Certified by IAPMO R&T to NSF/ANSI 42, 53, 401 and NSF/ANSI/CAN 372 and CSA B483.1 for the reduction claims listed in the performance data sheet.

WF100X Series

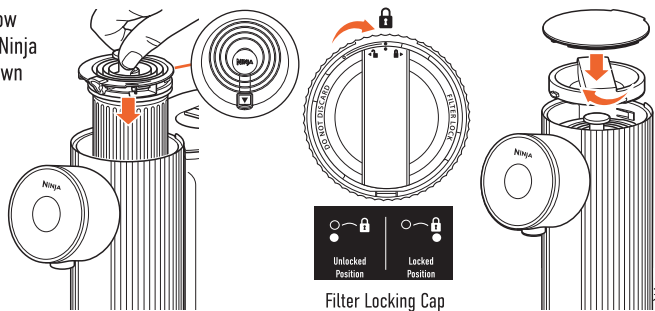

SETTING UP

1. Unbox and place your Ninja HydraSense™ near a sink and plug in.
2. Remove the filter from the packaging. Remove pre-installed filter cover and filter locking cap and fill your reservoir to MAX fill then ensure your Water Reservoir Lid is on.
3. Follow the onboarding instructions on the display to set up your unit and install your filter or review instructions below. **DO NOT** remove the reservoir during priming or when dispensing during rinse cycle.

FILTER INSTALLATION

1. **FILTER INSTALLATION:** Line up the front arrow with the front dispense head, and with the Ninja logo facing you. Drop your filter straight down into place then push firmly down.
2. **FILTER LOCKING CAP INSTALLATION:** Attach the filter locking cap on top of the filter by lining up with the open circle. Press firmly down, then twist clockwise until it clicks into place and aligns with the locked icon.
3. **ATTACH FILTER COVER:** Attach filter cover into place.

USING THE DISPLAY

- A Size Selection:** Tap to explore preset sizes, set a custom size, and access slow pour.
- B Info/Back:** Tap to go back during onboarding, explore filter status, recirculate water, change language, units, and other settings.
- C Selection Arrows:** Tap to navigate preset size options, filter status information, and other settings.
- D Dispense/Enter Selection:** Tap to enter selections and dispense water.

FILTER STATUS

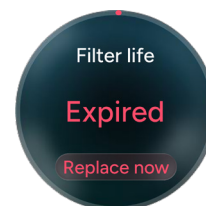

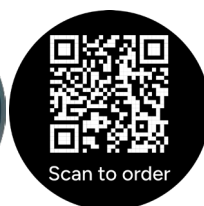

Blue: 100%–10%, up to 6 months left of filter life

Excellent filter status. Continue enjoying clean, filtered water.

Yellow: 9%–1%, up to 2 weeks left of filter life

Filter nearing end of life. Order a new filter by scanning the QR code, and replace when the filter life is expired.

Red: <1%, filter life expired

Filter at end of life. Replace as soon as possible.
