TRACKR SPEED

QUICK SETUP

WARNING See Important Product Information included in the product box for product warnings and other important information.

Always consult your physician before you begin or modify any exercise program.

1. SCAN & PAIR

Scan the QR code to automatically connect to the Wahoo App and pair your TRACKR SPEED.

If you do not have the Wahoo App, download it for free from the Apple app store or the Android Google Play Store for setup, device registration and firmware updates.

2. ATTACH

Attach TRACKR SPEED to your wheel hub by pulling the strap around the hub and engaging it with the hook.

3. SPIN

Spin the wheel to ensure TRACKR SPEED is secure and does not impede rotation of your wheel.

4. PAIR

Pair TRACKR SPEED to your ELEMNT Bike Computer, Wahoo App, or other compatible training tool.

The blue LED will flash while searching and become solid once connected.

5. TRANSMIT

Once connected, your TRACKR SPEED is awake and transmitting speed.

REPLACE THE BATTERY

Rotate the battery door counter-clockwise.

Lift and remove the battery door.

Insert a new CR2032 battery + side up.

Re-insert the battery door, and rotate clockwise until secure.

- ▶ Ensure the batteries are installed correctly according to polarity (+ and -).
- ▶ Do not mix old and new batteries, different brands or types of batteries (such as alkaline, carbon-zinc, or rechargeable batteries).
- ▶ Remove and immediately recycle or dispose of batteries from equipment not used for an extended period of time according to local regulations.
- ▶ Always completely secure the battery compartment. If the battery compartment does not close securely, stop using the product, remove the batteries, and keep them away from children.

LEDS

PAIRING

- ▶ Blue LED slow flash: awake and searching
- ▶ Blue LED fast flash: connecting to the device
- ▶ Blue LED solid: connected to the device

NOTE: LED will sleep to conserve battery.
