BOX CONTENTS

SKID KID DRIFT KART

CONTROLLER

600mAh 7.2V BATTERY

USB CHARGER

SCREWDRIVER

CONTROL OVERVIEW

1. Unscrew battery cover.

2. Place batteries as pictured.

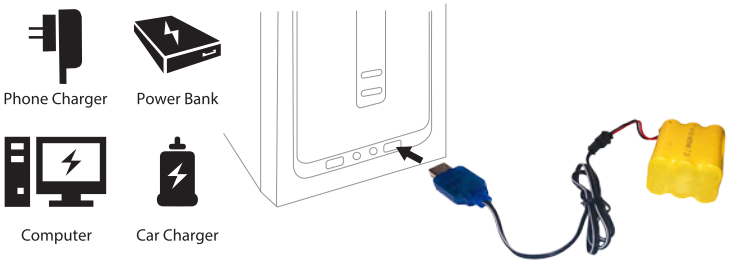

3. Screw battery cover back on.

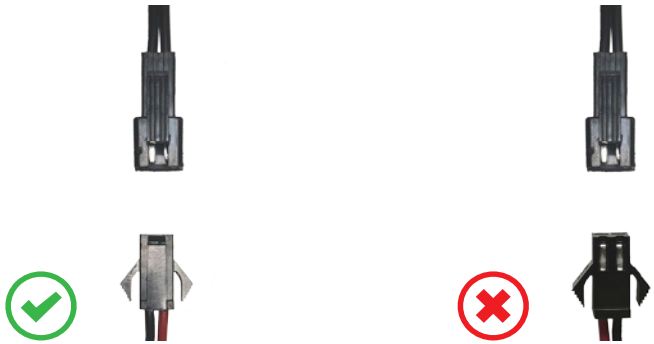

BATTERY CHARGING

Follow the steps below to charge your battery (failure to follow instructions precisely may result in damage to your battery charger):

1. Connect the USB cable to the battery.
2. Choose one of the methods as pictured below to connect the USB plug, then connect the battery.

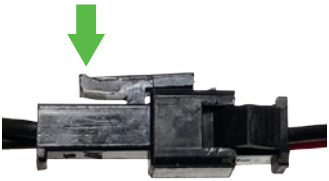

3. **Carefully connect the battery cable to the charger as shown below.**

NOTE
DO NOT plug the battery cable into the battery charger upside down. This will render the charger inoperable.

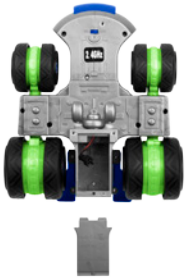

4. Hold the charging socket tab down to release the battery after charging.

BATTERY INSTALLATION

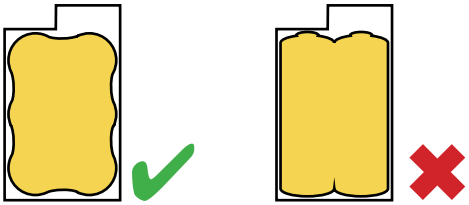

1. Unscrew the battery cover.

2. Remove battery cover.

3. Plug in battery. **Please note:** Battery should be installed as illustrated below.

4. Screw battery cover back on. Now the Drift Kart is ready to drive. Turn the On/Off switch on and get ready to drift!

DRIFT MODE

DRIFT MODE

Use the bumper buttons to activate Drift Mode and Drive Mode.

DRIVE MODE

Use the joysticks to drive n' drift once Drift Mode is activated!

NOTE: Skid Kid drives on all kinds of floors (and is better suited for indoor use), but drifts best on hard, smooth surfaces like linoleum and hardwood.

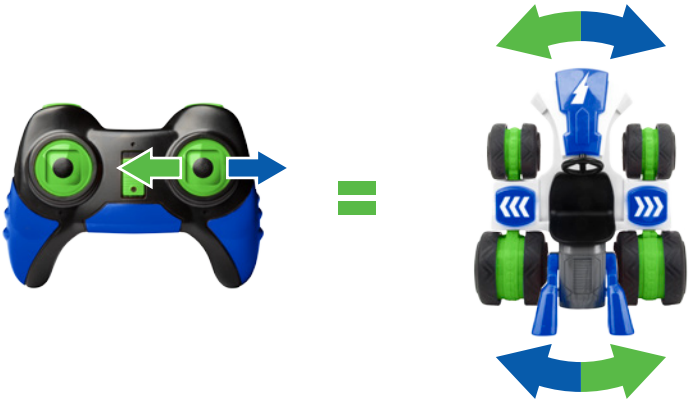

WHEELIES

Drive Skid Kid backward, then push forward quickly on the joystick to pop a wheelie!

Once your Kart is on two wheels, keep driving forward to maintain the wheelie.

360° SPIN

Push the Left/Right joystick in either direction without moving forward or backward to spin in place!
