EVAPORATOR COILS

Enhanced durability,
comfort and peace of mind

Models CAAMP, CAAVU, CSAHP,
CVAV, CVAM

Puron
ADVANCE™

Designed with Your Comfort in Mind

Efficiency, reliability, quality: Our aluminum evaporator coils complement your Carrier system for optimum efficiency and comfort. Made from recyclable aluminum, these tough, durable coils support the Carrier legacy of environmental stewardship. At the same time, they deliver lasting performance in corrosive environments.

EFFICIENCY

The evaporator coil is the unsung hero of your heat pump or air conditioning system. It provides the heat transfer needed to ensure peak energy efficiency and comfort capacity. And, with its outstanding corrosion resistance, it protects your system from efficiency loss experienced in corrosive environments.

DURABILITY

The sturdy, 22-gauge cabinet is painted to match your Carrier indoor unit for years of scratch-resistant good looks. Aluminum construction with thicker coil walls and our enhanced fin design combine to provide lasting durability and performance.

ENVIRONMENT

With Puron Advance™, Carrier proudly displays our commitment to environmental stewardship. It's a refrigerant that helps deliver a 75% reduction in global warming potential compared to R-410A.

LIMITED WARRANTY

To the original owner, our Carrier evaporator coils are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is five years if not registered within 90 days of installation except in jurisdictions where warranty benefits cannot be conditioned upon registration. See warranty certificate at carrier.com for complete details and restrictions.

At Carrier, we know purchasing a new heating or cooling system is a big investment. Take ownership in helping protect your investment. Carrier is excited to offer you a Consumer Choice Warranty option. Most Carrier products come with the option to select the warranty of your choice. Dealer participation is required.*

* Upon timely registration, on eligible equipment select either a 10-year parts only limited warranty or a five-year parts + three-year labor limited warranty. Dealer participation required. See limited warranty certificate at carrier.com for complete details and restrictions.

The Carrier Difference

RESHAPING THE FUTURE OF HVAC

If you could look under the hood of a Carrier CVAV or CVAM aluminum evaporator coil with Vertex™ Technology, you'd see what drives the performance – a serious commitment to quality. Here are some of the features and functions that show how we are reshaping the future of HVAC:

VERTEX
Technology

1 V-Shaped Coil

The Carrier V-shaped aluminum coil delivers similar performance to an A-coil in the size of an N-coil with better reliability, better condensate management and better quality. The V-shaped geometry provides improved heat transfer, more even and controlled airflow over the coil, and improved system efficiency† in a lighter, corrosion-resistant coil.

2 Vertex Coil Design/Technology

Our coil is constructed of flat, aluminum refrigerant channels brazed to ridged aluminum fins. It is configured in a “V” shape with the header tubes positioned at the top. The “V” configuration reduces pressure drop and enhances heat transfer. Combined, these design changes allow for the same or better SEER2 ratings without growing the size of the coil.

3 Rugged, Lasting Drain Pans

The corrosion-resistant drain pan is designed in a Polybutylene Terephthalate (PBT) material that offers unsurpassed pan strength. It is engineered with proper slope to help ensure water drainage and improved moisture removal as well.

4 Durable, Fully-Insulated Cabinet

Our aluminum V-coil is housed in a durable, 24-gauge, pre-painted taupe metallic cabinet. The fully insulated cabinet (foil faced with R-2.1 insulation properties) provides for quiet and efficient operation of the evaporator coil.

† With optimized outdoor unit under new M1 test procedures.

A Range of Comfort

Carrier delivers comfort systems in a range of shapes and sizes. Check out this side-by-side comparison of our durable and efficient evaporator coils.

	A-Coils		V-Coils		Slab Coil

+ Thermostatic Expansion Valve

The Indoor Comfort System

Your Carrier dealer will recommend a system to meet your home-comfort needs and local weather environment.

CONTROL

Wi-Fi®-enabled smart thermostat learns your schedule for greater efficiency and comfort.

AIR CONDITIONER OR HEAT PUMP

Provides efficient cooling or cooling/heating for comfort and potential energy savings.

VENTILATOR

Combines fresh outdoor air with conditioned indoor air for improved air quality.

AIR PURIFIER

Works in-line with your HVAC system to help reduce dust, dirt, pet dander and smoke particles that can circulate throughout your home.

HUMIDIFIER

Adds moisture to the air, helping keep static and dry skin at bay.

More Than a Century of Cool

In 1902, a determined engineer answered one of mankind's most nagging questions: How do we make hot, sticky, indoor air go away? In creating the world's first modern air conditioning system, Willis Carrier forever changed indoor life, and, more than a century later, the corporation that bears his name takes inspiration from his example.

Carrier strives to improve on our founder's breakthroughs, introducing new technologies that make life at home even cooler. Today, a nationwide network of experts continues to advance Willis Carrier's lifework. Your expert Carrier dealer is equipped to evaluate your home and create a customized system designed around your lifestyle.
