HOW TO

Inflating and deflating the Hangout FLOATube™ is simple. First remove the folded Hangout FLOATube™ from the bag, unroll, attach the pump hose to the inflation valve and fill 'er up. The Hangout FLOATube™ is to be filled until the pressure reaches 2-3 PSI. When you are ready to pack it up, do everything in reverse.

CARE & STORAGE

Always store your Hangout FLOATube™ in a cool, dry place or shady area out of reach of direct sunlight to avoid bursting or fading of colors. The sun both weakens the material and seams and increases the pressure beyond its design limits. If you must leave your Hangout FLOATube™ out of the water and in direct sunlight, reduce pressure until the Hangout FLOATube™ is compressible by hand.

The Hangout FLOATube's™ recommended inflation is between 2-3 PSI.
