

**! IMPORTANT**

If you choose to perform the installation yourself, it is absolutely vital that the Stealthbox® be properly mounted to the vehicle according to these instructions. Failure to mount the enclosure properly presents two problems:

- 1) The sub-bass performance will suffer due to the movement of the enclosure caused by the force exerted by the woofer(s).
- 2) A loose enclosure presents a serious safety hazard in the event of a collision or sudden deceleration.

Stealthbox®

INSTALLATION GUIDE
for the

SBA-J-JL-FHB
SKU# 99838
2018-Up Jeep Wrangler (JL)

Fuse Holder Bracket

*Thank you for choosing a JL Audio Stealthbox® for your automotive sound system.
With proper installation, your new vehicle-specific enclosed subwoofer system
will deliver years of listening pleasure.*

*We strongly recommend that you have your new Stealthbox® installed by your
authorized JL Audio dealer. The installation professionals employed by your
dealer have the necessary tools and experience to disassemble and reassemble
your vehicle properly. If you prefer to perform your own installation, please read
this installation guide completely before beginning the process.*

INCLUDED HARDWARE

BOM ID	Qty	SKU	Description
1	1	153975	Fuse Holder Bracket
2	4	154006	#6 - 32 x 1/2" Flat Head Phillips Screw

FUSE BLOCK MOUNTING TEMPLATE

The SBA-J-JL-FHB Fuse Holder Bracket is designed to accommodate two JL Audio XB-MFBU-ANL Master ANL Fuse Blocks (sold separately). Use the illustration and table below to determine the mounting hole use:

**STEP 1**

NOTE: The XB-MFBU-ANL Master ANL Fuse Block has adjustments for different wire-entry angles. The following steps show one orientation example using a single fuse block, but the installation process is the same for alternate orientations and/or two fuse blocks.

Remove one of the screw covers from the underside of the XB-MFBU-ANL Master ANL Fuse Block.

**STEP 2**

Using a Phillips head screwdriver, remove the exposed screw.

**STEP 3**

Flip the Master ANL Fuse Block over. Lift off the wire receptacle, rotate it 90 degrees, and reinstall, as shown.

Reinstall the screw and screw cover.

**STEP 4**

Align the mounting holes in the Master ANL Fuse Block with the holes in the Fuse Holder Bracket, as shown, and secure it using two #6 - 32 x 1/2" Flat Head Phillips Screws.

Repeat these steps for a second Master ANL Fuse Block, if necessary.

**STEP 5**

Locate and remove the two indicated factory nuts from the firewall on the passenger side.

**STEP 6**

Align the slots in the Fuse Holder Bracket with the factory studs, and secure the bracket using the factory nuts.

Connect and power cable to the Master ANL Fuse Block, and route the cable as necessary.

**CONGRATULATIONS!**

You have completed the installation for this model! Enjoy your new Stealthbox® Accessory!
