TROUBLESHOOTING

While Dash products are durable, you may encounter one or more of the problems listed below. If the issue is either not solved by the solutions recommended below or not included on this page, please contact our Customer Support Team at **1-800-898-6970** or **support@bydash.com**.

ISSUE	SOLUTION
The light on the Mini Waffle Maker keeps shutting off.	This is normal. During the cooking process, the heating element will automatically turn on and off to regulate the temperature and ensure that the Cooking Surface does not get too hot or cold. When this occurs, the Indicator Light turns on and off.
How do I know when the Mini Waffle Maker is heated and ready to use?	When the Mini Waffle Maker reaches the optimal temperature, the Indicator Light shuts off to indicate that it's time to start cooking.
There is no On/Off Button. How does the Mini Waffle Maker off and on?	To turn on, simply plug in the power cord. When finished cooking, turn off the Mini Waffle Maker by unplugging it.

TROUBLESHOOTING

ISSUE	SOLUTION
When using the Mini Waffle Maker, the Cover gets very hot. Is this normal?	Yes, this is completely normal. When using the Mini Waffle Maker, always lift and lower the Cover by the Cover Handle. To prevent personal injury, DO NOT lift the Cover with your arm positioned over the Cooking Surface. They are hot and may cause injury. Lift from the right side.
After using the Mini Waffle Maker a few times, food is starting to stick to the surface. What is happening?	There is probably a build-up of burnt food residue on the Cooking Surface. This is normal, especially when cooking with sugar. Allow the appliance to cool fully. Then, use a damp, soapy cloth to wipe down the Plates. Thoroughly rinse the cloth and wipe again. If any food remains, apply a small amount of cooking oil and let sit for a few hour. Then scrub with a soft bristled brush or soft sponge to wipe clean.
The Indicator Light will not turn on and the cooking surfaces are failing to heat.	1. Ensure that the power cord is plugged into the power outlet. 2. Check to make sure the power outlet is operating correctly. 3. Determine if a power failure has occurred in your home, apartment or building.
