

Start here to set up.

Place away from walls for optimal airflow. Any initial odor from your device should dissipate within 24-48 hours of continuous use.

- 1** Push down on center core, turn counterclockwise and release. Core will rise on its own. Lift it off.

- 2** Remove PECO-Filter from plastic wrapper and place back in.

- 3** Align red line inside shell with red line on core so it falls into place.

- 4** Push down and turn clockwise until it locks into place.

- 5** Unwind cord and plug into power outlet.

- 6** Download the Molekule app to complete setup and enable control from your phone.

Navigating Air Pro

Tap the touch screen once to awaken your Air Pro. Swipe left and right to switch between the five screens.

- HOME SCREEN**
See the overall particle level status at a glance.

- PARTICLE LEVELS**
See detailed particle (PM) levels, which correspond to four colors.

- FAN MODES**
Choose between Auto Protect and manual modes.

- PECO-FILTER STATUS**
Monitor filter health to know when a replacement is needed.

- SETTINGS**
Put the device on standby, change WiFi settings, and more.

Monitor & control

- Control your device and switch between Auto Protect and manual fan modes.
- See what your particle levels are and what they mean.
- Monitor PECO-Filter status and get notified when to replace it.
