Epson ProSense 307/347/367 GPS Multisport Watch Reviewer's Guide

Welcome to the Epson ProSense 307/347/367 GPS Multisport Watch *Reviewer's Guide*.

Using the Watch

Refer to these sections to learn more about your ProSense watch.
Controlling Music Playback

You can play audio on your smartphone and control it with your watch via a Bluetooth connection.

Note: On Android, you need to leave the Epson View app running in the background on your smartphone to use the audio playback controls.

1. At the Time screen, press and hold the 🔄 Back button for at least 2 seconds.

   You see a screen like this:

2. Do the following to play audio and control playback as necessary:

   • To start or stop playing the current track, press the ➡ Enter button.

   • To play the next track, press and hold the ⌃ Up button for at least two seconds.

   • To play the previous track, press and hold the ⌄ Down button for at least two seconds.

   • To adjust the volume, press the ⌃ Up button to raise it or the ⌄ Down button to lower it.

   • To exit audio playback and return to the Time screen, press and hold the 🔄 Back button for at least 2 seconds.

Measuring Workouts

Follow the instructions in these sections to measure workouts with your watch.

Parent topic: Using the Watch

Displayable Workout Measurements

You can display a variety of workout measurements on your device in these workout modes:

- ⚡ Run mode

- 🚶 Walk mode

- 🏃 Treadmill mode

- 🚴 Bike mode

- 🏊 Pool Swim mode

- 🏊 Open Water mode

Note: You can configure the measurement display settings from the Workout Settings menu in the Epson View app.

The workout measurements available depends in the workout mode you are using, as listed in these tables.
Run, Walk, Treadmill, and Bike Mode Workout Information

Modes	Description
⚡ 🚶 🏃 🚴	Total time from the start of measurement
⚡ 🚶 🏃 🚴	Total distance from the start of measurement

Modes	Description
🏃 🚶 🏊 🚴	Current time
🚶 🏊	Total calories burned from the start of measurement
🚶 🏃 🏊	Total number of steps from the start of measurement
🏃 🏊	Current number of steps per minute
🏃 🚴	Current heart rate per minute
🏃 🚴	Average heart rate from the start of measurement
🏃 🚴	Maximum heart rate from the start of measurement
🏃 🏊	Current stride
🏃 🚴	Total distance from start of lap measurement
🏃 🚴	Total time from start of lap measurement
🏃	Current pace in time per mile/kilometer
🏃 🚶 🏊 🚴	Current target time; displayed only when the **Training** setting is set to **Target Time**
🏃 🚶 🏊 🚴	Estimated distance completed at the end of the configured time; displayed only when the **Training** setting is set to **Target Time**
🏃 🚶 🏊 🚴	Target distance selected and total distance from the start of measurement; displayed only when the **Training** setting is set to **Target Dist.**
🏃 🚶 🏊 🚴	Estimated time at completion of selected target distance; displayed only when the **Training** setting is set to **Target Dist.**
🏃 🚶 🏊 🚴	Target heart rate selected and current heart rate; displayed on the workout screen only when the **Training** setting is set to **Target HR**
🏃	Target pace selected and current pace in time per mile/kilometer; displayed only when the **Training** setting is set to **Target Pace**
🏃	Interval information, including sprint and rest intervals; displayed only when the **Training** setting is set to **Interval** When you select a target distance, displays selected distance and current distance. When you select a target time, displays selected time and elapsed time.
🏃	Difference from selected pace and distance; displayed only when the **Training** setting is set to **Race**

Modes	Description
⚴	Target speed selected and current average speed; displayed only when the **Training** setting is set to **Target Speed**

Swim and Open Water Mode Workout Information

Modes	Description
◈ ⚴	Total distance from the start of measurement
◈ ⚴	Total time from start of measurement
◈ ⚴	Current time
◈	Current heart rate per minute
◈	Total time from start of lap measurement
◈	Total distance from start of lap measurement
⚴	Current pace for 100 yards or 100 meters
◈	Target time selected and total time since start of measurement; displayed only when the **Training** setting is set to **Target Time**
◈	Estimated distance completed at the end of the configured time; displayed only when the **Training** setting is set to **Target Time**
◈	Target distance selected and total distance from the start of measurement; displayed only when the **Training** setting is set to **Target Dist.**
◈	Estimated time at completion of selected target distance; displayed only when the **Training** setting is set to **Target Dist.**
◈	Interval information, including sprint and rest intervals; displayed only when the **Training** setting is set to **Interval** When you select a target time, displays selected time and elapsed time.

Starting Workout Measurement

Before using your watch to measure a workout, you need to select a workout mode and locate the watch's GPS signal.

1. At the Time screen, press the ⊙ Down button.

    You see the Activity selection screen.

2. Press the ⊙ Up or ⊙ Down button to select one of these workout modes and press the ⊙ Start/Stop button.

    - 🏃 Run mode
    - 🚶 Walk mode
    - 🏃 Treadmill mode
    - 🚴 Bike mode
    - 🚴 Indoor Bike mode
    - ◈ Pool Swim mode
    - 🏊 Open Water mode
    - Other 1
    - Other 2

    Note: Not all workout modes appear by default. You can configure the workout modes that appear from the Workout Settings menu in the Epson View app. For information on using the Epson View app, see the online help.

    Your watch locates the GPS signal and displays the Measurement screen when it is finished (except in Treadmill, Pool Swim, or Indoor Bike mode).

Note: If you must start a workout before GPS location is complete, press the ⓘ Start/Stop button. Your watch continues locating and begins measuring your workout with the built-in stride sensor. The watch will not record some measurements that require GPS signals, such as your workout route, until GPS location is complete.

3. Press the ⓘ Start/Stop button to start workout measurement.
If your watch displays the **Locating GPS Failed** message, GPS location has failed:

Move to an outdoor area with no overhead obstructions and press the ⓑ Back button to try again.

Parent topic: Measuring Workouts

Stopping Workout Measurement and Saving the Data

You can save up to 248 sessions of workout data.

Note: You can save up to 99 hours for each lap. If you exceed this time, workout measurement stops.

1. At the Measurement screen, press the ⓘ Start/Stop button to pause workout measurement.

2. Press the ➡ Enter button or wait 3 seconds.

   Your watch displays the Stop screen.

3. Press the ⬆ Up or ⬇ Down button to select **Save** and press the ➡ Enter button.

   Your watch saves your workout data and displays the history screen.

4. Press the ⬆ Up or ⬇ Down button to display each available screen of workout data.

5. Press the ➡ Enter button to return to the Time screen.

   Note: If you want to clear the current workout data when viewing the Stop screen, select **Delete** > **Yes**.

   Parent topic: Measuring Workouts

Recording Laps

Follow the instructions in these sections to measure workouts with your device.

Recording Laps During a Run, Walk, or Bike Workout

Recording Laps During a Pool Swim Workout

Recording Laps During an Open Water or Indoor Bike Workout

Parent topic: Measuring Workouts

Recording Laps During a Run, Walk, or Bike Workout

You can record laps during your workout in ⚡ Run, 🚶 Walk, or 🚲 Bike mode either automatically or manually.

• At the Measurement screen, press the ➡ Enter button to begin recording a lap manually.

• To record laps automatically, select **AT Lap** from the Settings screen, and select a time or distance at which to begin recording laps. When your workout reaches that time or distance, your device automatically begins recording laps.

When your device records a lap, it displays the Lap screen for a few seconds.

The Lap screen displays the lap number, lap time, and split time for the current lap.

Parent topic: Recording Laps

Changing Workout Settings

Recording Laps During a Pool Swim Workout

You can record laps during your workout in ◈ Pool Swim mode either automatically or manually.

- At the Measurement screen, press the ➲ Enter button to begin recording a lap manually. If you need to rest during a lap, press the ➲ Enter button.

- To record laps automatically, select **AT Lap** from the Settings screen, and select a time or distance at which to begin recording laps. When your workout reaches that time or distance, your device automatically begins recording laps. If you need to rest during a lap, simply stand in the pool to automatically switch to resting mode, then either just resume swimming or press the ➲ Enter button.

When your device records a lap, it displays the Lap screen for a few seconds.

Note: The device may not record the lap correctly if you turn with a weak kick or have very little change in your arm movement on the turn.

Parent topic: Recording Laps

Related tasks

Changing Workout Settings

Recording Laps During an Open Water or Indoor Bike Workout

You can manually record laps during your workout in 🏊 Open Water or 🚴 Indoor Bike mode.

At the Measurement screen, press the ⊙ Enter button to begin recording a lap.

Related tasks
Changing Workout Settings

Pausing and Resuming Workout Measurement

During your workout, you can start, pause, and resume workout measurements as necessary.

At the Measurement screen, press the ⊙ Start/Stop button to pause workout measurement. Press the ⊙ Start/Stop button again within 3 seconds to resume workout measurement.

If you pause your workout measurement for more than 3 seconds, your watch displays the Stop screen.

Press the ⌃ Up or ⌄ Down button to select **Resume** and press the ➡ Enter button to resume workout measurement.

Parent topic: Measuring Workouts

Changing Workout Type During Triathlon Measurement

During a workout in Triathlon mode, you can switch the workout mode or start transition timing as you reach those stages in triathlon activities.

Note: You can select your workout mode order and choose whether or not to measure triathlon time in the Epson View app.

At the Measurement screen, hold down the ➡ Enter button to change the workout mode or transition. Hold down the ➡ Enter button again to scroll through the modes or transitions.

Parent topic: Measuring Workouts

Monitoring Current Workout Data

During your workout, you can monitor the current workout data your watch has collected.

At the Measurement screen, press the ⌃ Up or ⌄ Down button to display the current workout data screens.

Note: You can configure the measurement display settings from the Workout Settings menu in the Epson View app. For information on using the Epson View app, see the online help.

Parent topic: Measuring Workouts

Estimating VO$_2$ Max

Your watch calculates the estimated maximum quantity of oxygen that your body can process, called VO$_2$ max. This estimate can be an indicator of your fitness level and should increase with improved athletic performance.

Your watch uses your heart rate and GPS measurements to accurately calculate the VO$_2$ max under the following conditions:

• Your profile information must be set up correctly.

VO$_2$ max is only measured in Run Mode.

• Your watch is connected to GPS and you run with the watch for at least 10 minutes.

• You turned on heart rate measurement and the **AT Pause** setting is turned off.

• Your running pace is 16 min/mile (10 min/km) or faster.

• You are running at an elevated heart rate at moderate intensity.

Your watch cannot accurately estimate the VO$_2$ max if the following occurs:

• You stop running before 10 minutes have elapsed.

• Your heart rate cannot be measured.

• Your running speed slowed to a walk or you stopped for a traffic signal, and your heart rate dropped too low for estimation.

Changing Workout Settings

Using the Epson View App

Refer to these sections to learn more about the Epson View App.

Reviewing Workouts

The Dashboard shows you an overview of all your workouts. Different types of workouts are categorized as cards. You can customize your dashboard by adding and deleting cards.

Parent topic:

Viewing Workout Data

You can review your workout cards from the Dashboard of the Epson View app.

1. Select **Dashboard** at the bottom of the app screen.

2. Select the type of workout that you want to view.

    Note: You can select **Edit** to add, remove, and change the order of workout types on the Dashboard.

3. Do one of the following:
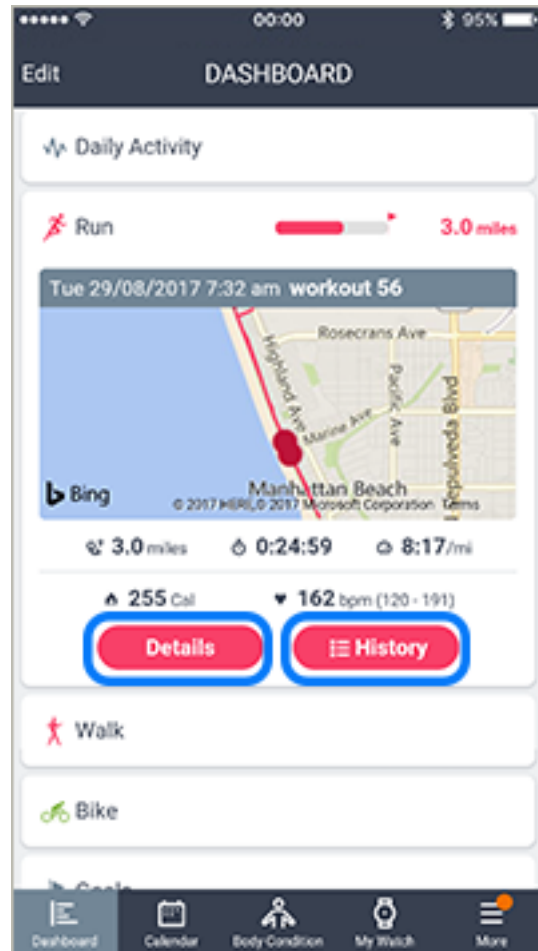

- Select **Details** to view the specific details of your most recent workout.
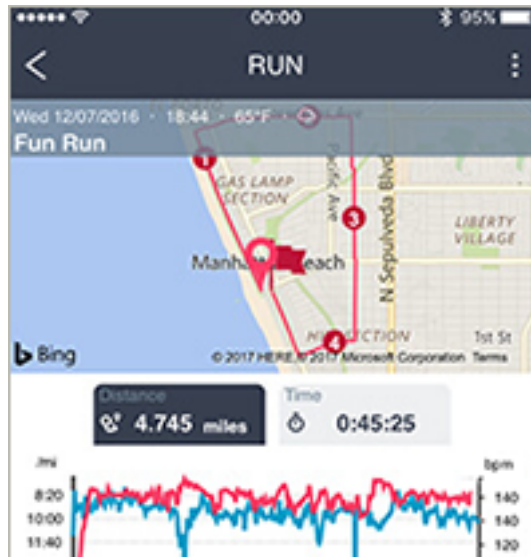

You can tap the various measurements (Pace, Cadence, Stride, Ascent/Descent, Heart rate) on the Details screen to add the workout data to the graph. Tap the measurement again to remove it from the graph.

- Select **History** to view a chronological list of all of your workouts of this type.
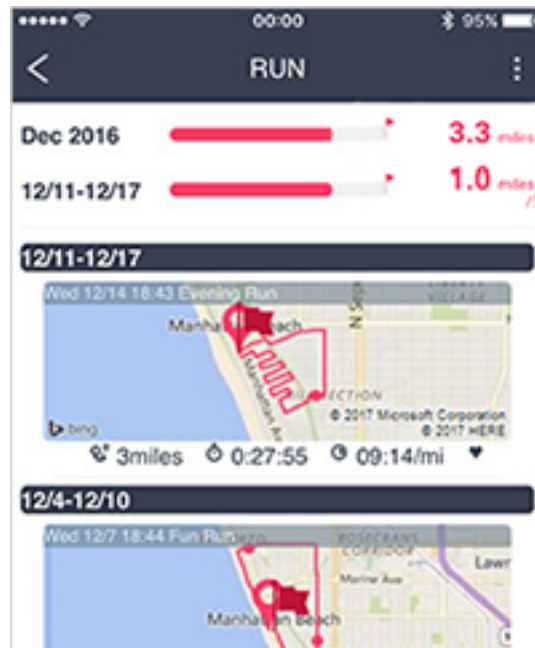

The bars at the top of the screen show your weekly and monthly distance totals for this workout type. The totals change to match the current date as you scroll through your workout history. Select a workout to view the details of that workout.

Parent topic: Reviewing Workouts

Editing Workout Data

Editing a workout in Epson View updates the information in your stored Epson View account and your ProSense watch.

1. Select **Dashboard** at the bottom of the app screen.

2. Select the card for the type of workout that you want to edit.

3. Select **History**.

4. Select a workout.

5. Select the ⋮ icon at the top of the app screen.

6. Select **Edit Workout**.
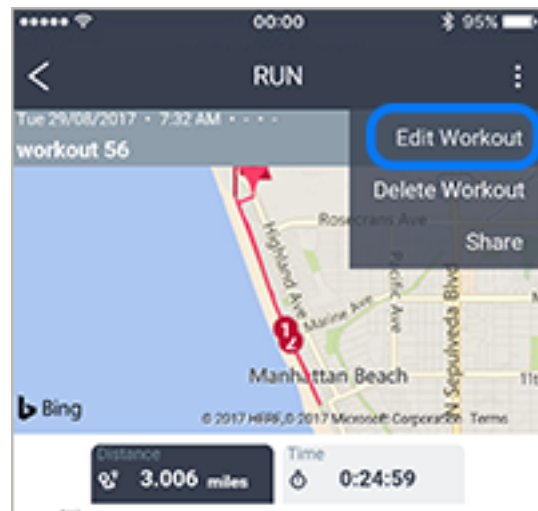

7. Edit the workout data as necessary.

8. Select **Save**.

Parent topic: Reviewing Workouts

Deleting Workout Data

Deleting a workout in Epson View removes it from both your watch memory and your account history.

1. Select **Dashboard** at the bottom of the app screen.

2. Select the card for the type of workout that you want to delete.
3. Select **History**.
4. Select the ⋮ icon at the top of the app screen.

5. Select **Delete Workout**.
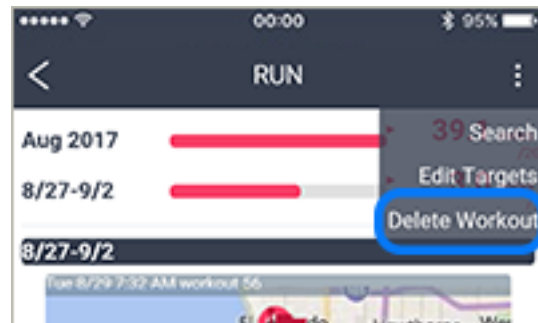

6. Select the workout(s) that you want to delete.
7. Select **Delete**.
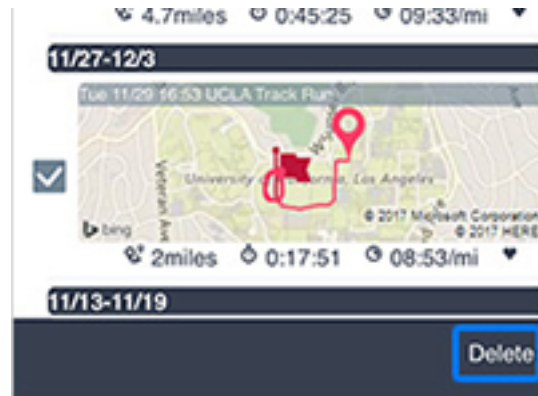

Parent topic: Reviewing Workouts

Reviewing Daily Activities

1. Select **Dashboard** at the bottom of the app screen.

2. Select the Daily Activity card.
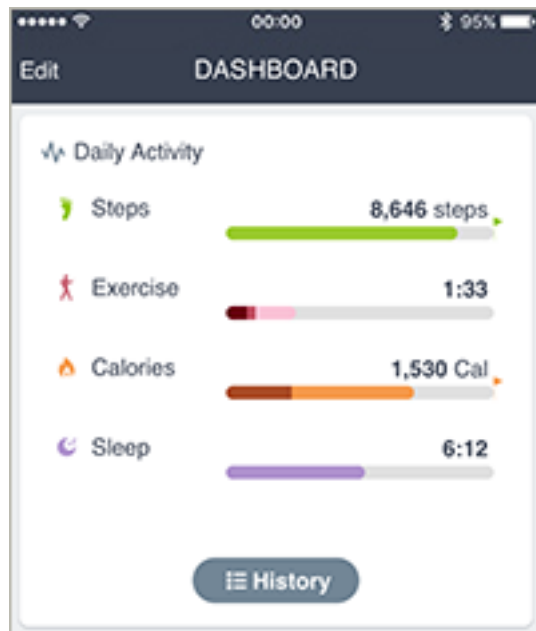

You see the number of steps you've taken, the amount you've exercised, the calories that you've burned, and the amount that you've slept today.

3. To view more details on your daily activity and a history of past activity, select **History**.
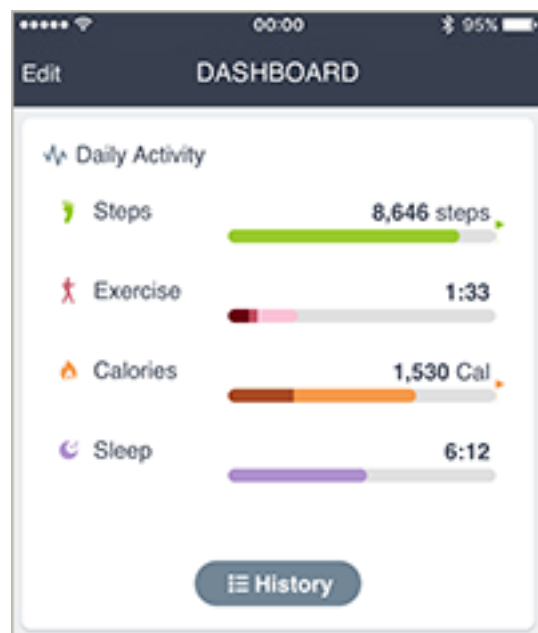

You can scroll through the cards and select a date to view detailed graphs of your distance walked and calories burned on that date.

Parent topic: Using the Epson View App

Using the Calendar

You can easily view your workout and daily activity history from the **Calendar** menu at the bottom of the app screen.
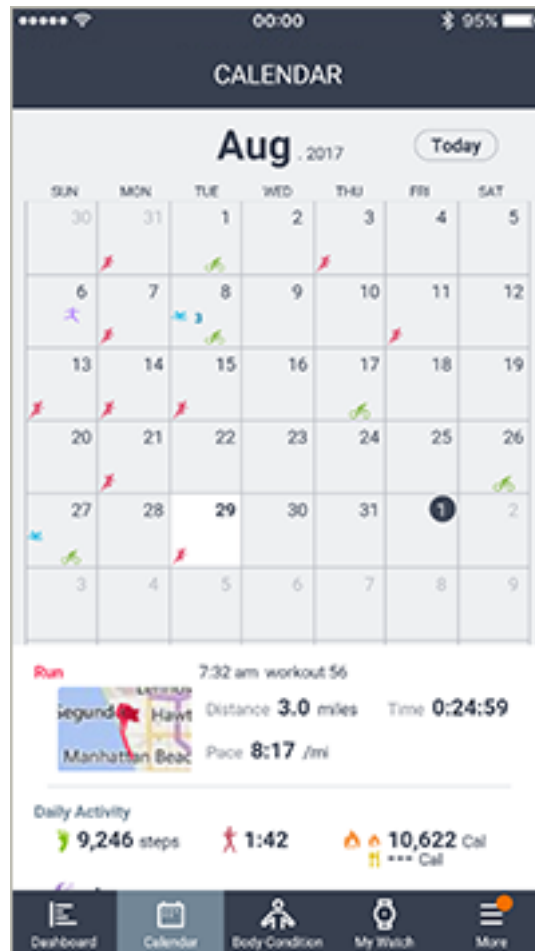

Select a date on the calendar to view that day's workouts or daily activity data. Workouts are represented by the following icons:

- : Running / Trail Running / Hiking / Walking / Treadmill

- : Cycling

- : Swimming

- : Triathlon

- : Multiple workouts of a type

- : More than 9 workouts of a type

Parent topic: Using the Epson View App

Setting Goals

You can create workout goals by entering the mileage and time period of your goal. Manage your progress in the Goals card on the Dashboard.
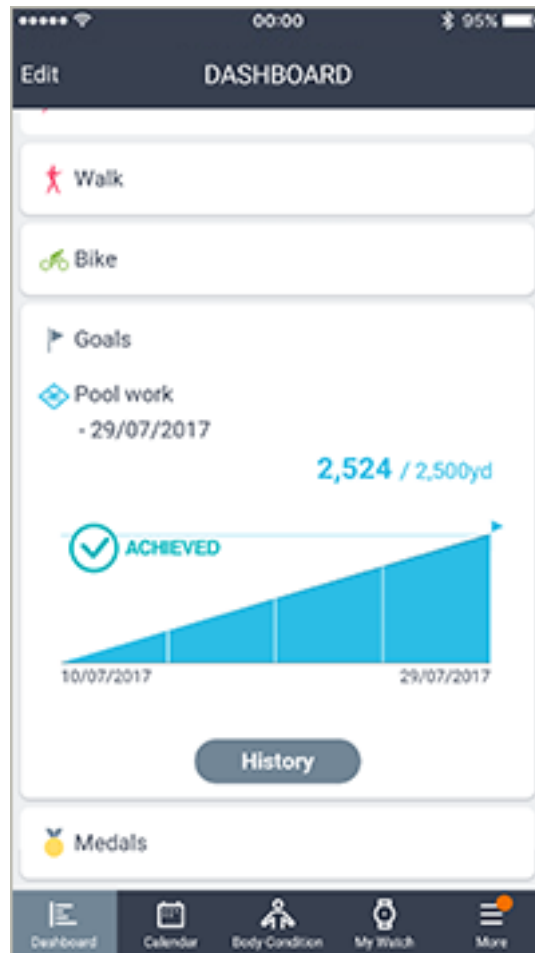

The Goals card always shows the goal that is ending the soonest. To see all of your goals, select **History**.

Your progress towards each goal is represented by a graph. The colored area of the graph represents your progress and the gray area represents your goal pace. If the colored area is below the gray, you are behind your goal:

If the colored area is above the gray, you are ahead of your goal:

When you achieve your goal, you see this message:

When you do not meet your goal, you see this message:

Parent topic: Using the Epson View App

Creating Goals

You can store up to 20 goals in Epson View.

1. Select **Dashboard** at the bottom of the app screen.
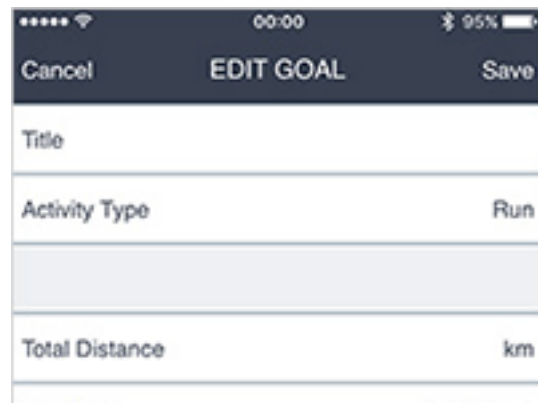

2. Select the Goals card.
3. Select **History**.
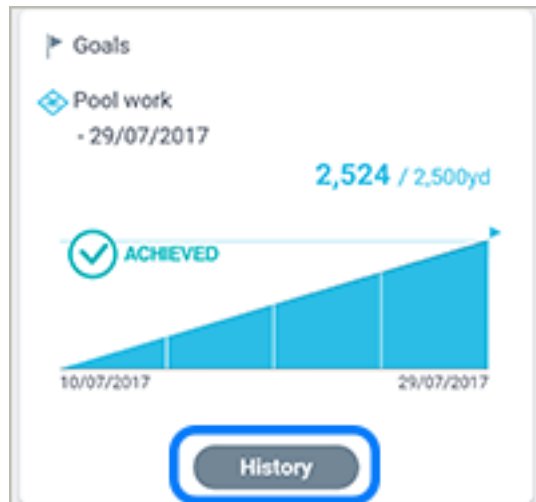

4. Select the ⋮ icon at the top of the app screen.

5. Select **Add New Goal**.
6. Edit the goal details as necessary.

7. Select **Save**.

Parent topic:

Editing Goals

You can edit a goal from the Goals screen.

1. Select **Dashboard** at the bottom of the app screen.

2. Select the Goals card.
3. Select **History**.

4. Select any of the goals listed.
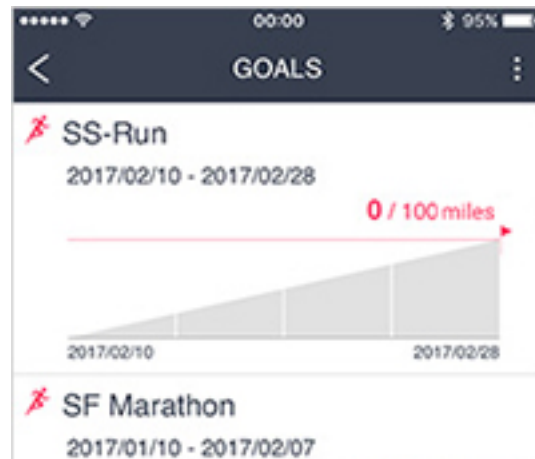

5. Edit the goal as necessary.

6. Select **Save**.

Parent topic:

Deleting Goals

You can delete goals from the Goals screen.

1. Select **Dashboard** at the bottom of the app screen.

2. Select the Goals card.
3. Select **History**.

4. Select the ⋮ icon at the top of the app screen.

5. Select **Delete Goals**.
6. Select the checkbox next to the goal(s) that you want to delete.
7. Select **Delete**.
Parent topic:

Setting Targets

You can set monthly or weekly targets for each workout type and your daily activity.

Parent topic:

Setting Workout Targets

You can set daily and weekly workout targets from the history view for each workout type.

1. Select **History** on a workout card on your Dashboard.

2. Select the ⋮ icon at the top of the app screen.

3. Select **Edit Targets**.
4. Enter your weekly and monthly workout targets.
5. When you finish, select **Save** in the upper right of the app screen.
Parent topic: Setting Targets

Setting Activity Targets

You can set daily targets for steps and calories burned from the Daily Activity card.

1. Select the Daily Activity card on your Dashboard.
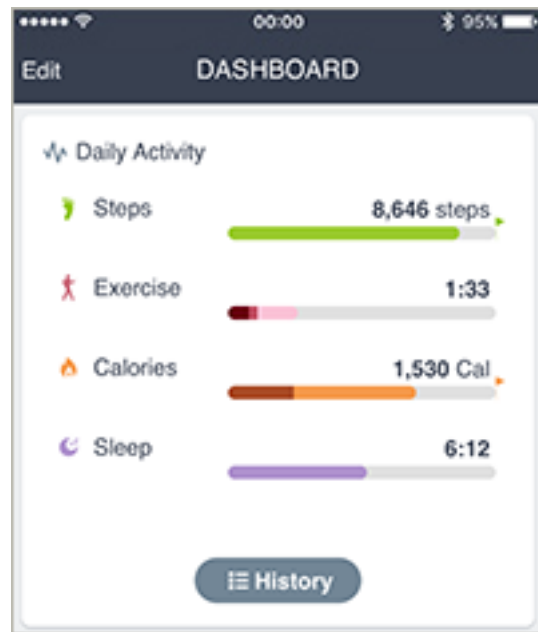

2. Select **History**.

3. Select the ⋮ at the top of the app screen.

4. Select **Edit Targets**.

5. Enter your daily targets for steps and calories burned.

6. When you finish, select **Save** at the top of the app screen.
Parent topic: Setting Targets

Earning Medals

You earn medals by uploading workouts and setting personal records. Select the Medals card on the Dashboard to view your medals.

You can earn the following medals:

• **Longest Distance** (Running / Trail Running / Hiking / Walking / Treadmill and Cycling):

Earned when you complete your longest distance workout. This medal automatically updates when you beat your best distance.

- **Longest Time** (Running / Trail Running / Hiking / Walking / Treadmill and Cycling):

Earned when you complete your longest workout (in time). This medal automatically updates when you complete a longer workout.

- **Half Marathon** (Running):

Earned when you complete your fastest half marathon. To earn this medal, make sure you go to the Run Details screen for your workout, select **Edit Workout** and set the **Type** to **Half Marathon**.

- **Marathon** (Running):

Earned when you complete your fastest marathon. To earn this medal, make sure you go to the Run Details screen for your workout, select **Edit Workout** and set the **Type** to **Marathon**.

- **Longest Weekly Distance** (Running / Trail Running / Hiking / Walking / Treadmill and Cycling):

  Earned when you complete your longest distance workout for the week. This medal automatically updates when you beat your best weekly distance.

- **Longest Monthly Distance** (Running / Trail Running / Hiking / Walking / Treadmill and Cycling):

  Earned when you complete your longest distance workout for the month. This medal automatically updates when you beat your best monthly distance.

You can delete medals by tapping the icon at the top of the app screen and selecting **Delete Medal**. Select the medals you want to delete, then select **Delete**. When you delete a medal, that record is reset.
