Homelink®
GARAGE DOOR OPENER

1. While the car is ON, hold the handheld garage door transmitter 1-3 inches from the Homelink® button you want to program in the vehicle.

2. Push and hold both the Homelink® button being programmed and the button on the garage door transmitter.

TO ERASE ALL SET CHANNELS:
Push and hold the two outside Homelink® buttons for 20 seconds until the orange indicator flashes. An individual channel cannot be erased.

ROLLING OR NON-ROLLING?
Check your garage door opener motor in your garage for a "LEARN" or "TRAIN" button by the hanging antenna. If you have one of these, you have a Rolling Code garage door opener.

3. **For Non-Rolling Code** garage door openers, watch for the indicator light to go constant.

   For Rolling Code garage door openers, watch for the indicator light to go from a slow blink to blinking rapidly.

4. **For Rolling Code** garage door openers only, firmly push and release the "LEARN" or "TRAIN" button on your garage door opener motor in your garage, then push the Homelink® button in your vehicle for two long holds.

5. If the programming was successful, your garage door should open and close with your chosen Homelink® button.

For more detailed instructions, see "Universal Garage Door Opener (Homelink®)" in your Owner's Manual.

LINK YOUR GARAGE DOOR

Lights & Wipers Operation

PUSH
TO ACTIVATE HIGH BEAMS

PULL
FOR FLASH-TO-PASS

ROTATE DOWN
TO MIST THE WINDSHIELD

PUSH & HOLD
TO ACTIVATE THE WINDSHIELD WASHER

KEEP IN MIND:
Vehicles sold in Canada are equipped with a headlight switch with an AUTO and ON detent but without an OFF detent. Headlights will be deactivated when the headlight switch is placed in the parking lights position. However, the Daytime Running Lights will be activated along with the front and rear marker lights.

Connected Services

WITH CONNECTED SERVICES YOU CAN...

- Lock Your Vehicle
- Unlock Your Vehicle
- Remote Start Your Vehicle
- Cancel Remote Start
- Activate Your Horn

ACTIVATE YOUR REMOTE SERVICES

1. Press "Apps" on the touchscreen.
2. Press "Activate Services".
3. Press "Activate Now".
4. There are two ways to activate: via email or via an agent. On the next page, you can either enter your name and email, or press "Call An Agent" to directly speak with someone.

TIP:

You can use your remote commands from the Uconnect App, your Owner's Site account, or by calling an agent.

However, not all remote commands will work when calling the agent.

Mopar® YOUR Way

REAP THE BENEFITS OF YOUR OWNER'S PROFILE

Get an online experience all your own–tailored to you and your vehicle–accessible anytime, anywhere.

(U.S. Residents Only)*

24/7 ACCESS TO EVERYTHING YOU NEED

- Custom dashboard for every vehicle in your garage
- Access to your vehicle's Owner's Manual, warranty, & more
- Ability to set preferred dealer & schedule service with ease
- Maintenance records and up-to-date vehicle health reports**
- Special offers on exceptional Mopar® service at your dealership
- Remote vehicle commands right from your mobile device**

** Requires an active SiriusXM Guardian™ subscription

*Canadian residents aren't required to create a profile, as one is created when a SiriusXM Guardian™ account is activated.

UTILIZE YOUR SERVICES & OWNER PROFILE

Pair a Phone

Scan me

1. Make sure Bluetooth® is enabled on your mobile device.
2. With the vehicle in the ON or ACC/RUN position, press the “Phone” button in the vehicle’s touchscreen menu bar.
3. Press “Pairing”.
4. Press “Paired Phones and Audio Devices”.
5. Select “Add Device” then follow the prompts on your phone and in the touchscreen.

KEEP IN MIND:

Some mobile phones will require you to enter a PIN as part of the connection process.

For more detailed connecting instructions, refer to “Phone Operation” in your Uconnect radio book.

READY TO REMOVE A PHONE OR AUDIO DEVICE?

Press the Pairing button on the touchscreen.

Press “Paired Phones and Audio Devices”.

Press “Settings” next to the phone or device you want to remove.

Press “Delete Device”.

Press “X” to exit the settings screen. The device should be removed.

YOU MAY ALSO BE ABLE TO CONNECT YOUR APPS

If your vehicle is equipped with Android Auto™ & Apple CarPlay®, connect your unlocked smartphone to one of the media USB ports in your vehicle.

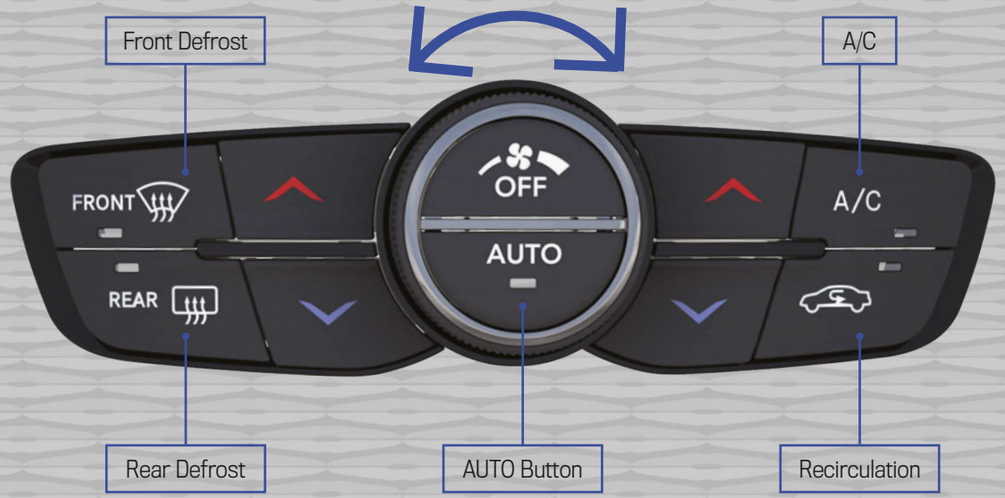

Once connected and recognized, the Android™ or CarPlay® icon will replace the phone icon on your personalized menu bar.

KEEP IN MIND:

For Android™ Users, if the Android Auto™ app was not previously downloaded, it will download the first time you plug in your device.

For Apple® Users, Apple CarPlay® is only compatible with iPhone® 5 or later and requires Siri being enabled in Settings.

Climate Controls

TIP:
Push the **red** arrow button to increase the temperature or push the **blue** arrow button to decrease the temperature for the driver or the passenger.

A/C BUTTON — Engages the Air Conditioning (A/C) system

RECIRCULATION BUTTON — Changes the system to recirculation mode

AUTO BUTTON — Automatically controls the cabin temperature

FRONT DEFROST BUTTON — Engages the front defrost mode

REAR DEFROST BUTTON — Turns on the rear window defroster and heated outside mirrors

BLOWER CONTROL KNOB — Regulates the amount of air forced through the system in any mode

MODE BUTTON (TOUCHSCREEN) — Changes the airflow distribution mode

SYNC BUTTON (TOUCHSCREEN) — Syncs the passenger temperature with the driver temperature setting

OFF BUTTON — Turns the Climate Controls on/off

Advanced Driving Assist Systems

The **Cruise Control system** will hold your vehicle's speed when you take your foot off of the accelerator.

The **Adaptive Cruise Control system** will adjust the speed you have set in order to maintain a set distance from the vehicle in front of yours.

Scan me

Scan me

The **Forward Collision Warning system** provides the driver with audible and visual warnings, and may apply a brake jerk to warn the driver when it detects a potential frontal collision.

Scan me

The **ParkSense system** provides visual and audible alerts when an obstacle is detected when backing up or moving forward. The vehicle brakes may be automatically applied and released when performing a reverse parking maneuver if the system detects a possible collision with the obstacle.

The **LaneSense system** detects lane markings and measures your vehicle's position within the lane. If your vehicle drifts out of the lane without a turn signal applied, your vehicle may provide a visual warning, apply pressure to your steering wheel, or both.

The **Blind Spot Monitoring system** uses two radar sensors to detect highway-licensable vehicles (automobiles, trucks, motorcycles, etc.) that enter the blind spot zones from the rear, front, or side of the vehicle.
