Important Safety Instructions

WARNING - Read all instructions before using this appliance.

1. Use this equipment only for its intended use as described in this manual. Do not attempt to ride this bike at high pedal speeds until you have ridden the bike for some time and are comfortable riding at slower pedal speeds.
2. Serious injury or death may occur from over-training. Consult a medical doctor or qualified fitness instructor to determine an exercise program appropriate for your level of fitness.
3. Do not attempt to turn the pedal cranks by hand. Do not touch any driving mechanism while it is in motion as possible injury could occur.
4. In a home setting, keep children away from the bike when it is not in use. Keep children and pets away from the unit while it is in use.
5. Do not attempt to perform dip movements on handlebars.
6. Never drop or insert any object into any opening of the bike.
7. Only use the bike on a stable, level floor.
8. Follow instructions for safe use of the equipment including proper seat position, handlebar position, and use of foot positioning system of pedals.
9. For safe operation, allow for at least 1 foot (30cm) of free space to either side of the unit and 2 feet (60cm) of free space to the rear of the unit.
10. Weight Limit: 250 lbs.

Regularly examine the bike for damage and wear. Inoperable components should be replaced immediately or the equipment should not be used until it is repaired.

Failure to follow all guidelines may compromise the effectiveness of the exercise experience, expose yourself (and possibly others) to injury, and reduce the longevity of the equipment.

WARNING: This product can expose you to chemicals including Toluene and Acrylamide which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov

SAVE THESE INSTRUCTIONS - THINK SAFETY!

Important Operation Instructions

WARNING - AS THE OWNER OF THIS EXERCISE EQUIPMENT, YOU SHOULD INSIST THAT ALL USERS FOLLOW THE SAME GUIDELINES: YOU SHOULD MAKE THIS MANUAL AVAILABLE TO ALL USERS.

1. Obtain a complete physical examination from your medical doctor and enlist a health/fitness professional's aid in developing an exercise program suitable for your current health status.
2. When working out for the first time, start out slowly for a minimum of five minutes. After your muscles are warmed up, gradually increase the pedaling speed and/or resistance.
3. The speed and duration of your exercise program should always be subject to how you feel. Never permit peer pressure to exceed your personal judgment while exercising.
4. This exercise equipment is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge.
5. Overweight or severely de-conditioned individuals should be particularly cautious when using the equipment for the first time. Even though such individuals may not have histories of serious physical problems, they may perceive the exercise to be far less intense than it really is, resulting in the possibility of overexertion or injury.
6. Proper installation and regular maintenance are required to ensure user's safety. Maintenance is the sole responsibility of the owner.

Final Considerations

- Tighten all bolts/nuts securely to complete assembly.
- The bike can be cleaned with a damp cloth and mild non-abrasive detergent. Do not use solvents.
- Make sure to tighten both pedals securely to the pedal crank arms as instructed.
- Store the bike Indoors. Excessive moisture can cause rust to the frame and damage to the electronics.
- Place the bike in a such a way that there is room on all side of the bike to safely mount and dismount. We recommend a minimum of 2 feet all around the bike to safely access the bike.

Adjusting Resistance

- Use the **Tension Knob (No. 51)** on to adjust the resistance. Level 1 is the minimum resistance.

Transporting the Bike

- There is a set of transport wheels on the **Front Stabilizer (No. 6)**. To move the bike carefully tilt the handlebar forwards and roll away.

Key Functions

Button Functions

MODE: Press to select functions. Press the button and hold for two seconds to reset all functions to zero, except ODOMETER.

SCAN: Press MODE button until “▼” appears at SCAN position, the console displays: time, speed, distance, calories, odometer and pulse, in sequence for 6 seconds at a time

TIME: Displays the time from exercise start to the end

SPEED: Displays the current speed

DISTANCE: Displays the distance from exercise start to the end

CALORIES: Displays the calories burned from the exercise start to the end.

The calorie readout is an estimate for an average user. It should be used only as comparison between workouts on this unit.

ODOMETER: Display the total accumulated distance you have traveled. The odometer does not reset unless you remove the batteries.

PULSE: Displays an average current heart beat rate in beats per minute (BPM). To use this feature, place hands on the pulse grips and hold for 6 ~ 7 seconds to get a more accurate reading.

Please note that due to contact delay, the heart rate will be higher than the actual heart rate during the first 2 ~ 3 seconds of measurement, then will return to normal level. The measurement value shouldn't be regarded as the basis of medical treatment.

Troubleshooting

Problem	Solution
When display shows all 0's, faded numbers, incomplete numbers or blank screen	• Remove the computer and check the wire that comes from the computer is properly connected to the wire that comes from the Upright. • Check that the batteries are correctly positioned and are in proper contact with the battery springs. • The batteries in the computer may be dead.
