

W-Series Winter Cover Features & Instructions

⚠️ WARNING ⚠️

Air Circulation: The Winter Cover is designed to provide shade and protection. Although we use breathable fabric, it can still restrict air circulation in certain conditions. Be mindful of the temperature inside the stroller wagon and monitor your child's comfort. If the weather is hot or humid, consider partially or fully converting the Winter Cover from full coverage to mesh windows.

Note: Repeated washing may reduce the effectiveness of the waterproof coating.

Thank you for choosing WONDERFOLD®

Installing the Winter Cover

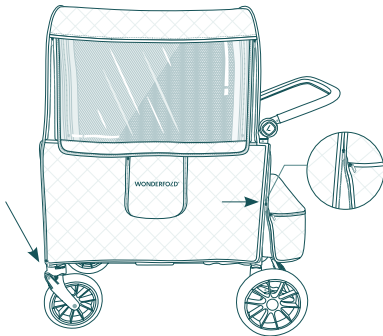

Note: Be sure to leave the canopy poles installed on the stroller wagon before installing the winter cover.

1. Engage the brake pedal to lock the stroller wagon in place.
2. Unzip the front and rear flaps of the cover.
3. Place the cover over the stroller wagon.

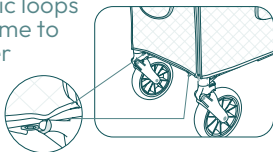

Note: The back panel should go through the handlebar.

4. Pull the cover all the way down.
5. Zip the front and rear flaps closed.

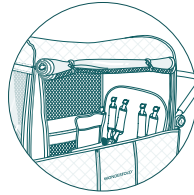

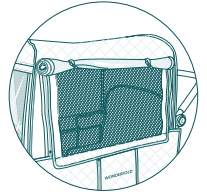

6. Hook the elastic loops around the frame to lock your winter cover in place.

Clear Window

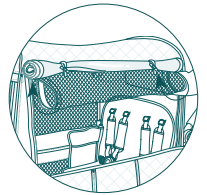

Unzip the clear window and roll it up, using the elastic straps to secure.

Mesh Window

Unzip the mesh window and roll it up. Use the elastic straps to secure.

Note: The same toggle is used for both the clear and mesh windows.

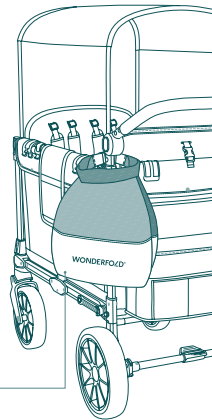

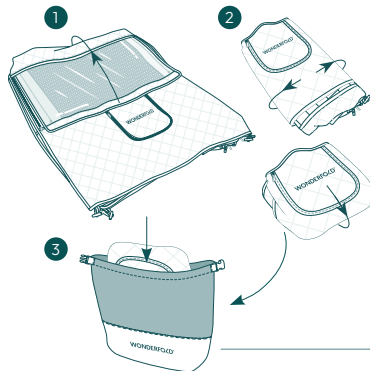

Alternative Storage Option

Unzip the mesh window and tuck it between the winter cover and the stroller wagon canopy.

Folding & Storing the Winter Cover

1. Lay the cover on its side, tucking in the front and back panels.
2. Fold in half so the top of the cover meets the bottom. Then fold in thirds.

3. Fold the cover and place it in the mesh bag.
4. Roll the top down, buckle it, and hang to store.
