kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use.
Your utility company uses it to compute your bill. Only standard size clothes
washers are used in this scale.

Clothes washers using more energy cost more to operate.
This model's estimated yearly operating cost is:

\$78

when used with an electric water heater

\$34

when used with a natural gas water heater

Based on eight loads of clothes a week and a 2000 U.S. Government national average cost
of 8.03¢ per kWh for electricity and 68.80¢ per therm for natural gas. Your actual operating
cost will vary depending on your local utility rates and your use of the product.

Important: Removal of this label before consumer purchase violates the Federal Trade Commission's Appliance Labeling Rule (16 CFR Part 305). **3954861**
