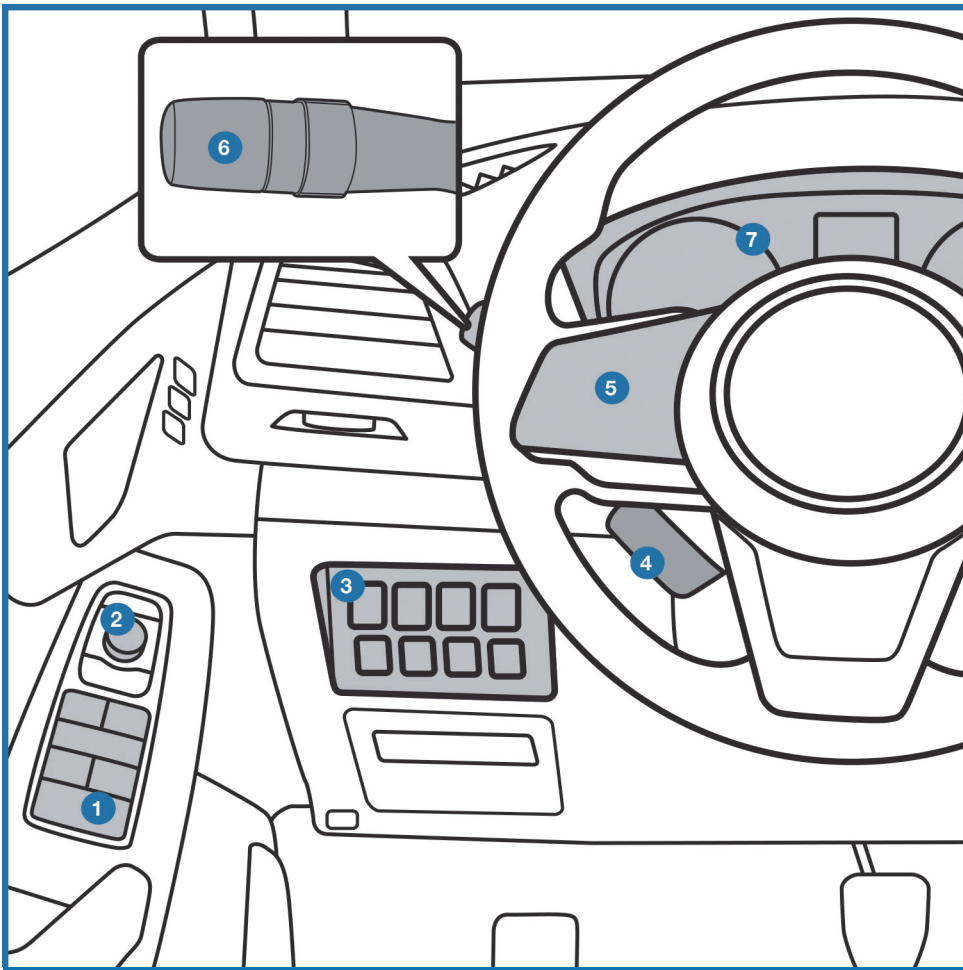

Press the lock button on the inside edge of the rear gate. The Power Rear Gate will close, and all doors, the rear gate, and the fuel filler lid will lock.

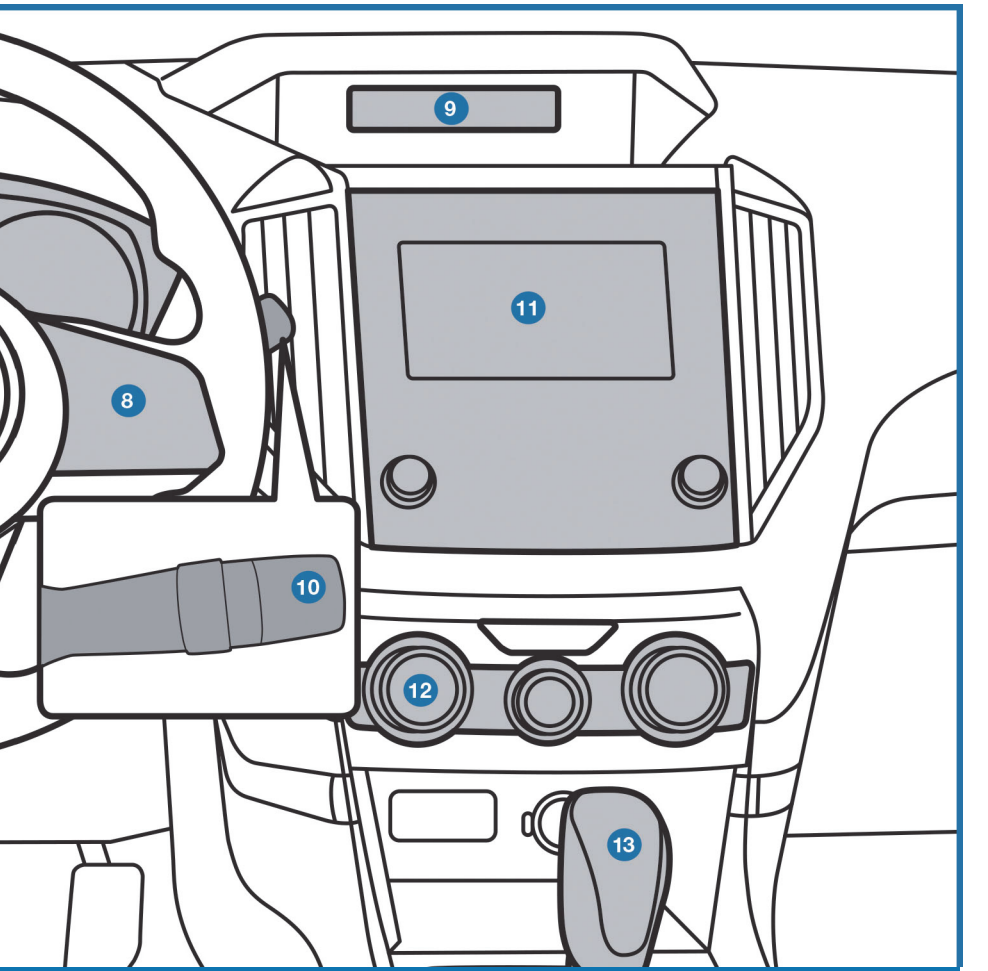

Power Rear Gate Close and Lock Button

The Power Rear Gate also comes equipped with a memory height function, allowing you to set the where the Power Rear Gate stops when it opens. For step by step instructions on setting the memory height, please refer to page 111 in this Getting Started Guide.

INSTRUMENT PANEL

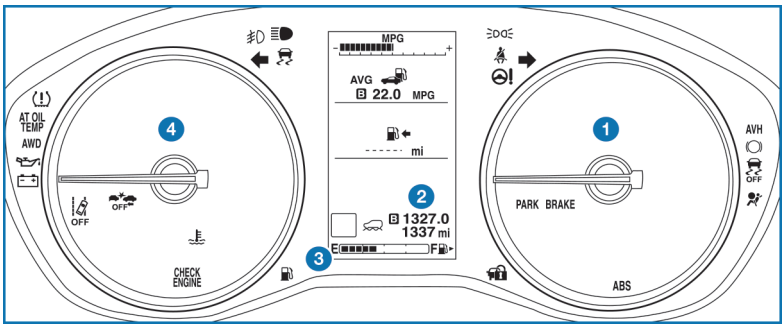

1. Power Windows (p. 29)
2. Power Exterior Mirrors (p. 28)
3. Instrument Panel Switches (p. 18)
4. i/Set Switch (p. 19)
5. Audio Controls (p. 18)
6. Light Controls (p. 20)
7. Combination Meter (p. 16)

8. Advanced Adaptive Cruise Control (p. 19)
9. Multi-Function Display (MFD) (p. 20)
10. Windshield Wipers (p. 22)
11. STARLINK® Multimedia Touchscreen (p. 59)
12. Climate Control System (p. 30)
13. CVT Select Lever (p. 39)

COMBINATION METER

1. Speedometer
2. Trip meter and odometer
3. Fuel gauge
4. Tachometer

WARNING AND INDICATOR LIGHTS

Red lights indicate immediate attention is required. Some examples are:

		
Seatbelt warning	Door open indicator	Brake system warning

Yellow lights indicate caution. Some examples are:

		
Low fuel	Engine low oil level warning	Tire pressure warning

Green and **blue** lights are for information. Some examples are:

		
Headlight indicator	Cold coolant temperature	High beam indicator

INSTRUMENT PANEL SWITCHES (LOWER LEFT)

The switches in the lower left of the instrument panel allow you to control several convenient and important features. Knowing their location and function will improve your driving experience.

1. Power Rear Gate (if equipped, p. 10)
2. Steering Responsive Headlights OFF (p. 100)
3. Power Rear Gate Memory Height (if equipped, p. 111)
4. Illumination Brightness (p. 21)
5. Vehicle Dynamics Control OFF (if equipped)
6. Auto Start-Stop OFF (p. 41)
7. Blind Spot Detection/Rear Cross Traffic Alert OFF (if equipped, p. 98)
8. Driver Monitoring System OFF (if equipped, p. 106)

For more information, please refer to your Owner's Manual.

AUDIO CONTROLS

1. Presets/Skip
2. Volume
3. Source
4. INFO
5. Call/Voice Recognition

For more information about your audio system and controls, please refer to page 62 in this Getting Started Guide or "Quick Guide" in your STARLINK® Owner's Manual.

ADVANCED ADAPTIVE CRUISE CONTROL

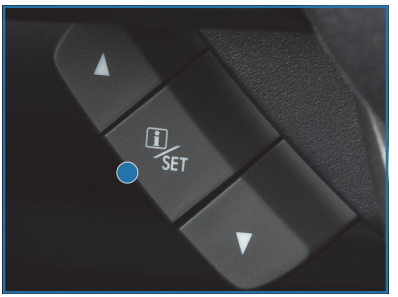

1. Adaptive Cruise Control On/Off
2. Lane Keep Assist
3. Increase Distance
4. Decrease Distance
5. Resume (RES)/Increase Speed and Set (SET)/Decrease Speed
6. SI-Drive

For more information on SI-Drive, please refer to page 40 in this Getting Started Guide or “Starting and Operating” in your Owner’s Manual.

For more information on Advanced Adaptive Cruise Control, please refer to page 93 in this Getting Started Guide or “Advanced Adaptive Cruise Control” in your EyeSight® Owner’s Manual.

i/SET SWITCH

The “i/Set” switch allows you to cycle through useful driving information in the Combination Meter Display such as fuel consumption, driving time, speed, and tire pressure. You can change the information displayed using the up and down arrows.

When the Menu Entering Screen is displayed, pull and hold the “i/Set” switch to enter the Menu Screen for the ability to modify a number of settings.

For more information about the Combination Meter Display, please refer to “Instruments and Controls” in your Owner’s Manual.

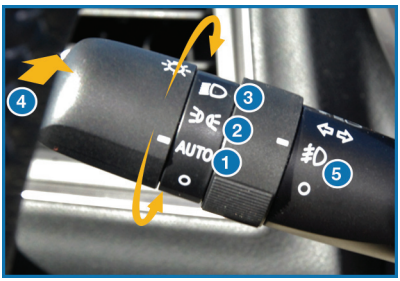

INFO SWITCH

Press the INFO switch to cycle through useful information in the Multi-Function Display (MFD). Navigate to the guidance screen and hold the INFO switch to access the settings menu and adjust a number of settings.

For more information about the Multi-Function Display, please refer to “Instruments and Controls” in your Owner’s Manual.

LIGHT CONTROLS

1. **AUTO:** Rotate the end of the lever to set your headlights to automatically turn on or off, depending on the level of light outside. When in the “AUTO” position, the headlights will automatically turn on when the windshield wipers operate several times.
   NOTE: The sensitivity of the automatic headlights can be adjusted through the STARLINK® multimedia display.
2. **Parking Lights:** Rotate the end of the lever to turn on the instrument panel illumination, parking lights, side marker lights, tail lights, and license plate lights.
3. **Headlights:** Rotate the end of the lever to turn on the headlights, instrument panel illumination, parking lights, side marker lights, tail lights, and license plate lights. To flash the headlights, pull the lever toward you, and then release. The high beams will stay on as long as you hold the lever.
4. **High Beams:** Push the lever forward to change from low beam to high beam. When set to the “AUTO” position, pushing the lever forward also activates the High Beam Assist (HBA) system. Pull the lever back to center to return to low beam.
5. **Fog Lights:** If equipped, rotate the dial to turn on the fog lights when the headlights are on low beams in the “ ” or “AUTO” position.

Illumination Brightness

When the light controls are on (in the “ ”, “ ”, or “AUTO” position), and ambient light is low, rotating the illumination brightness dial on the instrument panel upward will make the instrument panel illumination brighter. When the dial is fully rotated upward (dots aligned), the instrument panel illumination stays at full brightness. Rotating the dial downward dims the instrument panel illumination.

Illumination Brightness Dial

When the ambient light is bright, the illumination brightness is set to the maximum regardless of the position of the control dial.

For more information, please refer to “Instruments and Controls” in your Owner’s Manual.

Daytime Running Lights

The daytime running lights automatically turn on when the engine is running, the parking brake is fully released, the select lever is out of the “P” position, and the light switch is set to Off, “AUTO”, or “ ”. Always turn on the headlights when it’s dark outside by rotating the dial to the “ ” or “AUTO” position.

TURN SIGNALS

Push fully up for the right turn signal and fully down for the left turn signal. Your Subaru also has a one-touch lane changer feature: push slightly up and release to signal a right lane change or push slightly down and release to signal a left lane change.

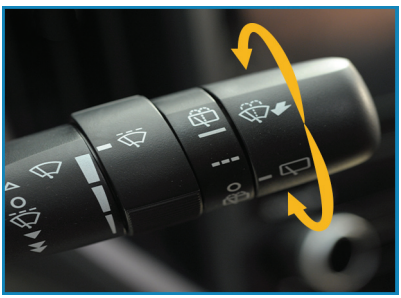

WINDSHIELD WIPERS

1. **Intermittent:** Push the wiper control lever down one position for intermittent operation. When the lever is in the intermittent position, you can rotate the dial to adjust the operating interval of the wipers.
2. **Low Speed:** Push the wiper control lever down two positions for low speed wiper operation.
3. **High Speed:** Push the wiper control lever down three positions for high speed wiper operation.
4. **Mist:** Push the wiper up from the off position for a single wipe.
5. **Windshield Washer:** Pull the lever toward you to wash the windshield. The washer will spray and the wipers will operate while you pull the lever.

REAR WINDOW WIPER

Rotate the end of the lever up one position for intermittent, or two positions for continuous operation.

When the lever in is the intermittent position, the wiper operates at intervals corresponding with vehicle speed. When you move the select lever to the “R” position, the wiper will switch to continuous operation. It will return to intermittent operation when you move the select lever out of “R”.

Rotate the dial up from the continuous operation position or down from the off position to spray washer fluid. The washer sprays and wiper operates until you release the dial, and then returns to the previous position.

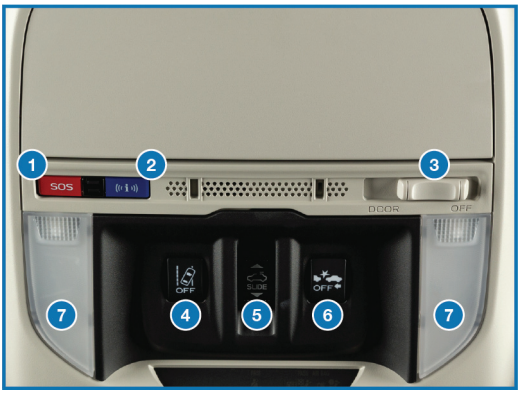

Rear-vision Camera Washer

To help keep your vision clear, your Subaru comes equipped with a Rear-vision Camera Washer. To clean the Rear-vision Camera, simply use the rear window washer, and a stream of washer fluid will aide in cleaning the camera.

For more information about the Rear-vision Camera and Rear-vision Camera Washer, please refer to page 96 in this Getting Started Guide or "Instruments and Controls" in your Owner's Manual.

OVERHEAD CONSOLE

1. **SOS Emergency Assistance (if equipped):** Press the red "SOS" button to connect with a SUBARU STARLINK® Customer Care Advisor (subscription required). Press and hold the button for about two seconds to cancel the call. The "i" button is also used for Concierge services, if subscribed.

   For more information, please refer to page 78 in this Getting Started Guide or "Introduction" in your SUBARU STARLINK® Safety and Security Owner's Manual.

2. **Enhanced Roadside Assistance (if equipped):** Press the blue "i" button to connect with a SUBARU STARLINK® Roadside Assistance Provider (subscription required). Press and hold the button for about two seconds to cancel the call.

   For more information, please refer to page 78 in this Getting Started Guide or "Introduction" in your SUBARU STARLINK® Safety and Security Owner's Manual.

3. **Automatic Illumination:** When the switch is in the “DOOR” position, the map lights illuminate when any door is opened, the doors are unlocked using the remote keyless entry system or keyless access function, or the ignition is turned from “ACC” to “LOCK”/“OFF”.

4. **Lane Departure Warning OFF Switch:** Press and hold this switch for two seconds to turn off Lane Departure Warning and Lane Sway Warning. Press and hold the switch again for two seconds to turn the systems back on.

   For more information, please refer to page 94 in this Getting Started Guide or “Lane Departure Warning” in your EyeSight® Owner’s Manual.

5. **Power Moonroof Switch:** Operate this switch to open and close moonroof.

   For more information, please refer to page 30 in this Getting Started Guide or “Keys and Doors” in your Owner’s Manual.

6. **Pre-Collision Braking System OFF Switch:** Press and hold this switch for two seconds to turn off the Pre-Collision Braking System (including Pre-Collision Brake Assist and, if equipped, Automatic Emergency Steering) and Pre-Collision Throttle Management. Press and hold the switch again for two seconds to turn the systems back on.

   For more information, please refer to page 95 in this Getting Started Guide or “Pre-Collision Braking System” in your EyeSight® Owner’s Manual.

7. **Map Lights:** Press a map light to turn it on or off.

SEATING

Manual Seats

1. **Forward/Backward:** Pull the lever below the seat up and slide the seat forward or backward. Release the lever and make sure the seat is locked into place.
2. **Seat Height (Driver's Seat):** Pulling up or pushing down on the lever will raise or lower the seat cushion.
3. **Recline Seatback:** Pull the lever up to adjust the seatback. Release the lever and make sure the seatback is locked into place.

Manual Seat Levers

Power Driver's Seat (if equipped)

Power Seat Controls

1. **Seat Position:** Moving the switch forward or backward will adjust the seat in that direction. Pulling up or pushing down on the back of the switch will adjust the seat height up or down. Pulling up or pushing down on the front of the switch will adjust the angle of the seat cushion.
2. **Recline Seatback:** Moving the top of the switch forward or backward will adjust the angle of the seatback.
3. **Lumbar Support:** Press the front side of the switch to increase lower back support. Press the rear side of the switch to decrease support.

If equipped, your Subaru can be programmed to automatically recall your preferred Power Driver's Seat and exterior mirror positions. For step by step instructions on setting the Power Memory Seat, please refer to page 113 in this Getting Started Guide.

Memory Seat Buttons

Head Restraint Adjustment

Pull the head restraint up to raise it to the first position. To raise it farther, press the release button on top of the seatback while raising the head restraint. To lower the head restraint, push it down while pressing the release button. Each head restraint should be adjusted so that the center of the head restraint is closest to the top of the occupant's ears.

Release Button and Head Restraint Adjustment

The angle of the front head restraints can be adjusted by tilting them forward. You will hear a click when the restraint locks in place. Pulling the head restraint as far forward as it will go allows it to return to the fully upright position.

Seatbelt Adjuster

To keep yourself comfortable and safe, always position the seatbelt adjuster so the shoulder belt passes over the middle of your shoulder without touching your neck. Pull the tab out and slide the adjuster up or down to set the position. Release the tab and make sure the adjuster is locked in place.

Seatbelt Adjustment Tab

TILT AND TELESCOPIC STEERING COLUMN

You can adjust both the height and lengthwise position of the steering wheel. Pull the lever on the steering column down firmly to unlock, and then adjust the position of the steering wheel. Push the lever firmly back up to lock the steering wheel in place.

Steering Column Unlock

POWER EXTERIOR MIRRORS

The power mirror knob works with the ignition in the “ON” or “ACC” position. Turn the knob to “L” (left side) or “R” (right side) to select a mirror. Push the knob in the direction you want to move the mirror. Turn the knob back to the center position when finished.

Power Mirror Knob

Auto Tilt-down Mirror (if equipped)

The passenger side mirror will automatically tilt down when you move the select lever to the "R" position, giving better visibility when backing up. The mirror returns to its normal position a few seconds after you move the select lever out of the "R" position. You can turn the tilt-down mirror off or on in the Combination Meter Display (CMD).

REAR VIEW MIRROR

Auto-dimming Mirror (if equipped)

The auto-dimming function senses distracting glare during nighttime driving and automatically dims to eliminate the glare and preserve your vision. Press the switch to turn auto-dimming on or off. A green LED indicator illuminates when the function is on.

HomeLink® 5 Accessory Mirror (if equipped)

The HomeLink® 5 accessory mirror provides three buttons to replace devices such as garage door openers, gate openers, entry door locks, security systems, and home lighting. The “Instruments and Controls” chapter in your Owner’s Manual provides programming instructions, and **www.subaru.com/homelink** has a helpful “how to” video.

NOTE: HomeLink® 5 may not be compatible with some older door openers or additional equipment may be required.

Scan to learn more about **HomeLink®**.

POWER WINDOWS

To open or close a window, partially press down or pull up and hold the corresponding switch. The driver’s window has a one-touch auto up/down function, and the front passenger’s window may also have an auto up/down function, if equipped. Fully press down or pull up and release to automatically open or close a one-touch window.

POWER MOONROOF (if equipped)

The moonroof operates with the ignition in the “ON” position.

1. **Opening:** Press, briefly hold, and release the switch to automatically open the moonroof. This also automatically opens the sunshade if it is closed.

   The moonroof will stop slightly before the fully-open position to reduce wind noise. Press, briefly hold, and release the switch again to fully open it.

2. **Closing:** Press, briefly hold, and release the switch to close the moonroof.

To stop the moonroof partway while opening or closing, press either side of the switch.

CLIMATE CONTROL

Automatic Climate Control

Set your desired temperature and let the system automatically make the adjustments for you. At any time, you can manually take control of the climate settings.

Operation in Automatic Mode

1. **Automatic Control Button:** This system automatically controls all of the climate system except defogging. Press “AUTO” to activate. Press the “ON/OFF” button to turn off the system.
2. **Temperature Control Dial:** Turn the dial clockwise to increase the temperature or counterclockwise to decrease the temperature. The temperature will appear on the Multi-Function Display (MFD).

When using automatic mode, the fan speed, airflow distribution, air-inlet control and air conditioning compressor are controlled automatically. To activate:

1. Press the “AUTO” button. The “FULL AUTO” indicator light illuminates on the Multi-Function Display (MFD).
2. Set the preferred temperature using the temperature control dial.

If you operate any of the buttons other than the “ON/OFF” button, rear window defogger button, or the temperature control dial, the “FULL” indicator light will turn off. The “AUTO” light will remain illuminated. You can then manually control the system as desired. Press the “AUTO” button to change back to “FULL AUTO” mode.

Operation in Manual Mode

3. **Air Conditioner Button:** Press this button to activate or deactivate the air conditioning.
4. **MAX A/C Button:** Press this button for quickest cooling.
5. **Airflow Mode Selection Dial:** Turn the dial to select the desired airflow mode. The selected mode – ventilation, ventilation 2, bi-level, feet, or feet-defrost – is shown on the display.

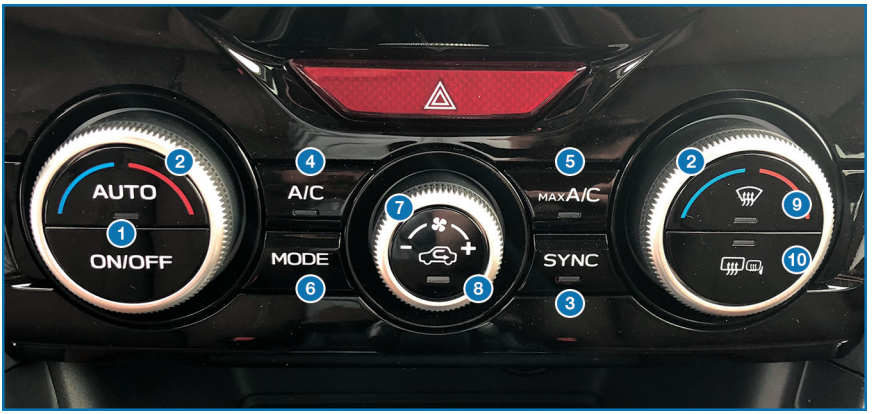

ICON	MODE	FUNCTION
	**Ventilation**	Instrument panel outlets
	**Ventilation 2**	Instrument panel outlets and less foot outlets than bi-level
	**Bi-Level**	Instrument panel outlets and foot outlets

ICON	MODE	FUNCTION
	**Feet**	Foot outlets, both side outlets of the instrument panel and some through windshield defroster outlets
	**Feet-Defrost**	Windshield defroster outlets, foot outlets and both side outlets of the instrument panel
	**Defrost**	Windshield defroster outlets and both side outlets of the instrument panel

NOTE: The defroster button is used to activate the defrost airflow mode.

6. **Fan Speed Control Dial:** Turn the fan speed control dial to increase or decrease fan speed.
7. **Recirculated/Outside Air Button:** Press this button to prevent outside air from entering your Subaru. Press the button again to allow outside air into your Subaru.
   NOTE: To prevent windshield fogging, do not remain in the recirculated mode for an extended period of time.
8. **Defroster Button:** Press this button to defrost or dehumidify the windshield and front door windows.
   NOTE: When the defrost mode is selected, the air conditioning compressor operates to defrost the windshield more quickly. However, the indicator on the air conditioner button may not illuminate.
9. **Rear Window Defogger Button:** Press this button to turn on the rear window defogger. If equipped, the outside mirror defogger and windshield wiper deicer will also activate. It will automatically turn off after about 15 minutes. If the window clears before then, press the button again to turn the defogger off. You can customize this function for continuous operation through the Combination Meter Display (CMD) or the STARLINK® Touchscreen by selecting “Settings” then “Vehicle”.

Dual—Zone Automatic Climate Control (if equipped)

You can set separate temperatures for the driver and front passenger. Set your desired temperature and let the system automatically make the adjustments for you. At any time, you can manually take control of the climate settings.

Operation in Automatic Mode

1. **Automatic Control Button:** This system automatically controls all of the climate system except defogging. Press “AUTO” to activate. Press the “ON/OFF” button to turn off the system.
2. **Temperature Control Dial:** Turn the dial clockwise to increase the temperature or counterclockwise to decrease the temperature. The temperature will appear on the screen. You can adjust separate temperature settings for the driver’s side and passenger’s side.

   If equipped with DriverFocus®, the temperature setting can also be changed with the gesture control function. For more information, please refer to page 105 in this Getting Started Guide or “Starting and Operating” in your Owner’s Manual.
3. **SYNC Button:** Press the button to synchronize the driver's and front passenger's temperatures to the driver’s temperature control dial.

When using automatic mode, the fan speed, airflow distribution, air-inlet control and air conditioning compressor are controlled automatically. To activate:

1. Press the “AUTO” button. The “FULL AUTO” indicator light illuminates on the Multi-Function Display (MFD).
2. Set the preferred temperature using the temperature control dial.

If you operate any of the buttons other than “ON/OFF”, rear window defogger, “SYNC”, or the temperature control dial, the “FULL” indicator light will turn off. The “AUTO” light will remain illuminated. You can then manually control the system as desired. Press the “AUTO” button to change back to “FULL AUTO” mode.

4. **Air Conditioner Button:** Press this button to activate or deactivate the air conditioning.
5. **MAX A/C Button:** Press this button for quickest cooling.
6. **Airflow Mode Selection Button:** Press the button to select the desired airflow mode. The selected mode – ventilation, ventilation 2, bi-level, feet, feet-defrost or defrost – is shown on the display.

ICON	MODE	FUNCTION
	**Ventilation**	Instrument panel outlets
	**Ventilation 2**	Instrument panel outlets and less foot outlets than bi-level
	**Bi-Level**	Instrument panel outlets and foot outlets
	**Feet**	Foot outlets, both side outlets of the instrument panel and some through windshield defroster outlets
	**Feet-Defrost**	Windshield defroster outlets, foot outlets and both side outlets of the instrument panel
	**Defrost**	Windshield defroster outlets and both side outlets of the instrument panel

NOTE: The defroster button is used to activate the defrost airflow mode.

7. **Fan Speed Control Dial:** Turn the fan speed control dial to increase or decrease fan speed.

8 **Recirculated/Outside Air Button:** Press this button to prevent outside air from entering your Subaru. Press the button again to allow outside air into your Subaru.
NOTE: To prevent windshield fogging, do not remain in the recirculated mode for an extended period of time.

9 **Defroster Button:** Press this button to defrost or dehumidify the windshield and front door windows.
NOTE: When the defrost mode is selected, the air conditioning compressor operates to defrost the windshield more quickly. However, the indicator on the air conditioner button may not illuminate.

10 **Rear Window Defogger Button:** Press this button to turn on the rear window defogger. If equipped, the outside mirror defogger and windshield wiper deicer will also activate. It will automatically turn off after about 15 minutes. If the window clears before then, press the button again to turn the defogger off. You can customize this function for continuous operation through the Combination Meter Display (CMD) or the STARLINK® Touchscreen by selecting “Settings” then “Vehicle”.

Remote Engine Start with Climate Control (if equipped)

MYSUBARU

This feature can also be set through **MySubaru.com** or the **MySubaru App**

MySubaru App

MySubaru.com

You can remotely start your Subaru and adjust the temperature using the STARLINK® Safety and Security features through the **MySubaru** App (subscription required). Please refer to “SUBARU STARLINK Features” in your SUBARU STARLINK® Safety and Security Owner's Manual for a list of required vehicle conditions for this feature.

Heated Seats (if equipped)

The heated seat switches are located between the driver and passenger seats. There is a separate switch for the driver and passenger. Press the “HI” button for more rapid heating or press the “LO” button for normal heating. Return the switch to the center position to turn off the heated seat.

Heated Seat Switches

Rear Heated Seats (if equipped)

There are separate heated seat switches for each side on the rear center console. Press the switch to activate the heated seat. The heating mode changes to High, Low, and Off each time you press the switch, and yellow indicators illuminate indicating the level.

Heated Steering Wheel (if equipped)

To activate, pull the heated steering wheel switch with the ignition in “ON” or “ACC”. The indicator light on the switch illuminates. To deactivate, pull the switch again. The heater will stay on for approximately 30 minutes.

ACCESSORY CONNECTIONS

Connection Ports

1 Auxiliary Input Jack:

The 3.5mm auxiliary input jack is located below the climate control dials. You can connect a portable music player to the auxiliary jack and hear the music stored on it through your multimedia system. Press the "Source" button located on the steering wheel or the "Media" button on the Touchscreen to select the auxiliary mode.

For more information, please refer to page 70 in this Getting Started Guide or "Audio" in your STARLINK® Owner's Manual.

2 Dual USB Ports:

The USB ports are located below the climate control dials and, if equipped, on the center console in the rear seat area. You can connect a variety of USB-equipped devices to the front ports, such as portable music players or smartphones, to enjoy your favorite music through your multimedia system or connect to Apple CarPlay® or Android Auto™. All ports provide charging (5V, 2.1A) to devices. The ports on the rear center console are for charging only.

For more information, please refer to page 70 in this Getting Started Guide or "Audio" in your STARLINK® Owner's Manual.

For more information and setup instructions, please refer to page 122 for Android Auto™ and page 123 for Apple CarPlay® in the How To Appendix in this Getting Started Guide.

3 Power Outlets:

Power outlets (12V) are located below the climate control dials, in the center console, and in the cargo area behind the rear seats. Electrical power is available for use with in-vehicle electrical appliances with a maximum power rating of 120W. These outlets cannot be used to connect to the SUBARU STARLINK® Multimedia System.

For more information, please refer to "Interior Equipment" in your Owner's Manual.

IGNITION SWITCH

The ignition switch has four positions:

LOCK: You can only insert or remove the key in this position.

ACC (Accessory): Provides power to the audio system and accessory power outlets.

ON: All electrical systems are available. The key returns to this position after starting the engine.

START: Turn the key to this position to start the engine.

PUSH-BUTTON IGNITION SWITCH (if equipped)

Each time you press the ignition switch without depressing the brake pedal, the ignition position will change as follows: ACC, ON, OFF.

ACC (Accessory): Provides power to the audio system and accessory power outlets. Orange indicator illuminates.

ON: All electrical systems are available. Orange indicator illuminates.

OFF: Power off and indicator off.

STARTING THE VEHICLE

Without Push-button Ignition

To start the engine:

1. Make sure the select lever is in the “P” position.
2. Using the key, turn the ignition switch to “START”.

NOTE: Do not depress the accelerator pedal. Release the key as soon as the engine starts.

With Push-button Ignition

To start the engine:

1. Sit in the driver’s seat with the access key fob.
2. Make sure the select lever is in the “P” position.
3. Depress the brake pedal.
4. When the Engine START/STOP button indicator turns green, briefly press and release the Engine START/STOP button.

DRIVING THE VEHICLE

Automatic Transmission Shift Mode

CVT Select Lever

The Continuously Variable Transmission (CVT) is electronically controlled and provides two different driving mode combinations: normal and manual or normal and low.

Normal Mode

When the select lever is in the “D” (Drive) position, the transmission is in normal shift mode. The select lever position indicator in the Combination Meter Display (CMD) shows “D” and the transmission automatically shifts into a suitable forward gear.

Low Mode (if equipped)

Low Mode is for using engine braking when going downhill, etc. Moving the select lever left into the “L” position from the “D” (Drive) position causes the transmission to change into Low Mode. The shift position indicator shows “L” as the selected gear.

Manual Mode (if equipped)

In manual mode, you select the desired gear position to obtain necessary acceleration and engine braking. Move the select lever left from the “D” position into the “M” position to select manual mode. The gear position indicator in the Combination Meter Display (CMD) shows the currently selected gear. Arrow-shaped indicators show when upshifting or downshifting is available. To shift, use the paddle shift control switches behind the steering wheel.

Manual Mode gear positions are available in the following ranges:

- Forester (Vehicles Equipped Except Wilderness): 7-Speed Manual Mode
- Forester (Wilderness): 8-Speed Manual Mode

Paddle Shift Control Switches (if equipped)

You can shift gears using the paddle shift control switches. To upshift to the next higher gear, pull the "+" paddle on the right toward you. To downshift to the next lower gear, pull the "–" paddle on the left toward you.

You can temporarily shift gears even when the select lever is in the "D" position by pulling either the "+" or "–" paddle toward you. Once vehicle speed stabilizes, the transmission will switch back to normal mode.

SI-Drive

Subaru Intelligent Drive (SI-Drive) has 2 possible mode combinations: Intelligent (I) and Sport (S) or Intelligent (I) and Sport Sharp (S#). Each mode is designed for different types of driving:

SI-Drive Switches

Intelligent:

The Intelligent (I) mode provides well balanced performance with greater fuel efficiency and smooth driveability without stress. Power delivery is moderate during acceleration for maximum fuel efficiency.

Sport:

The Sport (S) mode provides the engine power desired by those who want to make the driving experience their own personal adventure.

Sport Sharp:

The Sport Sharp (S#) mode offers an exhilarating level of engine performance and control. The throttle becomes more responsive regardless of the engine speed. Delivering maximum driving enjoyment, this mode is ideal for driving on twisting roads and for merging or overtaking other vehicles on the freeway with confidence.

AUTO START–STOP

The Auto Start-Stop system is designed to automatically stop and restart the engine when the vehicle is stationary for a short period of time after the engine has warmed up (while waiting for a traffic light or in a traffic jam, for example). The system operates in order to reduce fuel consumption, exhaust emissions, and undesired idling noise. You can learn more about using the Auto Start-Stop system from the how-to video linked in the QR code and from the following sections.

Scan to learn how to use **Auto Start-Stop.**

Auto Start-Stop System ON/OFF

If the Auto Start-Stop OFF switch is pressed, operation of the Auto Start-Stop system will be disabled.

NOTE: The system will default to ON once the vehicle has been shut off.

Auto Start-Stop Switch

The Auto Start-Stop indicator light on the combination meter illuminates in yellow when the system is disabled. If the switch is pressed once more, the Auto Start-Stop system will reactivate, and the Auto Start-Stop indicator light will turn off.

System Operation

So that it can be used safely and comfortably, the Auto Start-Stop system is designed to constantly monitor vehicle conditions, the environment inside and outside the vehicle, as well as driver operations, in order to control stopping and restarting the engine.

After the vehicle has been completely stopped by depressing the brake pedal with the select lever in the “D” position, the engine will be automatically stopped and the green indicator will illuminate in the combination meter.

If you release the brake pedal with the select lever kept in the “D” position, the engine will be automatically restarted. The indicator light will turn off when the system restarts the engine.

There are several operating conditions for this system to operate as intended.

For more information, please refer to “Starting and Operating” in your Owner’s Manual.

Auto Start-Stop Screen

You can use the “i/Set” and arrow switches to display the Auto Start-Stop Screen in the Combination Meter Display (CMD), showing how much time the engine was off in the top line and the amount of fuel saved in the bottom line. Displayed are the total stop time and fuel saved since the trip meter was reset.

No Activity Detected Indicator Light

If the operational conditions are not met when the vehicle is stopped, the engine will not stop and the white Auto Start-Stop No Activity Detected indicator light will illuminate. It will turn off when the brake pedal is released.

Auto Start-Stop Warning Light

The Auto Start-Stop warning light will illuminate in yellow when initially turning the ignition switch to the “ON” position. The light will turn off after the engine has started.

NOTE: If the Auto Start-Stop warning light does not turn off after the engine has started or is flashing, the Auto Start-Stop system may be malfunctioning. We recommend that you contact your authorized Subaru Retailer for an inspection.

INDICATOR	PATTERN	CONDITION
	Solid green	This indicator light illuminates when the engine has been temporarily stopped by the Auto Start-Stop system. It will turn off when the engine is restarted.
	Solid White	Operational conditions have not been met, the engine will not stop and this light will illuminate. The light turns off once the brake pedal is released.
	Solid Yellow	This light indicates that the system has been turned off. The light will turn off once the system is turned back on.
	Flashing Yellow	A fault has been detected with the Start-Stop system. Please contact your authorized Subaru Retailer.

ELECTRONIC PARKING BRAKE (EPB)

To apply the parking brake, depress the brake pedal and pull the parking brake switch up. The indicator light on the parking brake switch will illuminate and “PARK” will appear in the Combination Meter.

To release the parking brake manually, depress the brake pedal and push the parking brake switch down with the ignition in the “ON” position. To automatically release the parking brake, gently press the accelerator pedal with the select lever in the “D” or “R” position.

NOTE: Automatic parking brake release will not work unless all the doors are closed and your seatbelt is fastened.

Auto Vehicle Hold (AVH)

Auto Vehicle Hold gives your feet a break by automatically holding your Subaru in place when at a complete stop, such as a traffic signal, even after you release the brake pedal. Press the Auto Vehicle Hold switch on the center console to turn on the function. The AVH indicator in the combination meter will illuminate.

While your Subaru is being held by this function, the operation indicator in the combination meter will illuminate. The function is canceled when you depress the accelerator pedal or the brake pedal.

Press the switch again to turn it off. The function works when the select lever is in a position other than the “P” position.

NOTE:

- For this system to work your seatbelt must be fastened.
- Make sure to turn off this function before entering an automatic car wash.

ICON	MODE
AVH	Auto Vehicle Hold ON
	Auto Vehicle Hold IN OPERATION

X-MODE® (if equipped)

X-MODE® Multi-Function Display

X-MODE® is the integrated control system of the engine, All Wheel Drive, and Vehicle Dynamics Control (VDC) systems for driving with bad road conditions. Using X-MODE®, you can drive more comfortably even in slippery road conditions, such as mud or snow, including uphill and downhill. You can activate the system when the vehicle speed is less than 12 mph. If the vehicle speed reaches 25 mph or more with X-MODE® active, the system is automatically deactivated. X-MODE®, and Hill Descent Control, will automatically reactivate when the vehicle speed drops below 22 mph.

X-MODE® Standard System

To activate the X-MODE® system, press the X-MODE® switch. While the system is active, the X-MODE® indicator appears, and the Multi-Function Display shows vehicle posture and function operation status. To deactivate X-MODE®, press the X-MODE® switch again.

X-Mode® Indicator

In certain situations, such as navigating a vehicle stuck in mud or snow, it may be helpful to allow more wheel spin by turning off the Vehicle Dynamics Control (VDC) system. To turn off the VDC system, turn the Vehicle Dynamics Control OFF switch to the left. Turn the Vehicle Dynamics Control OFF Switch back to “Normal” to reactivate the VDC system.

Standard

X-MODE® Dual Mode System

To activate the X-MODE® system, turn the switch to the left for SNOW/DIRT or to the right for D.SNOW/MUD. While the system is active, the X-MODE® indicator appears, and the Multi-Function Display shows vehicle posture and function operation status. To deactivate X-MODE®, press the X-MODE® switch.

Dual Mode

- SNOW/DIRT is suitable for driving on slippery road surfaces such as snow or gravel, where the points of contact between the tires and road surface are visible.

Snow/Dirt Indicator

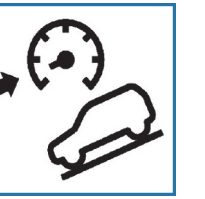

- D.SNOW/MUD provides maximum torque from the engine and the optimal amount of slip in the driving wheels, enabling the vehicle to free itself more effectively. It is suitable for driving on roads where the tires can become buried, such as deep snow, dry sand, or muddy roads.

Deep Snow/Mud Indicator

Hill Descent Control (HDC)

The Hill Descent Control function helps maintain a consistent vehicle speed when driving down steep hills or declines. HDC is automatically activated and set in standby mode when X-MODE® is activated. The Hill Descent Control Indicator appears when in standby mode, and the indicator will flash when HDC is operating.

Hill Descent Control Indicator

TURNING OFF THE VEHICLE

Without Push-button Ignition

To stop the engine:

1. Stop your Subaru completely.
2. Move the select lever to the “P” position.
3. Turn the ignition switch to LOCK/OFF.

NOTE: If equipped, the windows will remain active for about 40 seconds or until a front door is opened, whichever occurs first.

With Push-button Ignition

To stop the engine:

1. Stop your Subaru completely.
2. Move the select lever to the “P” position.
3. Press the ignition switch to stop the engine.

NOTE: If equipped, the windows will remain active for about 40 seconds or until a front door is opened, whichever occurs first.

FUEL FILLER LID

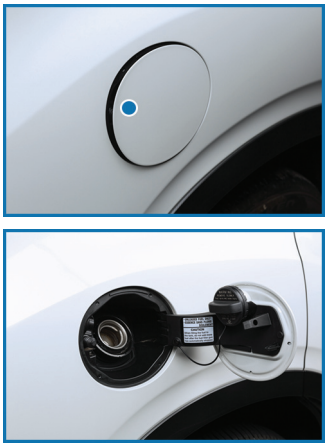

The fuel filler lid is located toward the rear of the passenger side. To open the lid:

1. Make sure your Subaru is stopped and the select lever is placed in the “P” position. Then, turn the ignition to the off position.
2. The fuel filler lid is unlocked by using the unlock switch in the door, access key fob, or door handles.
3. Push the rear side of the lid.
4. When the lid opens slightly, open it further by hand.

While refueling, place the fuel filler cap on the cap holder inside the lid.

After refueling, put the cap back on and turn it clockwise until you hear a clicking noise. Be certain not to catch the tether under the cap while tightening.

To close the lid, press it until you hear it latch.

Fuel Filler Lid and Cap

NOTE: The Check Engine warning light may illuminate if the fuel filler cap is not tightened properly.

FUEL SPECIFICATIONS AND CAPACITY

2.5L Engine Fuel Specifications and Capacity

Fuel Octane Rating	87 AKI or higher
Ethanol Content Limit	No more than 10%
Fuel Tank Capacity	16.6 US Gallons
Low Fuel Warning Light	2.5 US Gallons Appx.

FOLDING THE REAR SEATS

First, lower the headrests. Then, pull up on the release knob until you can see the red marker at the bottom of the knob and fold down the seats.

To return the seatback to its original position, raise the seatback until it locks into place. You will no longer be able to see the red marker at the bottom of the knob when the seat is locked.

Seat Release Knob

If equipped, release latches are located on either side of the cargo area. Pull the release latch on the seat side that you want to fold down.

Seat Release Latch

CHILD SAFETY LOCKS

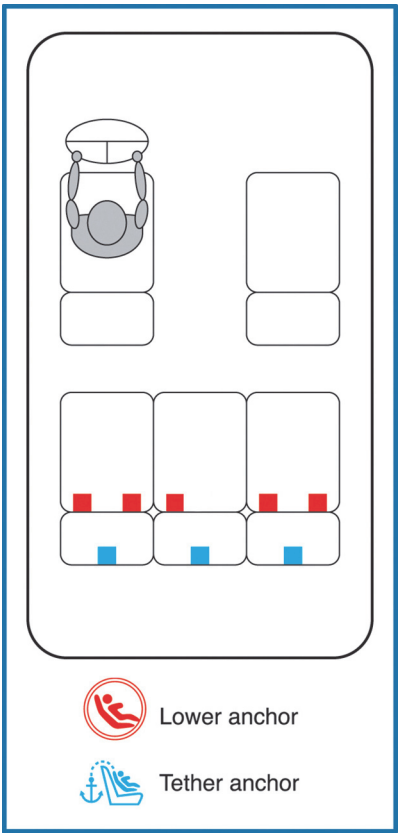

The child safety locks are located on the inside edges of the rear doors. In the locked position, the rear doors can only be opened from the outside.

LATCH/ANCHOR

Your Subaru is equipped with Lower Anchors and Tethers for Children (LATCH). For maximum safety, first carefully read the LATCH system instructions from the device manufacturer, as well as the installation instructions in your Owner's Manual, to properly install the LATCH compatible restraint system. Use the appropriate seatbelts or anchorages provided in your Subaru. Children age 12 and under must properly occupy the rear seat at all times.

For more information, please refer to "Seat, Seatbelt and SRS Airbags" in your Owner's Manual.

REAR SEAT REMINDER

The Rear Seat Reminder system assists you in preventing a child or pet from being left in your Subaru, prompting you to confirm the presence of passengers and cargo in the rear seats. The system monitors the opening and closing of the rear doors. It does not physically sense the presence of a child or pet.

The system activates when the rear doors are opened and closed. When the ignition switch is turned from the “ON” position to the “OFF” position, the system warns you with audible beeps and with a “Reminder, Look in Rear Seat” message in the Combination Meter Display (CMD).

You can turn the Rear Seat Reminder off in the Combination Meter Display (CMD).

Passenger Occupant Detection and Seatbelt Reminders

To help keep your passengers safe, your Subaru has a passenger occupant detection and seatbelt reminder system for each seat, including the rear seats.

If passengers in the rear seats do not fasten their seatbelts while the ignition is in the "ON" position, the seatbelt warning lights illuminate or blink for the specific seat, and a warning chime may sound.

For more information, please refer to “Instruments and Controls” in your Owner’s Manual.

CARGO AREA AND COVER (if equipped)

The cargo area is equipped with several tie-down hooks to secure your cargo with a cargo net or ropes and also has convenient hooks attached to the rear gate trim and upper lining of the cargo area to hang lightweight objects when the vehicle is stopped.

If equipped, use the detachable cargo cover to protect contents in the cargo area from direct sunlight. Pull the cover toward the rear of your Subaru and insert both ends of the cover into the catches. Store the cover under the floor of the cargo area when not in use. Instructions for operation are included on the cargo cover housing.

Cargo Area and Cover

SPARE TIRE AND JACK

A jack and other maintenance tools are stored in the tool bucket in the center of the spare tire, located under the cargo area floor.

Your vehicle is equipped with the following maintenance tools:

- Jack
- Jack handle
- Screwdriver
- Towing hook (eye bolt)
- Wheel nut wrench

For more information, please refer to “In Case of Emergency” in your Owner’s Manual.

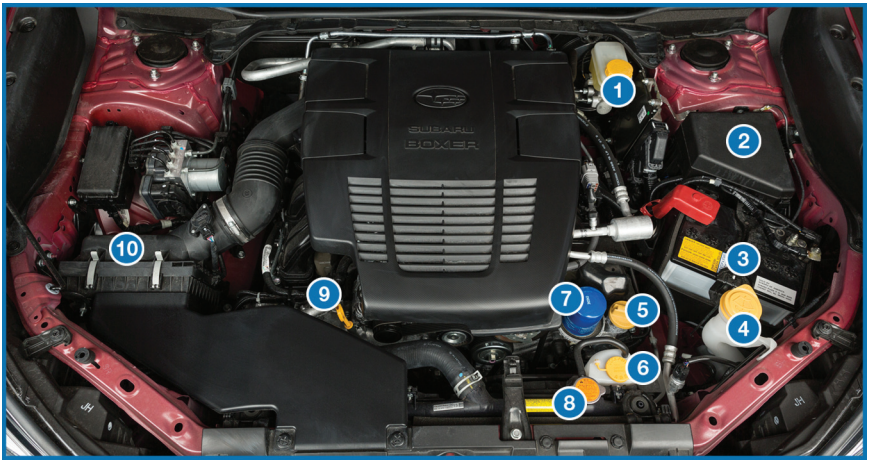

HOOD PROP

The hood prop is located in the left front of the engine compartment. Unfold it and insert the end into the slot marked with an arrow.

ENGINE COMPARTMENT

2.5 L ENGINE

1. Brake Fluid Reservoir
2. Fuse Box
3. Battery
4. Windshield Washer Tank
5. Engine Oil Filler Cap
6. Engine Coolant Reservoir
7. Engine Oil Filter
8. Radiator Cap
9. Engine Oil Dipstick
10. Air Cleaner Element

The table below lists recommended first service items. Your maintenance needs may vary depending on your driving conditions. Please consult with your retailer and refer to the Warranty and Maintenance Booklet for complete information and recommended replacement intervals.

Maintenance Item	Maintenance Interval	
	6 months or 6,000 Miles	12 months or 12,000 Miles
Replace Engine Oil and Filter	•	•
Rotate and Inspect Tires	•	•
Replace HVAC System A/C filter		•
Inspect Brake System, Steering System, and Suspension Components		•

NEW VEHICLE BREAK-IN

The performance and long life of your Subaru are dependent on how you handle and care for your Subaru while it is new.

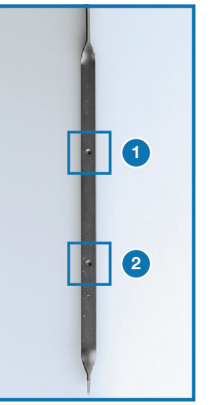

Follow these instructions during the first 1,000 miles:

- Do not race the engine.
- Do not allow the engine speed to exceed 4,000 rpm except in an emergency.
- Do not drive at one consistent engine or vehicle speed for a long time, either fast or slow.
- Avoid starting suddenly and rapid acceleration, except in an emergency.
- Avoid hard braking, except in an emergency.

ENGINE OIL SPECIFICATIONS & CAPACITIES

Only use 0W-20 Synthetic Engine Oil. For further details regarding oil specifications and capacities, please refer to “Engine Oil” in the “Specifications” chapter in your Owner’s Manual.
4.4 US quarts (during oil and filter change).

When the level is at the "low" mark, add approximately 1.1 quarts of engine oil in through the filler cap to bring the oil level to the “full” mark. For filler cap location see the engine compartment on page 54.

1. Full Level
2. Low Level

ADDITIONAL SPECIFICATIONS

ROOF RAIL / CROSS BAR CAPACITY (if equipped)

	Cross Bars Dynamic (if equipped)	Roof Rails Dynamic	Roof Rails Static
Forester (Except Wilderness)	150 Pounds	176 Pounds	700 Pounds
Forester (Wilderness)	150 Pounds	220 Pounds	800 Pounds

For more information, please refer to “Driving Tips” in your Owner’s Manual.

TRAILER TOWING CAPACITY

Forester (Except Wilderness)	
Maximum total trailer weight*	Maximum tongue weight*
1,500 pounds	150 pounds

Forester (Wilderness)	
Maximum total trailer weight*	Maximum tongue weight*
3,000 pounds	300 pounds

*Towing a trailer with brakes.

NOTE:

- For models equipped with the BSD (Blind Spot Detection) and RCTA (Rear Cross Traffic Alert) driving support systems, when towing a trailer, it may be necessary to press the BSD/RCTA OFF switch to deactivate the system. The system may not operate as expected due to obstruction of the radar waves. For details about the BSD/RCTA OFF switch, refer to page 99 in this Getting Started Guide and/or “Starting and Operating” in your Owner’s Manual.
- For models equipped with the RAB (Reverse Automatic Braking) driving support system, when towing a trailer, it may be necessary to press the RAB button to deactivate the system. The system may not operate as expected due to obstruction of the sonar waves. For details about the RAB button, refer to page 100 in this Getting Started Guide and/or “Starting and Operating” in your Owner’s Manual.

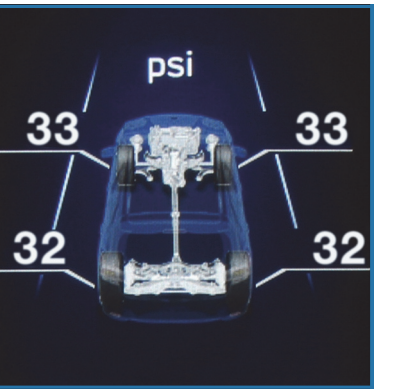

Please refer to “Driving Tips” in your Owner’s Manual for complete details, especially if you plan to use this vehicle for regular towing.

TIRE PRESSURE MONITORING SYSTEM (TPMS)

Your Subaru has a Tire Pressure Monitoring System (TPMS) that tracks the pressure of each individual tire. You can learn more by scanning the QR code to see a video with tips and more information about your Subaru's TPMS.

Scan to learn more about the **Tire Pressure Monitoring System.**

The TPMS screen shows individual tire pressure in the Combination Meter Display. Use the "i/Set" switch to display the TPMS screen.

TPMS Screen

ADDITIONAL SPECIFICATIONS

Tire pressure specification is listed on the tire inflation pressure label located on the driver's side door pillar and in the following table. For complete tire pressure specifications and information, please refer to the tire specifications in your Owner's Manual.

Tire Inflation Pressure Label

Forester (Base), Premium

Tire Inflation Pressure		
Front Wheel	**Rear Wheel**	**Temporary Spare Tire**
33 psi	32 psi	60 psi

Sport, Limited, Touring

Tire Inflation Pressure		
Front Wheel	**Rear Wheel**	**Temporary Spare Tire**
35 psi	33 psi	60 psi

NOTE: The temporary spare tire, if equipped, must be used only on a rear wheel. If a front wheel tire gets punctured, replace the wheel with a rear wheel and install the temporary spare tire in place of the removed rear wheel. Forester Wilderness is equipped with a full size spare tire.

Forester Wilderness

Tire Inflation Pressure	
Front Wheel	**Rear Wheel**
33 psi	32 psi

NOTE: Forester Wilderness is equipped with a full size spare tire.

OVERVIEW OF YOUR MULTIMEDIA SYSTEM

SUBARU STARLINK® Multimedia combines the radio along with the ability to connect your phone* through Bluetooth® to the multimedia system for making calls, sending text messages and listening to your favorite songs on your phone.

* Compatible smartphone and application required. For applications to operate, latest version of each application required. Data provided by smartphone is displayed on the Touchscreen. Some state laws prohibit the operation of handheld electronic devices while operating a vehicle. Smartphone apps should only be launched when vehicle is safely parked. Your wireless carrier's rates may apply.

Various Systems

Depending on your model and trim level there are several types of SUBARU STARLINK® Multimedia systems. Some of the functions described in this guide will vary by system.

- 6.5-inch Multimedia Plus
- 8.0-inch Multimedia Plus
- 8.0-inch Multimedia Navigation

BUTTONS

Radio Functions

1 Power/Volume Control

Press the power/volume control knob to mute or un-mute the audio and pause playback of cache radio and other media devices. Rotate the knob to decrease or increase the volume.

2 Radio

Press the RADIO button to display the AM/FM/SXM screen. The different tuner modes can be selected by touching the source you want to hear.

3 Media

Press the MEDIA button to display the media screen. Select the media source you want to hear. Connected media will display in white.

4 Tune

Rotate the knob to change the radio station or select the next track, media file, or list item. Press the knob to choose the list item selected with the cursor. Press and hold the knob to display the sound settings screen.

5 **Seek**

Press the seek up or seek down button to seek the next or previous radio frequency. You can also use the seek up or down buttons to select different audio tracks from media sources. Press and hold to fast-forward or rewind.

Other Functions

6 **Home**

Displays the Home screen apps. The Home screen allows you to customize which apps appear and rearrange the icons in a personalized order.

7 **Map** (if equipped)

Displays the map and navigation features available on the screen.

8 **Apps**

Displays the installed apps that are available on your vehicle.

Controlling the Volume

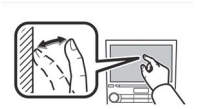

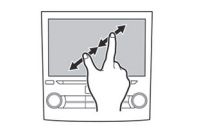

Adjusting the Volume: Turn the volume knob to adjust the volume. The volume stays at the level you set after an ignition cycle.

Muting the Volume: You can mute the audio system by pressing the volume knob once, and un-mute the audio by pressing the knob again. It will un-mute automatically after an ignition cycle.

Turning the System Off: To turn the system off, press and hold the volume knob for about three seconds. The system remains off after an ignition cycle. Press the volume knob again to turn the system back on.

TOUCHSCREEN

Operations are performed by touching the screen directly with your finger.

MOTION	ACTION	USE
	**Touch** Quickly touch and release once.	Changing and selecting various settings
	**Double Touch with one finger*** Quickly touch and release twice with one finger.	Enlarging the scale of the map screen
	**Double Touch with two fingers*** Quickly touch and release twice with two fingers.	Reducing the scale of the map screen
	**Drag**** Touch and drag your finger on the screen to move the screen to the desired position.	• Scrolling lists • Scrolling the map screen*
	**Swipe**** Quickly move the screen by swiping with your finger.	• Scrolling lists • Scrolling the map screen*
	**Pinch*** Move your two fingers further apart (pinch-out) to zoom in on the map. Move your two fingers closer together (pinch-in) to zoom out on the map.	Changing the scale of the map screen

* 8-inch with Navi system only
** The operations may not be performed on all screens.

STEERING WHEEL CONTROLS

Starlink® Audio Controls

1. **Presets/Skip:** Press to toggle through your preset radio stations or change a track/media file. Press and hold to scan radio stations or fast-forward/rewind media files.
2. **Volume:** Push the switch up/down to increase/decrease volume.
3. **Source:** Press the source button to change the audio sources between radio modes and media modes.
4. **INFO:** Press to operate the Multi-Function Display.
5. **Call/Voice Recognition:** Press to receive/end a call without taking your hands off the steering wheel. Press the talk button to activate the built-in voice recognition function. Press and hold to activate the Apple CarPlay®/Android Auto™ voice recognition function.

VOICE RECOGNITION

With SUBARU STARLINK®, simple voice commands can control features like navigation, entertainment, phone calls, and, on select models, climate control. A microphone is located in the overhead console; however, you do not need to speak directly into it to activate the voice command features. Press the Voice Recognition button on the steering wheel to start the voice recognition system. Press and hold the button to cancel the system.

For help with what features are available with voice recognition, press the "Help" button on the screen or press the voice recognition button and say "Help".

Scan to learn how to use **Voice Recognition**.

Scan to learn more about **Subaru Multimedia.**

Tips

The system may not recognize the voice command due to various types of interference. The following are some causes for voice command interference:

- The command is spoken too quickly or at a low or high volume.
- The command is incorrect or unclear.
- The window is open, the climate control system is set on high, or the ventilation is directed toward the microphone.
- Passengers are talking while the command is spoken.

NOTE: The system is designed to recognize a variety of commands, but certain words, accents or speech patterns may be difficult for the system to recognize.

Common Commands

Below are examples of common commands that can be used with the voice recognition system. Please refer to "Siri/Voice Recognition System" in your STARLINK® Owner's Manual for a complete list.

VOICE COMMAND	FUNCTION	EXAMPLE
Dial [Number]	Places a call to the phone number	Dial 555-123-4567
Call [Name] [Phone Type]	Places a call to the contact name and phone type of the contact from the phonebook	Call John Doe mobile
Navigate to [House Number, Street, City, State][1]	Sets a destination to the address	Navigate to 1234 Main Street, Lincoln, Washington
Show Map[1]	Displays the map screen	Show Map
Tune to [Frequency] (AM / FM)	Switches to AM/FM and tunes to spoken frequency	Tune to 99.5 FM
Preset [Number]	Switches to the preset channel	Preset 3
Satellite Channel [Name / Channel Number]	Switches to satellite channel number	Satellite Channel Prime Country 58
Set Fan Speed to [1-7] [2]	Sets the fan speed to the spoken fan speed	Set fan speed to 4
Set Temperature to [Number] [2,3]	Sets the temperature to the spoken temperature	Set temperature to 70
Help	Changes to help screen	Help
Phone Help	Displays a list of voice commands related to controlling your phone	Phone Help

VOICE COMMAND	FUNCTION	EXAMPLE
Media Help	Displays a list of commands related to the media	Media Help
Radio Help	Displays a list of commands related to the radio	Radio Help
Navigation Help[1]	Displays a list of voice commands related to navigation	Navigation Help

1 8.0-inch Multimedia Navigation system only
2 8.0-inch Multimedia Plus and 8.0-inch Multimedia Navigation system only
3 When the A/C is off, the A/C setting will not change even if the voice command is accepted

HOME SCREEN ICONS

Home Screen Icons

Phone – Allows you to place and receive calls and text messages.

Map – Allows you to enter a destination and have route guidance to get you where you are going.

Settings – Allows you to change the settings to your personal choice for select systems inside the vehicle.

Add Shortcut – Allows you to add icons for various functions to the home screen.

Apps – Entertainment and convenience applications that can be used to enhance your driving experience. The apps included are: MySubaru, Pandora®, Travel Link®, Android Auto™, aha®, and Apple CarPlay®.

Media – Allows you to play USB/iPod music or Bluetooth® audio by connecting to the device.

Radio – Allows you to select a station to listen to as well as pause and playback live radio.

Scan to learn more about **Subaru Multimedia.**

REARRANGING ICONS

You can rearrange the icons on the Home Screen when the Home Screen Shortcuts function is turned on. You can turn on the Home Screen Shortcuts function by selecting “Settings”, and then the “General” tab.

To rearrange icons on the Home Screen:

1. Select and hold the icon you want to move.
2. Drag the icon to the desired position and release.
3. To delete an icon, drag the icon to the bottom of the screen and release.

ADDING SHORTCUTS

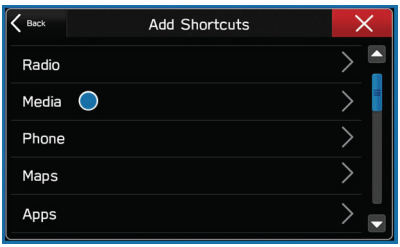

You can add shortcut icons for various functions to the Home Screen when the Home Screen Shortcut function is turned on. You can turn on the Home Screen Shortcuts function by selecting “Settings”, and then the “General” tab.

To add shortcut icons to the Home Screen, press the "Home" button.

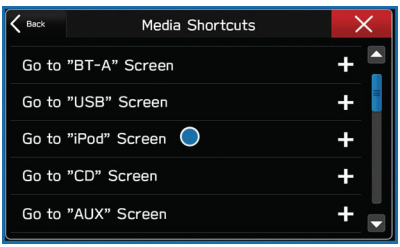

1. Select “Add Shortcut”.

2. Select the desired function.

3. Select the desired shortcut function.
4. Check that the shortcut icon is displayed on the Home screen.

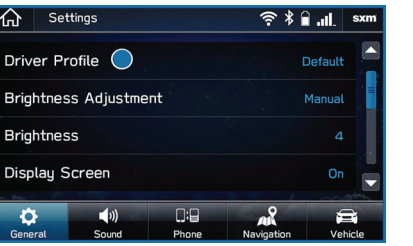

CREATING A DRIVER PROFILE

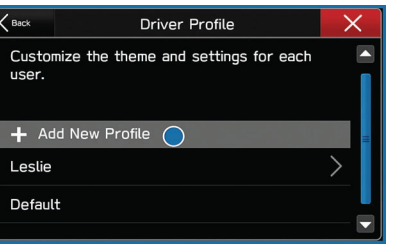

Creating a Driver Profile provides many benefits beyond just pairing a phone. The profile records and remembers station presets, sound preferences, home and work address (if equipped with navigation), phone favorites, screen icons and placement, and the background wallpaper.

To create a driver profile:

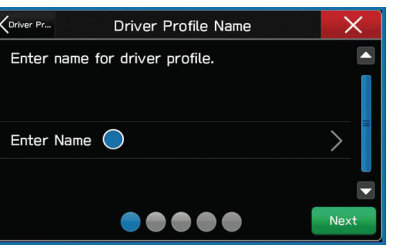

1. On the Home screen, select “Settings”. Then, in the General menu, select “Driver Profile”.

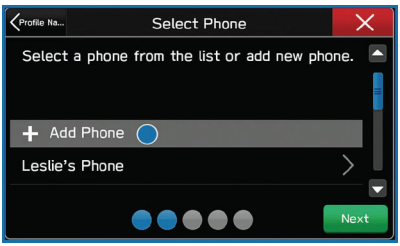

2. Select “Add New Profile”.

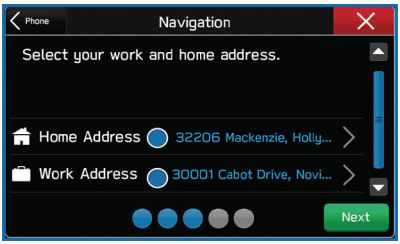

3. Select “Enter Name” to display the keyboard screen, and then type your name. Now select “Next” on this screen and the following screen.

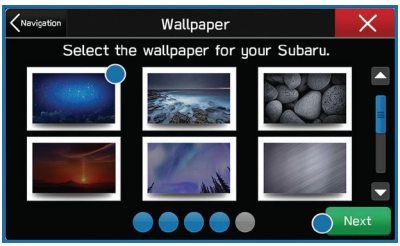

4. Select a paired phone or pair a new phone (see page 114 and page 118 in the How To Appendix). Then select “Next”.

5. Enter a Home Address and Work Address (if equipped with navigation). Then select “Next”.

6. Select a wallpaper, and then select “Next”.
7. Select “Finish”.

Retrieving a Driver Profile

The system automatically retrieves the profile once you are in your Subaru with the STARLINK® multimedia system on and your phone’s Bluetooth® active. You can also manually retrieve or change the profile by following these steps:

1. Press the “Home” button and then select “Settings”.
2. In the General menu, select “Driver Profile”.
3. Select the profile you want to use, and then select “Activate”.

RADIO

AM/FM Radio

Your Subaru is equipped standard with AM/FM radio, including HD Radio®. HD Radio® technology allows you to receive digital broadcasts (where available) in addition to analog broadcasts. Digital broadcasts provide free, crystal clear audio with no static or distortion.

Visit **www.hdradio.com** for more information and a guide to available radio stations and programming.

Scan to learn more about **HD Radio**.

Satellite Radio

A SiriusXM Satellite Radio is a tuner designed exclusively to receive broadcasts provided under a separate subscription. After a free trial period, a subscription is necessary to continue service.

For more information or to subscribe, visit **www.siriusxm.com**.

Scan to learn more about **SiriusXM Radio.**

Presets

You can preset 18 stations. Presets can be set for SiriusXM, FM, or AM stations, allowing you to switch among the three with the press of a single button. To preset a radio station:

1. Tune to the desired channel.
2. Press and hold the desired preset station button at the bottom of the screen.

MEDIA

Bluetooth®

Your Subaru has Bluetooth® hands-free technology to manage your phone and audio systems. Bluetooth®-enabled mobile phones link directly through your audio system automatically once connected. Bluetooth® hands-free allows you to receive and initiate calls, or play music directly from your device while keeping it stowed for safety.

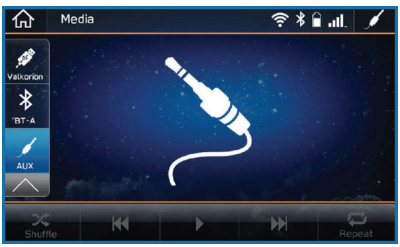

For step-by-step instructions on how to pair a Bluetooth® device to the audio system, please see page 114 for Android devices or page 118 for Apple devices. A QR code and link to more information can also be found on page 71.

USB/iPod

You can plug in a USB memory storage device or iPod into the USB ports. This will bring up the media screen with controls. If using an iPod, make sure to use an Apple certified cable or MFi certified cable for proper operation.

AUX Input

The AUX jack is a port that allows input from an audio device such as MP3 players, portable music players, and iPods. To access the AUX menu, plug in the device to the AUX jack and the menu will appear, or select the AUX menu from the “Media” Screen.

PAIRING A PHONE

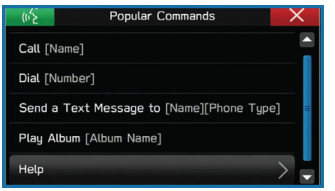

To begin using your Bluetooth® hands-free device you must first pair your phone with the system. Phone pairing provides access to the contact list on your phone and allows you to use the voice recognition system to make and receive calls. The system can also read incoming text messages, and allow you to send short messages to reply to texts. The system automatically reconnects to your Bluetooth® device and will remember your driver profile.

Visit **www.subaru.com/engineering/starlink/multimedia.html** for more information on what is available by connecting a phone to the Touchscreen.

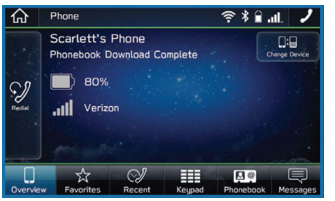

Scan to learn more about **Subaru Multimedia.**

For instructions on how to pair your phone to the Touchscreen, see page 114 for Android devices or page 118 for Apple devices.

MAKING A CALL

Once your phone is paired, you can make a call through voice recognition by pressing the “Voice Recognition Switch” on the steering wheel. After pressing the “Voice Recognition Switch”, wait for the “Voice Guidance” screen to appear on the Touchscreen and say “Call [name and phone type]” or “Dial [number]”.

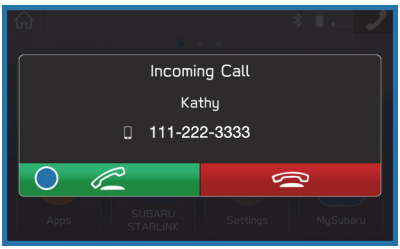

To make a call from the Touchscreen, start by pushing the “Home” button and then select “Phone”. After the phone screen displays, select the method you would like to use to make a call.

- Overview – Allows you to call the last number.
- Favorites – Allows you to place a call to one of your registered favorites.
- Recent – Allows you to call someone that has recently called you or that you called.
- Keypad – Allows you to dial any number you would like.
- Phonebook – Displays the phonebook from your phone.

RECEIVING A CALL

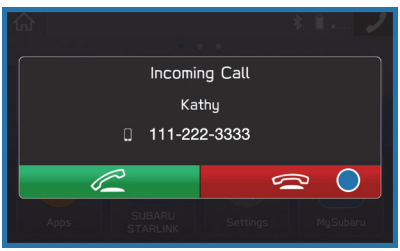

To receive a call, press the “Call Switch” on the steering wheel or the “Call Button” on the Touchscreen.

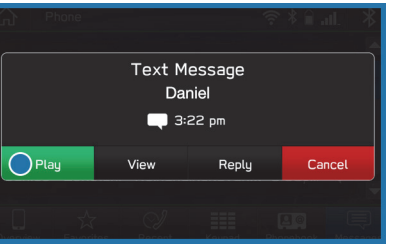

To reject a call, press the “End Switch” on the steering wheel or the “End Button” on the Touchscreen.

TEXT MESSAGES

Received messages can be forwarded from the connected Bluetooth® phone, enabling playback and reply functions using the system. To use this function, it is necessary to set the phonebook download function to ON.

When a Short Message Service (SMS)/ Multimedia Messaging Service (MMS) is received, the incoming message screen pops up with sound and is ready to be retrieved using the Touchscreen. Select “Play” to listen to the message.

If there is more than one unread message, a screen will appear allowing you to either view your inbox or ignore the message.

Depending on the Bluetooth® phone type, messages may not be transferred to the inbox, the screen display may differ, and it may not be possible to use certain functions.

SUBARU STARLINK® IN-VEHICLE APPS

SUBARU STARLINK® Multimedia offers advanced connectivity through Apple CarPlay®, Android Auto™, aha® and Pandora® apps. Wireless pairing and hands-free smartphone operation allow for safe and easy connection to your favorite apps and content.

For a complete list of all the apps available, visit **www.subaru.com/engineering/starlink/multimedia.html**

Scan to learn more about **Subaru Multimedia.**

aha® by HARMAN

aha is a cloud-based application that connects to the system and gives you access to your favorite web content safely and easily. There are thousands of available stations spanning internet radio, personalized music, audiobooks, Facebook, Twitter, restaurant and hotel searches, weather and more.

To use the aha application, connect your iPhone or Android device via Bluetooth®. When connecting an iPhone or Android device with the aha application installed, you can control, view, and hear aha content through the system.

Scan to learn more about **aha radio or to get the app.**

With the 8.0-inch Multimedia Navigation function, you may also display Points Of Interest (POI) information from the aha application on the map screen and route to these POIs.

Pandora®

Pandora is a free, personalized radio that offers effortless and endless music enjoyment. To use the Pandora application, first install the Pandora application on your smartphone. Then connect your iPhone or Android device via Bluetooth®.

NOTE: Some vehicles might be incompatible with this app depending on difference between models and software version.

Android Auto™

Android Auto can be used to view maps, play music, and place calls by connecting your Android device to the system. You can also run supported applications. To use the Android Auto application, connect your Android device to the USB port.

For details on services or operations, visit the Android Auto sites: **www.android.com/auto/** or **www.support.google.com/androidauto/**

Scan to learn more about **Android Auto**

Scan to learn more about **Android Auto Help**

For more information on connecting your phone, please refer to page 122 in this Getting Started Guide.

Apple CarPlay®

Apple CarPlay can be used to view maps, play music, and place calls by connecting your iPhone to the system. You can also run supported applications. To use the Apple CarPlay application, connect your iPhone to the USB port.

For more information on connecting your iPhone, please refer to page 123 in this Getting Started Guide.

For details on services or operations, check the Apple CarPlay site: **www.apple.com/ios/carplay/**

Scan to learn more about **Apple CarPlay**

SiriusXM® Travel Link

SiriusXM® U.S. satellite and data services are available only in the 48 states of the contiguous USA and DC.

Data service information, which is comprised of sports, weather, stocks, and fuel information, can be received via the SiriusXM® Radio, with the option to turn on or off weather alerts.

To receive the data service information in the vehicle, a subscription to the SiriusXM® Satellite Radio Service is necessary following a free trial.

MYSUBARU

Whether you're on the road or planning adventures, the MySubaru app makes loving every part of owning your Subaru easy. Although the mobile app is great when you are on the go, you can also visit **www.MySubaru.com** from your computer to access similar functions and to aid in planning your trip before you leave.

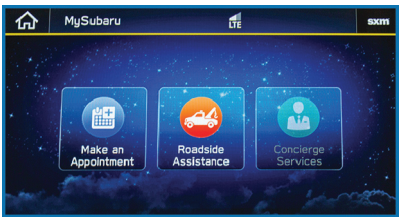

You can download the MySubaru app from the Google Play Store or the Apple App Store on your phone by searching MySubaru.

Scan to get the **MySubaru** App.

By creating an account, you can:

- Schedule service with a preferred Subaru Retailer
- Get vehicle service reminders, recall alerts, and exclusive coupons
- Track and record your service history
- Access resources like your owner's manuals, how to videos and more
- Access SUBARU STARLINK® Safety and Security features (must have an active SUBARU STARLINK® subscription)
- Get help from 24-hour roadside assistance (24-hour roadside is included in standard 3-year warranty)

Service Appointment Scheduler

The SUBARU STARLINK® Service Appointment Scheduler can help you set an appointment from the MySubaru website, Mobile App or the vehicle's Touchscreen. Getting your Subaru vehicle to the Subaru professionals for service is easy, no matter where you are. If you are away from your preferred Subaru Retailer for service, you can always use Service Appointment Scheduler to locate any of our certified Subaru Retailers near your location.

STARLINK® Service Appointment Scheduler on your Touchscreen is a convenient way to set a service appointment. Simply select the MySubaru icon on the home screen and choose "Make an Appointment" to get started.

An active SUBARU STARLINK® subscription is required to use this in-vehicle feature.

MAPS OVERVIEW

Your new SUBARU STARLINK® comes equipped with an integrated navigation system, powered by TomTom®. We hope you enjoy the state-of-the-art navigation technology and optimized mapping routes to guide you on safer, better, and more enjoyable journeys.

With your integrated navigation system, you can find destinations by address or search by points of interest, as well as save destinations in the system as favorites. You can also customize route options and settings and find the nearest gas station along your route with the touch of a button.

For more information and step by step directions on using your navigation system, please refer to page 127 in this Getting Started Guide or “Navigation System (8-inch with Navi system only)” in your STARLINK® Owner’s Manual.

CREATING HOME AND WORK PROFILES

Creating a driver profile allows you to save your home address and work address in the navigation system for ease of use.

For step by step instructions on creating a driver profile, please refer to page 67.

SAFETY AND SECURITY OVERVIEW (if equipped)

STARLINK® Safety and Security services* are designed to help in your time of need. These include Advanced Automatic Collision Notification, SOS Emergency Assistance, Enhanced Roadside Assistance, Stolen Vehicle Recovery, the added convenience of Remote Engine Start with Climate Control, and so much more.

With the SUBARU STARLINK® system integrated into your vehicle, advanced safety and security technology is just a button press away. The SUBARU STARLINK® experience includes in-vehicle call center support, maintenance and diagnostic alerts as well as remote services that keep you connected to your Subaru vehicle.

Located in the overhead console of most Subaru vehicles are the red SOS SOS and blue i-button ((i)). Both buttons link you to the SUBARU STARLINK® call centers that are there to support you 24 hours a day, 7 days a week.

The SOS button SOS is for SOS Emergency Assistance.

The i-button ((i)) is for Enhanced Roadside Assistance or Concierge (if subscribed).

- Press the SOS button SOS for SOS Emergency Assistance.*
- Press the i-button ((i)) for Enhanced Roadside Assistance* or Concierge* (if subscribed).*
- To cancel a SOS Emergency Assistance, Enhanced Roadside Assistance or a Concierge call, press and hold the same button for approximately two seconds or select the “End Call” button if displayed on the Touchscreen.

Head to **www.Subaru.com/STARLINK** to see all the SUBARU STARLINK® subscription services and packages.

* Access to STARLINK® Safety and Security services requires an active STARLINK® subscription. Not available in all States. See Retailer for details. Remote Engine Start available on keyless access with push-button start vehicles. Remote Engine Start with Climate Control is available on select models only. Not available on vehicles with manual transmission. See Retailer for details or visit the STARLINK® page on Subaru.com to learn more.

Scan to learn more about **SUBARU STARLINK.**

ENROLLMENT

To enroll in SUBARU STARLINK® and access remote services, a MySubaru account is required. MySubaru is the Subaru owner website that allows you to access vehicle remote services, user preferences, diagnostic alerts and other useful features enabled by your STARLINK® Safety Plus, STARLINK® Security Plus and STARLINK® Concierge subscription.

Your Retailer may have created an account for you during the delivery process. However, you can also create a MySubaru account at **www.mysubaru.com**.

Enrollment in SUBARU STARLINK® can be done online at MySubaru.com, through the MySubaru Mobile App, at your Subaru Retailer or by calling a STARLINK® Customer Care Representative at: 1-855-753-2495

NOTE: Please have your Vehicle Identification Number (VIN) available, as you will need it to complete this step. After the enrollment process, you will learn more about the features in detail at MySubaru.com.

MYSUBARU INTEGRATION

The connection between you and your Subaru has never been simpler, and the MySubaru website (MySubaru.com) and MySubaru Mobile Application are the best ways to stay in touch with your Subaru vehicle. From MySubaru, you can access the following information and STARLINK® Safety and Security services*:

- Remote Services
- Vehicle Health
- Usage Reports
- Service Appointment Scheduler
- Vehicle Maintenance Schedules
- Destination to Vehicle
- Service History
- Support Resources

* Activation with subscription required. Features and availability vary by vehicle and trim level. See your Retailer for details.

SUBARU STARLINK® WI-FI HOTSPOT (if equipped)

SUBARU STARLINK® in-vehicle Wi-Fi Hotspot* keeps you and your family connected using AT&T's 4G LTE nationwide cellular network. Whether watching movies, playing games or even listening to music, your family won't miss a beat with SUBARU STARLINK® in-vehicle Wi-Fi Hotspot. Set up is quick and easy.

Scan to learn more about **AT&T Wi-Fi Hotspot**

For more information on a subscription and step by step enrollment instructions, please refer to page 126 in this Getting Started Guide or visit: **https://myvehicle.att.com/#/subaru/learn?country=US&language=en**

* Internet access is purchased separately through AT&T with monthly, per gigabyte, and unlimited data options available. Existing AT&T customers have the option to add an additional line to their AT&T Mobile Share plan. Available on select models.

SETTINGS AND UPDATES OVERVIEW

Many settings can be customized for different features in your Subaru. In this section you will find examples and instructions for some of the settings you can tailor to fit your preferences, as well as ways to keep your system updated.

Connect to Home Wi-Fi (if equipped)

Connecting to your Wi-Fi network can allow you to update the software and maps. To connect to Wi-Fi, first go to the “Settings” screen, select “General”, and then select “Wi-Fi Settings”.

For step by step instructions on connecting to Wi-Fi, please refer to page 124 in this Getting Started Guide or “Settings” in your STARLINK® Owner’s Manual.

SOUND

To change the sound settings, press the “Home” button, then select “Settings”, and then select “Sound”. Choose the setting you want to change.

SETTING	FUNCTION
EQ and Sound Position	Select to set sound settings.
Entertainment Volume	Select to set audio volume.
Aux Volume Gain	Select to set AUX volume gain.
Microphone Volume	Select to adjust the mic sensitivity. This adjusts the speaker’s voice during hands-free communication.
Navigation Volume	Select to set the navigation prompt volume. (Navigation-equipped vehicles only).
Phone Volume	Select to adjust the default volume of the other party’s voice.
Ringtone Volume	Select to adjust the ringtone volume.
Speech/VR Volume	Select to set the voice recognition prompts volume.
Alert Sounds	Select to turn the Alert Sound on/off for traffic, weather, or SXM game information updates (if equipped).
Beep Sounds	Select to turn the sound beeps on/off.
Speed Volume	Select to set the speed volume. The system adjusts to the optimum volume and tone quality according to vehicle speed to compensate for increased vehicle noise (if equipped).

PHONE

This system supports Bluetooth®, a wireless data system. The hands-free system lets you make and receive calls without taking your hands off the steering wheel.

In the sound settings menu, you can adjust the microphone, ringtone, and phone volume.

On the Home Screen, select "Settings", then select the "Phone" menu to manage connected devices and access other phone settings.

MAPS/NAVIGATION

There are many programmable map/navigation features that can be customized. These settings are located under the "Settings" menu and then "Navigation". Listed in the table below are some common settings you can customize for your convenience.

SETTING	FUNCTION
Route Setting	Allows you to select Fastest, Shortest or Economic.
Avoid	Allows you to set avoidance criteria for the route calculation.
Map Display	Allows you to change the brightness by selecting auto, day or night.
Save as Home	Allows you to register or edit your home address.
Save as Work	Allows you to register or edit your work address.
POI Icons	Allows you to turn the icons on/off.
Auto Zoom	Allows you to turn on/off.
Rest Stop Guidance Function	Allows you to turn on/off.
Low Fuel Warning	Allows you to turn on/off.

Checking for Map Updates

You can update the maps to the latest information. The maps should be checked and updated regularly for the best possible navigation experience.

At **www.subaru-maps.com**, you can update the entire USA map at once via USB. The maps can also be updated over the air. When updating over the air, you can update eight regions at a time. This allows you to update your home state without having to download the entire map program for the United States. This option is great if you normally stay in your home state and/or surrounding states.

Updating Maps Over-the-Air

To update your maps over the air, first connect to a Wi-Fi network (see page 124). Map updates can be found by selecting “Settings”, then “Navigation” on the Touchscreen.

For more step by step directions for updating your maps through Wi-Fi, please refer to page 133.

Updating Maps Using Your PC/MAC

Maps can also be updated using a USB memory device, which will allow the entire map program to be updated at one time. This is a great option if you are going to take a cross-country trip and your maps have not been updated in a while.

To update the map using a USB memory device, start by going to **www.subaru-maps.com**.

Scan to learn more about **Map Updates**

CLOCK

You can adjust the clock manually or set the clock to update automatically. When set to “Auto,” the clock automatically adjusts when a Bluetooth® connected phone is paired (vehicles without navigation), or through the GPS signal (vehicles with navigation system).

The following sections contain step-by-step instructions for setting the clock, and you can scan the QR codes for a helpful “how to” video. Choose the appropriate QR code based on your Multi-Function Display (Color LCD or Black and White LCD).

Scan to learn how to **Set the Clock (Color LCD).**

Scan to learn how to **Set the Clock (Black and White LCD).**

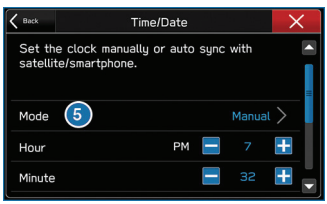

Manually

Use the STARLINK® Touchscreen to set the clock:

1. Press the “Home” button.
2. Select “Settings”.
3. Select “Vehicle”.
4. Select “Time/Date”.

5. Select “Mode”.

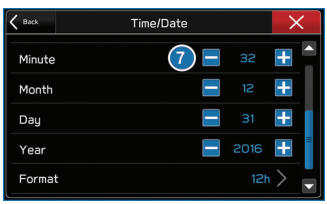

6. Select “Manual”.

7. Now adjust the time and date using the “+” and “-” buttons. Select the check mark when finished.

   For black-and-white Multi-Function Display (MFD), use the “+” and “-” buttons next to the clock.

Automatically

To set the clock automatically, the “Auto” mode must be selected in the clock adjustment setting. To set the clock:

1. Press the “Home” button.
2. Select “Settings”.
3. Select “Vehicle”.
4. Select “Time/Date”.

5. Select “Mode”.

6. Select “Auto”. Press the “Home” button when finished.

The clock automatically adjusts as follows:

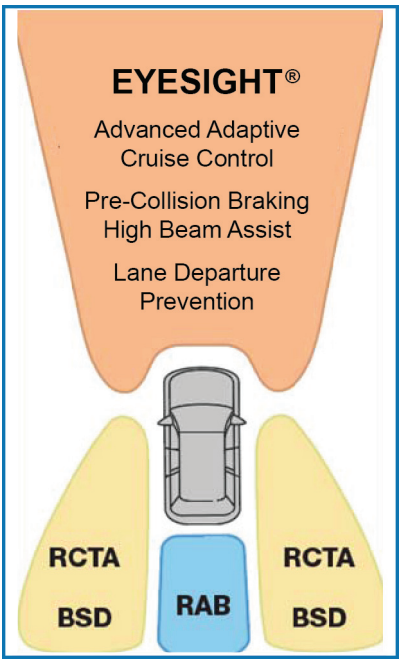

- Systems with Navigation: Automatically adjusts the clock when a GPS signal is available.
- Systems without Navigation: Automatically adjusts the clock when a phone is paired and connected via Bluetooth®. “Phonebook Download” must be enabled in the Phone Settings.

For step-by-step procedures to pair a phone to the SUBARU STARLINK® Touchscreen, see page 114 for Android devices or page 118 for Apple devices.

EYESIGHT® OVERVIEW

Your Subaru features a variety of safety systems that are the culmination of everything Subaru Engineers know about safety. These systems are referred to as “Driver Assist Technologies” and add confidence to every trip you and your passengers take. Working together, these systems provide enhanced awareness, safety, and convenience in front, to the sides, and behind your Subaru. Subaru Driver Assist Technologies include:

- EyeSight® Driver Assist Technology
- Rear-Vision Camera
- Pre-Collision Braking
- Automatic Emergency Steering
- Front View Monitor
- Blind-Spot Detection (BSD)
- Rear Cross-Traffic Alert (RCTA)
- Reverse Automatic Braking (RAB)
- High Beam Assist (HBA)
- Lane Departure Prevention
- Steering Responsive Headlights (SRH)

OPERATION

EyeSight® is a driver assist technology that uses dual stereo cameras to serve as an extra pair of eyes on the road ahead to identify vehicles in front, pedestrians, traffic lanes, or other objects. If need be, the EyeSight® system can apply the brakes and/or reduce engine power to help avoid or reduce the severity of a collision. During these events, the system will provide audible and visual alerts to assist you in making decisions.

Since the characteristics and limitations of the EyeSight® cameras are similar to human eyes, it is important that the cameras, windshield, and area in front of the cameras are treated with special care. Please refer to “Care and Limitations” on page 107 in this Getting Started Guide for more details.

EyeSight® Cameras (inside)

EyeSight® Cameras (outside)

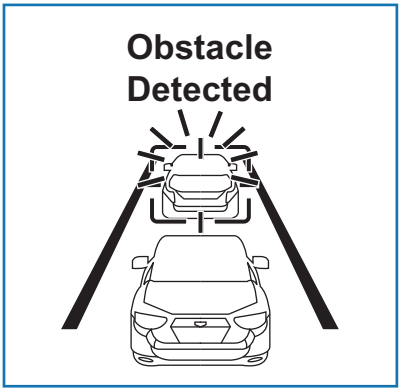

FUNCTIONS

The EyeSight® system features several distinct functions designed to provide extra awareness, improve safety, reduce fatigue, and add peace of mind every time you drive your Subaru. EyeSight® functions include:

- Pre-Collision Braking (PCB)
- Pre-Collision Brake Assist
- Automatic Emergency Steering
- Pre-Collision Throttle Management
- Lane Departure Warning (LDW)
- Lane Sway Warning
- Lane Departure Prevention
- Advanced Adaptive Cruise Control with Lane Centering
- Conventional Cruise Control
- Lead Vehicle Start Alert

Pre-Collision Braking

This function helps prevent or minimize a frontal collision with another vehicle, pedestrian, or other objects by providing visual and audible warnings. Warnings are displayed in the Combination Meter Display (CMD) with audible beeps. If you take no corrective action, the system automatically reduces engine power and applies the brakes with increasing force to help prevent or minimize the collision.

The Pre-Collision Braking function may also assist with avoiding or reducing the severity of collisions with crossing pedestrians and cyclists and with oncoming vehicles and pedestrians when turning.

This system can be turned on or off by using the Pre-Collision Braking System OFF switch (see page 95).

Pre-Collision Brake Assist

This function activates when the Pre-Collision Braking System is activated, the system determines that there is a high risk of collision with an obstacle in front, and you apply the brakes. The function assists by applying additional pressure to the braking system to decrease stopping distance.

This system can be turned on or off by using the Pre-Collision Braking System OFF switch (see page 95).

Automatic Emergency Steering (if equipped)

The Automatic Emergency Steering function activates when the Pre-Collision Braking System has activated and there is an extremely high possibility of a collision with an obstacle ahead. When traveling at 50 mph or slower, the function uses the EyeSight® cameras and rear radar to determine if there is enough space to safely avoid a collision with the object ahead, detecting lane markings and making sure that there are no other objects in front as well as behind, such as oncoming vehicles or pedestrians.

Once activated, Automatic Emergency Steering provides automatic steering support to avoid the collision while staying within the lane. After a collision is avoided, the system continues steering assist and brake control to maintain the vehicle in its lane until the vehicle stops.

This function can be turned on or off by using the Pre-Collision Braking System OFF switch (see page 95) or the BSD/RCTA OFF switch (see page 98).

Pre-Collision Throttle Management

This function is designed to help prevent you from unintentionally accelerating into a stopped vehicle or other obstacle by reducing engine power. Warnings are displayed in the Combination Meter Display (CMD) with audible beeps.

Pre-Collision Throttle Management is helpful when:

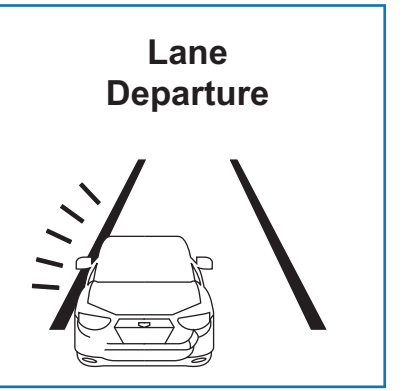

- You unintentionally place the select lever in the “D” position instead of the “R” position and start to accelerate toward a parked car, wall or parking structure.
- While you are at a stop, the vehicle ahead of you accelerates, but then suddenly slows down or stops as you begin to accelerate.

This system can be turned on or off by using the Pre-Collision Braking System OFF switch (see page 95).

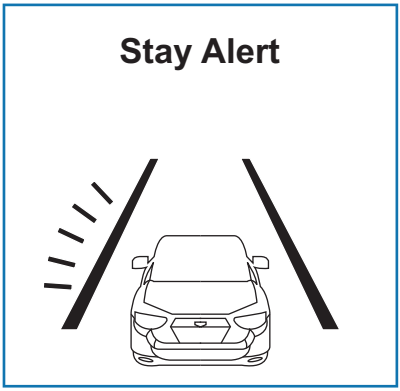

Lane Departure Warning

This function provides audible and visual warnings if you are about to depart your lane of travel. Using the EyeSight® camera, the Lane Departure Warning function identifies lane markings when traveling at speeds of approximately 30 mph or greater. These warnings are displayed in the Combination Meter Display (CMD) with audible beeps. Lane Departure Warning does not provide any corrective actions.

You can turn this system on or off by using the Lane Departure Warning OFF switch (see page 94).

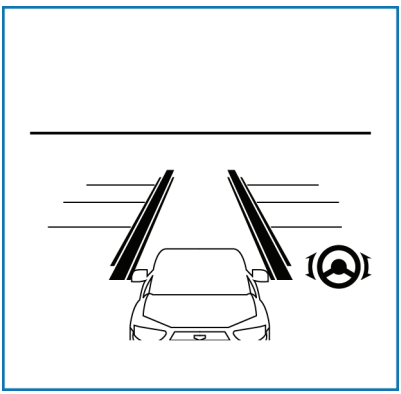

Lane Sway Warning

This function detects repetitive or unusual side-to-side vehicle movement within a lane of travel that may indicate a drowsy or inattentive driver. Using the EyeSight® camera, the Lane Sway Warning function activates to identify lane markings when traveling at speeds of approximately 37 mph or greater and deactivates when vehicle speed falls below 25 mph. Warnings are displayed in the Combination Meter Display (CMD) with audible beeps. Lane Sway Warning does not provide any corrective actions.

You can turn this system on or off by using the Lane Departure Warning OFF switch (see page 94).

Lane Departure Prevention

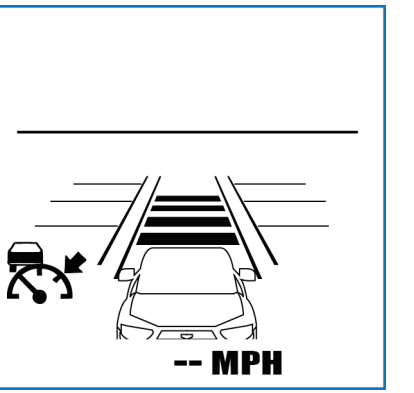

This function provides steering assistance to keep you in the lane of travel when driving on expressways, freeways, and interstate highways at approximately 37 mph or greater. Lane Departure Prevention uses the EyeSight® camera to identify lane markings and assists steering operation to help prevent lane departure.

This function is turned on or off using the Lane Keep Assist button on the right side of the steering wheel. Once the system is turned on, a white Lane Keep Assist icon will be displayed on the Combination Meter Display (CMD). Lane marking graphics on the CMD change to white to indicate that the right and/or left lane markings have been successfully identified by the EyeSight® camera. If the vehicle is about to depart the driving lane, the system assists steering by gently guiding the vehicle back into your lane. When the system is actively providing assistance, the Lane Keep Assist icon in the CMD will change from white to green.

Advanced Adaptive Cruise Control with Lane Centering

Advanced Adaptive Cruise Control is a driving support system intended to reduce the burden on you when driving on an expressway (including during congestion and when driving at high speed). Advanced Adaptive Cruise Control and Lane Centering work together to assist you by automatically controlling the accelerator, brake, and steering.

Advanced Adaptive Cruise Control

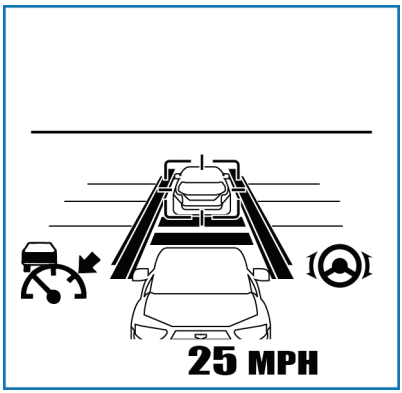

This system provides cruise control with the ability to keep a safe distance from the car in front of you. Using the EyeSight® camera, the Advanced Adaptive Cruise Control function identifies vehicles in front of you in the same lane, and your vehicle follows the vehicle in front (up to the maximum of your set speed). While following, your vehicle will automatically maintain a following distance that corresponds to the speed of the vehicle in front.

You can turn the Advanced Adaptive Cruise Control on or off using the Adaptive Cruise Control On/Off button on the right side of the steering wheel (see page 93). Once the system is turned on, a white Adaptive Cruise Control icon will be displayed on the Combination Meter Display (CMD). When all the operational conditions are met, “READY” appears underneath the Adaptive Cruise Control icon.

To set Advanced Adaptive Cruise Control, push down the “SET/–” switch on the right side of the steering wheel. The CMD will indicate a target speed and the icon will turn green. This speed can be adjusted up or down using the “RES +/SET -” switch (see page 93).

When a vehicle in front of you is identified, a Lead Vehicle indicator will be displayed on the Combination Meter Display (CMD) and/or Multi-Function Display (MFD). You can change the desired following distance from the lead vehicle by pressing the “Increase Distance” or “Decrease Distance” buttons (see page 93).

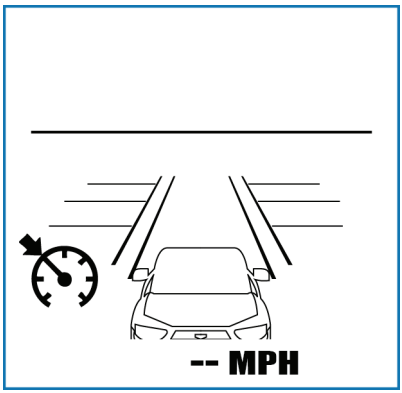

Lane Centering

The stereo camera detects lane markings (including Botts' dots) of the lane and the lead vehicle, and the system assists the steering operation by working with the electric power steering to help keep your vehicle in its lane when driving on expressways, freeways and interstate highways.

This function can be used by pressing the Lane Keep Assist switch when the Advanced Adaptive Cruise Control is activated. When driving at speeds of 0 mph to approximately 90 mph, the system detects the lane markings and/or the lead vehicle and assists you with steering in order to keep the vehicle close to the center of the lane.

Conventional Cruise Control

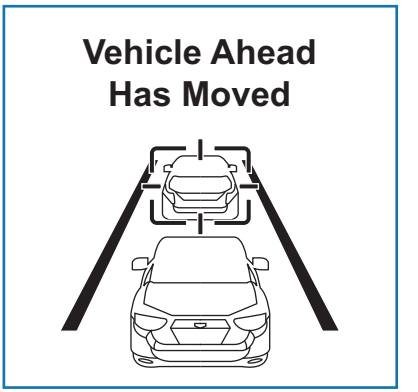

Conventional Cruise Control maintains a constant traveling speed you set, but it does not adapt to the other vehicles in front of you. To activate Conventional Cruise Control, press the Adaptive Cruise Control On/Off button to set Advanced Adaptive Cruise Control into standby status. Then, with Advanced Adaptive Cruise Control in standby status, press and hold the "Increase Distance" or "Decrease Distance" button on the steering wheel for approximately two seconds.

The Cruise Control indicator on the Combination Meter Display (CMD) will change from the Adaptive Cruise Control icon to the Conventional Cruise Control icon, and the "READY" indicator appears when all operational conditions are met. Use the accelerator to reach the desired speed, then use the RES +/ SET - switch to set the vehicle speed.

Lead Vehicle Start Alert

This function will provide a visual and audible alert when a stopped vehicle in front of you begins to move, and your vehicle remains stationary. Warnings are displayed in the Combination Meter Display (CMD) with audible beeps. Lead Vehicle Start Alert is helpful in situations where you may become temporarily distracted at a traffic light, and the vehicle ahead begins to move.

This function can be customized. To change this setting, use the steering wheel mounted "i/SET" switches to access the EyeSight® settings menu on the CMD.

STEERING WHEEL CONTROLS

Advanced Adaptive Cruise Control

Advanced Adaptive Cruise Control Switches

1. **Adaptive Cruise Control On/Off:** Press to turn Advanced Adaptive Cruise Control on or off.
2. **Lane Keep Assist:** Press to turn on or off Lane Centering or Lane Departure Prevention.
3. **Increase Distance:** Press to increase the following distance setting while using Advanced Adaptive Cruise Control. Press and hold to change to Conventional Cruise Control.
4. **Decrease Distance:** Press to decrease the following distance setting while using Advanced Adaptive Cruise Control. Press and hold to change to Conventional Cruise Control.
5. **Resume (RES)/Increase Speed and Set (SET)/Decrease Speed:** Press the switch down to set an initial target speed. Once set, press up or down to adjust the target speed.
   - **Adjust by 1 mph:**
     - Briefly press the switch up to increase the target speed in increments of 1 mph.

- Briefly press the switch down to decrease the target speed in increments of 1 mph.

- **Adjust by 5 mph:**
  - Press and hold the switch up to increase the target speed in increments of 5 mph.
  - Press and hold the switch down to decrease the target speed in increments of 5 mph.

Customizing EyeSight® Settings

The EyeSight® system features customization of certain preferences and warnings. Use the steering wheel mounted “i/Set” and arrow switches to navigate through the Combination Meter Display (CMD) to adjust settings such as:

- Warning Volume: Min/Mid/Max
- Cruise Control Acceleration Characteristics:
  - Lv. 1 Eco
  - Lv. 2 Comfort
  - Lv. 3 Standard
  - Lv. 4 Dynamic

i/Set and Arrow Switches

LANE DEPARTURE WARNING AND PRE-COLLISION BRAKING SYSTEM OFF SWITCHES

Lane Departure Warning OFF Switch

Press and hold this switch on the overhead console for approximately two seconds to turn off the Lane Departure Warning and Lane Sway Warning functions. Press and hold the switch again for approximately two seconds to turn the functions on.

When these functions are off, a yellow Lane Departure Warning OFF indicator will be illuminated in the Combination Meter. It may be helpful to turn these functions off when lane markings on the road are inconsistent.

Pre-Collision Braking System OFF Switch

Press and hold this switch on the overhead console for approximately two seconds to turn off the Pre-Collision Braking system (including Pre-Collision Brake Assist and, if equipped, Automatic Emergency Steering) and Pre-Collision Throttle Management function. Press and hold the switch again for approximately two seconds to turn these functions on.

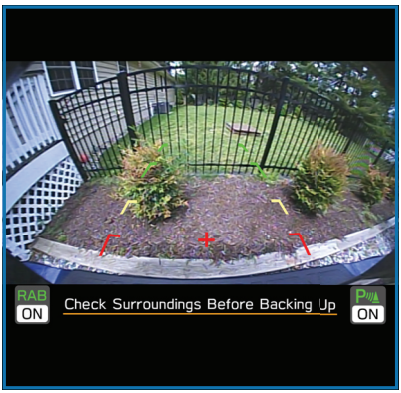

When these functions are off, a yellow Pre-Collision Braking OFF indicator illuminates in the Combination Meter. Deactivating the Pre-Collision Braking System also deactivates Automatic Emergency Steering, if equipped. When Automatic Emergency Steering is turned off, the Automatic Emergency Steering OFF indicator is displayed in the Combination Meter. It may be helpful to turn these functions off when using a drive-through car wash.

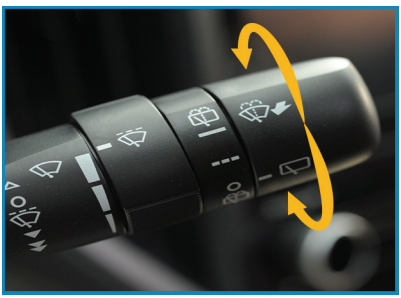

REAR-VISION CAMERA

This function provides a clear view of the area behind the vehicle to help avoid obstacles. Using a wide-angle camera mounted on the rear of the vehicle, an image is automatically displayed on the multimedia screen when you place the select lever in the “R” position. The displayed image features a centerline indicator, colored distance markers, and dynamic guidelines that move as the steering wheel is turned.

Rear-vision Camera Washer

To help keep your vision clear, your Subaru comes equipped with a Rear-vision Camera Washer. The Rear-vision Camera Washer is activated whenever the washer for the rear window is used. Rotate the end of the window wiper lever down from the off position, or up from the continuous operation position, to clean both the rear window and the Rear-vision Camera.

For more information, please refer to “Instruments and Controls” in your Owner’s Manual.

FRONT VIEW MONITOR (if equipped)

The Front View Monitor provides you with visibility from the front grille shown in the Multi-Function Display, allowing you to check blind spots and see road surface conditions around the front tires during off-road driving, such as when driving downhill. The Front View Monitor also supports everyday driving safety, improving visibility when making turns with an obstructed view or pulling into a narrow parking spot. A guide line is displayed to provide distance and width references.

Front View Monitor Switch

With the ignition in “ON” or “ACC”, press the “VIEW” switch on the center console (or shift the select lever from “R” to “D”) to display the Front View Monitor image on the Multi-Function Display (MFD). You can manually turn off the Front View Monitor by pressing the “VIEW” or “INFO” switch. The function will also deactivate automatically.

BLIND SPOT DETECTION (BSD) / REAR CROSS TRAFFIC ALERT (RCTA) (if equipped)

This system uses radar sensors mounted behind the rear bumper on the left and right sides that warn you if another vehicle is sensed in your blind spots. These functions provide additional awareness when changing lanes or driving in reverse.

For more information, please refer to the following sections of this Getting Started Guide and “Starting and Operating” in your Owner’s Manual.

Blind Spot Detection (BSD)

Blind Spot Detection senses if a vehicle is traveling at the same relative speed in your blind spot and provides a visual warning. If the system detects a vehicle in your blind spot, the BSD/RCTA approach indicator light in the corresponding side mirror frame illuminates. If you operate the turn signal lever in the direction the BSD/RCTA approach indicator light is illuminated, the system provides an additional level of warning by rapidly flashing the BSD/RCTA approach indicator light.

Lane Change Assist (LCA)

Lane Change Assist (LCA) provides an additional level of protection by warning you of rapidly approaching vehicles in the neighboring lanes. If LCA detects a vehicle approaching at a high speed in the neighboring lanes, the BSD/RCTA approach indicator light in the corresponding side mirror frame illuminates. If you operate the turn signal lever in the direction the BSD/RCTA approach indicator light is illuminated, the system rapidly flashes the BSD/RCTA approach indicator light.

Rear Cross Traffic Alert (RCTA)

This function detects a vehicle approaching from either side as you reverse, helping you check the rear and side areas of the vehicle when moving backward. If RCTA detects a vehicle approaching from either side while moving backward, the system provides visual and audible warnings: The BSD/RCTA approach indicator light(s) on the side mirror(s) flash, the BSD/RCTA warning indicator appears in the upper corner of the Rear-Vision Camera display, and a warning buzzer sounds.

Blind Spot Detection / Rear Cross Traffic Alert OFF

BSD/RCTA can be deactivated by pressing the BSD/RCTA OFF switch in the instrument panel. Press the switch again to turn BSD/RCTA back on.

When these functions are off, a yellow BSD/RCTA OFF indicator will be displayed in the Combination Meter. Deactivating BSD/RCTA also deactivates Automatic Emergency Steering, if equipped. When Automatic Emergency Steering is turned off, the Automatic Emergency Steering OFF indicator is displayed in the Combination Meter.

HIGH BEAM ASSIST (HBA)

This function uses the EyeSight® cameras to automatically switch the headlights between high and low beam settings, enhancing safety for both you and other drivers on the road. To activate High Beam Assist, set the headlight control switch to the “AUTO” position and push the headlight lever forward to the high beam position. The green HBA indicator illuminates on the Combination Meter.

HBA automatically activates the high beams when the forward area is dark, there are no preceding/oncoming vehicles or sharp curves in the road, and your speed is approximately 20 mph or greater. When a preceding/oncoming vehicle is detected, the forward area is bright, your speed decreases to 10 mph or less, or the EyeSight® system is malfunctioning or is temporarily stopped, HBA automatically switches to low beams.

STEERING RESPONSIVE HEADLIGHTS (SRH)

The Steering Responsive Headlights (SRH) system aims the headlight beams in the direction you are steering, improving visibility at corners and intersections when driving at night. Although the system is normally on, you can turn the system off using the SRH OFF switch located on the lower left console.

For more information, please refer to “Instruments and Controls” in your Owner’s Manual.

REVERSE AUTOMATIC BRAKING (RAB) (if equipped)

This system uses four rear bumper mounted sonar sensors to detect objects when moving between 1 and 9 mph in reverse. RAB uses the Rear-Vision Camera image to display colored proximity alerts when an object is detected. As an object becomes closer to the rear of your vehicle, audible beeps provide additional awareness in progressive levels. If RAB determines that a collision with an object is possible, the system can automatically apply the brakes to help prevent or minimize the impact.

Reverse Automatic Braking (RAB) OFF

In some cases, such as connecting a trailer, it may be helpful to temporarily turn the system off. RAB can be turned off using the buttons on the Touchscreen when the select lever is in the “R” position.

Select and hold the “RAB ON” button until it changes to “RAB OFF” to disable the automatic braking functions of the RAB system.

Select and hold the “P))) ON” button until it changes to “P))) OFF” to disable the audible beeping of the RAB system.

DRIVERFOCUS® OVERVIEW (if equipped)

Your Subaru features DriverFocus®, a state-of-the-art system that helps reduce distracted driving for both new and experienced drivers.

Working with our award-winning EyeSight® Driver Assist Technology, DriverFocus® is like having an attentive co-pilot along for the ride, available to give a helpful alert if a driver becomes distracted or drowsy. For added convenience, DriverFocus® can also recognize up to five drivers and remember their preferences, such as seat position, climate settings, and outside mirror positions.

Scan to learn more about **DriverFocus®.**

For more information, please refer to the video linked in the QR code and to “Starting and Operating” in your Owner’s Manual.

DRIVERFOCUS® COMPONENTS

Camera

DriverFocus® uses a near-infrared camera to focus on the driver’s eyes and head positions. The camera automatically scans and recognizes registered drivers, adjusting settings to their preferences.

Multi Function Display (MFD)

The MFD is used to register and delete users. Navigate the MFD screens using the “INFO” and “i/SET” switches on the steering wheel.

INFO Switch

Press the INFO switch to cycle through useful information in the Multi-Function Display (MFD). Navigate to the “Settings” Menu, then “Driver Monitoring System” to register drivers and change other DriverFocus® settings.

i/SET Switch

Once in the Multi-Function Display settings, pulling the up and down arrow switches will navigate through the settings menus. Pull the "i/SET" switch to confirm a selection.

i/Set and Arrow Switches

Combination Meter Display (CMD)

The CMD provides audible signals, visual alerts, and reminders in the event you become drowsy or distracted. DriverFocus® status is also displayed in the CMD. The Status Icons Chart below explains the status icons.

CMD

Status Icon	Indication
	DriverFocus is actively operating
OFF	OFF (Switch was pressed)
	Temporary Stop (See Owner's Manual)
	Malfunction (Contact your Subaru Retailer)

Status Icons Chart

DROWSY/INATTENTIVE WARNINGS

DriverFocus® detects when the driver is possibly not paying attention or is becoming drowsy while driving. It works whether you are a registered user or not. The system does not provide alerts when the turn signals are operating or when the select lever is in the "R" position.

When the system perceives the driver is not paying attention, the "Keep Eyes on Road" warning will appear in the CMD along with three rapid beeps.

When the system perceives drowsy driving, various warnings will appear in the CMD and/or MFD, along with beeps.

Press the Driver Monitoring System OFF button on the instrument panel to turn the system off. Press it again to turn the system back on again.

DRIVER PROFILE/CONVENIENCE SETTINGS

You can take advantage of convenience settings by becoming a registered driver. Preferences such as seat and side mirror memory settings, as well as some features in the MFD and climate control, are uniquely linked to you.

Registering a Driver

1. With the ignition on, use the INFO button on the steering wheel to navigate to the "Settings" menu in the MFD. Press and hold the INFO button to enter the menu.
2. Use the i/SET switches to navigate to the "Driver Monitoring System" menu.
3. Select "Register User" to add a new driver. Up to five drivers can be registered.
4. Select the position number you want to store to. Adjust the seat and side mirror positions before selecting "Set".
5. Face forward until you hear a beep.

NOTE: The system does not save images, audio or video.

6. Use the i/SET switch to enter your name and choose from an available icon.
7. Select "Set" to finish registration.

Temperature Gesture Control

Once you are recognized by the DriverFocus® system as a registered driver, the gesture control function allows you to use the DriverFocus® camera to quickly and easily adjust the interior temperature of your vehicle without having to take your eyes off the road. Use the following actions to adjust the temperature with gesture control:

- **Raise the temperature by 4:** gesture toward the DriverFocus® camera with an open palm, fingers extended up.

Raise Temperature

- **Lower the temperature by 4:** gesture toward the DriverFocus® camera with a closed fist.

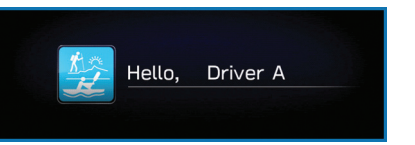

Lower Temperature

NOTE: The set temperature changes once per gesture operation. The engine must be running and the climate control system activated for gesture control to operate.

Recognizing a Driver

DriverFocus® will scan and recognize you as soon as you enter the vehicle. The MFD will display a welcome screen with your user name and personal icon. The vehicle will also recall your user settings, such as driver seat and side mirror positions.

If the system does not automatically recognize you, use the Multi-Function Display to navigate to the “Driver Monitoring System” menu, then select “Repeat Facial Scan.”

Deleting a Driver

1. With the ignition on, use the INFO button on the steering wheel to navigate to the “Settings” menu in the MFD.
2. Press and hold the INFO button to enter the settings menu.
3. Use the i/SET switches to navigate to the “Driver Monitoring System” menu.
4. Select “Delete User”.
5. Select the driver you want to delete and select “Yes”.

DRIVER MONITORING SYSTEM OFF

Press the switch on the lower left instrument panel to turn the DriverFocus® system off. Press the switch again to turn the system back on.

NOTE: The user recognition function and the automatically retract seat on entry function remain active even if the DriverFocus® system is turned off.

STEREO CAMERA PRECAUTIONS

Your EyeSight® stereo cameras are precision components that must be kept free from obstruction and contamination, such as fingerprints or cleaning solutions. When the system detects that the stereo camera lenses are impaired, a malfunction indicator will be displayed and EyeSight® functions will not be available.

When you are in the vicinity of the EyeSight® stereo cameras, always observe the following precautions:

- Do not touch or attempt to clean the EyeSight® camera lenses inside the vehicle. Extra caution should be used when cleaning the inside of the windshield. Over-spray from cleaning solutions may impair or even damage the camera lenses. When cleaning the inside of the windshield around the camera cover, do not spray cleaner directly onto the windshield. Instead, spray cleaner onto a cloth and then wipe the windshield. Please inform others who may attempt to clean the windshield, such as car wash staff, of these precautions.
- If the inside of the windshield in front of the stereo camera is dirty, do not try to clean the windshield yourself. Contact your Subaru retailer to have the vehicle inspected.
- If the camera system becomes hot, the cooling fans may operate. Do not block or insert anything into the ventilation holes. Do not touch the camera cover, because it may be hot due to head generated by the camera system.
- Electronic Toll Collection devices, such as EZPass™, must be installed in an area that does not obstruct the stereo cameras' field of vision. See prohibited area on page 108.
- Adjust the rearview mirror so it does not obstruct the stereo cameras' field of vision.
- Do not install any interior rearview mirror accessories, such as a wide-type mirror or hanging objects. Only approved Genuine SUBARU accessories may be installed.

For more detailed information, please refer to your EyeSight® Owner's Manual.

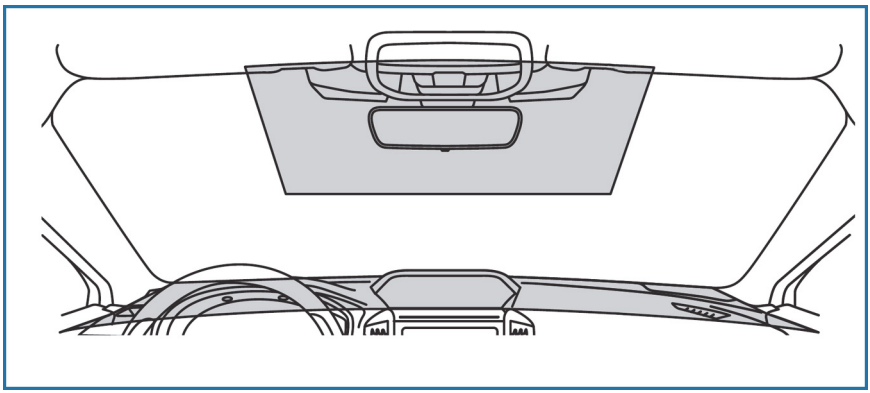

WINDSHIELD GLASS AND DASHBOARD

Since the characteristics and limitations of the EyeSight® stereo cameras are similar to human eyes, it is important that the area in front of the cameras be kept free from dirt, scratches, cracks, fogging, or accessories mounted to the windshield, hood or dashboard. Visual impairments or reflections can affect EyeSight® system performance. Extra caution should be taken when cleaning the windshield to prevent over-spray from cleaning solutions.

The image in the following section outlines those areas that must be kept clean and free from obstruction. Please refer to the Owner's Manual for a complete listing of limitations.

FRONT VIEW

FORESTER

Do not place stickers or objects in the prohibited area (in gray).

EYESIGHT® DISCLAIMER

EyeSight® is a driver assist technology which may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving. System effectiveness depends on many factors such as vehicle maintenance, weather and road conditions. See Owner's Manual for complete details on system operations and limitations.

The Pre-Collision Braking system is designed to provide automatic braking that either prevents a collision or reduces the severity of a frontal impact.

The Pre-Collision Throttle Management system is designed to reduce acceleration and minimize the severity of certain frontal impacts.

Advanced Adaptive Cruise Control and Brake Light Recognition are designed to assist the driver and are not substitutes for safe and attentive driving.

Lane Centering function operates only when used in conjunction with Advanced Adaptive Cruise Control.

Lane Departure Prevention operates only when the lane markings are visible, and system effectiveness depends on many factors.

Blind-Spot Detection, Lane Change Assist and Rear Cross Traffic Alert are systems designed to assist the driver by monitoring the rear and side areas of the vehicle during a lane change or reversing and are not a substitute for safe and attentive driving.

The Reverse Automatic Braking System is not a substitute for safe and attentive driving. System effectiveness depends on many factors, such as vehicle maintenance, weather and road conditions. Always exercise caution and use vehicle mirrors and the Rear-Vision Camera when backing up. See Owner's Manual for complete details on system operation and limitations.

The Driver Focus Distraction Mitigation System is a driver recognition technology designed to alert drivers if their attention to the road wavers or if the driver's face appears to turn away. The driver is always responsible for safe and attentive driving. System effectiveness may be affected by articles of clothing worn on the head or face. See Owner's Manual for complete details on system operation and limitations.

HOW TO OVERVIEW

This “How To” appendix provides detailed, step-by-step instructions to easily connect with features of your Forester.

If you need some help with these features or want to learn more, we are here to assist you:

Your Subaru Owner’s Manuals:
Located in the glovebox

Online Subaru Owner’s Resources:
www.subaru.com/owners

Subaru Customer Support:

1-800-782-2783 (1-800-SUBARU3)

Scan to learn more about **Owner's Resources**.

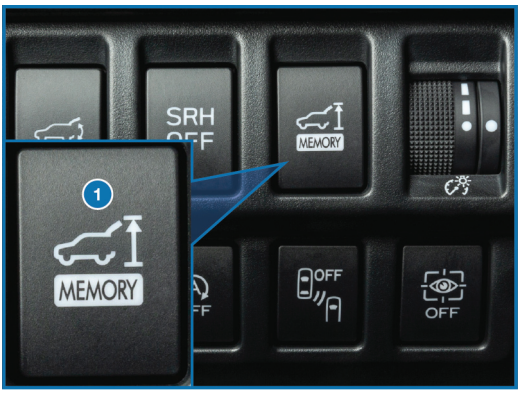

Scan to learn more about **Customer Support**.

MEMORY HEIGHT (if equipped)

You can set where the Power Rear Gate stops when it opens. This is a great feature to limit the upward travel of the rear gate to ensure you can reach it or to prevent the rear gate from contacting a garage ceiling. You can learn more about setting the Power Rear Gate Memory Height from the how-to video linked in the QR code and the following steps.

Scan to learn how to set **Power Rear Gate Memory Height.**

1. Make sure the Memory Height Switch is in the “OFF” position (the switch is raised and you can see a white line on the top).

Memory Height Button

2. Open the rear gate using the Power Rear Gate Button. Pause the rear gate when it reaches the desired height by pressing the Power Rear Gate Button on the rear gate, instrument panel, or key fob.

Power Rear Gate Button

3. Press the memory switch in the instrument panel to select the “ON” status (switch is depressed and you can no longer see the white line on top).

Memory Height Button

4. With the rear gate at the desired height, press and hold the Power Rear Gate Close Button on the inside edge of the rear gate. A chirp will sound and the hazard warning lights will flash to confirm the height is set.

Power Rear Gate Close Button

When the memory switch is in the “ON” status, the rear gate will stop at the set memory height when you use any of the Power Rear Gate buttons.

For more information, please refer to “Keys and Doors” in your Owner’s Manual.

MEMORY DRIVER'S SEAT (if equipped)

You can set the seat and outside mirror position and retrieve them using the buttons on the driver's door or the access key fob. You can learn more about setting and retrieving your seat and mirror positions from the how-to video linked in the QR code and the following steps.

Scan to learn how to set **Memory Power Seat and Mirrors.**

To set a seat position with a button:

1. Make sure the select lever is in the "P" position, with the parking brake applied and the ignition in the "ON" position.
2. Adjust your seat and outside mirrors to the desired position.
3. Register the position by either of the following procedures:

- Press the "SET" button, and then press and hold either button "1" or "2". A chirp sounds when the position is registered.
- While holding the "SET" button, press and hold either button "1" or "2". A chirp sounds when the position is registered.

Memory Seat Buttons

To retrieve the seat position set with a button:

1. Turn the ignition switch to "ON".
2. Put the select lever in the "P" position and apply the parking brake. Then, press button "1" or "2". The seat and outside mirrors are automatically recalled to your preferred positions.

To set a seat position with the access key fob:

1. Make sure the select lever is in the "P" position with the parking brake applied and the ignition "OFF".
2. Adjust your seat and outside mirrors to the desired position.
3. While holding the "SET" button, press and hold the unlock button on the access key fob. A chirp sounds when the position is registered.

To retrieve the seat position set with the access key fob:

1. Hold the access key fob.
2. Unlock and open the driver's door. The seat and outside mirrors are automatically recalled to your preferred positions.

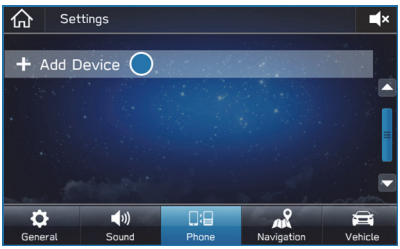

BLUETOOTH® PAIRING

Pairing an Android Device

1. Start by selecting "Settings" on the Home screen.

2. Select the Phone menu, and then select "Add Device".

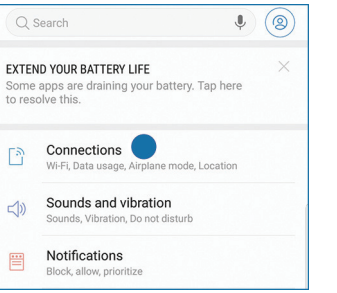

3. This screen will be displayed when pairing mode is in progress. The device name will most likely be Subaru BT, but be sure to make note of what name it is, so you can find it on your phone.

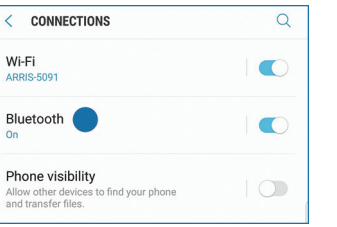

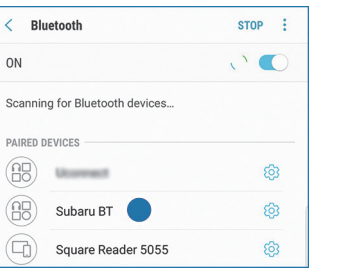

4. On your Android device, go to “Settings”. (It can be found under apps.) Then select “Connected Devices” or “Connections”.

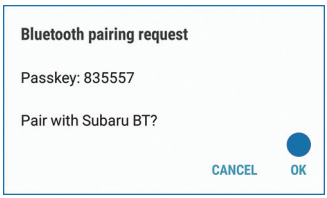

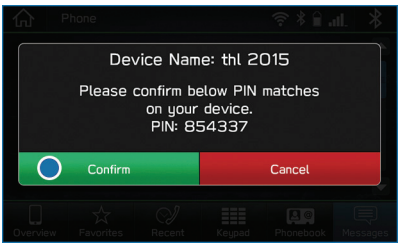

5. Now select “Bluetooth”. This will show a screen to “Pair New Device” or it will be showing the nearby devices to add. Select “Subaru BT” if shown on the list or “Pair New Device”.

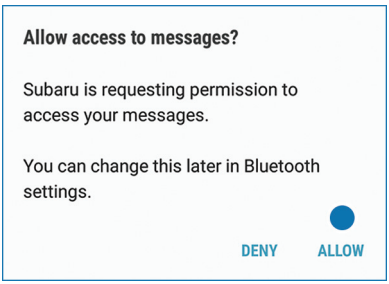

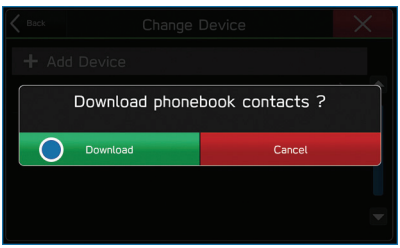

6. Now select "OK" to pair with Subaru BT and select “Confirm” on the Touchscreen if the PIN matches the phone.

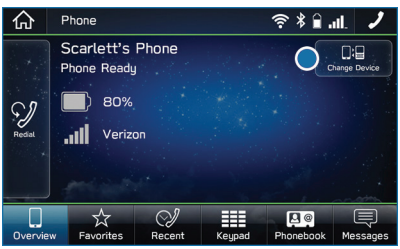

7. Make sure to allow access to your contacts and call history and select “Download” to download the phonebook contacts.

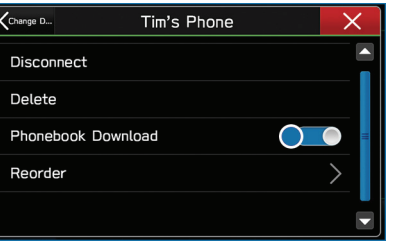

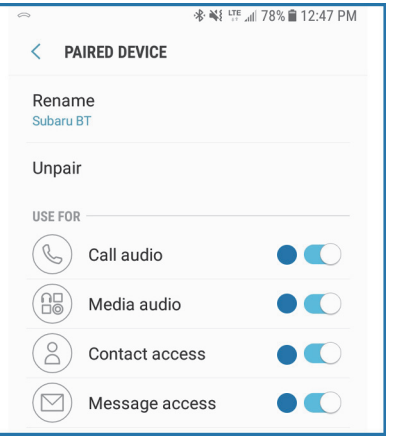

8. If your phonebook or messages are not appearing, press the “Phone” icon on the home screen and then select “Change Device” in the Overview menu.

9. Select your phone and ensure “Phonebook Download” is enabled.

10. If you still cannot access your phonebook or messages, go back to your phone’s Bluetooth® settings and select the gear icon next to your vehicle’s device name and ensure all settings are enabled.

Pairing an iOS/Apple Device

1. Start by selecting “Settings” on the Home screen.

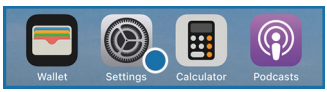

2. In the “Phone” menu, select “Add Device”.

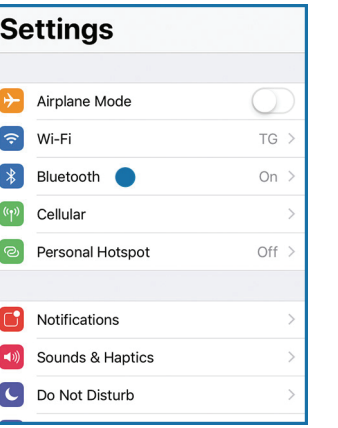

3. This screen will be displayed when pairing mode is in progress. The device name will most likely be Subaru BT, but be sure to make note of what name it is, so you can find it on your phone.

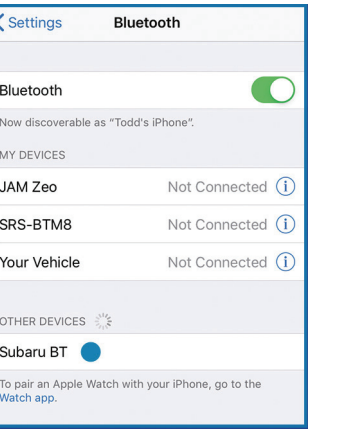

4. On your iOS/Apple device, select “Settings”. The location on the Home screen will vary.

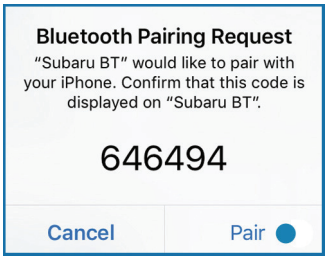

5. Select “Bluetooth”.

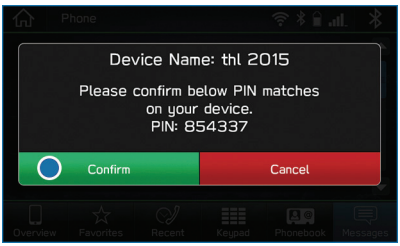

6. Now select the device name (usually “Subaru BT”) on your phone.

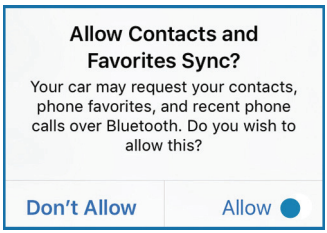

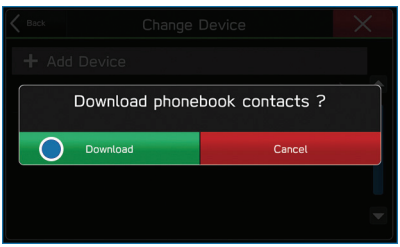

7. Verify your iOS/Apple device PIN is correct and select “Pair” on your phone and “Confirm” on the Touchscreen.

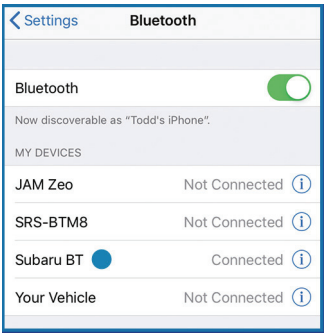

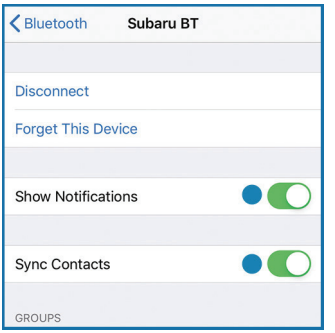

8. Select “Allow” on the “Allow Contacts and Favorites Sync?” screen, and then select “Download” to download the phonebook contacts.

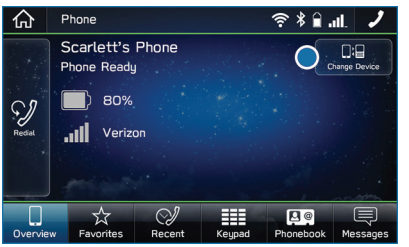

9. On your iOS/Apple device, Subaru BT should now be listed under “Bluetooth Settings”. Select the blue “i” next to the device name. Then ensure “Show Notifications” and “Sync Contacts” are enabled.
10. Your iOS/Apple device is now paired. It is recommended that you restart your Subaru to complete the process and ensure everything is fully synced.

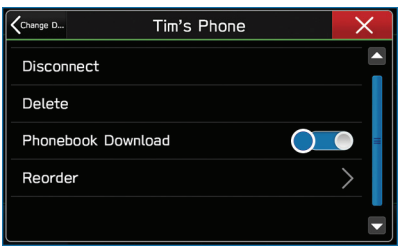

11. If your phonebook or messages are not appearing, press the “Phone” icon on the home screen and then select “Change Device” in the Overview menu.

12. Select your phone and ensure “Phonebook Download” is enabled.

ANDROID AUTO™

Cables

Always use a high-quality OEM USB cable.

Ensure the Android phone is fully up to date. Also verify that the Android Auto™ app, along with all other apps that work with Android Auto™, are up to date. Android Auto™ might not function properly if one of them is outdated or having an issue. The apps can be downloaded from the Play Store.

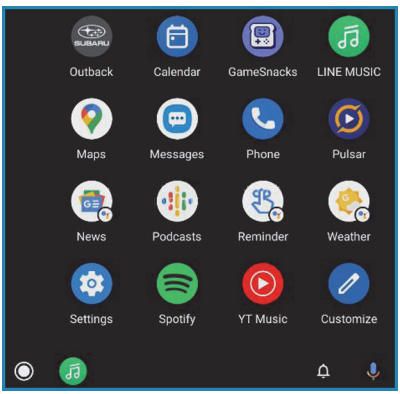

For more information, visit www.android.com/auto/

Scan to learn more about **Android Auto**

Connecting an Android™ Phone

Before connecting your phone for the first time, ensure your phone has a strong and fast cellular data connection. Turn on your Subaru, make sure the vehicle is in park, and allow enough time to set up Android Auto before starting your drive.

1. Plug a USB cable into the USB port of the vehicle and plug the other end of the cable into your Android phone. Your phone might ask you to download the Android Auto app or update to the newest version.
2. Follow the on-screen prompts and instructions to complete setup. Your phone's Bluetooth is turned on automatically when Android Auto is connected to the car via USB.

3. Once setup is complete, select the Android Auto button on the Touchscreen and follow the instructions to get started.

Compatible Models

Android Auto™ is available on Android phones. To see if your phone is compatible, please refer to the Android Auto™ website: https://www.android.com/phones/

Scan to see if your phone is compatible with **Android Auto**

APPLE CARPLAY®

Cables

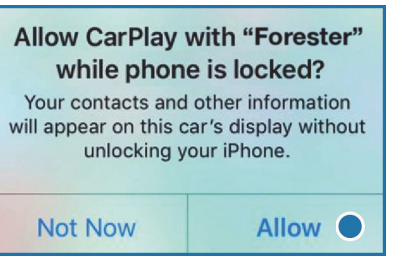

Apple CarPlay requires compatible iPhones to be connected via your Subaru's USB port. Cables must be an 8-Pin Lightning MFi Certified cable (made for iPod/iPhone). Look for the Works with Apple CarPlay or Made for iPod, iPhone, iPad icons when selecting a cable.

For more information, visit: **www.apple.com/ios/carplay/**

Scan to learn more about **Apple CarPlay**

Connecting an iPhone

1. To set up Apple CarPlay, you will need to plug the iOS/Apple phone into the USB port of the vehicle. Make sure to use an MFi certified cable.
2. Select "Allow" on the iOS/Apple phone when prompted.

3. Select Apple CarPlay on the vehicle screen. This will bring you to the home screen of Apple CarPlay.

   Ensure the iOS/Apple phone is fully up to date. Also ensure all apps that work on Apple CarPlay are up to date. Apple CarPlay might not function correctly if one of the apps is outdated or having an issue. Apps can be updated in the App Store.

Compatible Models

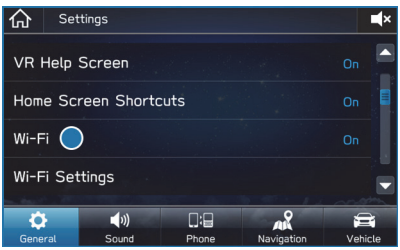

For a list of all the Apple phones that are compatible with Apple CarPlay, visit: **www.apple.com/ios/carplay/**

Scan to learn more about **Apple CarPlay**

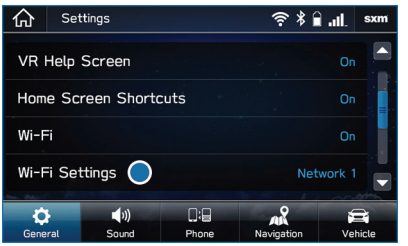

WI-FI

Connecting to a Wi-Fi Network (if equipped)

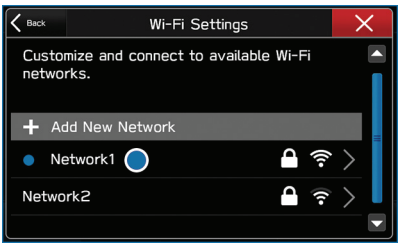

1. Display the General Settings screen by pressing the “Home” button, then select “Settings”. Make sure Wi-Fi is on.

2. Under the “General” tab, select “Wi-Fi Settings”.

3. Select the desired network. If the network is a secure network, a lock symbol appears on the right side of the screen.

4. Select “Connect” to connect to the network. If you are connecting to a secure network, enter the password and select “Join”.

5. Check that a confirmation message appears when the connection is complete. If an error message appears, follow the guidance on the screen to try again.

Wi-Fi Hotspot Subscription (if equipped)

Internet access is purchased separately through AT&T with monthly, per gigabyte, and unlimited data options available. Existing AT&T customers have the option to add an additional line to their AT&T Mobile Share plan. Available on select models.

Scan to learn more about **AT&T plans**

Shortly after you take delivery of your new Subaru, you will receive an email from AT&T for a one month free trial and how to activate your free trial. To set up and enroll:

1. Select “Settings” on the Home screen.
2. Select “Wi-Fi Hotspot” to turn it on (if the Wi-Fi Hotpot is already on then proceed to the next step).
3. Select Wi-Fi Hotspot Settings to view or update the following settings:
   - Wi-Fi Network Name (SSID)
   - SSID Broadcast (Network ON / OFF)
   - Security Type (WPA / WPA2)
   - Password
   - Connected Devices (Maximum of 8 devices)
   - Broadcast Frequency

How to enroll:

1. Connect your tablet, smartphone or laptop to the SUBARU STARLINK® Wi-Fi Hotspot network listed in the settings menu and open your preferred web browser on the device connected.
2. Once the SUBARU STARLINK® Wi-Fi Hotspot homepage loads, follow the on-screen instructions to create a new account or to add your vehicle to an already existing AT&T Wireless account. You can also subscribe to the Wi-Fi Hotspot from the MySubaru website or Mobile App.

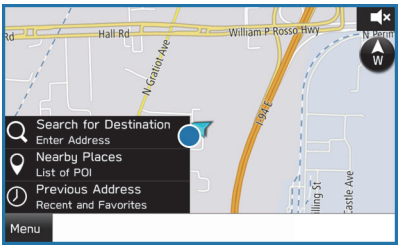

You can also visit an AT&T store or their website for more information at:
https://myvehicle.att.com/#/subaru/learn?country=US&language=en

MAPS (if equipped)

Finding a Destination by Address

Start by selecting the “Map” button to display the map screen. To search by address:

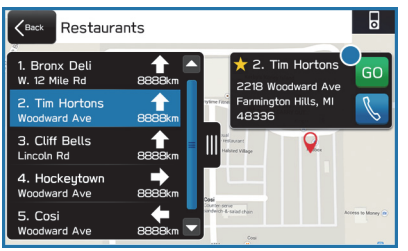

1. Select the “Menu” button, then select “Search for Destination Enter Address.”

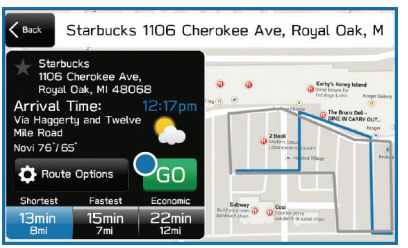

2. The keypad screen displays. Enter the address or a keyword (e.g. pizza) and select “Search.” As you type the address or name of the destination, suggestions will display. The route calculation screen is displayed if a suggested is selected.

3. Select the desired item from the list, then select “GO” for the route calculation screen.

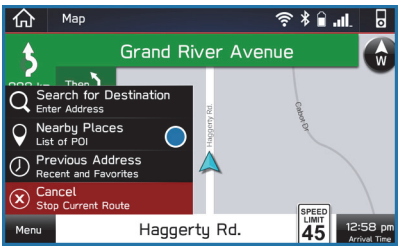

4. The route calculation screen displays three recommended routes at the bottom left of the screen. Select the desired route, then select “GO”.

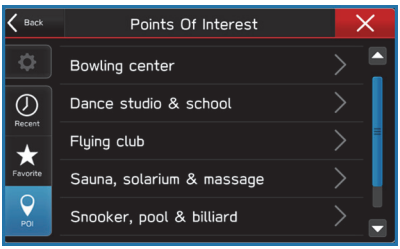

Finding a Destination by POI

To search by Points Of Interest (POI):

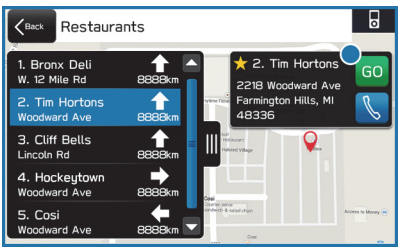

1. Push the “Map” button to display the map screen. Then, select “Menu”, followed by “Nearby Places List of POI”.

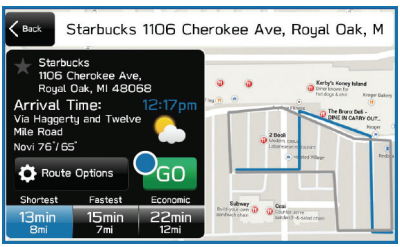

2. Categories are listed alphabetically. Use the scroll bar on the right, if needed, to display more categories, then make your selection.

3. Select the desired item from the list, then select “GO” for the route calculation screen.

4. The route calculation screen displays three recommended routes at the bottom left of the screen. Select the desired route, then select “GO”.

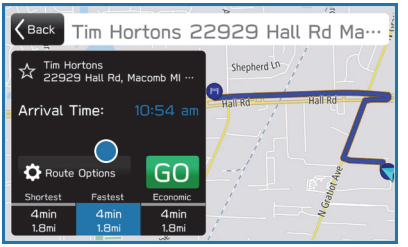

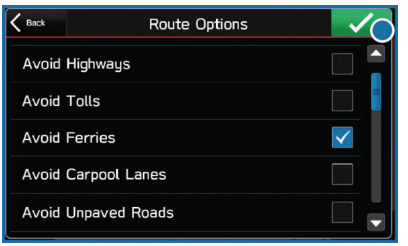

Route Options

You can set the navigation system to avoid various types of routes:

1. Select “Route Options” on the route calculation screen.
2. Select the desired item to avoid.
3. Select the check mark in the upper right corner.

NOTE: The avoidance criteria for the route calculation can also be set from the navigation settings screen.

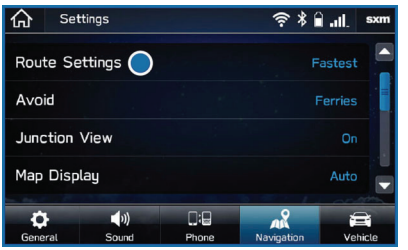

Shortest/Fastest/Economic

You can set the route preferences to search for the shortest, fastest, or most economic route. To do this:

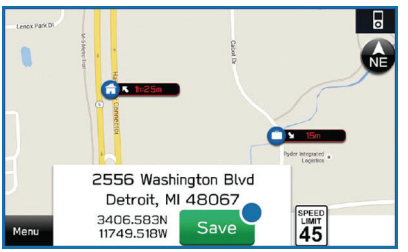

1. Select “Settings” on the home screen.
2. Select “Navigation”.
3. Select “Route Settings”.
4. Select the preference you would like to use: Shortest, Fastest, or Economic.

Saving Destination as a Favorite

Registered points can be set as a destination. To save a location as a favorite once you have arrived:

1. Select the current street name.
2. Select “Save”.
3. Select to save as Home, Work, or Favorite.

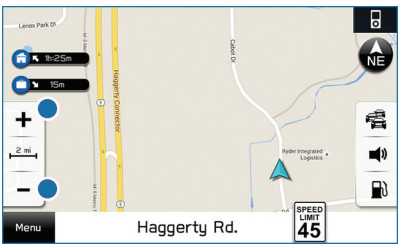

Guidance Screen Icons

The Guidance Screen Icons are the common icons used for the navigation guidance:

ICON	EXPLANATION	ICON	EXPLANATION
	Turn left.		Stay in the left lane.
	Turn right.		Stay in the right lane.
	U-Turn Left.		Straight ahead at the intersection.
	U-Turn right.		Turn left at the T junction.
	Keep left at the fork in the road.		Turn right at the T junction.
	Keep right at the fork in the road.		Go left at the roundabout.
	Turn left & sharp curve.		You are half way to your destination.
	Turn right & sharp curve.		You have arrived at your destination.

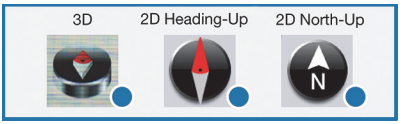

Map Zoom

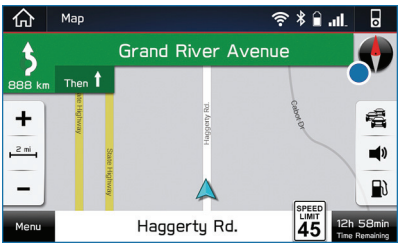

Once on the map screen, you can zoom in or out by touching the “+” or “-” buttons on the screen. You can also use two fingers on the screen and move them apart to zoom in or together to zoom out.

Map View/Perspective

The perspective of the map can be changed between 2D north-up, 2D heading-up, and 3D. To change the view, select the icon at the upper right of the screen. Each time the icon is selected, the view will change as well as the icon to match the map perspective.

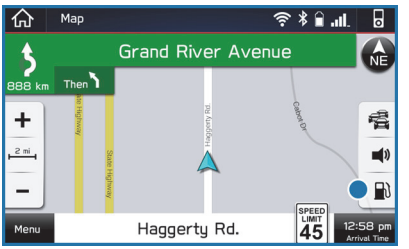

Traffic Information

Road sections affected by traffic conditions are displayed in a different color on the map, and a small icon representing the type of traffic condition is displayed above the road.

A subscription to the SiriusXM® Satellite Radio Service is necessary to receive the data service in the vehicle.

Nearest Gas Station

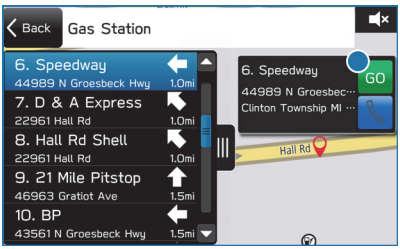

To find the nearest gas station, select any point on the map and then select the fuel icon in the lower right corner.

When driving on the highway during route guidance, information on gas stations, restaurants, or rest areas near the next three highway exits will be displayed.

Select the desired item from the list, and then select “GO” to navigate to the selected place.

Arrival Time/Distance

Displays the distance to the destination, the estimated travel time to the destination, or the estimated arrival time at the destination. Select the information box in the lower right corner to change between modes.

Canceling Guidance

To cancel guidance, select “Menu” and then select “Cancel”.

Map Updates

You can update the entire USA map at once via USB by going to: **www.subaru-maps.com**

Maps can also be updated over a Wi-Fi network. To update your maps via Wi-Fi, follow this process:

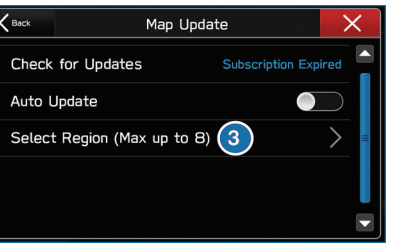

Scan to learn more about **Map Updates**

1. Connect to a Wi-Fi network. If you need help with this, see page 124.

2. On the Home screen, select “Settings” then “Navigation”. Next, select “Map Update” on the navigation setting screen.

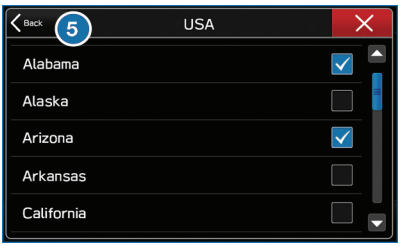

3. Select “Select Region (Max up to 8)” to select the regions you would like to update.

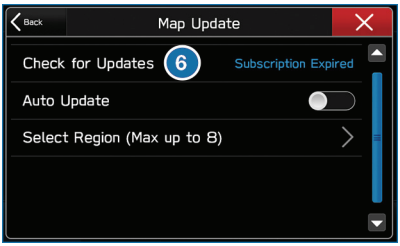

4. Select the regions for which maps are to be updated.

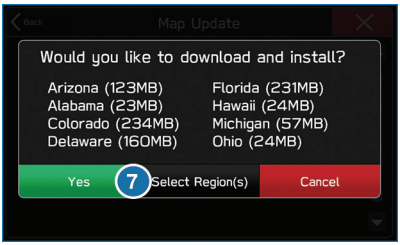

5 Select “Back”.

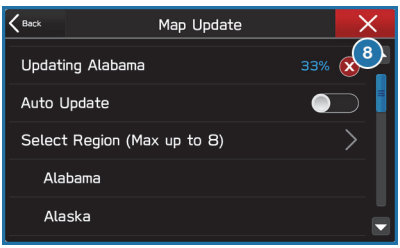

6 Select “Check for Updates”.

7 Check the confirmation message, then select “Yes”.

8 This screen is displayed simultaneously with the start of the download and installation. Select the “X” near the update progress if you need to stop the download and installation.
