

Quick Start

Nighthawk X8

AC5300 WiFi VDSL/ADSL Modem Router

Model D8500

Package Contents

1. Position the Antennas and Plug In Your Modem Router

For the best WiFi performance, position the antennas as shown.

Connect the VDSL port on the modem router to a DSL outlet.

If your package came with a DSL microfilter, install the DSL microfilter and connect it to the VDSL port on the modem router. You can also connect a phone to the DSL microfilter.

Connect the power adapter to the modem router.

The Power LED  lights amber and then lights solid white when the modem router is ready. If the Power LED does not light, press the **Power On/Off** button.

If the modem router is connected to a DSL service, the DSL LED  lights solid white.

2. Connect to the Internet

You can either use an Ethernet cable or connect with WiFi to the modem router.

To connect with WiFi:

Make sure that the WiFi LED on the WiFi button is lit. Look on the modem router's label for the preassigned WiFi network name (SSID) and network key (password).

Open the WiFi connection manager on your WiFi-enabled computer or mobile device, find the modem router's SSID, and use the modem router's password to connect to the modem router's WiFi network.

Make sure that the DSL LED  is solid white.

Launch a web browser. If the installation assistant does not display, visit www.routerlogin.net. If a login window displays, enter **admin** for the admin user name and **password** for the admin password.

Follow the onscreen instructions to connect to the Internet.

If the modem router does not connect to the Internet, see the user manual, which is available online at netgear.com/support/product/D8500, or visit community.netgear.com for help.

NETGEAR

All Set Up!

Note: To connect to the modem router, you can use either a computer with an Ethernet cable connection or a computer with a WiFi connection.

Note: If you set up the modem router for a DSL connection, you do not need to use the yellow Internet port on the modem router.

For more information about your modem router, see the Do More booklet.

Get Free Apps

Start enjoying your new modem router right away with free apps that make management simple. Visit netgear.com/support/product/D8500 to download the apps.

NETGEAR genie. Personal dashboard to monitor, control, and repair your home network. Includes remote access to manage your network away from home.
