Thank you for purchasing the Momcozy diaper pail. Before using this product, please read this user manual carefully to ensure the product is operated properly, and keep it safe for future reference.

1. Product Specifications

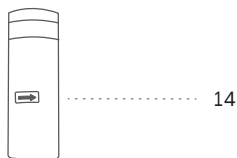

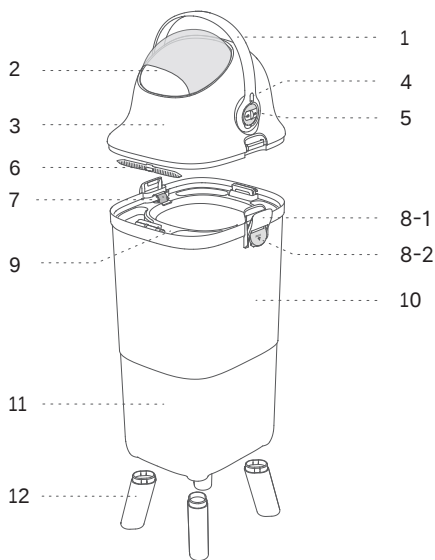

Product Name	Diaper Pail
Product Model	DP01
Product Dimensions	246.6 * 280.5 * 733 mm 9.71" (W) × 11.04" (D) × 28.86" (H)
Capacity	22 L
Weight	5.62 lbs

2. Notes

- 1.Place this product on a flat and stable surface.
- 2.Do not drop or subject this product to impacts.
- 3.Do not use the product if it becomes damaged or deformed.
- 4.Keep this product out of reach of children and do not allow them to play with it to prevent other objects from being accidentally placed into the pail.
- 5.Store the product packaging (package, bags, etc.) out of reach of children.
- 6.To avoid suffocation risks, do not place the plastic bags inside cribs, beds, strollers, prams, or playpens, as the thin plastic film can adhere to the nose and mouth of infants, obstructing their breathing.
- 7.Do not dispose of blades, needles, or other sharp objects in the pail, as they may puncture the garbage bag and cause contamination or injury.
- 8.Keep this product away from open flames, sources of fire, or high-temperature appliances, and avoid prolonged exposure to direct sunlight or harsh weather conditions.
- 9.Always install the garbage bag correctly and close the lid according to the user manual to ensure it is sealed properly.
- 10.Do not lift or move the diaper pail by the handle when it is full.

3. Parts List

Part Name	Quantity
Pail Lid	1
Deodorizer Pack Clip	1
Garbage Bag Holder	1
Upper Pail Body	1
Lower Pail Body	1
Pail Legs	4
Deodorizer Pack (Gift)	1
Drawstring Garbage Bags (Gift)	1 roll (15 bags)

1.Handle

2.Rotating Viewing Ball

3.Pail Lid

4.Screw Hole Plug

8.Fastener (1/2)

9.Garbage Bag Holder

10.Upper Pail Body

11.Lower Pail Body

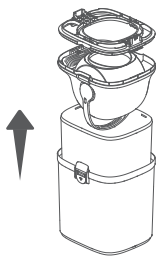

12.Pail Legs

13.Deodorizer Pack

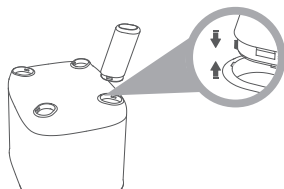

14.Garbage Bag

4. Assembly Steps

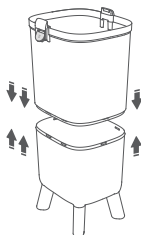

1. Remove the garbage bag holder, pail lid, legs, garbage bag, and upper and lower sections of the pail from the packaging box. (Note: The lower section of the pail body can be pulled away from the upper section.)

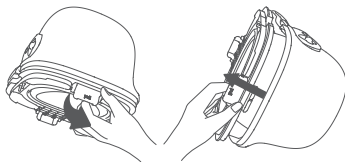

2. Align the four legs with the four mounting holes at the bottom of the lower section of the pail body, press down, and ensure they are securely installed without any looseness.

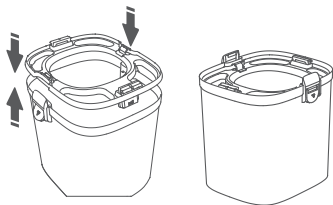

3. Align the front and back of the upper and lower sections of the pail, match the internal clips, and press downward to assemble. A "click" sound indicates proper assembly. Ensure the internal clips are seated smoothly and do not protrude.

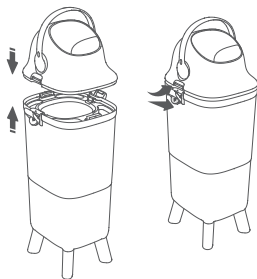

4. Release the snap buttons on the front and back of the pail lid's base, remove the garbage bag holder.

5. Place the garbage bag holder flat on the top of the upper section of the pail body.

6. Align the pail lid with the front and back of the pail body, place it flat on top of the upper section of the pail body, and press down. A "click" sound indicates that there is no gap between the pail lid and pail body. Then, lock the side fasteners.

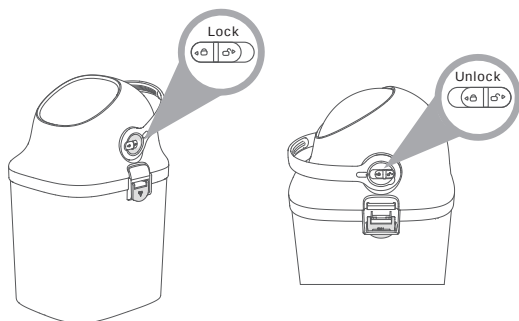

7. Rotate the handle of the pail lid to rotate the observation ball to the open position. Assembly is now complete.

Normal Idle State

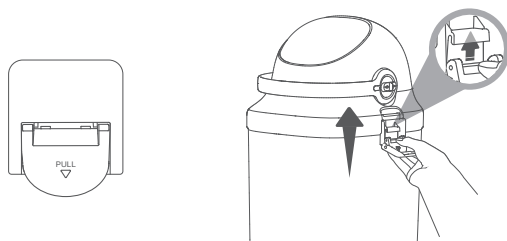

Child Safety Lock

- The child safety lock can secure the handle to prevent children from playing with the pail or depositing other items inside it.

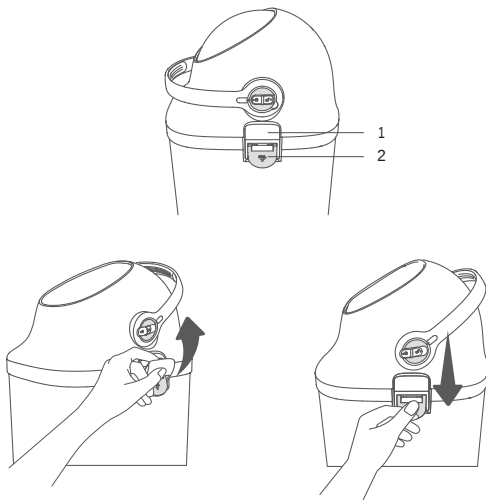

Pail Body Fastener Instructions

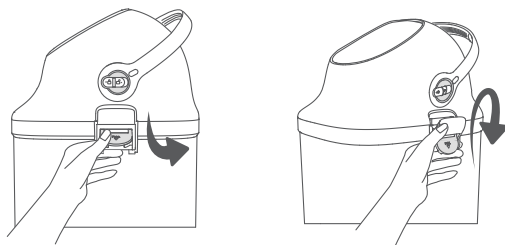

- Assembly: If the fasteners become detached during transportation, insert the metal axle upward into the pail body groove to reassemble them, as shown in the diagram.

- Locking: First engage Fastener 1, then Fastener 2. A "click" sound indicates the fasteners are securely locked.

- Release: First release Fastener 2, then Fastener 1.

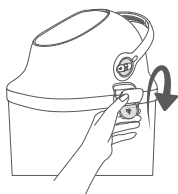

5. Operating Instructions

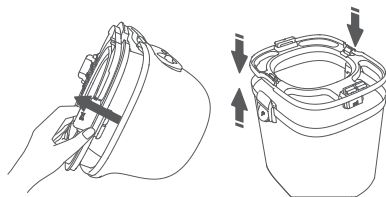

5.1 Garbage Bag Installation Instructions

Applicable to drawstring garbage bags; for standard garbage bags, step ⑤ can be skipped.

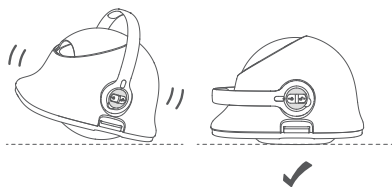

① Release the fasteners on both sides of the pail and lift up the pail lid.

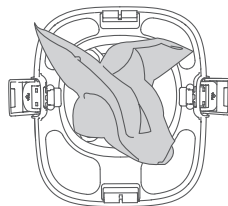

② Open the snap button on one side of the garbage bag holder, remove the holder, and place the garbage bag holder back on top of the upper section of the pail body.

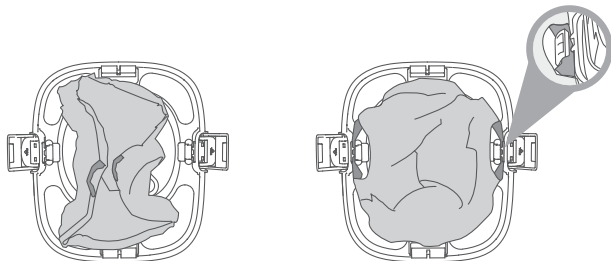

③ Place the pail lid steadily on a flat surface.

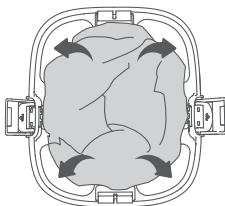

④ Place the drawstring garbage bag into the inner ring of the garbage bag holder.

- ⑤ Fit the drawstrings on both sides of the garbage bag into the space between the drawstring hook and the edge of the holder.

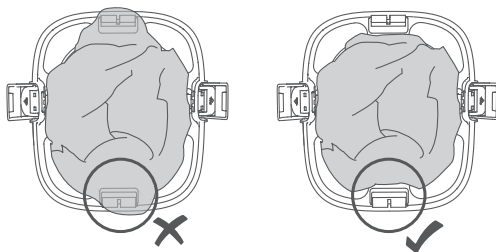

- ⑥ Tuck the opening of the garbage bag into the four outer holes of the garbage bag holder.

Note:

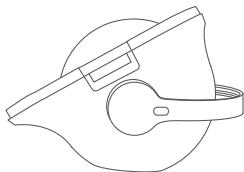

- Ensure that the garbage bag does not cover the snap button mechanism

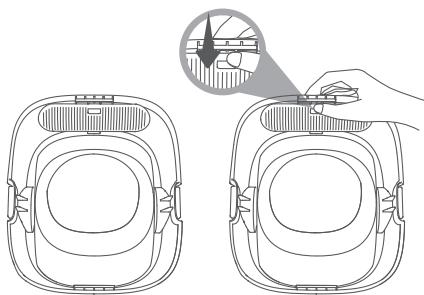

- Only use garbage bags that are free of cracks, holes, or any other damage.
- Overfilling garbage bags will accelerate wear. Therefore, please replace the garbage bag promptly when it's full.
- This product is compatible with commercially available standard 13-gallon garbage bags. However, its "innovative garbage bag closure feature" only works with drawstring garbage bags. Therefore, we recommend using Momcozy brand drawstring garbage bags for optimal performance.

5.2 Deodorizer Pack Installation Instructions

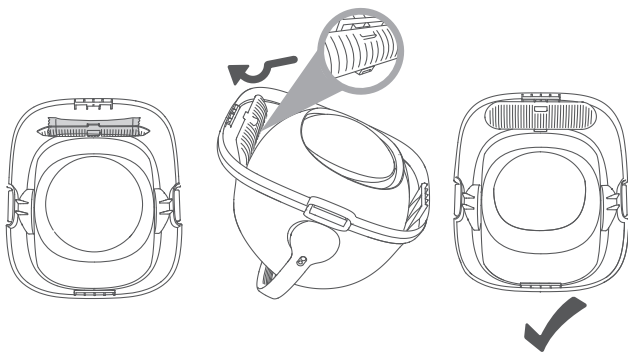

- ① Remove the garbage bag holder, then place the pail lid upside down on a flat surface.

- ② Remove the deodorizer pack clip.

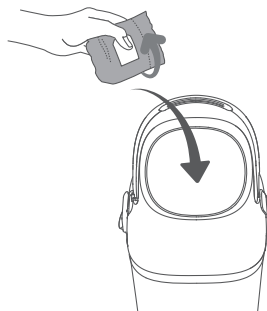

- ③ Place the deodorizer pack in position, align the deodorizer pack clip with the installation slot, and snap it into place, making sure the deodorizer pack is securely fixed.

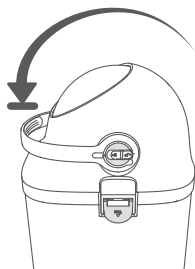

Remarks: Momcozy deodorizer packs can be placed inside the pail. Their ingredients effectively reduce odors, and it is recommended to replace them monthly.

5.3 Diaper Disposal Instructions

- ① Tightly roll up the diaper and place it inside the inner channel of the pail lid.

- ② Turn the handle until the opening of the rotating viewing ball is fully closed, allowing the diaper to drop into the installed garbage bag.

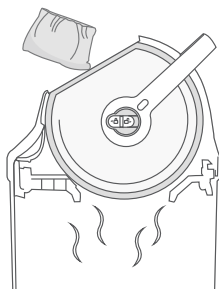

- ③ Turn the handle back to return the rotating viewing ball to the open position, making it ready for the next diaper disposal and effectively reducing odor release during use.

Notes:

- ① It is highly recommended to keep the rotating viewing ball in the open position during daily use, as this helps isolate the internal diapers from the external environment while also reducing odors during disposal.
- ② If the rotating viewing ball jams when closing, but you can still see a large space inside the pail through it, gently shake the pail to ensure the diapers are evenly distributed.

①

②

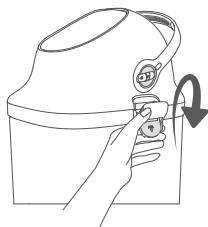

②

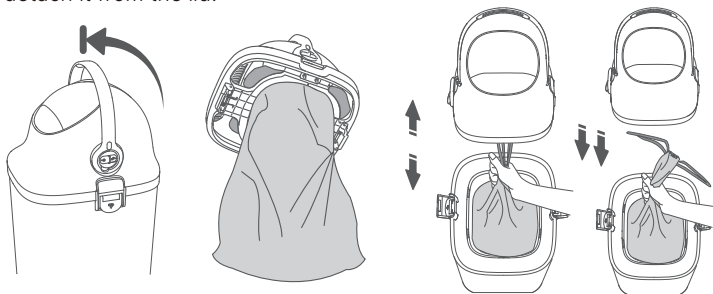

- ③ Before disposal, it is recommended to tightly roll the diapers to effectively reduce odors, and prevent leaks or contamination inside the pail.
- ④ If there is a substantial amount of baby waste, to avoid leaks and contamination, it is advised to wrap the diapers with tissue or a paper bag before disposal.

5.4 Packaging Instructions

- ① Release the fasteners on both sides of the pail

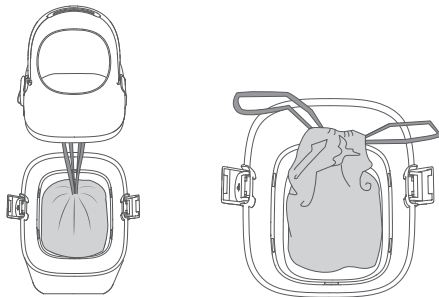

② Lift the pail lid. The garbage bag opening will be clamped and lifted with it. This product features a patented odor-control system. To help contain odors, hold the bag opening firmly with one hand and pull downward to detach it from the lid.

③ Tie the garbage bag securely and remove it from the pail body.

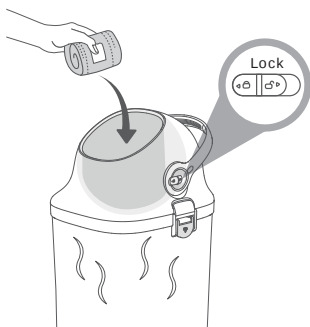

Note: If the garbage bag contains more or heavier diapers, it may automatically tighten and fall into the diaper pail when you lift the pail lid.

Usage Tips:

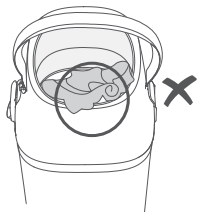

- ✓ It is recommended to keep the rotating viewing ball in the open position during daily use, allowing for convenient one-handed operation and effective odor control when disposing of diapers to keep the air fresh. The child safety lock function prevents babies from accidentally disposing of items.

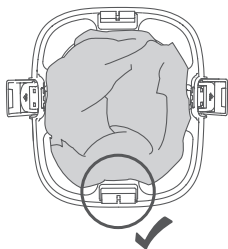

- ✓ Roll the diaper tightly before putting it into the pail (this effectively reduces odor release)

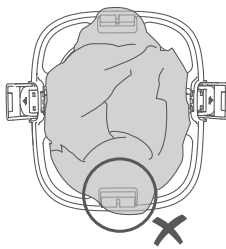

- × Do not put diapers in without rolling them tightly (this may cause jams and contamination in the channel)

✓ Gently arrange the garbage bag during installation

× Do not block the snap-button structure with the garbage bag (this may cause the locking structure to fail!!)

6. Cleaning and Care

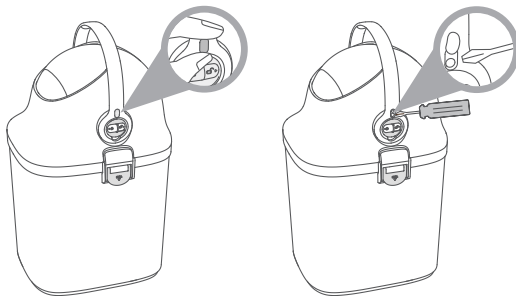

6.1 Daily Cleaning

If feces or other dirt are found in the channel, please clean it promptly. Wet wipes or a damp cloth can be used to wipe the dirty areas. Allow them to dry completely before reuse.

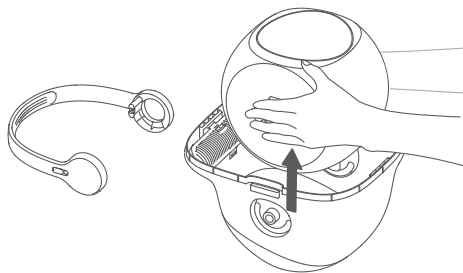

6.2 Deep Cleaning

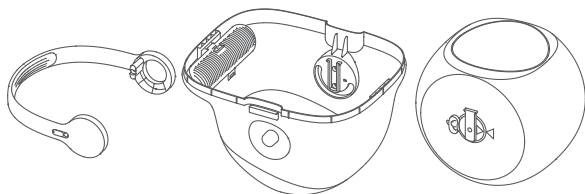

① Open the screw hole plugs on both sides of the handle and use a cross-head screwdriver to remove the screws, then disassemble the handle.

② Remove the internal rotating viewing ball from the pail lid.

③ Use a damp soft sponge/cleaning cloth with an appropriate amount of detergent to clean all parts, then rinse with clean water and air dry in a cool, ventilated place.

Remarks:

- If the diaper pail becomes soiled, please clean it following the instructions in this manual.
- It is recommended to regularly check components such as the sealing ring and locks for damage or aging, and replace them promptly if any issues are found.
- For disinfection, gently wipe the product with 75% alcohol.
- With prolonged use, odors may linger on plastic surfaces. We recommend regular cleaning and ventilation. For noticeable odors, gently wipe the inner surfaces with diluted white vinegar or a baking soda solution. After cleaning, ensure thorough air drying in a well-ventilated area.
- Avoid using disinfectants with unknown ingredients, as they may corrode the plastic surface and shorten the product's lifespan.

7. Manufacturer

Manufacturer: Hong Kong Lute Technology Co., Limited

Address: Room 803B, 8/F, West Bund International Building, 290-296 Yuen Chau Street, Cheung Sha Wan, Kowloon
