[1] Pages/copies per minute (ppm/cpm) speed measured after first page, based on black and color text patterns in Draft Mode on plain paper. Additional print time will vary based on system configuration, software application and page complexity. See www.epson.com/printspeed for more information about speeds.

[2] Ink fade resistance ratings based on accelerated testing of prints on specialty media, displayed indoors, under glass; claim that documents resist fading up to six times longer is based on accelerated testing of unframed color prints on plain paper in indoor display conditions. Actual print stability will vary according to media, printed image, display conditions, light intensity, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or properly store them. Visit www.wilhelm-research.com for the latest information.

[3] We recommend the use of genuine Epson ink cartridges. The use of other products may affect your print quality and longevity and could result in all-in-one damage. Cartridge yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature. For print quality, a small amount of ink remains in the cartridge after the "Replace cartridge" indicator comes on. See www.epson.com/cartridgeinfo for more information about cartridges.
