

How to Fit the HMZ-T1 Personal 3D Viewer

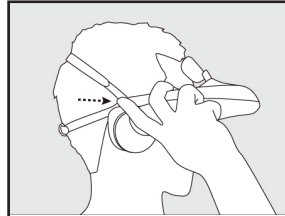

1. Loosen.

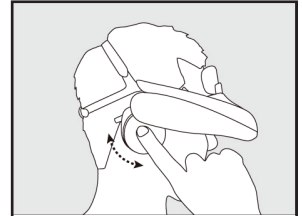

2. Put on like a catcher's mask.

3. Straighten.
Adjust the
flippers/eyes
(underneath).

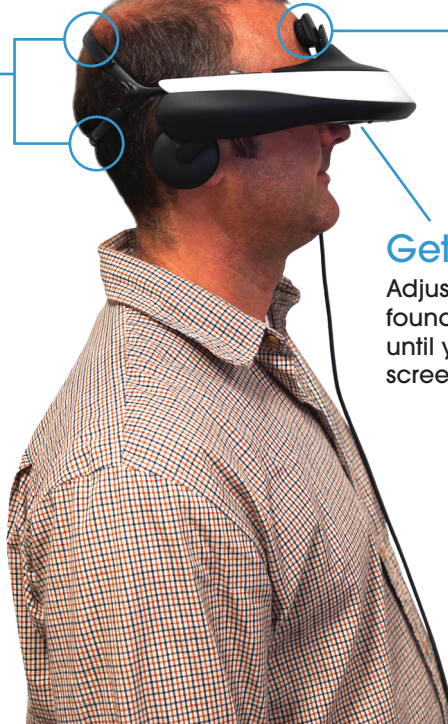

4. Tighten.

5. Adjust the
headphones.

Place both straps behind the head.

Make sure that the upper strap is not on the top of your head. This will cause the unit to tilt forward and put pressure on your nose.

The unit should rest on the forehead.

You should not feel any pressure on your nose.

Get in focus.

Adjust the two flippers found underneath until you can see the screens clearly.
