Installation Instruction

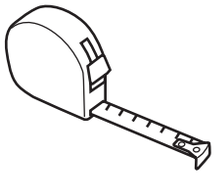

Tools Needed (Not included)

Electric Drill

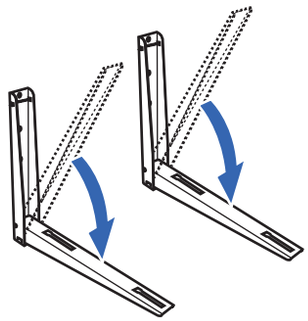

Hex Nut Driver / Wrench

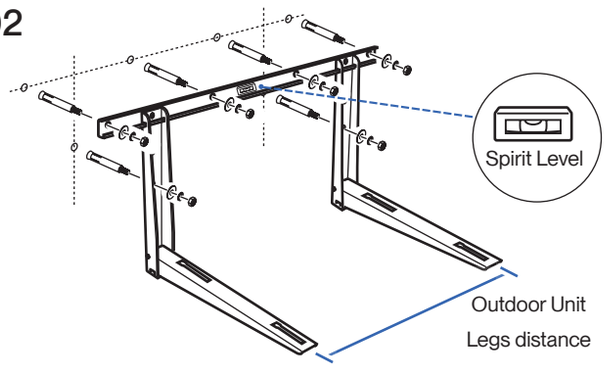

Measuring Tape

01

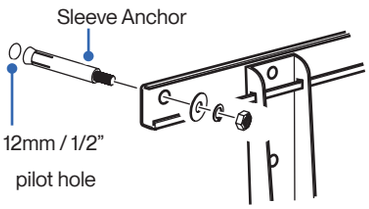

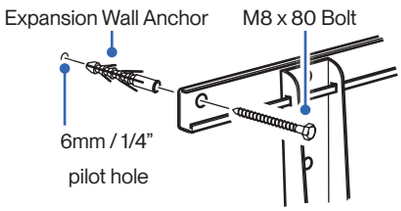

- Unfold the mounting arms.

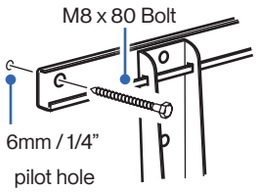

02

- Measure the width of your outdoor unit and mark the drilling position on your wall. Make sure the wall can hold the weight of your rack and AC.
- Affix the rack on the wall. Make sure the rack is leveled.

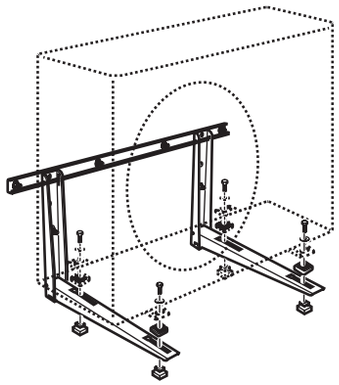

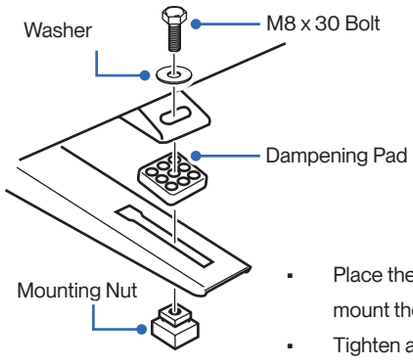

- Mounting the rack on concrete wall.
  - Sleeve anchor or expansion wall anchor must be used when mounting the rack on concrete or brick wall.
- Mounting the rack on wood stud.

03

- Place the dampening pad on the rack then mount the mini split outdoor unit onto the rack.
- Tighten all the fasteners, bolts, and nuts.
