BATTERY INSTALLATION

Install the **3.7V 500mAh** rechargeable battery in the bottom of the car.

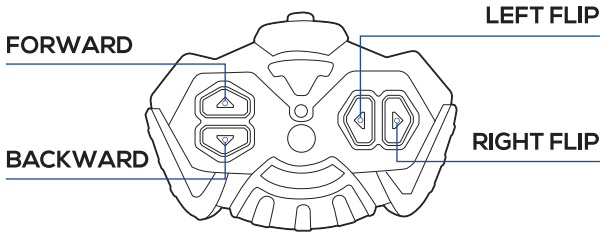

Turn the car on by using the switch on the bottom of the car.

Install two new, standard **AA batteries** in the pack of the transmitter, paying attention to polarity.
(**AA batteries not included**)

- The red LED on the transmitter may blink if you turn the transmitter on first and the car is not yet on. The LED will turn off once the car and transmitter are paired.
- The red LED on the transmitter will be off and will illuminate when you press a button on the transmitter.

CHARGING METHOD

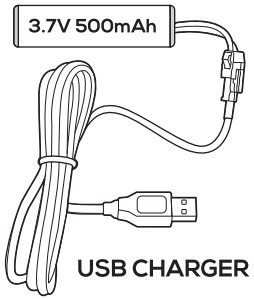

When charging, the LED on the USB charger will be on.

When charging is complete, the LED on the USB charger will turn off.

Charge time: approximately 100 minutes
Play time: approximately 20 minutes

WARNING: DO NOT LEAVE BATTERY CHARGING UNSUPERVISED

LI-PO BATTERY DISPOSAL & RECYCLING
Contact your local electronics recycling facility for more information about how to recycle Li-Po battery-powered products.

- ⚠ Never overcharge a li-po battery and avoid trickle charging.
- ⚠ Never use a li-po battery that has ballooned or swelled.
- ⚠ Do not leave the battery in direct sunlight, plugged into a charger for more than the full charge time required or in a hot environment.
- ⚠ Store li-po batteries at half or less charge.
- ⚠ Damaged batteries and those not cared for and stored properly run the risk of fire.
- ⚠ Charge and store the battery away from flammable or precious materials and liquids.
- ⚠ Store your li-po battery in a li-po battery bag.

BOX CONTENTS
