BREEO BASE

SUPERIOR SURFACE PROTECTION

Burn your fire pit just about anywhere without worry. From your natural stone or concrete patio, to your wood or composite deck—even wood chips and blacktop—the Breeo Base protects what's underneath so you can enjoy the fire above.

FEATURES

PROTECTION: Multi-surface safe on natural stone, block, poured concrete, wood, composite material, asphalt, wood chips, etc.

DESIGN: Stainless steel construction and compatible with all Breeo X Series® and Luxeve® Fire Pits.

USE & CARE

Take your Breeo Base out of the box and remove it from the bag. Position it where you'd like your fire pit.

Once the Base is situated, place your fire pit on the Base with the legs aligned with the corners of the Base.

When the fire pit is placed on the Base, do not slide the Base across the surface as it may scratch the surface or the Base. To clean the Breeo Base, use a stainless steel cleaner - such as Bar Keepers Friend.

SURFACES

NON-COMBUSTIBLE

SURFACES: The Breeo Base will protect paver patios, stamped concrete, concrete, blacktop, gravel, dirt & any other non-combustible surfaces from damage due to excessive heat.

COMBUSTIBLE SURFACES:

The Breeo Base will provide adequate protection from damage due to excessive heat on wood decks, composite decks, and wood chips. However, due to the combustible nature of the surface, a Spark Screen is required at all times, and the firewood must stay below the rim of the fire pit at all times.

GRASS: The Breeo Base can be used on grass to add extra height to your fire pit, but it will **NOT** provide adequate protection to prevent the grass from dying due to heat.

WARNING

Because the Breeo Base is stainless steel, it will get hot while the fire is burning. We do not recommend touching the Base as the fire burns.

When using the fire pit and Base on a combustible surface, we recommend using the Breeo Spark Screen and keeping the wood below the rim to ensure proper fire safety.
