kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use.

Your utility company uses it to compute your bill. Only standard size clothes washers are use in this scale.

Clothes washers using more energy cost more to operate.

This model's estimated yearly operating cost is:

\$23

when used with an electric water heater

\$14

when used with a natural gas water heater

Based on eight loads of clothes a week and a 2004 U.S. Government national average cost of 8.60¢ per kWh for electricity and 91.0¢ per therm for natural gas. Your actual operating cost will vary depending on your local utility rates and use of the product.
