- 1 Slide the edge guide to the left.

- 2 Load the paper under the tab against the right edge guide.

- 3 Slide the left edge guide over.

Letter

4 x 6 in

Install Software

Your software works with Windows® 98SE, Me, 2000, XP, and Macintosh® OS X 10.2.4 and later.

Windows

- 1 Make sure the printer is NOT CONNECTED to your computer.

Note: If you see a screen like this, click **Cancel** and disconnect the USB cable. You can't install your software that way.

- 2 Insert the Epson CD-ROM.

- 3 Read the license agreement that appears and click **AGREE**.

- 4 If you see a message like this, click **OK** to begin installing your printer driver.

- 5 When you see this screen, connect the USB cable. Connect the square end of your USB cable to the back of your printer and the flat end of the USB cable to your computer. (You can connect to any open port.)

- 6 Click **Print Test Page**. Then click **Next** to install additional software.
- 7 Install any additional software. When you are done installing software, click **Exit**. The registration screen appears.
- 8 Follow the on-screen instructions to register your printer.
- 9 When you're done, remove the CD-ROM and restart your computer.

You're ready to print! See the *Printer Basics* book or your on-screen *Reference Guide*.

Macintosh

- 1 Insert the Epson CD-ROM.
- 2 Open the Epson CD-ROM desktop icon and double-click the  **Epson** icon.
- 3 Read the license agreement that appears and click **AGREE**.
- 4 Click **Install Printer Driver** and follow the on-screen instructions. Software installation takes several minutes.

- 5 Install any additional software and the *Reference Guide*. When you are done installing software, click **Exit**. The registration screen appears.
- 6 Follow the on-screen instructions to register your printer.
- 7 Connect the USB cable. Use any open USB port.

- 8 Remove the CD and restart your Macintosh.
- 9 Open the **Applications > Utilities** folder and select the **Printer Setup Utility** (Mac OS® 10.3.x to 10.4.x) or **Print Center** (Mac OS 10.2.4).
- 10 Click the **Add** button.
- 11 In Mac OS X 10.4.x, select **Stylus Photo R220**.

In Mac OS X 10.2.4 to 10.3.x, select **EPSON USB** at the top and **Stylus Photo R220** below.

Mac OS X 10.4.x

Mac OS X 10.2.4 to 10.3.x

- 12 Click **Add**.
- 13 Quit **Printer Setup Utility** or the **Print Center**.

You're ready to print! See the *Printer Basics* book or your on-screen *Reference Guide*.

Solving Problems

The printer makes noise after ink cartridge installation.

- The first time you install ink cartridges, the printer must charge its print head for a minute or so. Wait until charging finishes (the green ⏻ power light stops flashing) before you turn off the printer, or it may charge improperly and use excess ink the next time you turn it on.
- If the printer stops moving or making noise, but the green ⏻ power light is still flashing after 5 minutes, turn off the printer. If the light is still flashing when you turn it back on, contact Epson as described in “Any Questions?”.
- Turn off the printer, then make sure the ink cartridges are inserted completely and the ink cartridge cover is closed completely. Also make sure no packing material remains in the printer. Wait a moment, then turn the printer back on to clear the error.

You’re having problems installing the printer software.

- Make sure your printer is turned on and the cable is securely connected at both ends. Then carefully follow the installation instructions. Also make sure your system meets the System Requirements listed in the *Printer Basics* book.
- Close your other programs, including any screen savers and virus protection software, and install the software again.
- In Windows, make sure your printer is selected as the default printer and that the correct port is shown in the printer properties.
