EPSON STYLUS® COLOR 900G Professional Series
## Exclusive for the Macintosh®!

When setting up and using your new EPSON Stylus COLOR 900G, follow the instructions in the *Start Here* card and *Printer Basics* book for the EPSON Stylus COLOR 900. The information contained in these books applies to both printer models.

To use your printer and its software, you should have a Power Macintosh® G3 (System 8.5.1 or later) or iMac (System 8.1 or later) with a built-in USB port. If your iMac is running OS 8.1, you must download and install the iMac Update 1.0 from Apple® at http://swupdates.info.apple.com before you install the EPSON® USB software. If your iMac is running OS 8.5.1 or later, you do not need to download and install the Update.

The following options are available to help maximize the performance of your printer:

- **EPSON Type B IEEE-1394 (FireWire®) Interface Card**
  Provides up to 400 Mbps data transfer rate between your computer and printer. It also features automatic configuration, and eliminates any need to turn off or restart your computer when attaching a new device.

- **EPSON Stylus RIP**
  Offers an Adobe® PostScript® 3 software solution for Macintosh. You will need this option if you routinely print from high-end PostScript-based drawing and publishing applications, such as Quark Xpress®, Adobe Illustrator® EPS files, or CorelDRAW™.

As a new EPSON Stylus COLOR 900G user, you can also receive two free software titles. Be sure to look for the brochure in this packet and select the ones you want.

Order directly from Epson Accessories, Inc. to get your EPSON Type-B IEEE 1394 Interface Card and EPSON Stylus RIP by mail.

MAIL TO Epson Accessories, Inc. P.O. Box 2903, Torrance, CA 90509-2903
