

Start here to set up.

Any initial odor from your device should dissipate within 24-48 hours of continuous use.

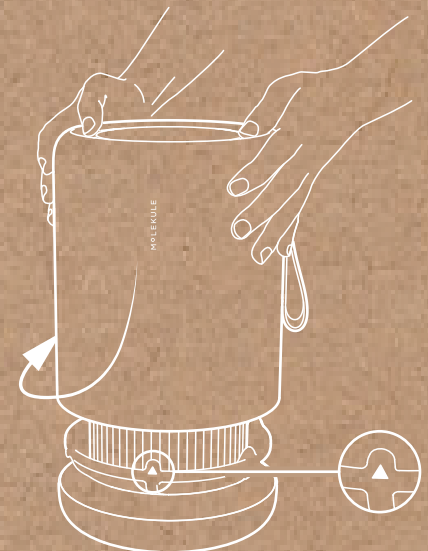

1

Push down and twist off shell counter-clockwise, pull out the PECO-Filter.

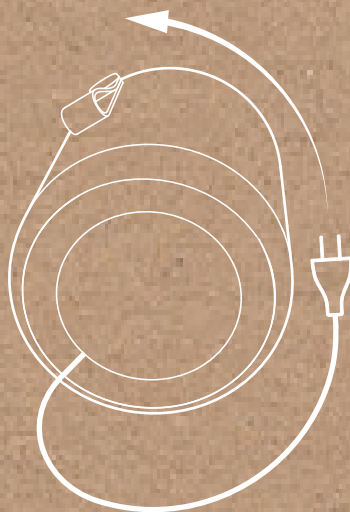

2

Unwrap PECO-Filter and place on base.

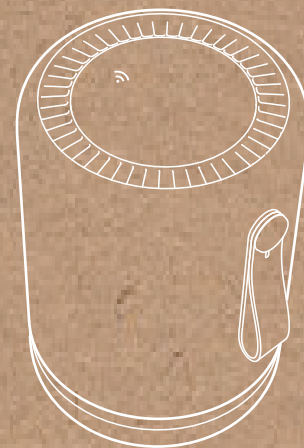

3

Align logo on shell with arrow on base. Close shell and twist to lock.

4

Unwind cord and plug in.

5

Once WiFi light is pulsing, you're ready to pair to the app.

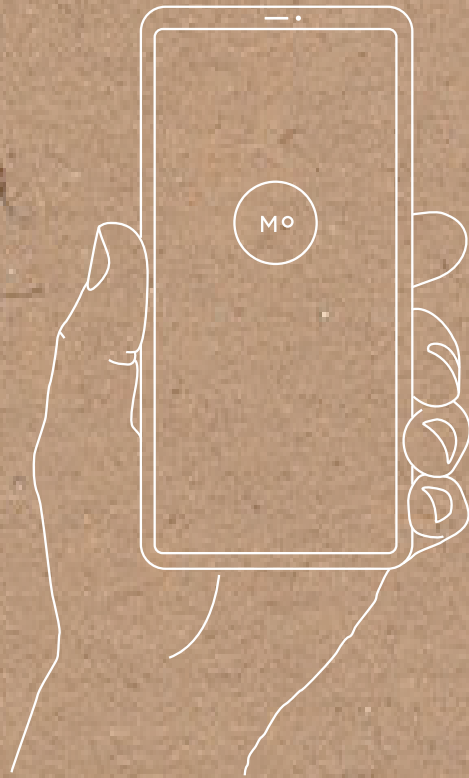

6

Download the Molekule app to complete setup.

Controlling your Molekule Air Mini+

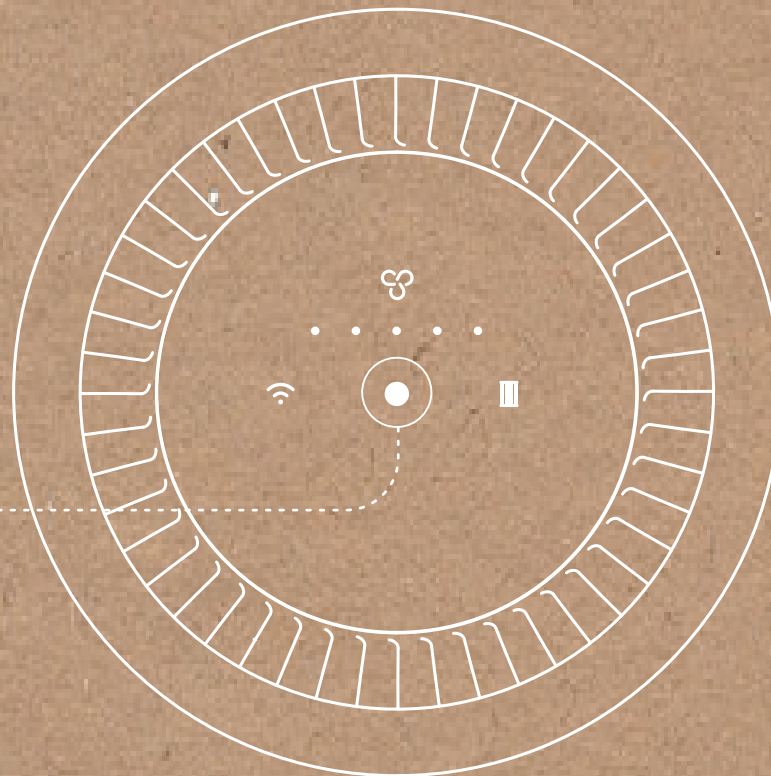

- Control your device and switch between Auto Protect and manual fan speeds.
- Monitor PECO-filter status so you know when it's time to replace them.
- See what your particulate matter level is and what it means.
- Stay up to date with the latest features and innovations from Molekule.

Short taps

Tap button to wake the device, and cycle through Auto Protect and manual fan speeds.

Long press

A long press for 3 seconds puts it on standby.
