HOW TO

Inflating and deflating the Hangout Couch (Port)[™] is simple. First remove the folded Hangout Couch (Port)[™] from the sling, unroll, attach the pump hose to the inflation valve and fill 'er up. The Hangout Couch (Port)[™] is to be filled until the pressure reaches 6-8 PSI and the Back-Support Pontoon should be filled until the pressure reaches 2-3 PSI. When you are ready to pack it up, do everything in reverse.

CARE & STORAGE

Always store your Hangout Couch (Port)[™] in a cool, dry place or shady area out of reach of direct sunlight to avoid bursting or fading of colors. The sun both weakens the material and seams and increases the pressure beyond its design limits. If you must leave your Hangout Couch (Port)[™] out of the water and in direct sunlight, reduce pressure until the Hangout Couch (Port)[™] is compressible by hand.

The Hangout Couch (Port)[™]'s recommended inflation is between 6-8 PSI for the Floor and 2-3 PSI for the Back-Support Pontoon.

HOW TO FOLD

1. When you are finished with your Hangout Couch (Port)™, make sure to clean off any dirt, sand or salt water with fresh water. Then allow the Hangout Couch (Port)™ to dry or dry with a towel.

Begin deflating the Back-Support Pontoon by removing the inflate/deflate port cap and pressing the push pin down until you can turn it clockwise to lock it open.

Remove excess air with a pump in deflate mode.

2. Next, begin deflating the Floor Chamber by removing the inflate/deflate port cap and pressing the push pin down until you can turn it clockwise to lock it open.

Remove excess air with a pump in deflate mode.

3. Without removing the Back-Support Pontoon, fold side **A** in to meet the Back-Support Pontoon.

4. Fold edge **B** in toward the Back-Support Pontoon.

Fold side **A** inward.

HOW TO FOLD

5. Fold edge **B** inward again.

6. Fold edge **B** in a third time.

7. Place Hangout over strap.

Finally, fold edge **B** over **A**.

7. Secure with included strap.

WARRANTY
