ABOUT THE FILTERS

This air purifier uses a 3-stage filtration system to purify air.

A. Pre-Filter

- Can help capture large particles such as dust, lint, fibers, hair, and fur.
- Maximizes the life of the Main Filter by protecting it.

B. Main Filter

- Filters small particles, like fine dust.

C. Activated Carbon Filter

- Helps to filter volatile organic compounds (VOCs) through physical adsorption.

Note: Levoit air purifiers filter airborne particles 0.3 microns in size. Arovast Corporation makes no claims that this air purifier helps reduce the COVID-19 virus.

Humidity

Moisture may damage the filters. This air purifier should be used in an area with a humidity level below 85% RH. If you use the air purifier in excessively humid areas, the surface of the filters will become moldy.

Essential Oils

Do not add essential oils to the air purifier or filter. The filters will become damaged by the oil and will eventually release an unpleasant smell. **Do not** use oil diffusers near the air purifier.

CARE & MAINTENANCE

Cleaning the Air Purifier

- Unplug before cleaning.
- Wipe the outside of the air purifier with a soft, dry cloth. If necessary, wipe the housing with a damp cloth, then immediately dry.
- **Do not** clean with abrasive chemicals or flammable cleaning agents.

Check Filter Indicator

The Check Filter Indicator  will light up as a reminder to check the filters. Depending on how much you use the air purifier, the indicator should turn on within 6–8 months. You may not need to change your filters yet, but you should check them when the indicator light turns on.

Resetting the Check Filter Indicator

Reset the Check Filter Indicator when:

-  lights up.
 1. Replace the filters (see page 11).
 2. While the air purifier is plugged in and turned on, press and hold  for 3 seconds until the air purifier beeps.
 3. The light will turn off once it is successfully reset.
- The filters were changed before  lit up.
 1. While the air purifier is plugged in and turned on, press and hold  for 3 seconds until the air purifier beeps. This will turn the indicator light on.
 2. Press and hold  again for 3 seconds until the air purifier beeps.
 3. The light will turn off once it is successfully reset.

Cleaning the Pre-Filter

- A. Only the Pre-Filter can be cleaned. Clean once a month to maintain efficiency and extend the life of your filters. Clean the Pre-Filter using a soft brush to remove hair, dust, and large particles. Optionally, rinse the Pre-Filter in clean water.

Note: Always make sure the Pre-Filter is completely dry before using, because dampness or moisture will damage the Main Filter.

- B. **Do not** clean the Main Filter or Carbon Filter. These filters must be replaced and are not washable.

CARE & MAINTENANCE (cont.)

When Should I Replace the Filters?

The filters should be replaced every 6–8 months. You may need to replace your filters earlier or later depending on how often you use your air purifier. Using your air purifier in an environment with relatively high pollution may mean you will need to change the filters more often (even if the Check Filter Indicator is off).

You may need to replace your filters if you notice:

- Increased noise when the air purifier is on
- Decreased airflow
- Unusual odors
- Visibly clogged filters

Note: To maintain the performance of your air purifier, only use official Levoit filters. For more information, contact **Customer Support**.

Replacing the Filters

1. Unplug the air purifier. Flip the air purifier over and remove the filter cover (see page 8).
2. Remove the old filters.
3. Clean any remaining dust or hair inside the air purifier using a vacuum hose. Do not use water or liquids to clean the air purifier.
4. Unwrap the new filters and place them into the housing (see page 6).
5. Replace the cover and plug in the air purifier.
6. Reset the Check Filter Indicator (see page 10).

Storage

If not using the air purifier for an extended period of time, wrap both the air purifier and the filters in plastic packaging and store in a dry place to avoid moisture damage.

TROUBLESHOOTING (cont.)

Problem	Possible Solution
The Check Filter Indicator is still on after replacing the filters.	Reset the Check Filter Indicator (see page 10).
The Check Filter Indicator has not turned on within 8 months.	The Check Filter Indicator is a reminder for you to check the filters and will light up based on how much the air purifier has been used (see page 11). If you don't use your air purifier often, the indicator will take longer to turn on.
The Check Filter Indicator turned on before 6 months.	The Check Filter Indicator is a reminder for you to check the filters and will light up based on how much the air purifier has been used (see page 11). If you run your air purifier frequently, the indicator will turn on sooner.
Air does not flow evenly out of the air purifier.	This is due to the design of the air purifier. This is normal and will not affect the air purifier's efficiency.

If your problem is not listed, please contact **Customer Support** (see page 15).
