

QUICK START GUIDE

WATCH THIS VIDEO

SCAN HERE for a video tutorial on setting up your robot and base.

POSITION THE BASE

DO NOT place the base on or near carpet.

Place on Hard Floor

Place the base on a flat, **hard-floor surface** in a location away from direct sunlight and with a strong Wi-Fi signal. Allow 2 feet of clearance in front and 1 foot on each side.

Plug In

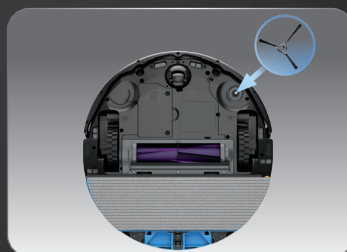

When the base is powered on, the indicator light will turn **white**.

PREPARE FOR CLEANING

Install Ramp

Press the ramp down onto the front edge of the base until it clicks into place.

Install 1 Side Brush

Remove all plastic wrap from the robot. Take one side brush and align the hole in the brush over the post on the bottom of the robot. Press down until it clicks into place.

Slide Robot Onto Base

Align the robot with the **Shark logo upside down**, then slide it up the ramp onto the base. The indicator light will turn **green** when the robot is charging.

Fill Tank

Lift the main lid on the front of the base. Remove the clean water tank with the blue handle. Add room-temperature water up to the fill line and 12 oz. of **only Shark cleaning solution** to the fill line.

GET CONNECTED

Download SharkClean® App

SCAN HERE to download the SharkClean app and follow the in-app instructions to complete setup.

Unlock full functionality with the app, including:

- ✓ Scheduling
- ✓ Personalized Routines
- ✓ No-Go Zones
- ✓ Remote Control
- ✓ Cleaning Reports
- And so much more!

Enter Pairing Mode

When prompted by the app, tap the **Wi-Fi icon** on your robot to enter pairing mode.
