⚠ DANGER

Contact with rotating blades and moving parts can cause injury or death. Always use proper safety techniques when operating. Keep all parts in good working order. Never use the blower if it is not in good working order.

⚠ WARNING

Read the owner's manual, safety rules, and the safety instructions. Always use proper safety techniques when operating. Keep all parts in good working order. Never use the blower if it is not in good working order.

⚠ ADVERTENCIA

La descarga de alta velocidad puede causar lesiones o la muerte. Siempre use las técnicas de seguridad apropiadas al operar. Mantenga todas las partes en buen estado de funcionamiento. Nunca use el soplador si no está en buen estado de funcionamiento.

⚠ WARNING

This shield must be in place at all times during operation.

Mower deflector must be in down position when blower is removed.

FAST-Vac

IMPORTANT:
V-side of belt must contact v-groove pulleys
Flat side of belt must contact flat pulleys

The guides and ruler furnished below are designed to help you select the appropriate hardware.

Standard Hardware Sizing

When a washer or nut is identified as 1/2" (M8), this is the *Nominal size*, meaning the *inside diameter* is 1/2 inch (8mm metric thread diameter); if a second number is present it represents the *threads per inch* (distance between threads).

When bolt or capscrew is identified as 1/2 - 16 x 2" (M8 - 1.25 x 50), this means the *Nominal size*, or body diameter is 1/2 inch (8mm metric thread diameter), the second number, 16, represents the *threads per inch*, (*distance between threads*). The final number is the body length of the bolt or screw, 2 inches (50mm).

NOTES

- These torque values are to be used for all hardware excluding: locknuts, self-tapping screws, thread forming screws, sheet metal screws and socket head setscrews.
- Recommended seating torque values for locknuts:
 - for prevailing torque locknuts - use 65% of grade 5 torques.
 - for flange whizlock nuts and screws - use 135% of grade 5 torques.
- Unless otherwise noted on assembly drawings, all torque values must meet this specification.
