

MAJOR V3 MANUAL

LORENTZ MAJOR V3

MAJOR REMOTE V3

Touchscreen is locked during acceleration or braking. Double-tap to unlock when the board is stationary and throttle is centered. Vibration confirms successful unlock.

Remote / Board Battery Remaining:

Direction Arrow : ▲ Front ▼ Rear

Speed Mode: Gear 1 (0-24kph / 0-15mph) Gear 2 (0-40kph / 0-25mph) Gear 3 (0-65kph / 0-40mph)

Ready To Ride

Before Riding:

- Please carefully read & fully understand the manual;
- Always wear a helmet, plus other protective equipment, such as elbow & knee pads, which are highly recommended;
- Find a flat, dry, open & smooth surface, which is obstacle free, for your first ride.

Frist Ride:

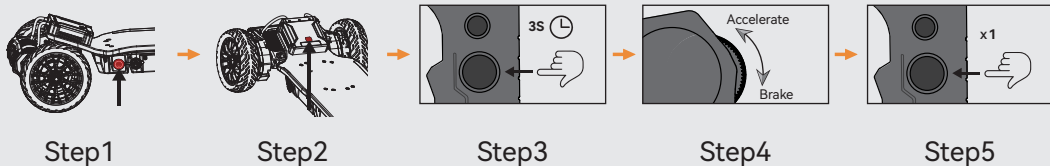

Step 1: Charge the board for 5 minutes via the charger to activate the board;

Step 2: Long press the power button for 2S to turn the board on/off.

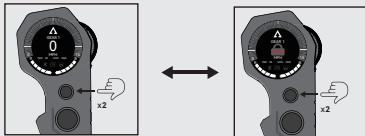

Step 3: Long press button B for 3s to turn the remote on/off;

Step 4: Gently roll the throttle wheel forward to accelerate, and roll the throttle back to brake;

Step 5: Short press button B to change speed modes.

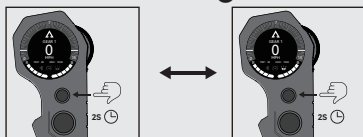

To Lock / Unlock The Board:

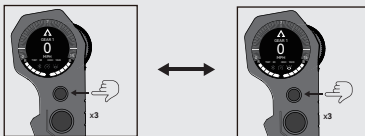

Short press button A twice, to lock/unlock the board;

Power On / Off Headlights:

Notice

- **Avoid Water** : - Avoid Water: Riding in wet conditions or through puddles, can damage the board's electronics and cause the board to lose power, or stop suddenly. Damage to the board due to water exposure is not covered under warranty.
- **Danger** : Crashes & losing control, in downhill and high speed riding, may cause serious injury. Please be very careful !!!
- **Lose Power1**: Lorentz Major can lose connection with the remote. Please always ride within your ability to control the board in case power loss occurs. You must be prepared to lose your ability to brake at any time.
- **Lose Power2**: Please be aware that braking downhill with a full battery will cause the board to shut down.
- **Start At Gear1**: - Always begin to ride in the lowest speed mode. Roll the throttle wheel forwards in small increments to accelerate gently.
