X SERIES INSERT RING

DESIGNED FOR THE PATIO ENTHUSIAST

The Breco X Series® Insert Ring provides a seamless integration of your X Series Fire Pit into a stone surround, so you don't have to sacrifice smokeless technology to match your hardscape.

FEATURES

CONSTRUCTION: Made in the USA with stainless steel

COMPATIBILITY: Place your X Series Smokeless Fire Pit into any stone surround.

SETTING UP

1 BLOCK SURROUND

Measure the inside diameter of your block surround to ensure it will fit your X Series Fire Pit.

INSIDE DIAMETER

X19	X24	X30
22-26 in.	27-33 in.	34-39 in.

2 SET UP SURROUND

The minimum recommended depth of your block fire surround is 15 inches.

For additional protection, add 3-5 inches of depth to the surround and place a small layer of gravel or sand at the bottom of the stone surround before inserting the fire pit. Ensure that nothing touches the bottom or the sides of your X Series Fire Pit, as this will affect airflow and interfere with the smokeless technology. Remove any debris or ashes from inside the block fire surround if necessary.

3 PLACE INSERT RING & X SERIES FIRE PIT

Remove your fire pit and insert ring from the box. ***We recommend 2-3 people lift for placement.***

Center the insert ring on the opening. Line up the legs of your X Series Fire Pit with the notches on the insert ring. Lower your X Series Fire Pit into the insert ring until the rim lies flat on the edge of the insert ring.

USE & CARE

To clean the insert ring, we recommend your favorite stainless steel cleaner with a soft cloth or a bristle brush, water, and dish soap. Stainless steel may darken in color when exposed to heat.

WARNING

The X Series Insert Ring is designed for outdoor use only. ***Never use your Insert Ring in a building, garage, or any enclosed area.*** The X Series Fire Pit generates a tremendous amount of heat, so keep at least 10 feet of clearance above the pit from branches or overhangs.

Always use your X Series Insert Ring on a level, non-combustible surface such as rock, stone, or dirt. ***Never use your Insert Ring on wooden or composite decks, stamped concrete, or any heat-sensitive surface.*** These pits radiate intense heat that can damage or burn improperly protected surfaces.

The X Series Insert Ring may have sharp edges; it is recommended to use gloves during installation. We recommend having two people lift and lower the fire pit into the X Series Insert Ring.

All surfaces of the Insert Ring will become extremely hot when in use. To avoid burns, don't touch any part of the fire pit until it's completely cool (unless you're using protective gear like heat-resistant gloves, hot pads, potholders, etc.).

Exercise the same caution you would with any open fire. When using your X Series Insert Ring, ***never leave it unattended, especially around children and pets.***
