

#6-8041 GUTTER CLEANING KIT for

SNAPPER

250 BV 415BPB

HAND HELD & BACK PACK BLOWERS

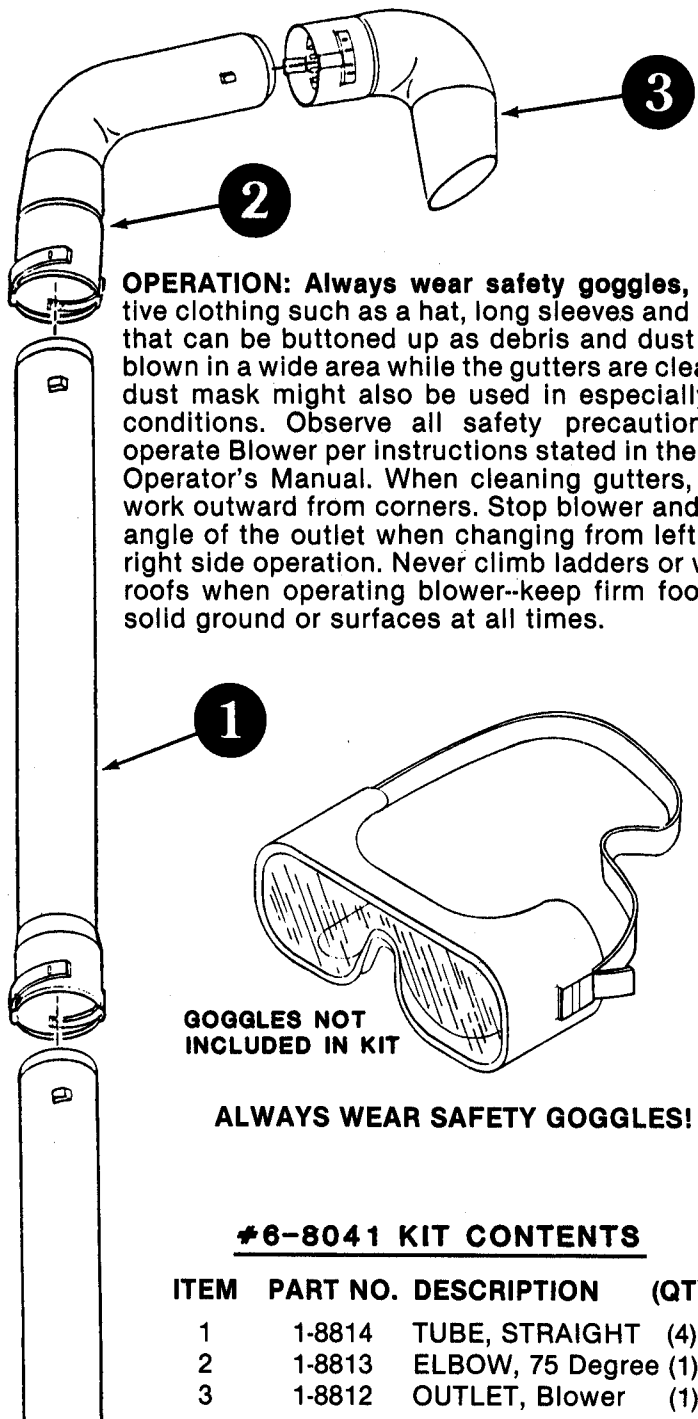

OPERATING INSTRUCTIONS

ASSEMBLY: Carefully open the flaps at one end of the kit carton so that the components can be placed back in the carton for storage after cleaning the gutters. Twist lock the required number of the 2 foot long straight tubes together then the elbow and the outlet. **NOTE:** The outlet can be positioned to blow gutters clean working outward to the left as shown below or to the right.

WORK OUTWARD FROM CORNERS

INSTALLATION: On the hand held Model 250BV Blower, remove the nozzle. On the 415BPB models remove the curved section and nozzle first then install the gutter cleaning tubes. Make sure the tubes are twist locked.

OPERATION: Always wear safety goggles, protective clothing such as a hat, long sleeves and a collar that can be buttoned up as debris and dust can be blown in a wide area while the gutters are cleaned! A dust mask might also be used in especially dusty conditions. Observe all safety precautions and operate Blower per instructions stated in the Blower Operator's Manual. When cleaning gutters, always work outward from corners. Stop blower and switch angle of the outlet when changing from left side to right side operation. Never climb ladders or work on roofs when operating blower-keep firm footing on solid ground or surfaces at all times.

GOGGLES NOT
INCLUDED IN KIT

ALWAYS WEAR SAFETY GOGGLES!
